Before operating this product, please read the instructions carefully and save this manual for future use.
Dear Panasonic Customer:

This instruction booklet provides all the necessary operating information that you might require. We hope it will help you to get the most out of your new product, and that you will be pleased with your Panasonic LCD projector. The serial number of your product may be found on its bottom. You should note it in the space provided below and retain this booklet in case service is required.

Model number:  PT-AX200U
Serial number: 

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

Power Supply:  This LCD Projector is designed to operate on 100 V - 240 V, 50 Hz/60 Hz AC, house current only.

CAUTION:  The AC power cord which is supplied with the projector as an accessory can only be used for power supplies up to 125 V, 7 A. If you need to use higher voltages or currents than this, you will need to obtain a separate 250 V power cord. If you use the accessory cord in such situations, fire may result.

WARNING - RISK OF ELECTRIC SHOCK, DO NOT OPEN
MISE EN GARDE - RISQUE DE CHOC ELECTRIQUE. NE PAS OUVRIR.
WARNUNG - ZUR VERMEIDUNG EINES ELEKTRISCHEN SCHLAGES GERÄT NICHT ÖFFNEN.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

CAUTION:  This equipment is equipped with a three-pin grounding-type power plug. Do not remove the grounding pin on the power plug. This plug will only fit a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician. Do not defeat the purpose of the grounding plug.

Do not remove

NOTICE:  This product has a High Intensity Discharge (HID) lamp that contains mercury. Dispose may be regulated in your community due to environmental considerations. For disposal or recycling information, please contact your local authorities, or the Electronic Industries Alliance: http://www.eiae.org
Important Safety Notice

WARNING:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC CAUTION: To assure continued compliance, use only shielded interface cables when connecting to computers or peripheral devices. Any unauthorized changes or modifications to this equipment will void the users authority to operate.

If you use serial port to connect PC for external control of projector, you must use optional RS-232C serial interface cable with ferrite core. Any unauthorized changes or modifications to this equipment will void the user’s authority to operate.

Pursuant to at the directive 2004/108/EC, article 9(2)
Panasonic Testing Center
Panasonic Service Europe, a division of Panasonic Marketing Europe GmbH
Winsbergring 15, 22525 Hamburg, F.R. Germany

Declaration of Conformity

Model Number: PT-AX200U
Trade Name: Panasonic
Responsible party: Panasonic Corporation of North America
Address: One Panasonic Way, Secaucus, New Jersey 07094
Telephone number: (888) 411 - 1996

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Information on Disposal in other Countries outside the European Union
This symbol is only valid in the European Union.
If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.
Contents

Quick steps

1. Set up your projector
   See “Setting up” on page 14.

2. Connect with other devices
   See “Connections” on page 18.

3. Prepare the remote control
   See “Remote control” on page 11.

4. Start projecting
   See “Switching the projector on/off” on page 19.

5. Adjust the image
   See “Menu Navigation” on page 27.

Precautions with regard to safety

**WARNINGS**

If you notice smoke, strange smells or noise coming from the projector, disconnect the power plug from the wall outlet.
- Do not continue to use the projector in such cases, otherwise fire or electric shocks could result.
- Check that no more smoke is coming out, and then contact an Authorized Service Center for repairs.
- Do not attempt to repair the projector yourself, as this can be dangerous.

Do not install this projector in a place which is not strong enough to take the full weight of the projector.
- If the installation location is not strong enough, it may fall down or tip over, and severe injury or damage could result.

Installation work (such as ceiling suspension) should only be carried out by a qualified technician.
- If installation is not carried out correctly, there is the danger that injury or electric shocks may occur.
- Do not use other than an authorized ceiling mount bracket.

If foreign objects or water get inside the projector, or if the projector is dropped or the cabinet is broken, disconnect the power plug from the wall outlet.
- Continued use of the projector in this condition may result in fire or electric shocks.
- Contact an Authorized Service Center for repairs.

Do not overload the wall outlet.
- If the power supply is overloaded (for example, by using too many adapters), overheating may occur and fire may result.

Never attempt to modify or disassemble the projector.
- High voltages can cause fire or electric shocks.
- For any inspection, adjustment and repair work, please contact an Authorized Service Center.

Clean the power plug regularly to prevent it from becoming covered in dust.
- If dust builds up on the power plug, the resulting humidity can damage the insulation, which could result in fire. Pull the power plug out from the wall outlet and wipe it with a dry cloth.
- If not using the projector for an extended period of time, pull the power plug out from the wall outlet.

Do not handle the power plug with wet hands.
- Failure to observe this may result in electric shocks.

Insert the power plug securely into the wall outlet.
- If the plug is not inserted correctly, electric shocks or overheating could result.
- Do not use plugs which are damaged or wall outlets which are coming loose from the wall.

Do not place the projector on top of surfaces which are unstable.
- If the projector is placed on top of a surface which is sloped or unstable, it may fall down or tip over, and injury or damage could result.

Do not place the projector into water or let it become wet.
- Failure to observe this may result in fire or electric shocks.

Do not do anything that might damage the power cord or the power plug.
- Do not damage the power cord, make any modifications to it, place it near any hot objects, bend it excessively, twist it, pull it, place heavy objects on top of it or wrap it into a bundle.
- If the power cord is used while damaged, electric shocks, short-circuits or fire may result.
- Ask an Authorized Service Center to carry out any repairs to the power cord that might be necessary.

Do not place the projector on soft materials such as carpets or sponge mats.
- Doing so may cause the projector to overheat, which can cause burns, fire or damage to the projector.

Do not place liquid containers on top of the projector.
- If water spills onto the projector or gets inside it, fire or electric shocks could result.
- If any water gets inside the projector, contact an Authorized Service Center.

Do not insert any foreign objects into the projector.
- Do not insert any metal objects or flammable objects into the projector or drop them onto the projector, as doing so can result in fire or electric shocks.

Do not allow the + and - terminals of the batteries to come into contact with metallic objects such as necklaces or hairpins.
- Failure to observe this may cause the batteries to leak, overheat, explode or catch fire.
- Store the batteries in a plastic bag and keep them away from metallic objects.

Do not touch the leaked liquid from the batteries.
- If you touch the leaked liquid, it may hurt your skin. Immediately wash away the liquid with water and seek medical advice.
- If you get the leaked liquid in your eye, it may cause blindness or damage. Never rub your eye, and immediately wash away the liquid with water and seek medical advice.

During a thunderstorm, do not touch the projector or the cable.
- Electric shocks can result.
Precautions with regard to safety

Do not use the projector in a bath or shower.
- Fire or electric shocks can result.

Do not place your skin into the light beam while the projector is being used.
- Strong light is emitted from the projector’s lens. If you place directly into this light, it can hurt or damage your skin.

Do not look into the lens while the projector is being used.
- Strong light is emitted from the projector’s lens. If you look directly into this light, it can hurt and damage your eyes.
- Be especially careful not to let young children look into the lens. In addition, turn off the power and disconnect the power plug when you are away from the projector.

Do not place your hands or other objects close to the air outlet port.
- Heated air comes out of the air outlet port. Do not place your hands or face, or objects which cannot withstand heat close to this port [allow at least 50 cm (20") of space], otherwise burns or damage could result.

Replacement of the lamp is recommended to be carried out by a qualified technician.
- The lamp has high internal pressure. If improperly handled, explosion might result.
- The lamp can easily become damaged if struck against hard objects or dropped, and injury or malfunctions may result.

