Thank you for purchasing this projector.

⚠️ WARNING ➤ Before using this product, please read all manuals for this product. Be sure to read “Safety Guide” first. After reading them, store them in a safe place for future reference.

About this manual
Various symbols are used in this manual. The meanings of these symbols are described below.

⚠️ WARNING This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.

⚠️ CAUTION This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.

 kaz This entry notices of fear of causing trouble.

PLEASE REFER TO THE PAGES WRITTEN FOLLOWING THIS SYMBOL.

NOTE • The information in this manual is subject to change without notice. The illustrations in this manual are for illustrative purposes. They may differ slightly from your projector.
• The manufacturer assumes no responsibility for any errors that may appear in this manual.
• The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

Features

The projector provides you with the broad use by the following features.

- The unique lens and mirror system realizes ultra short distance projection, which gives you more various way of use.
- The motorized lens door offers you very simple use of the projector.
- The double layer filter system is expected to function longer and offers you less maintenance frequency.
- The **HDMI** port can support various image equipment which have digital interface to get clearer pictures on a screen.
- This projector can be controlled and monitored via LAN connection.
- This projector's network supports the PJLink™ standard.
- PJLink™ is a unified standard for operating and controlling data projectors. PJLink™ enables central control of projectors manufactured by different vendors and projectors can be operated by a controller. PJLink™ compliant equipment can be managed and controlled at any time and in any place, regardless of manufacturer.

For the command of PJLink™, see “Technical”.
For specifications of PJLink™, see the web site of the Japan Business Machine and Information System Industries Association.

Checking the contents of package

Please see the **Contents of package** section in the **User’s Manual (concise)** which is a book. Your projector should come with the items shown there. Require of your dealer immediately if any items are missing.

**NOTE** • Keep the original packing materials, for future reshipment. Be sure to use the original packing materials when moving the projector. Use special caution for the lens.
Part names

Projector

(1) Lamp cover (Page 92)
   The lamp unit is inside.
(2) Control panel (Page 5)
(3) Elevator feet (x 2) (Page 23)
(4) Remote sensor (Page 16)
(5) Lens (Page 97)
(6) Intake vents
(7) Filter cover (Page 94)
   The air filter and intake vent are inside.
(8) Battery cover
   The internal clock battery is inside.
(9) Speaker (Page 12, 20, 46)
(10) Exhaust vent
(11) AC IN (AC inlet) (Page 14)
(12) Ports (Page 5)
(13) Security bar (Page 14)
(14) Security slot (Page 14)
(15) Lens door (Page 97)
(16) Mirror (Page 97)
(17) Spacer (Small) (Page 23)
(18) Spacer (Large) (Page 23)

⚠️ WARNING
► HOT! : Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.
► Be careful not to pinch your finger with the lens door, to prevent an injury.
► Never look into the projection lens or mirror while the projection lamp lights, since the projection lamp ray may cause a trouble on your eyes.
► Do not use the security bar and slot to prevent the projector from falling down, since it is not designed for it.

⚠️ CAUTION
► Maintain normal ventilation to prevent the projector from heating up. Do not cover, block or plug up the vents. Do not place anything that can stick or be sucked to the vents, around the intake vents. Clean the air filter periodically.
**Control panel**

(1) **STANDBY/ON** button (18)
(2) **INPUT** button (20)
(3) **POWER** indicator (18, 101, 102)
(4) **TEMP** indicator (101, 102)
(5) **LAMP** indicator (101, 102)

**Buttons** ◄/►/▲/▼

(6) **FOCUS +/−** buttons when no menu is displayed (24), or Cursor ◄/► buttons when a menu is displayed (28). FOCUS +/− function is invalid when the **USB TYPE A** port is selected as the input source.

(7) **MENU** buttons when no menu is displayed (28), or Cursor ▲/▼ buttons when a menu is displayed (28).

The ◄/►/▲/▼ buttons on the projector work only as the cursor buttons while the template is displayed (52).

