Please read this manual carefully before operating your set. Retain it for future reference. Record model number and serial number of the set. See the label attached on the bottom of the set and quote this information to your dealer when you require service.

Model number: 
Serial number: 

Model number: BX401C
Owner’s Manual
Warning
This is a class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.
Disposal of your old appliance

1. When this crossed-out wheeled bin symbol is attached to a product it means the product is covered by the European Directive 2002/96/EC.
2. All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.
3. The correct disposal of your old appliance will help prevent potential negative consequences for the environment and human health.
4. For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service or the shop where you purchased the product.
# Safety Instructions

Please take note of the safety instructions to prevent any potential accident or misuse of the projector.

→ Safety Instructions are given in two forms as detailed below.

⚠️ **WARNING** : The violation of this instruction may cause serious injuries and even death.

⚠️ **NOTES** : The violation of this instruction may cause light injuries or damage to the projector.

→ After reading this manual, keep it in the place that the user always can contact easily.

## Indoor Installation

<table>
<thead>
<tr>
<th><strong>WARNING</strong></th>
<th><strong>NOTES</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not place the Projector in direct sunlight or near heat sources such as radiators, fires and stove etc. This may cause a fire hazard!</td>
<td>Do not place inflammable materials beside the projector This may cause a fire hazard!</td>
</tr>
<tr>
<td>Do not allow children to hang on the installed projector. It may cause the projector to fall, causing injury or death.</td>
<td></td>
</tr>
</tbody>
</table>

### Disconnect from the mains and remove all connections before moving.

- Do not place the projector close to sources of steam or oil such as a humidifier. This may create a fire hazard or an electric shock hazard!
- Do not place the projector where it might be exposed to dust. This may cause a fire hazard or damage to the unit!

### When installing the projector on a table, be careful not to place it near the edge.

- Do not place the projector on a table where it might cause the projector to fall causing serious injury to a child or adult and serious damage to the projector. **Only use a suitable stand.**
- Ensure good ventilation around the projector. The distance between the projector and the wall should be more than 30cm/12 inches. An excessive increase in its internal temperature may cause a fire hazard or damage to the unit!

### Do not block the vents of the projector or restrict air-flow in any way.

- This would cause the internal temperature to increase and could cause a fire hazard or damage to the unit!
- Do not place the projector directly on a carpet, rug or place where ventilation is restricted. This would cause its internal temperature to increase and might create a fire hazard or damage the unit.

### Ensure good ventilation around the projector. The distance between the projector and the wall should be more than 30cm/12 inches.

- An excessive increase in its internal temperature may cause a fire hazard or damage to the unit!

### When installing the projector on a table, be careful not to place it near the edge.

- This may cause the projector to fall causing serious injury to a child or adult and serious damage to the projector.
- Only use a suitable stand.

### Disconnect from the mains and remove all connections before moving.

- Do not place the projector on a level and stable surface. It may fall and cause injury and/or damage to the unit.
- Ensure good ventilation around the projector. The distance between the projector and the wall should be more than 30cm/12 inches. An excessive increase in its internal temperature may cause a fire hazard or damage to the unit!

### Outdoor Installation

- Do not use the projector in a damp place such as a bathroom where it is likely to get wet. This may cause a fire or an electric shock hazard!

### Power

<table>

</tbody>
</table>

**CAUTION concerning the Power Cord**

Most appliances recommend they be placed upon a dedicated circuit; that is, a single outlet circuit which powers only that appliance and has no additional outlets or branch circuits. Check the specification page of this owner’s manual to be certain.

Do not overload wall outlets. Overloaded wall outlets, loose or damaged wall outlets, extension cords, frayed power cords, or damaged or cracked wire insulation are dangerous. Any of these conditions could result in electric shock or fire. Periodically examine the cord of your appliance and if its appearance indicates damage or deterioration, unplug it, discontinue use of the appliance, and have the cord replaced with an exact replacement part by an authorized service personnel.

Protect the power cord from physical or mechanical abuse, such as being twisted, kinked, pinched, closed in a door, or walked upon. Pay particular attention to plugs, wall outlets, and the point where the cord exits the appliance.
## Safety Instructions

### Using

<table>
<thead>
<tr>
<th>WARNING</th>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Never touch the wall outlet when there is leakage of gas, open the windows and ventilate. It can cause a fire or a burn by a spark.</td>
<td>Do not drop the projector or allow impact shock. This may cause mechanical failure or personal injury!</td>
</tr>
<tr>
<td>Don't look at laser beam directly as it can cause eye damage!</td>
<td></td>
</tr>
</tbody>
</table>

Always open the lens door or remove the lens cap when the projector lamp is on.