When replacing the lamp, allow it to cool for at least one hour before handling it.
- The lamp cover gets very hot, and touching it can cause burns.

Before replacing the lamp, be sure to disconnect the power plug from the wall outlet.
- Electric shocks or explosions can result if this is not done.

Do not allow infants or pets to touch the remote control unit.
- Keep the remote control unit out of the reach of infants and pets after using it.

CAUTIONS

Do not cover the air inlet port or the air outlet port.
- Doing so may cause the projector to overheat, which can cause fire or damage to the projector.
- Do not place the projector in narrow, badly ventilated places such as closets or bookshelves.
- Do not place the projector on cloth or papers, as these materials could be drawn into the air inlet port.

Do not set up the projector in humid or dusty places or in places where the projector may come into contact with oily smoke or steam.
- Using the projector under such conditions may result in fire, electric shocks or plastic deterioration. The plastic deterioration may cause the falling down of the projector which is mounted in the ceiling.

Do not set up the projector in a high temperature environment, such as near a heater or in direct sunlight.
- Failure to observe this may result in fire, malfunction or plastic deterioration.

Do not set up the projector outdoors.
- The projector is designed for indoor use only.

Always disconnect all cables before moving the projector.
- Moving the projector with cables still attached can damage the cables, which could cause fire or electric shocks to occur.

Do not place any heavy objects on top of the projector.
- Failure to observe this may cause the projector to become unbalanced and fall, which could result in damage or injury.

Do not short-circuit, heat or disassemble the batteries or place them into water or fire.
- Failure to observe this may cause the batteries to overheat, leak, explode or catch fire, and burns or other injury may result.

When inserting the batteries, make sure the polarities (+ and -) are correct.
- If the batteries are inserted incorrectly, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

Use only the specified batteries.
- If incorrect or different kind of batteries are used, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

When disconnecting the power cord, hold the plug, not the lead.
- If the power cord itself is pulled, the lead will become damaged, and fire, short-circuits or serious electric shocks may result.
Precautions with regard to safety

Do not mix old and new batteries.
- If the batteries are inserted incorrectly, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

Remove the used batteries from the remote control promptly.
- If you leave used batteries in the remote control for an extended period of time, it may cause liquid leaking, abnormal internal temperature rising or explosion.

If not using the projector for an extended period of time, disconnect the power plug from the wall outlet and remove the batteries from the remote control.
- If dust builds up on the power plug, the resulting humidity may damage the insulation, which could result in fire.
- Keeping or leaving the remote control with batteries inside may cause insulation deterioration, electrical leakage or explosion which could result in fire.

Do not put your weight on this projector.
- You could fall or the projector could break, and injury may result.
- Be especially careful not to let young children stand or sit on the projector.

We are constantly making efforts to preserve and maintain a clean environment. Please take non repairable units back to your dealer or a recycling company.

Cautions when transporting

Do not subject the projector to excessive vibration or shocks.
- The projector lens need to be handled with care.
- Cover the lens with the lens cover when transporting the projector.

When transporting the projector, hold the body at the bottom securely.
- Do not hold the adjuster legs or the top cover to move the projector, as this may damage the projector.

Cautions when installing

Avoid setting up in places which are subject to vibration or shocks.
- The internal parts can be damaged, which may cause malfunctions or accidents.

Avoid setting up in places which are subject to sudden temperature changes, such as near an air conditioner or lighting equipment.
- The life of the lamp may be shortened or the projector may be turned off. See “TEMP indicator” on page 40.

Do not set up the projector near high-voltage power lines or near motors.
- The projector may be subject to electromagnetic interference.

If installing the projector to the ceiling, ask a qualified technician to carry out all installation work.
- You will need to purchase the separate installation kit (Model No. ET-PKX100). Furthermore, all installation work is should only be carried out by a qualified technician.
- See “Ceiling mount bracket safeguards” on page 50 for the safety cable installation.

If using this projector at high elevations (above 1 400 m), set the HIGHLAND to ON. See “ALTITUDE” on page 39.
- Failure to observe this may result in malfunctions or the life of the lamp or the other components may be shortened.
Cautions on use

In order to get the best picture quality
- Draw curtains or blinds over any windows and turn off any lights near the screen to prevent outside light or light from indoor lamps from shining onto the screen.

Do not touch the surfaces of the lens with your bare hands.
- If the surface of the lens becomes dirty from fingerprints or anything else, this will be magnified and projected onto the screen. Moreover, when not using the projector, attach the lens cover.

Liquid crystal panel
- Do not project the same image for long periods of time, as this may remain as an afterimage on the liquid crystal panel.
- The liquid crystal panel of the projector is built with very high precision technology to provide fine picture details. Occasionally, a few stuck pixels may appear on the screen as fixed points of blue, green or red. It is recommended to switch off the projector once and try after 1 hour later again. Please note that this does not affect the performance of your LCD.

The projector has a high pressure mercury lamp and that is characterized as follows.
- The brightness of the lamp depends on the duration of use.
- The lamp may explode or shorten the lamp life by shocks or chipping damage.
- The lamp may explode only occasionally after using the projector.
- The lamp may explode if using the projector after the instructed lamp replacement timing.
- The lamp life is depends on individual lamp characteristics, usage condition and the installation environment. Especially the consecutive use of the projector for more than 10 hours, or the frequent switching on or off may greatly affect on the lamp life.

Screen
- Do not apply any volatile substances which may cause discoloration to the screen, and do not let it become dirty or damaged.

Optical components
- If you use the projector consecutively 6 hours every day, the optical components may need to be replaced in less than 1 year.
## Precautions with regard to safety

**POWER button**
While the MAIN POWER button is on, switch between stand-by mode and projection mode. (page 19)

**PICTURE MODE buttons**
Switch to the best setting for a darker room.
Switch to the best setting for a brighter room.
Display the FAVORITE LOAD menu. (page 22)

Switch to cycle through the aspect ratio. (page 23)

Display the main menu or return to the previous menu. (page 27)

Navigate through the menus with ▲▼◄►, and activate the menu item with ENTER. (page 27)

Reset some of the settings to the factory default settings. (page 23)

Switch to cycle through the input method. (page 26)

**Remote control signal emitter**
Remote control signal. (page 22)

**Turn the button backlight of the remote control on/off. (page 22)**

**Display the COLOR MANAGEMENT menu.**
(page 24)

**Display the PICTURE menu.** (page 23)

**Return to the previous menu.** (page 27)

**Capture the projected image as a still picture.** (page 23)

**Assign the frequently used functions from the option for shortcut.** (page 26)

**Battery compartment**
1. Press the tab and lift up the cover.
2. Insert the batteries according to the polarity diagram indicated inside.

