Disposal of your old appliance
1. When this crossed-out wheeled bin symbol is attached to a product it means the product is covered by the European Directive 2002/96/EC.
2. All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by your government or your local authorities.
3. The correct disposal of your old appliance will help prevent potential negative consequences for the environment and human health.
4. For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service or the shop where you purchased the product.
# Safety Instructions

Please take note of the safety instructions to prevent any potential accident or misuse of the projector.

→ Safety Instructions are given in two forms as detailed below.

**WARNING**: The violation of this instruction may cause serious injuries and even death.

**NOTES**: The violation of this instruction may cause light injuries or damage to the projector.

→ After reading this manual, keep it in the place that the user can access it easily.

<table>
<thead>
<tr>
<th><strong>Indoor Installation</strong></th>
<th><strong>NOTES</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not place the Projector in direct sunlight or near heat sources such as radiators, fires and stove etc. This may cause a fire hazard!</td>
<td>Do not place the projector close to sources of steam or oil such as a humidifier. This may cause a fire hazard or an electric shock hazard!</td>
</tr>
<tr>
<td>Disconnect the power and remove all connections before moving.</td>
<td>Do not place the projector where it might be exposed to dust. This may cause a fire hazard or damage to the unit!</td>
</tr>
<tr>
<td>When installing the projector on a table, be careful not to place it near the edge. This may cause the projector to fall causing serious injury to a child or adult and serious damage to the projector. <strong>Only use a suitable stand.</strong></td>
<td>Only use the projector on a level and stable surface. It may fall and cause injury and/or damage to the unit.</td>
</tr>
<tr>
<td>Do not block the vents of the projector or restrict air-flow in any way. This would cause the internal temperature to increase and could cause a fire hazard or damage to the unit!</td>
<td>Ensure good ventilation around the projector. The distance between the projector and the wall should be more than 30cm/12 inches. An excessive increase in its internal temperature may cause a fire hazard or damage to the unit!</td>
</tr>
</tbody>
</table>

Safety Instructions

**WARNING**

*Do not place anything containing liquid on top of the projector such as flowerpot, cup, cosmetics or candle.*

This may cause a fire hazard!

*In case of impact shock or damage to the projector switch it off and unplug it from the power outlet and contact your service center.*

This may cause a fire hazard!

*Do not allow any objects to fall into the projector.*

This may cause a fire or an electric shock hazard or damage to the unit!

*If water is spilt into the projector unplug it from the power outlet immediately and consult your Service Agent.*

This may cause an electric shock hazard or damage to the unit!

*Dispose of used batteries carefully and safely.*

In the case of a battery being swallowed by a child please consult a doctor immediately.

*In the event that an image does not appear on the screen please switch it off and unplug it from the power outlet and consult your Service Agent.*

This may cause a fire or an electric shock hazard or damage to the unit!

**NOTES**

*Hold the power plug firmly when unplugging. If you pull the cord, it may be damaged.*

This may cause a fire hazard!

*Ensure the power cord does not come into contact with sharp or hot objects such as a heater.*

This may cause a fire or an electric shock hazard or damage to the unit!

*Place the projector where people will not trip or tread on the power lead.*

This may cause a fire or an electric shock hazard or damage to the unit!

**WARNING**

*Do not turn the projector On/Off by plugging-in or unplugging the power plug to the wall outlet.*

(Do not use the power plug for switch.)

It may cause mechanical failure or could cause an electric shock.

**Power**

*Do not use too many plugs on the same outlet.*

It may result in overheating of the outlet and cause a fire hazard!

*Never touch the power plug with a wet hand.*

This may cause an electric shock hazard!

*Do not plug when the power cord or the plug is damaged or any part of the power outlet is loose.*

This may cause a fire or an electric shock hazard or damage to the unit!

*Do not turn the projector On/Off by plugging-in or unplugging the power plug to the wall outlet.*

(Do not use the power plug for switch.)

It may cause mechanical failure or could cause an electric shock.