<table>
<thead>
<tr>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not place heavy objects on top of projector. This may cause mechanical failure or personal injury!</td>
</tr>
<tr>
<td>Take care not to impact the lens particularly when moving the projector.</td>
</tr>
<tr>
<td>Do not touch the lens of the projector. It is delicate and easily damaged.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not use any sharp tools on the projector as this will damage the casing.</td>
</tr>
</tbody>
</table>

### Cleaning

<table>
<thead>
<tr>
<th>WARNING</th>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not use water while cleaning the projector. This may cause damage to the projector or an electric shock hazard.</td>
<td>In the unlikely event of smoke or a strange smell from the projector, switch it off, unplug it from the wall outlet and contact your dealer or service centre. This may cause a fire or an electric shock hazard or damage to the unit!</td>
</tr>
<tr>
<td>Use an air spray or soft cloth that is moist with a neutral detergent and water for removing dust or stains on the projection lens.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contact the Service Center once a year to clean the internal parts of the projector. Accumulated dust can cause mechanical failure.</td>
</tr>
<tr>
<td>When cleaning the plastic parts such as projector case, unplug the power and wipe it with a soft cloth. Do not use cleanser, spray water or wipe with a wet cloth. Especially, never use cleanser (glass cleaner), automobile or industrial shiner, abrasive or wax, benzene, alcohol etc., which can damage the product. Use an air spray or soft cloth that is moist with a neutral detergent and water for removing dust or stains on the projection lens. It can cause fire, electric shock or product damage (deformation, corrosion and damage).</td>
</tr>
</tbody>
</table>

### Others

<table>
<thead>
<tr>
<th>WARNING</th>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not attempt to service the projector yourself. Contact your dealer or service centre. This may cause damage to the projector and could give an electric Shock as well as invalidating the warranty!</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Be sure to unplug if the projector is not to be used for a long period. Accumulated dust may cause a fire hazard or damage to the unit!</td>
</tr>
<tr>
<td>Refer lamp servicing to qualified service personnel.</td>
</tr>
<tr>
<td>Do not mix new batteries with old batteries. This may cause the batteries to overheat and leak.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Only use the specified type of battery. This could cause damage to the remote control.</td>
</tr>
</tbody>
</table>
Names of parts

**Main Body**

* The projector is manufactured using high-precision technology. You may, however, see on the Projector screen tiny black points and/or bright points (red, blue, or green). This can be a normal result of the manufacturing process and does not always indicate a malfunction.

- **OK Button**: Checks present mode and saves the function changes.
Remote Control

Installing Batteries

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED WITH AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

- Open the battery compartment cover on the back of the remote control.
- Insert the specified type of batteries with correct polarity, match "+" with "+", and match "-" with "-".
- Install two 1.5V AAA batteries. Don’t mix used batteries with new batteries.

Installing and Composition

**Installation Instructions**

* Don’t place the projector in the following conditions. It may cause malfunction or product damage.

- **Provide proper ventilation for this projector.**
  - The projector is equipped with ventilation holes (intake) on the bottom and ventilation holes (exhaust) on the front. Do not block or place anything near these holes, or internal heat build-up may occur, causing picture degradation or damage to the projector.
  - Do not place the projector on a carpet, rug or other similar surface. It may prevent adequate ventilation of the projector bottom. This product should be mounted to a wall or ceiling only.

- **Never push projector or spill any kind of liquid into the projector.**
  - Leave an adequate distance (30cm/12 inches or more) around the projector.

- **Place this projector in adequate temperature and humidity conditions.**
  - Install this projector only in a location where adequate temperature and humidity is available. (refer p.41)
  - Don’t place the projector where it can be covered with dust.
  - This may cause overheating of the projector.

- **Do not obstruct the slots and openings of the projector. This may cause overheating and create a fire hazard.**

- **The projector is manufactured using high-precision technology. You may, however, see tiny black points and/or bright points (red, blue, or green) that continuously appear on the projector Screen. This is a normal result of the manufacturing process and does not indicate a malfunction.**

- **To display DTV programs, it is necessary to purchase a DTV receiver (Set-top Box) and connect it to the projector.**

- **When the remote control does not work during operation.**
  - The remote control may not work when a lamp equipped with electronic ballast or a three-wavelength lamp is installed. Replace those lamps with international standard products to use the remote control normally.
Basic Operation of the Projector

1. Place the projector on a sturdy and horizontal surface with the PC or AV source.
2. Place the projector with the desired distance from the screen. The distance between the projector and the screen determines the actual size of the image.
3. Position the projector so that the lens is set at a right angle to the screen. If the projector is not set at a right angle, the screen image will be crooked. If this is so then the keystone adjustment may correct this (Refer to page 27.).
4. Connect the cables of the projector to a wall power socket and other connected sources.

## Projection Distance Based on the Picture Format

</tbody>
</table>

*The longest/shortest distance show status when adjusted by the zoom function.*
Using Kensington Security System

• The projector has a ‘Kensington’ Security System Connector on the side panel. Connect the ‘Kensington’ Security System cable as below.