**Ports** (9 ~ 13)

(1) **USB TYPE A** port
(2) **LAN** port
(3) **HDMI** port
(4) **USB TYPE B** port
(5) **MIC** port
(6) **AUDIO IN1** port
(7) **AUDIO IN2** port
(8) **AUDIO IN3(L,R)** ports

(9) **AUDIO OUT (L,R)** ports
(10) **COMPUTER IN1** port
(11) **COMPUTER IN2** port
(12) **MONITOR OUT** port
(13) **CONTROL** port
(14) **VIDEO** port
(15) **S-VIDEO** port
Remote control

(7) BLANK button (27)
(8) MAGNIFY - ON button (26)
(9) MAGNIFY - OFF button (26)
(10) MY SOURCE/DOC.CAMERA button (21, 58)
(11) VOLUME - button (20)
(12) PAGE UP button (17)
(13) PAGE DOWN button (17)
(14) VOLUME + button (20)
(15) MUTE button (20)
(16) FREEZE button (27)
(17) MY BUTTON - 1 button (57)
(18) MY BUTTON - 2 button (57)
(19) KEYSTONE button (25)
(20) FOCUS - button (24)
(21) FOCUS + button (24)
(22) D-ZOOM - button (23)
(23) D-ZOOM + button (23)
(24) POSITION button (25, 29)
(25) MENU button (28, 29)
(26) ▲ / ▼ /◄ /► cursor buttons (28)
(27) ENTER button (28, 29)
(28) ESC button (28)
(29) RESET button (28)
(30) Battery cover (16)
Install the projector according to the environment and manner the projector will be used in.

**Arrangement**

Refer to table T-1 or T-2 and figures F-1 and F-2 at the end of User’s Manual (concise) to determine the screen size and projection distance.

The values shown in the table are calculated for a full size screen.

- Screen size (diagonal)  
- Projection distance (±8%)  
- Screen height (±8%)

- For the case of installation in special conditions such as on the wall or ceiling, the specified mounting accessories and service may be required. Tabletop use must be setup with the designated optional accessories. Before installing the projector, consult your dealer about your installation.

- The screen position may shift after installation if the projector is mounted on locations such as the wall or ceiling, due to the flexibility of the plastic projector body. If readjustment is necessary, consult with your dealer or service personnel.

- The projected image position and/or focus may change during warm-up (approx. 30 minutes after the lamp is turned on) or when the ambient conditions change. Readjust the image position and/or focus as necessary.

- Since the projector features an ultra short throw, be aware that it is required to select a screen carefully to have better performance.
  - A soft screen such as a pull-down screen may cause serious distortion of a projected image. A hard screen such as a board screen is recommended for use with this projector.
  - A high-gain screen such as a bead screen that has narrow viewing angle is not suitable for this projector. A low-gain screen (around 1.0) such as a matte screen that has wide viewing angle is recommended for use with this projector.
  - A screen with a weave pattern may cause moiré on the projected image, which is not a failure of the projector. A screen that has less moiré effects is recommended for use with this projector.

⚠️ **WARNING**

- Place the projector in a stable horizontal position. If the projector falls or is knocked over, it could cause injury and/or damage to the projector. Using a damaged projector could then result in fire and/or electric shock.

  - Do not place the projector on an unstable, slanted or vibrational surface such as a wobbly or inclined stand.

  - Do not place the projector on its side or front position. To place the projector on its rear position for the table top use, it is required to use the designated optional parts. Consult with your dealer.

  - Consult with your dealer before a special installation such as on the wall or ceiling.

(continued on next page)
Setting up

Arrangement (continued)

⚠️ WARNING ➤ Place the projector in a cool place, and ensure that there is sufficient ventilation. The high temperature of the projector could cause fire, burns and/or malfunction of the projector.
• Do not stop-up, block or otherwise cover the projector’s vents.
• Keep a space of 30 cm or more between the sides of the projector and other objects such as walls.
• Do not place or attach anything that would block the lens or vent holes.
• Do not place the projector on metallic thing or anything weak in heat.
• Do not place the projector on carpet, cushions or bedding.
• Do not place the projector in direct sunlight or near hot objects such as heaters. Do not place the projector where the air from an air conditioner or similar unit will blow on it directly.
• Do not place anything near the projector lens or vents, or on top of the projector.
• Do not place anything that may be sucked into or stick to the vents on the bottom of the projector. This projector has some intake vents also on the bottom.
➤ Do not place the projector anyplace where it may get wet. Getting the projector wet or inserting liquid into the projector could cause fire, electric shock and/or malfunction of the projector.
• Do not place the projector in a bathroom or the outdoors.
• Do not place anything containing liquid near the projector.
• Do not place the projector where any oils, such as cooking or machine oil, are used.
➤ Use only the mounting accessories the manufacturer specified, and leave installing and removing the projector with the mounting accessories to the service personnel.
• Read and keep the user’s manual of the mounting accessories used.