**Using**

*Do not place anything containing liquid on top of the projector such as flowerpot, cup, cosmetics or candle.*

This may cause a fire hazard or damage to the unit!

*In case of impact shock or damage to the projector switch it off and unplug it from the power outlet and contact your service center.*

This may cause a fire or an electric shock hazard or damage to the unit!

*Do not allow any objects to fall into the projector.*

This may cause an electric shock hazard or damage to the unit!

*Dispose of used batteries carefully and safely.*

In the case of a battery being swallowed by a child please consult a doctor immediately.

*In the event that an image does not appear on the screen please switch it off and unplug it from the power outlet and consult your Service Agent.*

This may cause a fire or an electric shock hazard or damage to the unit!

*Do not remove any covers (except lens cover). Or there is a high risk of Electric Shock!*

*Don’t look directly onto the lens when the projector is in use. Eye damage may occur!*

*Do not touch metal parts during or soon after operation since the vents and lamp cover will remain very hot!*

*CAUTION concerning Power*

Do not overload wall outlets. Overloaded wall outlets, loose or damaged wall outlets, extension cords, frayed power cords, or damaged or cracked wire insulation are dangerous. Any of these conditions could result in electric shock or fire. Periodically examine the cord of your appliance. If its appearance indicates damage or deterioration, unplug it, discontinue use of the appliance, and have the cord replaced with an exact replacement part by an authorized service personnel.

Protect the power cord from physical or mechanical abuse, such as being twisted, kinked, pinched, closed in a door, or walked upon. Pay particular attention to plugs, wall outlets, and the point where the cord exits the appliance.
### Safety Instructions

#### Using

<table>
<thead>
<tr>
<th><strong>WARNING</strong></th>
<th><strong>NOTES</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Never touch the wall outlet when there is leakage of gas, open the windows and ventilate. It can cause a fire or a burn by a spark.</td>
<td>Do not touch the lens of the projector or allow impact shock. This may cause mechanical failure or personal injury!</td>
</tr>
</tbody>
</table>

Always open the lens door or remove the lens cap when the projector lamp is on.

<table>
<thead>
<tr>
<th><strong>NOTES</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not place heavy objects on top of projector. This may cause mechanical failure or personal injury!</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>NOTES</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not touch the lens of the projector. It is delicate and easily damaged.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>NOTES</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not use any sharp tools on the projector as this will damage the casing.</td>
</tr>
</tbody>
</table>

#### Cleaning

<table>
<thead>
<tr>
<th><strong>WARNING</strong></th>
<th><strong>NOTES</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not use water while cleaning the projector. This may cause damage to the projector or an electric shock hazard.</td>
<td>In the unlikely event of smoke or a strange smell from the projector, switch it off, unplug it from the wall outlet and contact your dealer or service center. This may cause a fire or an electric shock hazard or damage to the unit!</td>
</tr>
</tbody>
</table>

When cleaning the plastic parts such as projector case, unplug the power and wipe it with a soft cloth. Do not use cleanser, spray water or wipe with a wet cloth. Especially, never use cleanser (glass cleaner), automobile or industrial shiner, abrasive or wax, benzene, alcohol etc., which can damage the product. Use an air spray or soft cloth that is moist with a neutral detergent and water for removing dust or stains on the projection lens. |

<table>
<thead>
<tr>
<th><strong>NOTES</strong></th>

Installing Batteries

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED WITH AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

- Open the battery compartment cover on the back of the remote control.
- Insert the specified type of batteries with correct polarity, match "+" with "+", and match "-" with "-".
- Install two 1.5V AAA batteries. Don’t mix used batteries with new batteries.
Projector Status Indicators

*Lamp indicator, operation indicator and temperature indicator at the top of the projector show the user the operating status of the projector.

<table>

- Video Cable
- Ceiling mount for projector
Installing and Composition

Installation Instructions

* Don’t place the projector in the following conditions. It may cause malfunction or product damage.

 PROVIDE PROPER VENTILATION FOR THIS PROJECTOR.