• For the detailed installation and use of the Kensington Security System, refer to the user’s guide attached to the Kensington Security System set. And for further information, contact http://www.kensington.com, the internet homepage of the Kensington company that deals with expensive electronic equipment such as notebook PCs or projectors.

• Kensington Security System is an optional item.
Turning on the Projector

1. Connect power cord correctly.

2. Remove the lens cap. If it is left on, it could become deformed due to the heat produced by the projection lamp.

3. Press the **POWER** button on the remote control or top cover.
   (Green operation indicator flashes if lamp is in start-up cycle.)
   - An image will appear after the operation indicator light turns (Green).
   - Select the source mode with the SOURCE button.

**Note!**
* Do not disconnect the power cord during the suction/discharge fan in operation. If the power cord is disconnected during the suction/discharge fan in operation, it may takes longer to activate the lamp after turning on the power and the lifespan of the lamp may be shortened.

Turning off the Projector

1. Press the **POWER** button on the top cover or remote control.

2. Press the **POWER** button on the top cover or remote control again to turn off the power.

3. If the operation indicator LED is orange and blinking, do not disconnect (10 sec.) the supply until the operation indicator LED is lit constantly (orange).
   - If the operation indicator LED is orange and blinking, the power button on the top cover or on the remote control will not operate.
   - This projector features the Quick Power On/Off function that allows a user to turn it on and off quickly.

* What is the Quick Power On/Off function?
The projector enters into Standby mode without waiting it is cooled.
If Standby mode continues for a certain amount of time, the projector can operate without cooling when it is turned on.
Focus and Position of the Screen Image

When an image appears on the screen, check if it is in focus and fits well to the screen.

To adjust the focus of the image, rotate the focus ring which is the outer ring on the lens.
To adjust the size of the image, rotate the zoom ring which is the inner ring on the lens.

To raise or lower the image on the screen, extend or retract the foot at the bottom of the projector by pushing foot adjusting button as below.

1. While pressing the foot adjusting button, raise or lower the projector to place the screen image in the proper position.
2. Release the button to lock the foot in its new position.
3. Turn the foot at the back left or right to make a fine tune of the length of the projector.
   After raising the front foot, do not press down on the projector.

Selecting source mode

1. Press the **SOURCE** button on the remote control or the control panel.

2. After moving into desiring input by pressing *, button, please press the confirm button.
   - When a signal cable is plugged in and there 's a signal, the selecting item is activated as white, and if there 's no signal, the selecting item is deactivated as gray.
   - If pressing the input selection button, it is possible to select activated item.
   - It is possible to watch by selecting RGB 1 for Component 1 input and RGB 2 for Component 2 input, and in case of Component, even though there 's an input signal, the OSD item is not activated.
Connection

Connecting to a Desktop PC

* You can connect the projector to a computer of VGA, SVGA, XGA and SXGA output.
* Refer to page 40 for the supported monitor displays of the projector.
* You can select an RGB input from the Monitor Out menu that will be output to RGB OUT (RGB1 or RGB2).

<To use by connecting to RGB>

Connect the RGB IN-1 of the projector and the computer output port with computer cable.

* You can also connect to the RGB IN-2 port.

Connecting to a Notebook PC

<How to connect>

Connect the RGB IN-1 of the projector and the computer output port with computer cable.

* If you set your computer to output the signal to both the display of your computer and the external projector, the picture of the external projector may not appear properly. In such cases, set the output mode of your computer to output the signal only to the external projector. For details, refer to the operating instructions supplied with your computer.

* You can also connect to the RGB IN-2 port.

<To use by connecting to HDMI terminal>

Please connect projector’s HDMI IN terminal and computer’s output terminal by using HDMI to DVI cable.
Connecting to a Video Source

* You can connect a VCR, a camcorder or any other compatible video image source to the projector.

< How to connect >
a. Connect the Video input jacks of the projector to the output jacks of the A/V source with Video cable.

Connecting to a DVD

* The output jacks (Y, Pb, Pr) of the DVD might be labeled as Y, Pb, Pr / Y, B-Y, R-Y / Y, Cb, Cr according to the equipment.

< How to connect >
a. Connect the DVD Component cable to the RCA to D-Sub Adapter and then connect the RCA to D-Sub Adapter to RGB IN-1 of the projector.
* When connecting the component cable, match the jack colors with the component cable (Y=green, Pb=blue, Pr=red)
* You can also connect to the RGB IN-2 port.

</tbody>
</table>

Connecting to a D-TV Set-Top Box

* To receive D-TV programmes, it is necessary to purchase a D-TV receiver (Set-Top Box) and connect it to the projector.
* Please refer to the owner’s manual of the D-TV Set-Top Box for the connection between projector and D-TV Set-Top Box.