**NOTE:**
- Do not drop the remote control.
- Avoid contact with liquids or moisture.
- Use manganese batteries or alkaline batteries with the remote control.
- Do not attempt to modify or disassemble the remote control. Contact an Authorized Service Center for repairs.
- Do not keep pressing the remote control buttons as this may shorten battery life.
- See “Remote control operation” on page 22.
About Your Projector

Projector body

Top and front view

• Do not cover the ventilation openings or place anything within 50 cm (20") of them as this may cause damage or injury.
• While the projector is not in use, keep the lens cover to protect the lens.
About Your Projector

Back and bottom view

- **SERIAL**: Connect a compatible cable for controlling the projector remotely via your computer.
- **COMPUTER IN**: Connect an RGB signal cable from your PC.
- **S-VIDEO IN**: Connect a S-VIDEO signal cable.
- **VIDEO IN**: Connect an RCA composite video cable.
- **HDMI IN**: Connect HDMI signal cables.
- **COMPONENT IN**: Connect YPBPR signal cables.
- **MAIN POWER**: Switch the projector on/off (page 19).
- **AC IN**: Connect the power cord to supply electronic power to the projector. (page 19)
- **Air intake port**: (page 41)
- **Lamp unit compartment**: (page 41)
- **Security lock**: Attach the shackle lock provided with the projector. Compatible with the Kensington MicroSaver Security System. (page 50)
- **Air filter**: (page 41)
- **Lens cover attachment hole**
- **Front leg adjusters**: Screw up/down to adjust the projection angle. (page 15)

**NOTE:**
- Do not cover the ventilation openings or place anything within 10 cm (4") of them as this may cause damage or injury.
- The projector should only be used with the attached power cord to ensure optimum performance and avoid damage to the projector.
## Setting up

### Screen size and throw distance

You can adjust the projection size with 2.0x zoom lens. Calculate and define the throw distance as follows.

![Diagram of screen size and throw distance]

### Calculation methods for screen dimensions

You can calculate more detailed screen dimension from the screen diagonal.

\[
\begin{align*}
\text{SW (m)} &= \text{SD (m)} \times 0.872 \\
\text{SH (m)} &= \text{SD (m)} \times 0.490 \\
\text{LW (m)} &= 1.2244 \times \text{SD (m)} - 0.056 \\
\text{LT (m)} &= 2.449 \times \text{SD (m)} - 0.056
\end{align*}
\]

* The results above are approximate and may differ slightly from the actual measurements.

### Projection size (16 : 9)

</tbody>
</table>

* All measurements above are approximate and may differ slightly from the actual measurements.

### NOTE:

- Do not use the projector at a raised or a horizontally tilted position as it may cause malfunction of the projector.
- Make sure the projector lens surface is parallel with the screen. You can tilt the projector body less than approximately ± 30° vertically. Overtilting may result in shortening the component’s life.
- For the best quality of the projection image, install a screen where sun light or room light does not shine directly onto the screen. Close window shades or curtains to block the lights.
Getting Started

**Projection method**
You can use the projector with any of the following 4 projection methods. To set the desired method in the projector, see "INSTALLATION" on page 38.

- **Setting on a desk/floor and projecting from front**
  - INSTALLATION: FRONT/DESK

- **Setting on a desk/floor and projecting from rear**
  - INSTALLATION: REAR/DESK

- **Mounting in the ceiling and projecting from front**
  - INSTALLATION: FRONT/CEILING

- **Mounting in the ceiling and projecting from rear**
  - INSTALLATION: REAR/CEILING

**NOTE:**
- A translucent screen is required for rear projection.
- When mounting the projector in the ceiling, the optional ceiling mount bracket (ET-PKX200) is required.
- See "Ceiling mount bracket safeguards" on page 50.

**Front leg adjusters and throwing angle**
You can screw up/down the front leg adjusters to control the angle of the projector for adjusting the throwing angle. See “Positioning the image” on page 21.

**NOTE:**
- Heated air comes out of the air exhaust port. Do not touch the air exhaust port directly.
- If keystone distortion occurs, see "KEYSTONE" on page 36.
- Screw up the adjuster legs, and an audible click will be heard as the limit.
Setting up

Lens shift and positioning

If the projector is not positioned right in front of the center of the screen, you can adjust the projected image position by moving the lens shift dials within the shift range of the lens.

Adjusting the lens shift lever

1. Screw the shift lever counterclockwise to unlock.
2. Move the shift lever to adjust the projected image position.
3. Screw the shift lever clockwise to lock.

Horizontal shift

You can place the projector where the projector lens is up to 25% horizontally off-center from the screen and then adjust the image position with the lens shift feature.

Vertical shift

You can place the projector where the projector lens is up to 63% vertically off-center from the screen and then adjust the image position with the lens shift feature.

Shifting the lever left:
Moving to screen’s right

Shifting the lever right:
Moving to screen’s left

Shifting the lever down:
Moving to screen’s bottom.

Shifting the lever up:
Moving to screen’s top.
Projector location range

You can determine where to locate the screen and the projector by considering the lens shift possibilities. See "Positioning the image" on page 21.

- **When the screen position is fixed**

  ![Diagram of screen and projector placement](image)

  - Vertical center of screen
  - Center of lens
  - SW
  - SH

- **When the projector position is fixed**

  ![Diagram of projector shift range](image)

  - Shift range
  - 63%
  - 25%

**NOTE:**

- When the projector is located right in front of the screen and the lens shift dials is centered, you will get the best quality of the projection image.
- When the shift lever is at the vertical limit of the shift range, you cannot move the lever to the horizontal limit, likewise when the shift lever is at the horizontal limit of the shift range, you cannot move the lever to the horizontal limit.
- When the projector is tilted and you adjust **KEYSTONE**, the center of the screen and the lens need to be realigned.
- Do not attempt to pull hard the shift lever while adjusting as this may damage the projector.
Connections

Before connecting to the projector
- Read and follow the operating and connecting instructions of each peripheral device.
- The peripheral devices must be turned off.
- Use cables that match each peripheral device to be connected.
- Confirm the type of video signals. See “List of compatible signals” on page 45.
- Audio cables must be connected from each peripheral device directly to the audio reproduction system.

Connecting to COMPONENT IN/VIDEO IN/S-VIDEO IN

Connecting to COMPUTER IN/HDMI IN

NOTE:
- Make sure the HDMI cable is adapted to your HDMI device for proper performance.
- A compatible cable is required for an HDMI 1080p signal.
- It is possible to connect with DVI devices via a HDMI/DVI conversion adapter, but some equipment may not project the image properly or other problems could be encountered. "Serial terminal" on page 46
Switching the projector on/off

Power cord

Connecting
1. Make sure the shape of the power plug and the AC IN connector on the back of the projector match, then push the plug all the way in.
2. Connect the power cord to a wall outlet.

Disconnecting
1. Make sure the MAIN POWER is switched off and unplug the power cord from the wall outlet.
2. Hold the plug and unplug the power cord from the AC IN connector on the side of the projector.

NOTE:
- Do not use other than the provided power cord.
- Ensure all the input devices are connected and turned off before connecting the power cord.
- Do not force the connector as this may damage the projector and/or the power cord.
- Dirt or dust build-up around plugs may cause fire or electrical hazards.
- Switch off the power to the projector when not in use.

POWER indicator

<table>
<thead>
<tr>
<th>Indicator status</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>No illumination or flashing</td>
<td>The MAIN POWER button is switched off.</td>
</tr>
<tr>
<td>Red</td>
<td>Lit</td>
</tr>
<tr>

<td>Flashing</td>
</tr>
<tr>
<td></td>
<td>Lit</td>
</tr>
<tr>
<td>Orange</td>
<td>Lit</td>
</tr>
<tr>
<td></td>
<td>Flashing</td>
</tr>
</tbody>
</table>

NOTE:
- While the projector is cooling the lamp, do not switch the MAIN POWER button off or unplug the power cord.
- The electric consumption in standby mode is 0.08 W.
Basic Operation

Switching on the projector

1. Switch the \textbf{MAIN POWER} button on.
   - The power indicator lights up in red.
2. Remove the lens cover from the lens.
3. Press the \textbf{POWER} button.
   - The power indicator lights up in green after flashing for a while.
   - The \textbf{STARTUP LOGO} is displayed on the screen.
     See “STARTUP LOGO” on page 38.