- The projector is equipped with ventilation holes (intake) on the bottom and ventilation holes (exhaust) on the front. Do not block or place anything near these holes, or internal heat build-up may occur, causing picture degradation or damage to the projector.

- Do not place the projector on a carpet, rug or other similar surface. It may prevent adequate ventilation of the projector bottom. This product should be mounted to a wall or ceiling only.

- Leave an adequate distance (30cm/12 inches or more) around the projector.

PLACE THIS PROJECTOR IN ADEQUATE TEMPERATURE AND HUMIDITY CONDITIONS.

- Install this projector only in a location where adequate temperature and humidity is available. (refer p.35)

- This may cause overheating of the projector.

DO NOT OBSTRUCT THE SLOTS AND OPENINGS OF THE PROJECTOR. THIS MAY CAUSE OVERHEATING AND CREATE A FIRE HAZARD.

- This projector is manufactured using high-precision technology. You may, however, see tiny black points and/or bright points (red, blue, or green) that continuously appear on the projector screen. This is a normal result of the manufacturing process and does not indicate a malfunction.

TO DISPLAY DTV PROGRAMS, IT IS NECESSARY TO PURCHASE A DTV RECEIVER (SET-TOP BOX) AND CONNECT IT TO THE PROJECTOR.

WHEN THE REMOTE CONTROL DOES NOT WORK DURING OPERATION.

- The remote control may not work when a lamp equipped with electronic ballast or a three-wavelength lamp is installed. Replace those lamps with international standard products to use the remote control normally.
Positioning the Projector

1. Place the projector on a sturdy and horizontal surface.
2. Place the projector the desired distance from the screen. The distance between the projector and the screen determines the actual size of the image.
3. Position the projector so that the lens is set at a right angle to the screen. If the projector is not set at a right angle, the screen image will be crooked. The keystone adjustment may correct this (Refer to page 25.).
4. Once you have positioned the projector, connect the power and any input devices.

* The longest/shortest distance show status when adjusted by the zoom function.
* You can move an image up to 70% of the screen size from the lens center.
Using Kensington Security System

- This projector has a ‘Kensington’ Security System Connector on the side panel. Connect the ‘Kensington’ Security System cable as below.

- For the detailed installation and use of the Kensington Security System, refer to the user’s guide included to the Kensington Security System set. And for further information, contact http://www.kensington.com.

- The Kensington Security System is an optional item.
Installing and Composition

Turning on the Projector

1. Connect power cord correctly.

2. Remove the lens cap. If it is left on, it could become deformed due to the heat produced by the projection lamp.

3. Press the **POWER** button on the remote control or back cover.
   - An image will appear after the operation deco LED turns (Blue (flashing)) (Refer to page 11).
   - Press the INPUT button on the remote control or the INPUT button on the control panel to select the input signal you want.

**Note!**

* Do not disconnect the power cord while the suction/discharge fan in operation. If the power cord is disconnected during the suction/discharge fan in operation, it may takes longer to activate the lamp after turning on the power and the lifespan of the lamp may be shortened.

Turning off the Projector

1. Press the **POWER** button on the back cover or remote control.

2. Press the **POWER** button on the back cover or remote control again to turn off the power.

3. If the operation indicator is flashing orange, in other words the fan is working (60 seconds), do not disconnect the projector. When the indicator turns red, you may remove the power cord (Refer to page 11).
   - If the operation indicator LED is orange and flashing, the power button on the back cover or on the remote control will not operate.

---

Please press Power key again.
Focus and Position of the Screen Image

When an image appears on the screen, check if it is in focus and fits the screen well.

- To adjust the focus of the image, rotate the focus ring which is the outer ring on the lens.
- To adjust the size of the image, rotate the zoom ring which is the under ring on the lens.

When you need to move the screen image up or down, use the Lens shift dial on the projector to adjust the height as shown below.

- Turn the Lens shift dial left or right to adjust the projector image up or down.

**Note!**

Turning the Lens shift dial with excessive power may cause damage to the projector.