< How to connect a HDMI source >
a. Connect the HDMI IN terminal of the projector to the HDMI output terminal of the D-TV Set-Top Box via HDMI cable.
b. Use a DTV receiver with DTV 480p(576p)/720p/1080i mode. * No support of audio.

< How to connect a Component source >
a. Connect the D-TV Set-Top Box Component cable to the RCA to D-Sub Adapter and then connect the RCA to D-Sub Adapter to RGB IN-1 of the projector.
* When connecting the component cable, match the jack colors with the component cable (Y=green, Pb=blue, Pr=red)
* You can also connect to the RGB IN-2 port.
* No support of audio.
Function

* In this manual, the OSD (On Screen Display) may be different from your Projector’s because it is just an example to help with the Projector operation.
* This operating guide explains operation of RGB(PC) mode mainly.

Video Menu Options

1. Press the MENU button and then use < . > button to select the menu.
2. Press the ^ , v button to select a video item you want to adjust.
3. Press the < . > button to adjust the screen condition as you want.
   - Each adjustment of menu options will not affect other inputs.
   - When receiving an NTSC signal, the picture item Tint is displayed and can be adjusted.(60Hz only)
   - You can adjust contrast by pressing the button on the remote control.
   - You can adjust brightness by pressing the button on the remote control.
   - Press the MENU button twice or the EXIT button to exit the menu screen.

Picture mode

* Use Picture mode function to set the projector for the best picture appearance.
1. Press the MODE button on the remote control.
2. Press the < . > button to adjust the screen condition as you want.
   - Each press of the < . > button changes the screen as shown below.

   - You can use this function through the MENU button.
   - To exit the menu display, press the EXIT button.
1. Press the **MENU** button and then use < , > button to select the **menu**.

2. Press the **button to select ** item.

3. Press the < , > button to make desired adjustments.

   - Each press of the < , > button changes the screen as shown below.

   - This function can be inactivated depends on the Picture mode. When the Picture mode is set in Bright or Golf, you can’t adjust Color temperature function.

   - Press the **button twice or the ** button to exit the menu screen.

**Gamma Function**

1. Press the **button on the remote control.

2. Press the < , > button to select the screen condition you want.

   - Each press of the < , > button changes the screen as shown below.

   - You can use this function through the **button.

   - To exit the menu display, press the ** button.

**Gamma curve shift Function**

- This function shifts the gamma curves for Red, Green and Blue individually to adjust brightness.

1. Press the **button and then use < , > button to select the ** menu.

2. Press the ** button to select ** item.

3. Press the ** button.

4. When the window below appears, press < , > button to move between the items and the < , > buttons to adjust the screen as you want.

   - **Gamma curve shift Red, Green, Blue** can be adjusted between -20 and 20.

   - Press the **button twice or the ** button to exit the menu screen.
1. Press the **W.PEAK** button on the remote control.
2. Press the , button to select the screen condition you want.
3. Adjust to higher setting to achieve brighter picture. Adjust to lower setting for darker picture.
4. You can use this function through the **MENU** button.
5. To exit the menu display press the **EXIT** button.

* What is the **Brilliant color™** function?
This function increases the entire brightness of the screen or decreases it a little to make the rich grayscale color.

1. Press the **MENU** button and then use < , > button to select the menu.
2. Press the , button to select **Brilliant color™** item.
3. Press the < , > button to select On or Off.
4. Press the **MENU** button twice or the **EXIT** button to exit the menu screen.

1. Press the **W.PEAK** button on the remote control.
2. Press the < , > button to select the screen condition you want.

- The default value may change depending on input mode.
- **White peaking** can be adjusted from 0 to 10.
- Adjust to higher setting to achieve brighter picture. Adjust to lower setting for darker picture.
- You can use this function through the **MENU** button.
- To exit the menu display press the **EXIT** button.

* What is the **Black level** function?
When you watch the movie, this function adjusts the set to the best picture appearance. Adjusting the contrast and the brightness of the screen using the black level of the screen.
**Expert color Function**

- This function allows a user to adjust the Gain, Saturation and Hue for Red, Green, Blue, Cyan, Magenta and Yellow individually.

1. Press the **MENU** button and then use < , > button to select the menu.

2. Press the < , > button to select **Expert Color** item.

3. Press the **OK** button.

4. When the window above appears, press < , > button.

5. Press the < or > button to move between the items and the < or > buttons to adjust the screen as you want.

- **Red, Green, Blue, Cyan, Magenta** and **Yellow Gain** can be adjusted between 0 and 100.
- **Saturation-Red, Green, Blue, Cyan, Magenta** and **Yellow** can be adjusted between 0 and 100.
- **Hue-Red, Green, Blue, Cyan, Magenta** and **Yellow** can be adjusted between -50 and 50.
- Press the **MENU** button twice or the EXIT button to exit the menu screen.
- An advanced settings function is possible to be saved according to an image mode.