⚠️ CAUTION ➤ Avoid placing the projector in smoky, humid or dusty place. Placing the projector in such places could cause fire, electric shock and/or malfunction of the projector.
• Do not place the projector near humidifiers, smoking spaces or a kitchen. Also do not use an ultrasonic humidifier near the projector. Otherwise chlorine and minerals contained in tap water are atomized and could be deposited in the projector causing image degradation or other problems.
➤ Position the projector to prevent light from directly hitting the projector’s remote sensor.
➤ Do not place the product in a place where radio interference may be caused.
➤ Do not place this product in a magnetic field.
➤ If the projector is used at an altitude of about 1600 m or higher, set FAN SPEED of the SERVICE item in the OPTION menu to HIGH (59). Otherwise, set it to NORMAL.
If the projector is used with a wrong setting, it may cause damage to the projector itself or the parts inside.
Arrangement (continued)

**NOTE** • The projector may make a rattling sound when tilted, moved or shaken, since a flap to control the air flow inside of the projector has moved. Be aware that this is not a failure or malfunction.

**Connecting with your devices**

Before connecting the projector to a device, consult the manual of the device to confirm that the device is suitable for connecting with this projector and prepare the required accessories, such as a cable in accord with the signal of the device. Consult your dealer when the required accessory did not come with the product or the accessory is damaged.

After making sure that the device and projector are turned off, connect them following the instructions below.

⚠️ **WARNING** ► Use only the appropriate accessories. Otherwise it could cause a fire or damage to the device and the projector.
- Use only the accessories specified or recommended by the projector’s manufacturer. Consult your dealer when the required accessory did not come with the product or the accessory is damaged. It may be regulated under some standard.
- For a cable with a core at only one end, connect the end with the core to the projector. That may be required by EMI regulations.
- Neither disassemble nor modify the projector and the accessories.
- Do not use the damaged accessory. Be careful not to damage the accessories. Route a cable so that it is neither stepped on nor pinched out.

⚠️ **CAUTION** ► Do not turn on or off the projector while connected to a device in operation, unless that is directed in the manual of the device. Otherwise it may cause malfunction in the device or projector.
- Be careful not to mistakenly connect a connector to a wrong port. Otherwise it may cause malfunction in the device or projector.
- When connecting a connector to a port, make sure that the shape of the connector fits the port.
- Tighten the screws to connect a connector equipped with screws to a port.
- Use the cables with straight plugs, not L-shaped ones, as the input ports of the projector are recessed.

(continued on next page)
Connecting with your devices (continued)

About Plug-and-Play capability

- Plug-and-Play is a system composed of a computer, its operating system and peripheral equipment (i.e. display devices). This projector is VESA DDC 2B compatible. Plug-and-Play can be used by connecting this projector to a computer that is VESA DDC (display data channel) compatible.
  - Take advantage of this feature by connecting a computer cable to the COMPUTER IN1 port (DDC 2B compatible). Plug-and-Play may not work properly if any other type of connection is attempted.
  - Please use the standard drivers in your computer as this projector is a Plug-and-Play monitor.

- When AUTO is selected for the COMPUTER IN1 or COMPUTER IN2 port in COMPUTER IN of the INPUT menu, that port will accept component video signals (40).
- When the USB TYPE B port and the computer’s type A USB port are connected, you can use the USB TYPE B port as a picture input port from the computer, or use the remote control as a simple mouse and keyboard of the computer. (17, 55).