Selecting source mode

1. Press the **INPUT** button.

**Input List**

<table>
<thead>
<tr>
<th>Input Type</th>
<th>Icon</th>
<th>RGB</th>
<th>HDMI1</th>
<th>HDMI2</th>
<th>Video</th>
<th>S-Video</th>
<th>Component</th>
</tr>
</thead>
</table>

2. Selecting an input signal with the **INPUT** button will only change the projector only to connected inputs. You can change it to any inputs with the <, > button.
Connection

Connecting to a Desktop PC

* You can connect the projector to a computer of VGA, SVGA, XGA, SXGA and 1080p/60Hz output.
* Refer to page 30 for resolutions the projector supports.

< How to connect >

Connect the RGB IN of the projector and the computer output port with computer cable.

* You may have to change the resolution that your PC exports to one supported by the projector. Refer to page 30. This projector may not support output from laptops when the laptop screen is on.

Connecting to a Video Source

* You can connect a VCR, a camcorder or any other compatible video image source to the projector.

< How to connect 1 >

a. Connect the Video input jacks of the projector to the output jacks of the A/V source with Video cable.

< How to connect 2 >

b. Connect the S-Video input jack of the projector to the S-Video output jack of an A/V source with an S-Video cable.
* S-Video supports better video quality than a regular A/V connection.
Connecting to a DVD

* The output jacks (Y, Pb, Pr) of the DVD might be labeled as Y, Pb, Pr or Y, R-Y, Cb, Cr according to the equipment.

< How to connect >

a. Connect the DVD component cable to the Y, Pb and Pr of the COMPONENT IN of the projector.
   * When connecting the component cable, match the jack colors with the component cable. (Y=green, Pb=blue, Pr=red)

b. You may use HDMI instead of component if available on the DVD player. HDMI supports better quality than component.

Connecting to a D-TV Set-Top Box

* To receive D-TV programs, it is necessary to purchase a D-TV receiver (Set-Top Box) and connect it to the projector.
* Please refer to the owner’s manual of the D-TV Set-Top Box for the connection between the projector and D-TV Set-Top Box.

< How to connect a HDMI source >

a. Connect the HDMI IN of the projector and the HDMI output port of the DTV set-top box with an HDMI cable.

b. Set the DTV receiver’s resolution to one of the following: 480p(576p)/720p/1080i/1080p mode.

< How to connect a Component source >

a. Connect the component cable connected to the DTV set-top box to the Y, Pb and Pr of the COMPONENT IN of the projector.
   * When connecting the component cable, match the jack colors. (Y=green, Pb=blue, Pr=red)
Function

* In this manual, the OSD (On Screen Display) may be different from your Projector's because it is just an example to help with the Projector operation.
* This operating guide explains operation of RGB (PC) mode mainly.

PICTURE Menu Options

* Use Picture mode function to set the projector for the best picture appearance.

1. Press the PICTURE button on the remote control.

2. Press the < , > button to adjust the screen condition as you want.

   - Each press of the < , > button changes the screen as shown below.
   
   ![Picture Mode Options]

   - You can use this function through the MENU button.
   - To exit the menu display, press the EXIT button.

Adjusting Video

1. Press the MENU button. Then, move to PICTURE with the \( \wedge, \vee, <, > \) buttons and press the OK button.

2. Move to a sub-item with the > button. Then, use the \( \wedge, \vee \) buttons to move to a desired function and press the OK button.

3. Use the < , > buttons to make a desired adjustment and then press the OK button.

   - You can set image values differently for each input and Picture Mode.
   - Saving after making adjustments will display (User) in adjusted Picture Mode. (except Expert 1/2)
   - Execute Picture Reset for Picture Mode to restore back to default factory settings.
   - You can adjust contrast by pressing the \( \wedge \) button on the remote control.
   - You can adjust brightness by pressing the \( \vee \) button on the remote control.
   - Press the MENU or EXIT button to exit the menu screen.
ADV. PICTURE Menu Options

Auto Iris Function

* This function adjusts the brightness of the entire image depending on inputted image to provide optimum image quality.