**Reset**

- To return to the factory default settings, select [Reset] with < , > buttons and press **OK** button.
Special Menu Options

Selecting Language

1. Press the **MENU** button and then use <, > button to select the **Cursor** menu.
2. Press the ▲, ▼ button to select **Language** item.
3. Press the <, > button to select the language you want to use.
   - On-Screen-Display (OSD) is displayed in the selected language.
   - Press the **MENU** button twice or the **EXIT** button to exit the menu screen.

Using ARC Function

1. Press the **RATIO** button.
   Each press of the button changes the display as below.

```
4:3          16:9
```

- You can also use this function by using the **MENU** button.

Overscan Function

1. Press the **MENU** button and then use <, > button to select the **Cursor** menu.
2. Press the ▲, ▼ button to select **Overscan** item.
3. Press the <, > buttons.
   - The **Overscan** function can be adjusted only in RGB, HDMI and Component modes.
   - The **Overscan** function can be adjusted between Off and 10%.
   - The **Overscan** function cannot be adjusted if the Zoom +/- in Digital Zoom is set to a value other than 100%.
   - Press the **MENU** button twice or the **EXIT** button to exit the menu screen.
**Flip horizontal Function**

* This function reverses the projected image horizontally. Use this function when rear projecting an image.

1. Press the **MENU** button and then use < , > button to select the menu.
2. Press the ^ , ^ button to select **Flip horizontal** item.
3. Press the **OK** button to see reversed image.
   - Each time you press the **OK** button, the image will be reversed.
   - Press the **MENU** button twice or the **EXIT** button to exit the menu screen.

**Flip vertical Function**

* This function reverses the projected image vertically.
* When you hang the projector upside down from the ceiling, you will need to reverse the image vertically and horizontally.

1. Press the **MENU** button and then use < , > button to select the menu.
2. Press the ^ , ^ button to select **Flip vertical** item.
3. Press the **OK** button to see reversed image.
   - Each time you press the **OK** button, the image will be reversed.
   - Press the **MENU** button twice or the **EXIT** button to exit the menu screen.

**Sleep time Function**

* The sleep timer turns the projector off at the preset time.

1. Press the **SLEEP TIME** button of remote control.
2. Press the < , > button to select the desired preset time.
   - Each press of the < , > button changes the screen as shown below.

<table>
<thead>
<tr>
<th>Off</th>
<th>10 Min</th>
<th>20 Min</th>
<th>30 Min</th>
<th>60 Min</th>
</tr>
</thead>
<tbody>
<tr>
<td>240 Min</td>
<td>180 Min</td>
<td>120 Min</td>
<td>90 Min</td>
<td></td>
</tr>
</tbody>
</table>

* You can use this function through the **MENU** button.
* To exit the menu display press the **EXIT** button.
Auto sleep Function

1. Press the MENU button and then use < , > button to select the  menu.
2. Press the  button to select Auto sleep item.
3. Press the < , > button to select the desired preset time.
   - Press the MENU button twice or the EXIT button to exit the menu screen.

<table>
<thead>
<tr>
<th>Setting</th>
<th>10 Min</th>
<th>20 Min</th>
<th>30 Min</th>
<th>60 Min</th>
</tr>
</thead>
<tbody>
<tr>
<td>240 Min</td>

<td>120 Min</td>
<td>90 Min</td>
<td></td>
</tr>
</tbody>
</table>

Presentation timer Function

1. Press the TIMER button of remote control.
2. Press the  button to select Time alarm or Time keeper item.
3. Press the < , > button to select the desired preset time.
4. The timer starts to operate if you select specific time.
   - Time alarm function : If you select a specific time, it is displayed in minute units. After 1 minute, the remaining time is displayed at the bottom right of the screen, and then disappears after 5 seconds. When the remaining time is displayed, other OSD windows are closed. When the set time is reached, ‘0 minute’ flickers 10 times at 1 second intervals, and then disappears.
   - Time keeper function : If you select a specific time, it continues to be displayed in minute(‘) and second(”) units. Even though other OSD windows appear, the remaining time is displayed again after the windows are closed. When the set time is reached, ‘0’ 00’ flickers 10 times at 1 second intervals, and then disappears.
5. If the set time disappears because of the use of other menus, press the TIMER button on a remote to display the set time again.
   - The Time alarm function and the Time keeper function cannot be used at the same time.
   - The Time alarm function can be set from 5 to 60 minutes at 5 minute intervals (Off, 5, 10, 15, 20, ............, 55, 60 minutes).
   - The Time keeper function can be set from 1 to 10 minutes at 1 minute intervals, and from 10 to 60 minutes at 5 minute intervals (Off, 1, 2, 3, 4, ............, 8, 9, 10, 15, 20, 25, ............, 55, 60 minutes).
   - You can use this function through the MENU button.
   - Press the EXIT button to exit the menu screen.
Using Digital Zoom Function

* This function is available only in RGB input mode. The Zoom -/+ and Position values return to their defaults when you change the SOURCE or input signal, or turn the power off.