(continued on next page)
Connecting with your devices (continued)

NOTE • Before connecting the projector to a computer, consult the computer’s manual and check the compatibility of the signal level, the synchronization methods and the display resolution output to the projector.
- Some signal may need an adapter to input this projector.
- Some computers have multiple screen display modes that may include some signals which are not supported by this projector.
- Although the projector can display signals with resolution up to UXGA (1600X1200), the signal will be converted to the projector’s panel resolution before being displayed. The best display performance will be achieved if the resolutions of the input signal and the projector panel are identical.
• If you connect this projector and a notebook computer, you need output the display to an external monitor, or output simultaneously to the internal display and an external monitor. Consult the computer's manual for the setting.
• Depending on the input signal, the automatic adjustment function of this projector may take some time and not function correctly.
- Note that a composite sync signal or sync-on-green signal may confuse the automatic adjustment function of this projector (40).
- If the automatic adjustment function does not work correctly, you may not see the dialog to set the display resolution. In such a case, use an external display device. You may be able to see the dialog and set an appropriate display resolution.

(continued on next page)
Connecting with your devices (continued)

- If you insert a USB storage device, such as a USB memory, into the USB TYPE A port and select the port as the input source, you can view images stored in the device (78).
- You can connect a dynamic microphone to the MIC port with a 3.5 mm mini-plug. In that case, the built-in speaker outputs the sound from the microphone, even while the sound from the projector is output. You can input line level signal to the MIC port from equipment such as wireless microphone. Select HIGH in the MIC LEVEL item of the AUDIO menu when you input line level audio signal to the MIC port. In the normal mode, the volume of the microphone can be adjusted separately from the volume of the projector using the menu. (47)
  In the standby mode, the volume of the microphone is adjustable with the VOLUME +/- buttons on the remote control, in synchronization with the volume of the projector. (20)
  Even when the sound of projector is set to mute mode by the AUDIO SOURCE function (46), the volume of the microphone is adjustable.
  In both modes (standby or normal), the MUTE button on the remote control works on the sounds of the microphone and the projector. (20)

⚠️ CAUTION ⚠️ Before removing the USB storage device from the port of the projector, be sure to use the REMOVE USB function on the thumbnail screen to secure your data (81).

NOTE • If a loud feedback noise is produced from the speaker, move the microphone away from the speaker.
• This projector doesn't support plug-in power for the microphone.
Connecting with your devices (continued)

To use network functions of the projector, connect the LAN port with the computer's LAN port, or with an access point that is connected to the computer with wireless LAN, using a LAN cable. To use NETWORK BRIDGE function, also connect the CONTROL port and an RS-232C port of the external device to communicate as a network terminal. See the User's Manual - Network Guide for details of the network functions.

⚠ CAUTION ⚠ Before connecting the projector to a network system be sure to obtain the consent of the administrator of the network (65).

➤ Do not connect the LAN port to any network that might have the excessive voltage.

NOTE • If an oversized USB storage device blocks the LAN port, use a USB extension cable to connect the USB storage device.
Connecting to a power supply

1. Put the connector of the power cord into the AC IN (AC inlet) of the projector.
2. Firmly plug the power cord’s plug into the outlet. In a couple of seconds after the power supply connection, the POWER indicator will light up in steady orange.

Please remember that when the DIRECT POWER ON function activated (54), the connection of the power supply make the projector turn on.

⚠️ WARNING ⚠️ Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.
- Do not touch the power cord with a wet hand.
- Only use the power cord that came with the projector. If it is damaged, consult your dealer to get a new one. Never modify the power cord.
- Only plug the power cord into an outlet whose voltage is matched to the power cord. The power outlet should be close to the projector and easily accessible. Remove the power cord for complete separation.
- Do not distribute the power supply to multiple devices. Doing so may overload the outlet and connectors, loosen the connection, or result in fire, electric shock or other accidents.

Using the security bar and slot

A commercial anti-theft chain or wire up to 10 mm in diameter can be attached to the security bar on the projector. Also this product has the security slot for the Kensington lock. For details, see the manual of the security tool.

⚠️ WARNING ⚠️ Do not use the security bar and slot to prevent the projector from falling down, since it is not designed for it.