1. Press the A.IRIS button on the remote control.

2. Press the <,> button to adjust the screen condition as you want.

- Each press of the <,> button changes the screen as shown below.

  Manual  ➔  Auto Iris1 ➔  Off ➔  Auto Iris3 ➔  Auto Iris2

- Manual: You can adjust from 0 to 32 on Advanced Control of ADV. PICTURE.
- You can use this function through the MENU button.
- To exit the menu display, press the EXIT button.

TruMotion Demo Function

1. Press the MENU button. Then, move to ADV. PICTURE with the ∧,∨,<,> buttons and press the OK button.

2. Move to a sub-item with the > button. Then, use the ∧,∨ buttons to move to TruMotion Demo and press the OK button.

- Press the MENU or EXIT button to exit the menu screen.
Advanced Control Function

1. Press the MENU button. Then, move to ADV. PICTURE with the ▲, ▼, <, > buttons and press the OK button.

2. Move to a sub-item with the > button. Then, use the ▲, ▼ buttons to move to Advanced Control and press the OK button.

3. Move to a desired item with the ▲, ▼ buttons and then press the OK button.

4. Use the <, > buttons to make a desired adjustment and then press the OK button.

- You can set image values differently for each input and Picture Mode.
- Press the MENU or EXIT button to exit the menu screen.

**TruMotion**: Makes the moving image smoother through compensation.

- This function cannot be set when PC signal is input.

**Color Temp**: Selects the mood of screen colors.

- You can also use the C.TEMP button on the remote control.

**Noise Reduction**: Removes noise from image without damaging it.

- You can use it only in Video, S-Video, Component (480i, 480p, 576i, 576p) and HDMI (480p, 576p) modes.

**Gamma**: Sets the intensity of the picture.

- You can also use the GAMMA button on the remote control.

**Real Cinema**: Set up the picture for the best picture appearance for viewing movies.

- You can use it only in Video, S-Video, Component (480/576i/1080i 50/50Hz, 1080p 24Hz) and HDMI (1080i 50/60Hz, 1080p 24Hz) modes.

**Black Level**: Adjusting the contrast and the brightness of the screen using the black level of the screen.

- You cannot set this function in SECAM, PAL 60 and PAL BGDK signals of Video, S-Video and RGB modes.
Function

- **Lamp Mode**: Adjusts the lamp brightness.

  ![Lamp Mode](image)

- **Overscan**: You can adjust from 90, 92, 94...100.

  ![Overscan](image)

  - This function cannot be set when the signal is 1080i and 1080p or Aspect Ratio is set as Justscan.
  - Noise can occur at the edges of the screen at the signal of 1080i/1080p because of the malfunctioning of an image input device. In this case, change the signal into the one that can be set with Overscan and set Overscan.

- **Gamma Mode**: You can select this mode only when Picture Mode is Cinema/Expert 1/2.

  ![Gamma Mode](image)

  - **Adjustment**: You can select Low, Medium or High.
  - **Level**: You can adjust from 0 to 8.
  - **IRE**: Automatically set from 0 to 100 according to Level change.
  - When you select User -> Red/Green/Blue: You can adjust from -127 to 127.

- **White Balance**: Adjusts the overall feeling of the screen to your choice. You can select this function only when Picture Mode is Cinema/Expert 1/2.

  ![White Balance](image)

  - **Red/Green/Blue Contrast**: You can adjust from -30 to 30.
  - **Red/Green/Blue Brightness**: You can adjust from -30 to 30.

### Advanced Picture Reset Function

* Settings of the selected ADV PICTURE function for each input and Picture Mode return to the default factory settings.

1. Press the MENU button. Then, move to ADV. PICTURE with the \( \wedge , \vee , < , > \) buttons and press the \( \odot \) OK button.

2. Move to a sub-item with the > button. Then, use the \( \wedge , \vee \) buttons to move to Adv. Picture Reset and press the \( \odot \) OK button.