### Adjusting the Zoom

1. Press the **ZOOM** button on the remote control.
2. Press the **/,** button to select **Zoom -/+** item.
3. Press the **<,>** button to adjust Zoom -/+ to your choice.
   - You can adjust Zoom -/+ in 5% increments from 100% to 250%.
   - You can also use this function by using the **MENU** button.
   - Press the **EXIT** button to exit the menu screen.

### Adjusting the Position

1. Press the **ZOOM** button on the remote control.
2. Press the **/,** button to select **Position** item.
3. Press the **OK** button. When the window below appears at the bottom right corner of the screen, press the **/>** to adjust the position. When the arrow turns black, maximum adjustment has been reached and no further adjustment can be made.

   - Position is activated only when Zoom -/+ is set to more than 105%.
   - You can also use this function by using the **MENU** button.
   - Press the **EXIT** button to exit the menu screen.
To use keystone function

1. Press the KEYSTONE button on the remote control.

2. Press the <, > button to select an item.

3. Press the ∧, ∨ button to select the item (H or V) you want, and press the <, > button to adjust it.
   - You can adjust each item from 0 to 100.
   - The default value may change depending on input mode.
   - You can also use this function by using the MENU button.
   - Press the MENU button to exit the menu screen.

To select a background image

1. Press the KEYSTONE button on the remote control.

2. Please select a Background image by ∧, ∨ button.

3. Please select desiring item by <, > button.
   - If there’s no input signal, it is possible to adjust keystone by using the adjusting pattern.

Using Blank Function

* This function may be effective if you need to get the attention of the audience during presentations, meetings or briefings.

1. Press the BLANK button.
   - The screen turns off to a background color.
   - You can choose the background color.
   (Refer to "Selecting blank image color"

2. Press any button to cancel the blank function.
   - To temporarily turn off the lamp, press BLANK on the remote control. Do not block the projection lens with any objects when the projector is under operation as this could cause the objects to become heated and deformed or even cause a fire.
Selecting Blank image

1. Press the MENU button and then use , button to select the menu.
2. Press the , button to select Blank image item.
3. Press the , button to select the color you want to use.
   • Background image will be altered to the selected Blank image function.
   • You can choose blue, black, green, or captured image for the Blank image.
   • If you have a captured image, you can use it as a blank image instead of logo image. And you only have one last captured image.
   • When you select the Captured image, displays a logo, if you don’t have a captured image.
   • Press the MENU button twice or the EXIT button to exit the menu screen.

Captured Image Function

1. Press the MENU button and then use , button to select the menu.
2. Press the , button to select Captured Image item.
3. Press the OK button to capture actual screen image.
4. Press the OK button again to save Screen capture image.
   • You can use the captured image as a Blank image.
   • You can not use the remote control when this function is in use.
   • If you want see your captured image, select Captured image in the Blank image function.
   • Press the MENU button twice or the EXIT button to exit the menu screen.

Lamp mode Function

1. Press the LAMP button of remote control.
2. Press the , button to adjust the screen condition as you want.
   • Each press of the , button changes the screen as shown below.
   • The menu automatically disappears at specific temperature (more than 35°C).
   • It is automatically changed into power saving mode at specific temperature (more than 35°C).
   • You can use this function through the MENU button.
   • To exit the menu display, press the EXIT button.
Function

Using Monitor out Function

* You can select either of the two RGB inputs.

1. Press the MENU button and then use <, > button to select the menu.
2. Press the ^, button to select Monitor Out item.
3. Press the <, > button to select RGB1, RGB2 or Auto.
   - Press the MENU button twice or the EXIT button to exit the menu screen.
   - Auto mode is the mode to output an image of currently seeing input among RGB1 or RGB2 input.

Checking lamp time

1. Press the MENU button and then use <, > button to select the menu.
2. The used lamp time is displayed.
   - When projector lamp is reaching the end of its life, the lamp indicator will turn red. (Refer to the page 10.)
   - The lamp warning LED illuminates red continuously in the case of excessive lamp time.
   - Press the MENU button twice or the EXIT button to exit the menu screen.

Using Still Function

1. Press the STILL button of remote control.
   * You can freeze the input image.

   <Moving Image>  <Still Image>

2. To exit STILL, press any button.
   * The STILL function will release automatically after approximately 10 minutes.
Screen Menu Options

Auto configure Function

* This function assures you of getting the best video quality by automatically adjusting the horizontal size and synchronization of the image.
* Auto Tracking function works in RGB PC input only.