\textbf{NOTE:}
- When starting up the projector, some small rattling or tinkling sound may be heard, or the display may flicker for the characteristics of the lamp. Those are normal and do not affect the performance of the projector.
- Do not attempt to modify the lens cover which may cause burns, fire or damage to the projector.

Switching off the projector

1. Press the \textbf{POWER} button.
   - The confirmation screen is displayed. It will disappear and return to the projection after 10 seconds without any operation.
   - To return to the projection, press \textbf{ENTER} to select \textbf{CANCEL} or press \textbf{MENU/RETURN}.
2. Press \textless{} to select \textbf{OK} and press the \textbf{POWER} or \textbf{ENTER} button.
   - The power indicator lights up in orange while cooling the lamp, then illuminates red when it is ready to switch off the \textbf{MAIN POWER} button.
3. Switch off the \textbf{MAIN POWER} button on the back of the projector.

\textbf{NOTE:}
- Press the \textbf{POWER} twice or for a long duration to switch the power off.
Projecting an image

Selecting the input signal

1. Switch on the connected devices.
   - Press the play button of the required device.
2. Press the **INPUT SELECT** button to select the required input method if needed. See “Switching the input signal” on page 26.
   - The image will be projected on the screen.

   **NOTE:**
   - *AUTO SEARCH* is ON as default and the signal from the connected devices is detected automatically. See “AUTO SEARCH” on page 38.

Positioning the image

1. Press the **ASPECT** button to select the required aspect mode. See “Switching the aspect ratio” on page 23.
2. Adjust the projected image with the lens shift levers. See “Lens shift and positioning” on page 16.

3. Adjust the angle of the projector.
   - Screw down the front leg adjusters and adjust the angle vertically.
   - See “Front leg adjusters and throwing angle” on page 15.

4. Adjust the focus and the projected image size.
   - Turn the focus ring and zoom ring to adjust.
   - You can confirm the result with **TEST PATTERN**. See “TEST PATTERN” on page 39.

   **NOTE:**
   - Do not touch the air exhaust port as this may cause burns or injury.
   - If keystone distortion occurs, see “KEYSTONE” on page 36.
   - If you adjust the focus, you may need to adjust the size of the image again.
Remote control operation

Operating range

You can operate the projector with the remote control within the remote range 7 m (22'11”).

- Facing to the projector
  Ensure the remote control emitter is facing to the remote control signal receptor on front/back of the projector and press the required buttons to operate.

- Facing to the screen
  Ensure the remote control emitter is facing to the screen and press the required buttons to operate the projector. The signal will be reflected off the screen. The operating range may differ due to the screen material. This function may not be effective with a translucent screen.

NOTE:
- Do not let strong light shine onto the signal receptor. The remote control may malfunction under strong light such as fluorescent.
- If there are any obstacles between the remote control and the remote control signal receptor, the remote control may not operate correctly.

Turning on the button backlight

In a dark room, you can turn on the button backlight to operate the remote control. Press the LIGHT button on the upper right corner of the unit to turn on the backlight and enter the light-on mode.

After 5 seconds without any operation, the backlight will be faded, and it will go out after another 5 seconds. Press any but the LIGHT button to turn on again. To escape from the light-on mode, press the LIGHT button.

Switching the preset settings

You can switch the preset settings by pressing the THEATER ROOM, LIVING ROOM, FAVORITE LOAD buttons. See “FAVORITE LOAD” on page 32.

Recommended for viewing in dark room.

- CINEMA1
- CINEMA2
- NATURAL

Recommended for viewing in lit room.

- NORMAL
- DYNAMIC
- GAME
- VIVID CINEMA

Display the FAVORITE LOAD menu. See “FAVORITE LOAD” on page 32.
Adjusting the image

You can display the PICTURE and ADVANCED MENU menu items by pressing the PIC. ADJUST button. Press the button to switch between PICTURE and ADVANCED MENU menu. Press ▲ ▼ to select the required menu item and ◀ ▶ to adjust.

- **PICTURE menu items**
  - PICTURE MODE, CONTRAST, BRIGHTNESS, COLOR, TINT, SHARPNESS, COLOR TEMPERATURE and DYNAMIC IRIS
- **ADVANCED MENU items**
  - GAMMA, CONTRAST, BRIGHTNESS, NR, MPEG NR, CINEMA REALITY and TV-SYSTEM

**NOTE:**
- For each menu items description, see “PICTURE menu” on page 30.
- The screen will be cleared after 7 seconds without any operation.

Switching the aspect ratio

The aspect ratio will be selected automatically, or you can switch it manually by pressing the ASPECT button. Press the button several times to cycle through the different aspect type as follows. See “ASPECT” on page 34.

- **VIDEO/S-VIDEO/COMPONENT (YPbPr)**
  - 4:3 ➤ ZOOM2
  - 16:9 ➤ ZOOM1
  - 14:9 ➤ JUST
- **COMPUTER (RGB)**
  - 4:3 ➤ V SCROLL
  - 16:9
- **HDMI**
  - 4:3 ➤ 16:9

**NOTE:**
- If you project an image with an unmatched aspect ratio, the image may distort or some portions may be cropped. Select an aspect ratio which preserves the intention of the image creator.
- The order of aspect type is defined not only by the input method but also by the input signals. See “List of compatible signals” on page 45.
- If you project a copyrighted image enlarged or distorted by using ASPECT function in commercial use in a public place, such as a restaurant or hotel, you might infringe on the copyright of the creator which is protected by copyright law.

Resetting to the factory default settings

You can reset most of the customized settings to the factory defaults by pressing DEFAULT button of the remote control. Display the required sub-menu or the menu items and press the button again.

**NOTE:**
- Some menu items are not available to reset by pressing the DEFAULT button. Adjust each menu items manually.

Capturing an image

When projecting an image, press FREEZE button to capture the projected image and display it on the screen as a still picture. Press again to escape.
You can adjust a selected color individually and save and retrieve under the PICTURE MODE setting. Press the COLOR MANAGEMENT button to open the menu.

<table>
<thead>
<tr>
<th>PROFILE</th>
<th>NORMAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>CURSOR</td>
<td></td>
</tr>
<tr>
<td>LOG</td>
<td></td>
</tr>
<tr>
<td>PROFILE SAVE</td>
<td></td>
</tr>
<tr>
<td>PROFILE DELETE</td>
<td></td>
</tr>
<tr>
<td>PROFILE NAME CHANGE</td>
<td></td>
</tr>
</tbody>
</table>

### Adjusting the selected color

Select a color and adjust COLOR, TINT and BRIGHTNESS.

1. Select the CURSOR menu and press ENTER.
   - The projected image is captured, and the target cursor is displayed.
   - When the LOG is fully stored, the target cursor will not be displayed. See “Managing stored logs” on page 24.

2. Move the cursor with ▲ ▼ ◀ ◀ to the required place to select a color and press ENTER.
   - The color at the center of the target cursor is sampled and the sample box is displayed on the left of the cursor. The menu items are displayed on the upper part of the screen.