⚠️ CAUTION ⚠️ Do not place anti-theft chain or wire near the exhaust vents. It may become too hot.

NOTE • The security bar and slot is not comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.
Using the cable cover

Utilize the cable cover as the guard and blind for the connecting parts.

1. Connect the signal cables and the power cord to the projector first.

2. Combine parts as shown in figure, and assemble the cable cover.

3. Insert the three knobs on the cable cover into the three holes on the projector as shown in the figure. Pass the cables through the holes on the bottom of the cable cover.

⚠️ CAUTION  ▶ Be careful not to pinch the cables in the cable cover, to prevent damage to the cables.
▶ Use the cable cover that is supplied with the projector. Do not attempt any modifications to the cable cover.
Remote control

Installing the batteries

Please insert the batteries into the remote control before using it. If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for a long period, remove the batteries from the remote control and store them in a safe place.

1. Holding the hook part of the battery cover, remove it.
2. Align and insert the two AA batteries (HITACHI MAXELL or HITACHI MAXELL ENERGY, Part No. LR6 or R6P) according to their plus and minus terminals as indicated in the remote control.
3. Replace the battery cover in the direction of the arrow and snap it back into place.

⚠️ WARNING ⚠️ Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.
• Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
• Make sure the plus and minus terminals are correctly aligned when loading a battery.
• Keep a battery away from children and pets.
• Do not recharge, short circuit, solder or disassemble a battery.
• Do not place a battery in a fire or water. Keep batteries in a dark, cool and dry place.
• If you observe battery leakage, wipe out the leakage and then replace a battery. If the leakage adheres to your body or clothes, rinse well with water immediately.
• Obey the local laws on disposing the battery.

About the remote control signal

The remote control works with the projector’s remote sensor. This projector has a remote sensor on the front. The sensor senses the signal within the following range when the sensor is active:
60 degrees (30 degrees to the left and right of the sensor) within 3 meters about.

NOTE • The remote control signal reflected in the screen or the like may be available. If it is difficult to send the signal to the sensor directly, attempt to make the signal reflect.
• The remote control uses infrared light to send signals to the projector (Class 1 LED), so be sure to use the remote control in an area free from obstacles that could block the remote control’s signal to the projector.
• The remote control may not work correctly if strong light (such as direct sunlight) or light from an extremely close range (such as from an inverter fluorescent lamp) shines on the remote sensor of the projector. Adjust the position of projector avoiding those lights.
Changing the frequency of remote control signal

The accessory remote control has the two choices on signal frequency Mode 1:NORMAL and Mode 2:HIGH. If the remote control does not function properly, attempt to change the signal frequency. In order to set the Mode, please keep pressing the combination of two buttons listed below simultaneously for about 3 seconds.

(1) Set to Mode 1:NORMAL... VOLUME - and RESET buttons
(2) Set to Mode 2:HIGH... MAGNIFY OFF and ESC buttons

Please remember that the REMOTE FREQ. in the SERVICE item of the OPTION menu ( bölümü) of the projector to be controlled should be set to the same mode as the remote control.

Using as a simple PC mouse & keyboard

The accessory remote control works as a simple mouse and keyboard of the computer, when the projector’s USB TYPE B port and the computer’s type A USB port are connected and MOUSE is selected for the USB TYPE B item in the OPTION menu ( bölümü).

(1) PAGE UP key: Press PAGE UP button.
(2) PAGE DOWN key: Press PAGE DOWN button.
(3) Mouse left button: Press ENTER button.
(4) Move pointer: Use the cursor buttons ▲, ▼, ◄ and ►.
(5) ESC key: Press ESC button.
(6) Mouse right button: Press RESET button.

⚠️ NOTICE ➤ Improper use of the simple mouse & keyboard function could damage your equipment. While using this function, please connect this product only to a computer. Be sure to check your computer’s manuals before connecting this product to the computer.