1. Press the AUTO button of the remote controller.
   - Image positioning and synchronization are automatically adjusted.

2. If any more manual adjustment is needed according to the various PC mode inputs even after the auto-correction, execute Phase, Clock, Horizontal and Vertical function in menu. In certain circumstances, you can’t get the best picture quality by only using auto-correction.

Note!

You can also use this function by using the MENU button. (Only in RGB mode)
For best results, perform this function while displaying a still image.

Using Phase Function

1. Press the MENU button and then use < , > button to select the menu.

2. Press the ^ , v button to select Phase item.

3. Press the < , > button to make desired adjustments.
   - Phase adjustment range is 0 ~63.
   - The variable range can be different depends on input resolutions.
   - Press the MENU button twice or the EXIT button to exit the menu screen.

Using Clock Function

1. Press the MENU button and then use < , > button to select the menu.

2. Press the ^ , v button to select Clock item.

3. Press the < , > button to make desired adjustments.
   - Clock adjustment range is -20 ~ 20.
   - The variable range can be different depends on input resolutions.
   - Press the MENU button twice or the EXIT button to exit the menu screen.
Using Horizontal Function

1. Press the **MENU** button and then use `< . >` button to select the ** menu.

2. Press the `^ , v` button to select **Horizontal** item.

3. Press the `< , >` button to make desired adjustments.
   - **Horizontal** adjustment range is -50 ~ 50.
   - The variable range can be different depends on input resolutions.
   - Press the **MENU** button twice or the **EXIT** button to exit the menu screen.

Using Vertical Function

1. Press the **MENU** button and then use `< . >` button to select the ** menu.

2. Press the `^ , v` button to select **Vertical** item.

3. Press the `< , >` button to make desired adjustments.
   - **Vertical** adjustment range is -25 ~ 25.
   - The variable range can be different depends on input resolutions.
   - Press the **MENU** button twice or the **EXIT** button to exit the menu screen.
External Control Device Setup

* Connect the RS-232C input jack to an external control device (such as a computer) and control the Projector's functions externally.

**SET ID**

1. Press the MENU button and then use < , > button to select the menu.
2. Press the OK button and then use , button to select Set ID item.
3. Press the < , > button to select your desired number.
   Press the OK button to save the selected number.
   - The adjustment range of Set ID is 1~99.
   - Only the projector with the specified ID number will operate from the remote control.
   - Press the MENU button twice or the EXIT button to exit the menu screen.

How to connect external control equipment

- Connect the serial port of the PC to the RS-232C jack on the projector back panel.
- RS-232C cable is not supplied with the projector.

- Use the RS232C cable to control the projector externally (Refer to Fig.1).

**Communication Parameter Setup**

- Baud Rate : 9600 bps(UART)
- Data Length : 8 bit
- Parity : none
- Stop bit : 1 bit
- Flow Control : none
- Communication code : ASCII code

External control device setup

1. Transmission

<table>
<thead>
<tr>
<th>Command1</th>
<th>Command2</th>
<th>[Set ID]</th>
<th>[Data]</th>
<th>[Cr]</th>
</tr>
</thead>
</table>

- **[Command1]**: First command to control the set. (ASCII code, 1 Character)
- **[Command2]**: Second command to control the set. (ASCII code, 1 Character)
- **[Set ID]**: You can adjust the set ID to choose desired projector ID number in special menu. See previous page.
- **[DATA]**: To transmit command data. Transmit 2 character when organized ASCII code.
- **[Cr]**: Carriage Return ASCII code ‘0x0D’
- **[ ]**: ASCII code character correspond to "Space Bar" which is in order to classify command, set ID and Data.

2. OK Acknowledgement

<table>
<thead>
<tr>
<th>[Command2]</th>
<th>[Set ID]</th>
<th>[OK]</th>
<th>[Data]</th>
<th>[x]</th>
</tr>
</thead>
</table>

* The Projector transmits ACK (acknowledgement) based on this format when receiving normal data. At this time, if the data is data read mode, it indicates present status data. If the data is data write mode, it returns the data of the PC computer.

3. Error Acknowledgement

<table>
<thead>
<tr>
<th>[Command2]</th>
<th>[Set ID]</th>
<th>[NG]</th>
<th>[Data]</th>
<th>[x]</th>
</tr>
</thead>
</table>

* The Projector transmits ACK (acknowledgement) based on this format when receiving abnormal data from non-viable functions or communication errors.

Data : [1] : Illegal code (This command is not supported.)
[2] : Not support function (This function doesn’t work.)
[3] : wait and retry (Try again a few minute later.)

01. Power (Command:ka)

> To control Power On/Off of the Projector.