3. Select a menu item and the ◀ ◀ to adjust each item level.
   - The result box is displayed on the right of the cursor and shows the adjusted color.

<table>
<thead>
<tr>
<th>COLOR</th>
<th>Adjust the vividness of the color. Setting range: -30 to +30</th>
</tr>
</thead>
<tbody>
<tr>
<td>TINT</td>
<td>Adjust the color tone. Setting range: -30 to +30</td>
</tr>
<tr>
<td>BRIGHTNESS</td>
<td>Adjust the brightness of the color. Setting range: -20 to +20</td>
</tr>
</tbody>
</table>

4. Press ENTER to store the adjusted result.
   - “PROCESSING” is displayed for a few seconds and the result is stored in LOG.
   - You can store up to 8 logs under LOG for each PICTURE MODE setting.

5. Press MENU or RETURN to return to the previous menu.
   - Repeat the steps above to store more adjustment.

### Managing stored logs

You can edit or delete the stored logs of the selected PICTURE MODE.

1. Select LOG and press ENTER.
   - The LOG menu is displayed.

2. Select the required log from 1 - 8 or ALL DELETE, and press ENTER.
   - Select CHANGE to edit the log.
     - The cursor menu is displayed and you can readjust the color.
   - Select DELETE to delete the log.
     - The confirmation screen will be displayed. Select OK to delete.
   - When you select ALL DELETE, the “DELETE ALL LOG.” screen is displayed. Select OK to delete all logs. The PROFILE setting will be set to NORMAL.
### Saving a log setting as a profile

Return to the COLOR MANAGEMENT menu and save the stored log as a profile. Make sure that the PICTURE MODE is not switched.

1. Select the PROFILE SAVE menu and press ENTER
   - The PROFILE SAVE menu is displayed. You can save the profile as USER1, USER2 and USER3.
   - USER1
   - USER2
   - USER3
   
2. Press ENTER to save the profile
   - The confirmation screen is displayed. Press ENTER again to save.
3. Use ▲▼◄► to specify the location of the required character to enter and press the ENTER button.
   - You can enter up to 14 characters.

<table>
<thead>
<tr>
<th>PROFILE NAME INPUT</th>
</tr>
</thead>
<tbody>
<tr>
<td>A B C D E F G H I J K L M</td>
</tr>
<tr>
<td>N O P Q R S T U V W X Y Z</td>
</tr>
</tbody>
</table>

4. Repeat step 3 until you finish the text line.
   - Move the cursor to DEL ALL and press the ENTER button to delete all the entered text line.
   - Press the DEFAULT button to delete the last entered character or indicated with cursor in the text box.
   - To insert a character in the entered text line, move the cursor to the text box to select the required place and press ▼ then perform step 4.
5. Select OK and press the ENTER button to set the entered text as a name.
   - Press the ENTER without entering any text to keep the default name.

### Changing the profile names

You can change the name of the profiles from the PROFILE NAME CHANGE menu.

1. Select PROFILE NAME CHANGE and press the ENTER button.
2. Select the required profile and press the ENTER button.
3. Use ▲▼◄► to specify the location of the required character to enter and press the ENTER button.
4. Select OK and press the ENTER button to set the entered text as a name.

### Loading saved profiles

When profiles are loaded under the PICTURE MODE setting, you can keep them as you defined until the PROFILE is set to NORMAL.

1. Select the required PICTURE MODE and press ENTER.
2. Press the COLOR MANAGEMENT button and select the PROFILE menu.
   - The profile settings of the selected PICTURE MODE will be displayed.
3. Select the required profile and press ENTER.

<table>
<thead>
<tr>
<th>NORMAL</th>
<th>Return to the default setting of the PICTURE MODE menu.</th>
</tr>
</thead>
<tbody>
<tr>
<td>USER1</td>
<td>Defined profile settings.</td>
</tr>
<tr>
<td>USER2</td>
<td></td>
</tr>
<tr>
<td>USER3</td>
<td></td>
</tr>
</tbody>
</table>

### Deleting the saved profiles

You can delete the profiles from PROFILE DELETE menu.

1. Select PROFILE DELETE and press the ENTER button.
2. Select the required profile or ALL DELETE and press the ENTER button.
   - The confirmation screen will be displayed and select OK.
3. Press the ENTER button.

#### NOTE:
- LOG and PROFILE SAVE are not displayed before you apply COLOR MANAGEMENT.
- If you load a profile with a different attribute mode of the profile, the CURSOR and PROFILE SAVE menus will not be displayed.
- The approximate colors will be adjusted at the same time. If you adjust the exact same color differently, both colors will affect each other and you might get unexpected results.
- White, Black and Gray are not adjustable.
- If you escape the COLOR MANAGEMENT menu or attempt to perform another menu action before you save the adjusted profile, the confirmation screen will be displayed.
- If you switch the input signal before you save the profile, the setting will be cancelled without notice.
Remote control operation

Switching the input signal

You can switch the input method manually by pressing the INPUT SELECT button. Press the button several times or press ▼ to cycle through the input methods as follows. The actual projected image will be changed in a while.

- The graphical guidance will be displayed on the upper right of the projected image and you can confirm the selected input method which is highlighted in yellow. See “INPUT GUIDE” on page 38.

Menu Navigation

The menu system allows you to access functions which do not have their own dedicated buttons on the remote control. The menu options are structured and categorized. You can navigate through the menu with ▲▼►◄ buttons.

Navigating through the MENU

Displaying the main menu

Press the MENU button to display the main menu and the operating guidance.

Operating procedure

1. Press ▲▼ to scroll to the required main menu item and press ENTER to select.
   - The selected item is highlighted in orange and the sub-menu is displayed on the right.
   - See “Main menu and sub-menu” on page 28.

2. Press ▲▼ to scroll to the required sub-menu item and press ◄► or ENTER to adjust.
   - The selected item is called up and the other menu items disappear from the screen. Called up item will be disappear after 5 seconds and return to the menu mode.
   - If there is a lower level, the next level will be displayed.

3. Press ◄► to adjust or set the selected item.
   - For items using a bar scale, the current settings are displayed on the left of the bar scale.
   - You can cycle through the options of an item by pressing ◄►.

4. Press MENU or RETURN to return to the previous menu.

NOTE:
- See “Resetting to the factory default settings” on page 23 to reset each menu item.
Menu Navigation

Main menu and sub-menu

The main menu has 5 options. Select the required menu item and press **ENTER** to display the sub-menu.

**NOTE:**
- Some default settings vary by the selected input signal.
- Sub-menu items vary according to the selected input signal.
- Some settings are adjustable without any signals.

PICTURE menu

Remote control

Control panel

- See “Navigating through the MENU” on page 27.
- See “Main menu and sub-menu” on page 28.

PICTURE MODE

Depending on the projection environment, you can use these preset parameter settings to optimize image projection. Press ▲▼ to cycle through the options.

CONTRAST
You can adjust the contrast of the projected image. Adjust the BRIGHTNESS in advance if necessary.

Lower ▲▼ Higher

- Setting range: -32 to +32

BRIGHTNESS
You can adjust the brightness of the projected image.

Darker ▲▼ Brighter

- Setting range: -32 to +32

COLOR
You can adjust the color saturation of the projected image.

Lighter ▲▼ Darker

- Setting range: -32 to +32
- When COMPUTER signal is connected, only available with the following signals.
  1 125 (1 080)/60i 1 125 (1 080)/50i
  1 125 (1 080)/60p 1 125 (1 080)/50p

TINT
You can adjust the skin tone in the projected image.