3. Move to Yes with the \( < , > \) buttons and then press the \( \odot \) OK button.

   - Press the MENU or EXIT button to exit the menu screen.
SCREEN Menu Options

To Change PJT Mode
* This function turns the projected image upside down or flips horizontal.
1. Press the MENU button. Then, move to SCREEN with the , , , buttons and press the OK button.
2. Move to a sub-item with the > button. Then, use the , , buttons to move to PJT Mode and press the OK button.
3. Move to a desired item with the , , buttons and then press the OK button.

- Select Rear when projecting from the back of the transparent screen purchased separately.
- Select Ceiling when installing the product on the ceiling.
- Press the MENU or EXIT button to exit the menu screen.

Using Aspect Ratio Function
1. Press the RATIO button on the remote control.
2. Use the <, > buttons to select a desired screen size.

- Some options may not be available depending on input signals.
- You can use this function through the MENU button.
- To exit the menu display, press the EXIT button.
Using Keystone Function

* Use this function when the screen is not at a right angle to the projector and the image is a trapezoid shape.
* Only use the Keystone function when you can’t get the best angle of projection.

1. Press the KEystone button of remote control.

2. Move to a desired item with the , buttons and then press the > button.

3. Press the , button to adjust the screen condition as you want and then press the OK button.
   - Keystone can be adjusted from -100 to 100.
   - Execute Reset to restore back to default factory settings.
   - You can use this function through the MENU button.
   - To exit the menu display, press the EXIT button.

Test Pattern Function

* Execute this function when installing the projector to adjust the screen size and focus.

Press the PATTERN button of remote control.

Auto configure Function

* This function assures you of getting the best video quality by automatically adjusting the horizontal size and synchronization of the image.
* Auto Tracking function works in RGB PC input only.

1. Press the AUTO button of the remote controller.
   - Image positioning and synchronization are automatically adjusted.

2. After automatic adjustments, if further manual adjustments are needed depending on PC RGB Config. on the SCREEN menu. In certain circumstances, you can’t get the best picture quality by only using auto-correction.

Note!

You can also use this function by using the MENU button. (Only in RGB mode)
For best results, perform this function while displaying a still image.
RGB Config. Function

1. Press the MENU button. Then, move to SCREEN with the \( \wedge, \vee, <, > \) buttons and press the \( \circ \) OK button.

2. Move to a sub-item with the \( > \) button. Then, use the \( \wedge, \vee \) buttons to move to RGB Config. and press the \( \circ \) OK button.

3. Move to a desired item with the \( \wedge, \vee \) buttons and then press the \( > \) button.

4. Press the \( \wedge, \vee, <, > \) button to adjust the screen condition as you want and then press the \( \circ \) OK button.

- The Auto Configure function operates only for RGB input. If you execute screen adjustment for a video from PC graphic signal, optimal state may not be found. Execute the Auto Configure function for a still image.
- The variable range can be different depends on input resolutions.
- To exit the menu display, press the EXIT button.

Screen Reset Function

* Settings of the selected SCREEN modes return to the default factory settings.

1. Press the MENU button. Then, move to SCREEN with the \( \wedge, \vee, <, > \) buttons and press the \( \circ \) OK button.

2. Move to a sub-item with the \( > \) button. Then, use the \( \wedge, \vee \) buttons to move to Screen Reset and press the \( \circ \) OK button.

3. Move to Yes with the \( <, > \) buttons and then press the \( \circ \) OK button.

- Keystone function is not reset.
- Press the MENU or EXIT button to exit the menu screen.
OPTION Menu Options

Using Still Function
1. Press the STILL button on the remote control.
   * You can freeze the moving image.

   ![Moving Image] ➔ ![Still Image]

2. To exit STILL, press any button.
   * The STILL function will release automatically after approximately 10 minutes.

Selecting Language

1. Press the MENU button. Then, move to OPTION with the \_\_\_. button and press the OK button.

2. Move to a sub-item with the \_\_. button. Then, use the \_\_. button to move to Language and press the OK button.

3. Move to a desired item with the \_\_. button and then press the OK button.
   • On-Screen-Display (OSD) is displayed in the selected language.
   • Press the MENU or EXIT button to exit the menu screen.