**Transmission**

<table>
<thead>
<tr>
<th>[k]</th>

* Cable type
1- RCA to D-Sub Adapter
2- HDMI to HDMI Cable

Maintenance

* The projector needs little maintenance. You should keep the lens clean because any dirt or stains may appear on the screen. If any parts need to be replaced, contact your dealer. When cleaning any part of the projector, always turn the power off and unplug the projector first.

Cleaning the lens

Clean the lens whenever you notice dirt or dust on the surface of it. Wipe the lens surface gently with an air spray or a soft, dry lint-free cloth.

To remove dirt or stains on the lens, moisten a soft cloth with water and a neutral detergent and wipe the lens surface gently.

Cleaning the Projector Case

To clean the projector case, first unplug the power cable. To remove dirt or dust, wipe the casing with a soft, dry, lint-free cloth. To remove stubborn dirt or stains, moisten a soft cloth with water and a neutral detergent and then wipe the casing.

Do not use alcohol, benzene, thinners or other chemical detergents as these can cause the casing to be warped or discolored.
Replacing the Lamp

Lamp Replacement

The change interval of lamp may depend on the use environment of Projector. You can see the used lamp time in the CHECKING LAMP TIME section of the Menu (page.29). You must replace the lamp when:

- The projected image gets darker or starts to deteriorate.
- The lamp indicator is red.
- The message “Replace the lamp” appears on the screen when turning the projector on.

Be careful when replacing lamp

- Press the POWER button on the control panel or remote control to turn off power.
- If the operation indicator LED is orange and blinking, do not disconnect the main supply until the operation indicator LED is lit up constantly (orange).
- Allow the lamp to cool for 1 hour before replacing it.
- Replace only with the same type lamp from an LG Electronics Service Center. Using another manufacturers lamp may cause damage to the Projector and lamp.
- Pull out the lamp only when replacing the lamp.
- Keep the lamp unit out of reach of children. Keep the Lamp away from heat sources such as radiators, stoves etc.
- To reduce the risk of fire do not expose the lamp to liquids or foreign materials.
- Do not place the lamp near any heat source.
- Make sure the new lamp is securely tightened with screws. If not, the image may be dark or there could be an increased risk of fire.
- Never touch the lamp unit glass otherwise image quality may be compromised or lamp life maybe reduced.

To obtain a replacement Lamp unit

Lamp model number is on page 42. Check the lamp model and then purchase it from an LG Electronics Service Center. Using another manufacturers lamp may cause damage to the projector.

Lamp unit disposal

Dispose of the used lamp by returning it to the LG Electronics Service Center.
Replacing the Lamp

1 Turn off the projector and unplug the power cable. Carefully place on a cushioned surface. (Allow the lamp to cool for 1 hour before removing the used lamp from the projector.)

2 Unscrew the screw from the lamp cover using a screwdriver.

3 After lifting the lamp cover off, remove the two retaining screws on the lamp case with a screwdriver.

4 Lift the lamp up from the projector.

5 Pull out the handle slowly and remove the lamp case.

6 Insert the new lamp gently into the correct position. Make sure it is inserted correctly.

7 Tighten the screws you removed in step 3. (Make sure they are fixed firmly.)

8 Close the lamp cover and install the screws from step 2 to install the cover. (If the lamp cover is not installed correctly the unit will not power on.)

Note!
Using another manufacturers lamp may cause damage to the projector or lamp. Make sure the lamp cover is securely fastened. If the lamp cover is not installed correctly the unit will not power on. If this fault persists contact an LG Authorized Service Center.
Preparation Information

### How to fix the lens cap to the projector

**How to fix the lens cap**

1. Prepare the lens cap and the strap supplied as accessories.

   ![Image 1]

   Fix the strap at the hole of the projector into the hole of the lens cap, and then pass the lens cap through the strap lasso.

2. Insert the non-knot end of the strap into the hole at the bottom of the lens section of the projector.

   ![Image 2]

3. They are completely assembled as shown at the below figure.

   ![Image 3]

**Regarding the projector lamp control**

⚠️ **WARNING**

- Don’t turn off the projector at least in 5 minutes after activating it.
  - The frequent On/Off changes may cause the lamp function to deteriorate.

- Don’t pull out the power cord while activating the projector and the cooling fan.
  - It may cause the lamp life-span to shorten and get damaged.

- The life-span of projector may considerably depend on the use environment and treatment conditions.

- The projector uses the high pressure mercury lamp so that the serious caution is essential. The shock or abuse while using may cause lamp to blow off with explosion.

- When you continue to use the projector after an interval of lamp replacement, the lamp may be blown off with explosion.

- The following treatment should be done, in case of lamp blow-off.
  - Pull off the power cord immediately.
  - Let some fresh air in immediately (Ventilation).
  - Check the product condition at the nearer service center and replace it with new lamp, if necessary.
  - Don’t try to disassemble the product without the authorized technician.

**WARNING**