More reddish ▲▼ More greenish

- Setting range: -32 to +32
- When COMPUTER signal is connected, only available with the following signals.
  1 125 (1 080)/60i 1 125 (1 080)/50i
  1 125 (1 080)/60p 1 125 (1 080)/50p

SHARPNESS
You can adjust the sharpness of the projected image.

Less sharp ▲▼ More sharp

- Setting range will vary according to the selected input signal.

Reproducing color of an sRGB image
For reproducing the original color of S-VIDEO images precisely, set as follows.

1. Press the PICTURE ADJUST button and select NATURAL.
2. Press the DEFAULT button to reset the other sub-menu items.
3. Press the RETURN button once to return to the main menu and select OPTION.
4. Set the LAMP POWER menu to NORMAL.

SHARPNESS

Reproducing color of an sRGB image
For reproducing the original color of S-VIDEO images precisely, set as follows.

1. Press the PICTURE ADJUST button and select NATURAL.
2. Press the DEFAULT button to reset the other sub-menu items.
3. Press the RETURN button once to return to the main menu and select OPTION.
4. Set the LAMP POWER menu to NORMAL.
COLOR TEMPERATURE
You can adjust the white balance of the projected image.

You can adjust linear intensity at 3 levels. Press ▼ to increase/decrease 1 point.

<table>
<thead>
<tr>
<th>Levels</th>
<th>Default setting</th>

</tr>
</tbody>
</table>

Setting range: -8 to +8

DYNAMIC IRIS
You can switch automatic adjustment system of the lamp and the lens iris, which control the contrast and black level, on/off.

- ON: Automatic adjustment
- OFF: No adjustment

LIGHT HARMONIZER
The luminance sensor detects the brightness of the room and keeps the luminance in balance automatically. If needed, you can switch this function on/off from MODE, or adjust it manually from MANUAL by pressing ▼ ▼.

- Setting range: -8 to +8

NOTE:
- To assure correct performance of the LIGHT HARMONIZER, do not interrupt the light on to the luminance sensor. See “Projector body” on page 12.

ADVANCED MENU
You can perform more detailed image adjustment manually.

GAMMA
You can adjust linear intensity at 3 levels. Press ▼ ▼ to increase/decrease 1 point.

<table>
<thead>
<tr>
<th>Levels</th>
<th>Default setting</th>

</tr>
</tbody>
</table>

Setting range: -16 to +16

COLOR MANAGEMENT
You can manage your own defined color settings. See “Setting your own color profile” on page 24.

NR (Noise Reduction)
You can switch the automatic noise reduction system on/off. Press ▼ ▼ to select the required setting.

- ON: Automatic noise reduction
- OFF: No noise reduction

MPEG NR
You can switch the automatic noise reduction system for MPEG format images on/off. The system minimize block noise and mosquito noise to eliminate jagged edges, providing an overall smoother image. Press ▼ ▼ to select the required setting.

- ON: Active
- OFF: Deactive

NOTE:
- CINEMA REALITY is effective only with interlace signals.
PICTURE menu

TV-SYSTEM

When the video signal is changed, the setting switches automatically. You can switch the setting manually to match the video data. Press \( \uparrow \downarrow \) to cycle through the options.

- AUTO
- SECAM
- NTSC
- NTSC 4.43
- PAL-N
- PAL-M
- PAL

NOTE:
- AUTO setting will select from NTSC/NTSC 4.43/PAL/PAL60/PAL-M/PAL-N/SECAM.

FAVORITE SAVE

You can save and name the adjusted PICTURE menu settings for instant access from FAVORITE LOAD menu.

1. Adjust the items in PICTURE menu.
2. Select FAVORITE SAVE and press the ENTER button.
3. Select the required memory setting and press the ENTER button.
   - The confirmation screen will be displayed. Select OK and press the ENTER button.
   - Indicated with ★ is in use, and ✩ is empty.
4. Use \( \uparrow \downarrow \) to specify the location of the required character to enter and press the ENTER button.
   - You can enter up to 16 characters.
5. Repeat step 4 until you finish the text line.
   - Move the cursor to DEL ALL and press the ENTER button to delete all the entered text line.
   - Press the DEFAULT button to delete the last entered character or indicated with cursor in the text box.
   - To insert a character in the entered text line, move the cursor to the text box to select the required place and press \( \downarrow \) then perform step 4.
6. Select OK and press the ENTER button to set the entered text as a name.

NOTE:
- If you leave the text box empty and save, the default memory number will stay as a name.

FAVORITE LOAD

You can access the saved settings instantly. See “Switching the preset settings” on page 22.

1. Select a setting from FAVORITE1 - 8.
   - Undefined settings will not be selectable.
2. Press ENTER to activate.

NOTE:
- If you have not saved any settings, FAVORITE1 - 8 will not be displayed.
**FAVORITE EDIT**

You can edit the named memory settings.

- **Deleting a memory setting**
  1. Select FAVORITE DELETE and press the ENTER button.
  2. Select the required memory setting and press the ENTER button.
     - If you select ALL DELETE, you can delete all of the saved memory settings.
  3. Select OK in the confirmation screen and press the ENTER button.

- **Changing the name of the memory setting**
  1. Select the required memory setting and press the ENTER button.
  2. Use ▲ ▼ ◀ ◁ to specify the location of the required character to enter and press the ENTER button.
     - You can enter up to 16 characters.

  ![FAVORITE NAME CHANGE](image)

  3. Repeat step 4 until you finish the text line.
     - Move the cursor to DEL ALL and press the ENTER button to delete all the entered text line.
     - Press the DEFAULT button to delete the last entered character or indicated with cursor in the text box.
     - To insert a character in the entered text line, move the cursor to the text box to select the required place and press ▼ then perform step 4.
  4. Select OK and press the ENTER button to set the entered text as a name.

**NOTE:**
- If you have not saved any settings, FAVORITE1 - 16 will not be displayed.

**SIGNAL MODE**

The current selected signal will be displayed. This is available with signals from COMPUTER IN/COMPONENT IN/HDMI IN only.

**NOTE:**
- See “List of compatible signals” on page 45.
**POSITION menu**

**H-POSITION**
You can move the projected image horizontally for fine adjustment.

![H-POSITION](image)

**V-POSITION**
You can move the projected image vertically for fine adjustment.

![V-POSITION](image)

**DOT CLOCK**
If you have interference patterns of the projected image, which is sometimes referred to as moire or noise, you can minimize it by pressing ▼► to adjust the clock frequency. (Available with signals from COMPUTER IN only)

**NOTE:**
- If the projecting signal’s dot clock frequency is higher than 150 MHz, the adjustment may not make a difference.
- DOT CLOCK needs to be adjusted before adjusting the CLOCK PHASE.

**CLOCK PHASE**
If you require further adjustment for the same reason as the DOT CLOCK adjustment, you can fine adjust the timing of the clock. Press ▼► to adjust. (Available with signals from COMPUTER IN/COMPONENT IN only)

**NOTE:**
- If the projecting signal’s dot clock frequency is higher than 150 MHz, the adjustment may not make a difference.
- Available signals from COMPONENT IN:
  - 1125 (1080)/60i, 1125 (1080)/50i, 1125 (1080)/50p, 1125 (1080)/24p, 750 (720)/60p, 750 (720)/50p

**ASPECT**
You can switch the aspect ratio manually when needed.

- **Aspect ratio depend on signals**
  Press ▼► to cycle through the aspect ratio options. The cycle pattern depends on the connected signals.