Using Blank Function

* This function may be effective if you need to get the attention of the audience during presentations, meetings or briefings.

1. Press the BLANK button on the remote control.
   • The screen turns off to a background color.
   • You can choose the background color.
   (Refer to ‘Selecting Blank image color’)

2. Press any button to cancel the blank function.
   • To temporarily turn off the lamp, press BLANK on the remote control. Do not block the projection lens with any objects when the projector is under operation as this could cause the objects to become heated and deformed or even cause a fire.
Function

Selecting Blank image color

1. Press the MENU button. Then, move to OPTION with the \_\.\,\,<\,\> buttons and press the \_OK button.

2. Move to a sub-item with the > button. Then, use the \_\.\,\, buttons to move to Blank Image and press the \_OK button.

3. Move to a desired item with the \_\.\,\, buttons and then press the \_OK button.

- Background color will be altered to the selected Blank function color.
- Press the MENU or EXIT button to exit the menu screen.

Sleep time Function

* The sleep timer turns the projector off at the preset time.

1. Press the SLEEP button of remote control.

2. Press the < , > button to select the desired preset time.

- Each press of the < , > button changes the screen as shown below.

```
<table>
<thead>
<tr>
<th>10 Min</th>
<th>20 Min</th>
<th>30 Min</th>
</tr>
</thead>
<tbody>
<tr>
<td>60 Min</td>
<td>90 Min</td>
<td></td>
</tr>
<tr>
<td>120 Min</td>
<td>180 Min</td>
<td></td>
</tr>
<tr>
<td>240 Min</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
```

- You can use this function through the MENU button.
- To exit the menu display, press the EXIT button.
Auto sleep Function

* This function turns the projector off automatically after 10 minutes is passed when there is no signal.

1. Press the MENU button. Then, move to OPTION with the ↑, ↓, ←, → buttons and press the OK button.

2. Move to a sub-item with the → button. Then, use the ↑, ↓ buttons to move to Auto Sleep and press the OK button.

3. Move to On with the ←, → buttons and then press the OK button.
   • Press the MENU or EXIT button to exit the menu screen.

Option Reset Function

* Settings of the selected OPTION modes return to the default factory settings.

1. Press the MENU button. Then, move to OPTION with the ↑, ↓, ←, → buttons and press the OK button.

2. Move to a sub-item with the → button. Then, use the ↑, ↓ buttons to move to Option Reset and press the OK button.

3. Move to Yes with the ←, → buttons and then press the OK button.
   • Language function is not reset.
   • Press the MENU or EXIT button to exit the menu screen.

INFORMATION Menu Options

To See The Projector Information

1. Press the MENU button. Then, move to INFORMATION with the ↑, ↓, ←, → buttons and press the OK button.

2. You can see the current information of the projector.
   • Press the MENU or EXIT button to exit the menu screen.
Supported Monitor Display

* The following table lists the display formats supported by the projector.

<table>
<thead>
<tr>
<th>Format</th>
<th>Vertical Freq.(Hz)</th>
<th>Horizontal Freq.(kHz)</th>
</tr>
</thead>
<tbody>
<tr>
<td>640X480</td>
<td>59.94Hz</td>

* Cable type
  1- Component Cable
  2- HDMI Cable
Maintenance

* The projector needs little maintenance. You should keep the lens clean because any dirt or stains may appear on the screen. If any parts need to be replaced, contact your dealer. When cleaning any part of the projector, always turn the power off and unplug the projector first.

Cleaning the lens
Clean the lens whenever you notice dirt or dust on the surface of it. Wipe the lens surface gently with an air spray or a soft, dry lint-free cloth.
To remove dirt or stains on the lens, moisten a soft cloth with water and a neutral detergent and wipe the lens surface gently.