NOTE When the simple mouse & keyboard function of this product does not work correctly, please check the following.
- When a USB cable connects this projector with a computer having a built-in pointing device (e.g. track ball) like a laptop PC, open BIOS setup menu, then select the external mouse and disable the built-in pointing device, because the built-in pointing device may have priority to this function.
- Windows 95 OSR 2.1 or higher is required for this function. And also this function may not work depending on the computer’s configurations and mouse drivers. This function can work with the computer which can operate general USB mouse or keyboard.
- You cannot do things like press two buttons at once (for instance, pressing two buttons at the same time to move the mouse pointer diagonally).
- This function is activated only when the projector is working properly. This function is not available in any of the following cases:
  - While the lamp is warming up. (The POWER indicator blinks in green.)
  - When either USB TYPE A or USB TYPE B port is selected.
  - While displaying BLANK ( bölümü), TEMPLATE ( bölümü) or MY IMAGE ( bölümü) screen.
  - When any menu is displayed on the screen.
  - While using the cursor buttons to operate the sound or screen functions such as adjusting the sound volume, correcting the keystone, correcting the picture position and magnifying the screen.
Turning on the power

1. Make sure that the power cord is firmly and correctly connected to the projector and the outlet.
2. Make sure that the POWER indicator is steady orange (101).
3. Confirm that there is nothing that the lens door hits while opening. Press STANDBY/ON button on the projector or the remote control. The lens door opens, the projection lamp lights up, and the POWER indicator begins to blink green. When the power is completely on, the indicator will stop blinking and light in steady green (101).

⚠️WARNING ⚠️ Never look into the projection lens or mirror while the projection lamp lights, since the projection lamp ray may cause a trouble on your eyes.
⚠️ Be careful not to pinch your finger with the lens door, to prevent an injury.
⚠️ Do not place the projector vertically with the lens door open as shown in the figure on the right. It could cause malfunction or injury. Tabletop use must be setup with the designated optional accessories.
⚠️ Do not stand under the projector mounted on the wall or ceiling, when its lens door is opening or closing. Moreover, do not look at the mirror when the lens door is opening or closing.
⚠️ Never touch a lens door or mirror. If the mirror is broken, the projected image will be distorted. Close the lens door, and contact your dealer.
Turning off the power

1. Press the STANDBY/ON button on the projector or the remote control. The message “Power off?” will appear on the screen for about 5 seconds.

2. Confirm that there is nothing that the lens door hits while closing. Press the STANDBY/ON button again while the message appears. The projector lamp will go off, and the POWER indicator will begin blinking in orange. The lens door will close right after the lamp goes off. However, to maintain better picture quality, the lens door will close after the lamp has been cooled down when the projector is installed upside down such as in ceiling mount installation. Then POWER indicator will stop blinking and light in steady orange when the lamp cooling is complete (101).

Do not turn the projector on for about 10 minutes or more after turning it off. Also, do not turn the projector off shortly after turning it on. Such operations might cause the lamp to malfunction or shorten the lifetime of some parts including the lamp.

⚠️WARNING Be careful not to pinch your finger with the lens door, to prevent an injury.
► Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.
► Remove the power cord for complete separation. The power outlet should be close to the projector and easily accessible.

NOTE • Turn the power on/off in right order. Please power on the projector prior to the connected devices.
• This projector has the function that can make the projector automatically turn on/off. Please refer to the DIRECT POWER ON (54) and AUTO POWER OFF (55) items of the OPTION menu.
Adjusting the volume

1. Use the VOLUME +/- buttons to adjust the volume. A dialog will appear on the screen to aid you in adjusting the volume. If you do not do anything, the dialog will automatically disappear after a few seconds.

   ● When X is selected for current picture input port, the volume adjustment is disabled. Please see AUDIO SOURCE item of AUDIO menu (46).
   ● Even if the projector is in the standby mode, the volume is adjustable when both of the following conditions are true:
     - An option other than X is selected for STANDBY in the AUDIO SOURCE item of the AUDIO menu (46).
     - NORMAL is selected in the STANDBY MODE item of the SETUP menu (45).
   ● In the standby mode, the volume of the microphone is adjustable with the VOLUME +/- buttons on the remote control, in synchronization with the volume of the projector (12).