#### COMPUTER signals

**V SCROLL**

Escape and press ▲▼ to scroll the image of COMPUTER signals to adjust the edge vertically.
**POSITION menu**

**WSS**

WSS (Wide Screen Signalling) detects if a **PAL/625p (576p)/625i (576i)** signal is input and that signal has an identification signal, and switch the aspect ratio to required setting automatically. You can switch the system off manually.

**OVER SCAN**

If the 4 edges of an image is partly dropped, you can use this function to adjust and project it properly.

- Setting range: 0 to +10
- **OVER SCAN** is not available with **COMPUTER** signals.

  ![Shrink](image)  ![Enlarge](image)

**KEYSTONE**

If the projector is aligned non-perpendicularly to the screen, or if the projection screen has an angled surface, you can vertically correct keystone.

<table>
<thead>
<tr>
<th>Image</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Keystone" /></td>
<td><img src="image" alt="Arrow Left" />  <img src="image" alt="Arrow Right" /></td>
</tr>
</tbody>
</table>

- Setting range: -32 to 32

**NOTE:**

- You can correct the distortion ± 30 degrees from the vertical plane. For a better quality image, installing the projector with a minimum of distortion is recommended.
- Some distortion may be retained for the lens shift adjustment.
- The distortion of the main menu screen is not correctable.
- The result of the keystone correction will affect the aspect ratio and the size of the image.

**AUTO SETUP**

You can adjust **V - POSITION, H - POSITION, DOT CLOCK** and **CLOCK PHASE** automatically when connecting via **COMPUTER IN**. Press **ENTER** to adjust these at the same time.

36 - ENGLISH
FUNCTION BUTTON

You can assign a frequently used menu option to the FUNCTION button for shortcut. Press ◀ ▶ to select the required menu option and press the ENTER button.

<tr>
<td>SIMPLE</td>
<td>Display the input method by text. The INPUT GUIDE will go out after 5 seconds without any operation.</td>
</tr>
<tr>
<td>DETAILED</td>
<td>Display the input method by graphic. The INPUT GUIDE will go out after 10 seconds without any operation.</td>
</tr>
</tbody>
</table>

You can change the background color of the menu. Press ▲▼ to cycle through the options.

- TYPE1: Semi transparent black
- TYPE2: Solid blue
- TYPE3: Semi transparent dark blue

You can change the position where to display the menu. Press ▲▼ to cycle through the options.

- UPPER LEFT
- UPPER CENTER
- UPPER RIGHT
- CENTER
- LOWER LEFT
- LOWER CENTER
- LOWER RIGHT

BACK COLOR
You can choose a screen color from BLUE or BLACK for when the projector is idle. Press ▲▼ to select.

STARTUP LOGO
You can switch the logo on/off that is displayed when starting up the projector. Press ▲▼ to select the required option. STARTUP LOGO will be displayed for 30 seconds.

- ON: Active
- OFF: Deactive

AUTO SEARCH
When the projector is turned on, the input terminals are detected and an input signal is selected automatically. You can switch the system on/off. Press ▲▼ to cycle through the options.

- ON: Active
- OFF: Deactive

NOTE:
- When no signal is detected, the last used input will be selected.

HDMI SIGNAL LEVEL
When an HDMI is not projected normally, you can switch the HDMI signal level to NORMAL or EXPAND. Press ▲▼ to select an option.

- NORMAL: General HDMI signal level
- EXPAND: Expanded HDMI signal level

NOTE:
- HDMI SIGNAL LEVEL is not available with some equipment.

INSTALLATION
When installing the projector, select the projection method according to the projector position. Press ▲▼ to cycle through the options. See “Projection method” on page 15.

- FRONT/DESK: Setting on a desk/floor and projecting from front
- FRONT/CEILING: Mounting in the ceiling and projecting from front
- REAR/DESK: Setting on a desk/floor and projecting from rear
- REAR/CEILING: Mounting in the ceiling and projecting from rear
**SLEEP**

You can select the required duration of time and set the off timer to turn off the power of the projector automatically. 3 minutes before turn-off, the countdown of minutes will be displayed in the lower right corner. Press ⬅️ ➤️ to cycle through the options.

- OFF
- 240MIN.
- 60MIN.
- 210MIN.
- 90MIN.
- 180MIN.
- 120MIN.
- 150MIN.

**ALTITUDE**

If you use the projector at high elevation, the ALTITUDE setting need to be HIGH to set the fan speed high. Press ⬅️ ➤️ to select the required option.

- **LOW** The fan speed is low.
- **HIGH** The fan speed is high.

**NOTE:**
- At 1 400 m (4 593 ft) above sea level, the setting must be HIGH.
- The loudness of fan noise depends on the ALTITUDE setting.

**LAMP POWER**

You can adjust the power of the lamp to save electricity, prolong the lamp life and reduce the noise.

<table>
<thead>
<tr>
<th>Options</th>
<th>Function</th>

</thead>
<tbody>
<tr>
<td>NORMAL</td>
<td>When higher luminance is required.</td>
</tr>
<tr>
<td>ECO-MODE</td>
<td>When lower luminance is sufficient.</td>
</tr>
</tbody>
</table>

**NOTE:**
- When no input signal is detected, the function is disabled.

**LAMP RUNTIME**

You can check how long time the lamp has been used.

**NOTE:**
- LAMP RUNTIME is a relevant matter for lamp replacement timing. See “Replacing the lamp unit” on page 42.

**TEST PATTERN**

You can use the 2 different test patterns to adjust the focus of the image.

1. Press the ENTER button to display the test pattern 1 and adjust the focus with the focus ring.

2. Press the ENTER button to display the test pattern 2 and adjust the focus with the focus ring again.

3. Press the MENU or RETURN to return to the previous menu, or press repeatedly to return to the screen.

**NOTE:**
- When the projector and/or the screen is tilted, adjust the focus at the center of the image. The upper and lower edge might be out of focus.
- When the image is distorted in keystone, adjust the KEYSTONE in the POSITION menu.
TEMP and LAMP Indicators

Managing the indicated problems

If a problem should occur with the projector, the LAMP and/or TEMP indicators will inform you. Manage the indicated problems as follow.
1. Confirm the status of all indicators and projector, and switch off the projector in proper way.
2. Find out the cause of the problem by status of the LAMP and/or TEMP indicators.
3. Follow the following instruction for each indication and solve the problem.
4. Turn on the projector in the correct way and confirm the indicator is not indicating a problem any longer.

NOTE:
• If no problem is found or the problem remains, do not turn on the projector. Instead contact an Authorized Service Center.

LAMP indicator

</tr>
</tbody>
</table>
Care and Replacement

Cleaning the projector

Before cleaning the projector
- Switch off the MAIN POWER switch in proper way and disconnect the power plug from the wall outlet.
- Unplug all the cables from the projector.

Cleaning the outer surface of the projector
Wipe off dirt and dust gently with a soft cloth.
- If it is difficult to remove the dirt, soak a cloth in a neutral detergent diluted with water, wring the cloth well and then wipe the projector. Dry off the projector with dry cloth.
- If you use a chemical treated wipe, follow the instructions supplied with it.