Cleaning the Projector Case
To clean the projector case, first unplug the power cable. To remove dirt or dust, wipe the casing with a soft, dry, lint-free cloth. To remove stubborn dirt or stains, moisten a soft cloth with water and a neutral detergent and then wipe the casing.
Do not use alcohol, benzene, thinners or other chemical detergents as these can cause the casing to be warped or discolored.

Cleaning the Filter
When prompted to clean the filter while using the projector, take the following steps to clean it.

1. Turn off the projector and unplug the power cable. Turn it upside down and place it on a table or flat surface.
2. Press as indicated by arrows with both hands and remove the filter cover.
3. Turn the filter cover upside down, take the filter out and remove dust from it. (When the filter is damaged, use additionally-provided new filter.)
4. Insert the filter into the cover. Fit the cover onto the projector and press it until a click sound is heard.
Replacing the Lamp

Lamp Replacement

The change interval of lamp may depend on the use environment of Projector. You can see the used lamp time in the CHECKING LAMP TIME section of the Menu (page.29). You must replace the lamp when:

- The projected image gets darker or starts to deteriorate.
- The lamp indicator is red.
- The message “Replace the lamp” appears on the screen when turning the projector on.

Be careful when replacing lamp

- Press the POWER button on the control panel or remote control to turn off power.
- If the operation indicator LED is orange and blinking, do not disconnect the main supply until the operation indicator LED is lit up constantly (red).
- Allow the lamp to cool for 1 hour before replacing it.
- Replace only with the same type lamp from an LG Electronics Service Center. Using another manufacturers lamp may cause damage to the Projector and lamp.
- Pull out the lamp only when replacing the lamp.
- Keep the lamp unit out of reach of children. Keep the Lamp away from heat sources such as radiators, stoves etc.
- To reduce the risk of fire do not expose the lamp to liquids or foreign materials.
- Do not place the lamp near any heat source.
- Make sure the new lamp is securely tightened with screws. If not, the image may be dark or there could be an increased risk of fire.
- Never touch the glass on the lamp. Image quality may be compromised or lamp life maybe reduced.

To obtain a replacement Lamp unit

Lamp model number is on page 35. Check the lamp model and then purchase it from an LG Electronics Service Center. Using another manufacturers lamp may cause damage to the projector.

Lamp unit disposal

Dispose of the used lamp by returning it to the LG Electronics Service Center.
Replacing the Lamp

1. Turn off the projector and unplug the power cable. Carefully place on a cushioned surface. (Allow the lamp to cool for 1 hour before removing the used lamp from the projector.)

2. Unscrew the screw from the lamp cover using a screwdriver.

3. After lifting the lamp cover off, remove the two retaining screws on the lamp case with a screwdriver.

4. Pull out the handle slowly and remove the lamp case.

5. Insert the new lamp gently into the correct position. Push the lamp bottom to check if it is correctly installed.

6. Tighten the screws you removed in step 3. (Make sure they are fixed firmly.)

7. Close the lamp cover and install the screws from step 2 to install the cover. (If the lamp cover is not installed correctly the unit will not power on.)

Note:
Using another manufacturer's lamp may cause damage to the projector or lamp. Make sure the lamp cover is securely fastened. If the lamp cover is not installed correctly the unit will not power on. If this fault persists contact an LG Authorized Service Center.
Regarding the projector lamp control

⚠️ WARNING

- Don’t turn off the projector at least in 5 minutes after activating it.
  - The frequent On/Off changes may cause the lamp to deteriorate.

- Don’t pull out the power cord while the projector or the cooling fan are running.
  - It may shorten the life of the lamp.

- The life-span of depends on the environment its used in and how well its treated.

- The projector uses a high pressure mercury lamp. Shock or abuse to the projector can cause the lamp to burst.

- Continuing to use a lamp the projector has indicated needs replacement may burst.

- If the lamp burst, perform the following:
  - Remove the power cord immediately.
  - Let some fresh air in immediately (Ventilation).
  - Have a service center check the projector’s condition and replace the lamp.
  - Do not disassemble the projector.