Cleaning the lens surface
Wipe off dirt and dust gently with a lint-free cloth.
- Make sure no dirt or dust remains on the surface of the lens. It will be enlarged and projected onto a screen.

Cleaning the air filter
If the air filter is excessively dirty, the internal temperature of the projector increases and may cause malfunction. Clean the air filter regularly every 100 hours of usage.
1. Turn the projector upside down and place it gently on a soft cloth.
2. Press the tab and slightly slide up the air filter to remove.
3. Vacuum dirt and dust from the air filter.
   - Do not wash the air filter.
4. Place and slightly slide in the air filter in the air intake port to attach.
   - Make sure the air filter clicks into the place.

**NOTE:**
- Do not use the projector without attaching the air filter.

Replacing the air filter
The air filter should be replaced when cleaning is ineffective and when replacing the lamp unit. A replacement air filter is provided with a replacement lamp unit, ET-LAX100. Contact an Authorized Service Center for the optional air filter.
Revising the lamp unit

Before replacing the lamp unit
- Switch off the MAIN POWER button in proper way and disconnect the power plug from the wall outlet.
- Make sure the lamp unit and the surroundings are cooled enough.
- Unplug all the cables from the projector.
- Prepare a Phillips-head screwdriver.
- Contact an Authorized Service Center to purchase a replacement lamp unit (ET-LAX100).
- When the projector is mounted in the ceiling, do not work directly under the projector or put your face closer to the projector.

NOTE:
- Prior to replacing the lamp unit, allow it to cool down to prevent the risk of burns, damage and other hazards.
- Do not attempt replacement with an unauthorized lamp unit.

When to replace the lamp unit
The lamp unit is consumable and the brightness decreases by duration of usage. The LAMP indicator will inform you of the replacement timing at 1,800 hours, and at 2,000 hours, the projector will be turned off. Those figures are rough guidance and might be shortened by the usage conditions, characteristics of the lamp unit, environmental conditions, and so on. You can check the duration of usage time using LAMP RUNTIME in the OPTION menu.

<table>
<thead>
<tr>
<th>Indication</th>
<th>On screen</th>
<th>LAMP indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 1,800 hours</td>
<td>&quot;REPLACE LAMP&quot; is displayed on the upper left of the screen for 30 seconds. To clear the screen immediately, press any button.</td>
<td>Illuminates red.</td>
</tr>
<tr>
<td>Over 2,000 hours</td>
<td>&quot;REPLACE LAMP&quot; is displayed on the upper left of the screen, and it will stay until you respond. To clear the screen, press any button.</td>
<td></td>
</tr>
</tbody>
</table>

NOTE:
- The guide times, 1,800 and 2,000 hours, are rough estimates based on certain conditions and is not a guaranteed time. The estimated condition is: LAMP POWER in OPTION menu set to NORMAL.
- To prolong the lamp life, set the LAMP POWER in OPTION menu to ECO-MODE. See "LAMP POWER" on page 39.
- For more information about the lamp unit, such as guaranteed time, see the instructions which is provided with the lamp unit.
Removing and replacing the lamp unit

1. Turn the projector upside down and place it gently on a soft cloth.
2. Use a Phillips screw driver to loosen the 2 lamp unit fixing screws until the screws turn freely and remove the lamp unit cover.
3. Use a Phillips screw driver to loosen the 2 lamp unit fixing screws until the screws turn freely.
4. Hold the handle of the lamp unit and pull out gently from the projector.
5. Replace the new lamp unit while making sure that the direction of insertion is correct.
   - Press the top of the lamp unit and make sure the unit is installed securely.
6. Tighten the lamp unit fixing screws securely with a Phillips screwdriver.
7. Attach the lamp unit cover and tighten the 3 lamp unit cover fixing screws securely with a Phillips screw driver.

NOTE:
- Be sure to install the lamp unit and attach the lamp unit cover securely. If they are not installed securely, it may cause the protection circuit to operate so that the power cannot be turned on.
- Grip the handle and keep the lamp unit paralleled when you remove the lamp unit. Some parts of the lamp unit are sharpened and may cause injury.
- Do not switch the power on while the lamp unit cover removed.

Resetting the LAMP RUNTIME

If the lamp usage time has passed 2 000 hours (when LAMP POWER has been set to NORMAL), the projector will switch to standby mode after approximately 10 minutes of operation. The resetting procedure should thus be completed within 10 minutes.

1. Connect the power cord to the projector and a wall outlet, and switch the MAIN POWER on.
2. Press the POWER button.
3. Press the MENU button to display the menu.
4. Select the OPTION menu and press the ENTER button.
5. Select LAMP RUNTIME.
6. Press and hold the ENTER button for approximately 3 seconds.
7. The confirmation screen will be displayed and select OK.
8. Press the POWER button to turn off for resetting the duration of the LAMP RUNTIME.
9. Confirm the duration of time in LAMP RUNTIME is reset to “0 H”.

</table>

*1. The "i" appearing after the resolution indicates an interlaced signal.
*2. The following symbols are used to indicate picture quality.
AA  Maximum picture quality can be obtained.
A   Signals are converted by the image processing circuit before picture is projected.
Technical Information

Serial terminal

The serial connector which is on the connector panel of the projector conforms to the RS-232C interface specification, so that the projector can be controlled by a personal computer which is connected to this connector.

Connection

Connection diagram

NOTE:
- You must use only an RS-232C Serial Interface Cable with a ferrite core, type ET-ADSER.

Cable specifications

(When connected to a personal computer)

Basic format

The data streaming from the computer will start with STX, and proceed to Command, Parameter and end with ETX. You can add the required parameter.

- The projector can not receive any command for 10 seconds after the lamp is switched on. Wait 10 seconds before sending the command.
- If sending multiple commands, check that a response has been received from the projector for one command before sending the next command.
- When a command which does not require parameters to be sent, the colon (:) is not required.
- If an incorrect command is sent from the personal computer, the ER401 command will be sent from the projector to the personal computer.

| Options            | Ceiling bracket ET-PKX200                                             |
|                    | Projection screen ET-SRW90CC                                           |
| Cables             | ET-SC10CP (RCA pin jack x 3 - RCA pin jack x3)                         |
|                    | ET-SC10DT (RCA pin jack x3 - D-Terminal)                               |
|                    | Serial adapter ET-ADSER (DIN 8-pin/D-sub 9-pin)                        |
The projector and the ceiling mount bracket are designed sufficiently safety though, make sure the safety cable provided with the projector is installed and attached to the security lock slot of the projector when mounting in the ceiling for safety and security.

### Installing the safety cable

1. Install the ceiling mount bracket according to the Installation Instructions.
2. Loop the security cable around the ceiling mount bracket with less slack.
   - Lace the cable of the end with a latch through the loop on the other end of the cable.
3. Pull out the tab of the lock and insert it to the security lock slot of the projector.
4. Twist the lock 90° and push in securely.
5. Attach the provided screw securely with a screwdriver, such as a torque screwdriver.
   - Torque: 0.7±0.1 N·m

### NOTE:

- Even if it is guarantee period, the manufacturer is not responsible for any hazard or damage caused by using a ceiling mount bracket which is not purchased from an authorized distributors, or environmental conditions.
- Make sure to use a torque driver and do not use an electrical screwdriver or an impact screwdriver.
- Installation work of the ceiling mount bracket should only be carried by a qualified technician.
- Remove an unused ceiling mount bracket promptly.