Temporarily muting the sound

1. Press MUTE button on the remote control.
   A dialog will appear on the screen indicating that you have muted the sound.
   To restore the sound, press the MUTE, VOLUME + or VOLUME - button. Even if you do not do anything, the dialog will automatically disappear after a few seconds.

   ● When X is selected for current picture input port, the sound is always muted. Please see AUDIO SOURCE item of AUDIO menu (46).
   ● C.C. (Closed Caption) is automatically activated when sound is muted and an input signal containing C.C. is received. This function is available only when the signal is NTSC for VIDEO or S-VIDEO, or 480i@60 for COMPUTER IN1 or COMPUTER IN2, and when AUTO is selected for DISPLAY in the C.C. menu under the SCREEN menu (53).

Selecting an input signal

1. Press INPUT button on the projector.
   Each time you press the button, the projector switches its input port from the current port as below.

   → COMPUTER IN1 → COMPUTER IN2  →
   VIDEO   LAN
   ↑   ↓
   S-VIDEO    USB TYPE A
   ↓   ↑
   HDMI  USB TYPE B
   ← ←
   • While ON is selected for AUTO SEARCH item in OPTION menu (54), the projector will keep checking the ports in above order repeatedly till an input signal is detected.
   • It may take several seconds to project the images from the USB TYPE B port.

(continued on next page)
Selecting an input signal (continued)

1. Press **COMPUTER** button on the remote control.
   Each time you press the button, the projector switches its input port from the current port as below.

   ![COMPUTER button]

   ▶ COMPUTER IN1 → COMPUTER IN2 → LAN
   USB TYPE B ← USB TYPE A ←

   - While ON is selected for AUTO SEARCH item in OPTION menu, the projector will keep checking every port sequentially till an input signal is detected (54). If **COMPUTER** button is pressed when **VIDEO**, **S-VIDEO** or **HDMI** port is selected, the projector will check **COMPUTER IN1** port first.
   - It may take several seconds to project the images from the **USB TYPE B** port.

1. Press **VIDEO** button on the remote control.
   Each time you press the button, the projector switches its input port from the current port as below.

   ![VIDEO button]

   ▶ HDMI → S-VIDEO
   VIDEO ←

   - While ON is selected for AUTO SEARCH item in OPTION menu, the projector will keep checking every port sequentially till an input signal is detected (54). If **VIDEO** button is pressed when **COMPUTER IN1**, **COMPUTER IN2**, **LAN**, **USB TYPE A** or **USB TYPE B** port is selected, the projector will check **HDMI** port first.

1. Press the **MY SOURCE / DOC. CAMERA** button on the remote control. The input signal will be changed into the signal you set as **MY SOURCE** (58).

   - This function also can use for document camera. Select the input port that connected the document camera.
Searching an input signal

1. Press SEARCH button on the remote control.
   The projector will start to check its input ports as below in order to find any input signals.
   When an input is found, the projector will stop searching and display the image. If no signal is found, the projector will return to the state selected before the operation.

   ➔ COMPUTER IN1 ➔ COMPUTER IN2 ➔
   
   VIDEO LAN
   
   ↑ ↓
   S-VIDEO
   ↑
   HDMI
   ➔
   USB TYPE A
   ➔
   USB TYPE B
   ➔

• While ON is selected for AUTO SEARCH item in OPTION menu (54), the projector will keep checking the ports in above order repeatedly till an input signal is detected.
• It may take several seconds to project the images from the USB TYPE B port.

Selecting an aspect ratio

1. Press ASPECT button on the remote control.
   Each time you press the button, the projector switches the mode for aspect ratio in turn.

   ❌ For a computer signal
   NORMAL ➔ 4:3 ➔ 16:9 ➔ 16:10 ➔ NATIVE

   ❌ For an HDMI™ signal
   NORMAL ➔ 4:3 ➔ 16:9 ➔ 16:10 ➔ 14:9 ➔ NATIVE

   ❌ For a video signal, s-video signal or component video signal
   4:3 ➔ 16:9 ➔ 16:10 ➔ 14:9 ➔ NATIVE

   ❌ For an input signal from the LAN, USB TYPE A or USB TYPE B port, or if there is no signal
   CP-A221N, CP-A301N: 4:3 (fixed)
   CP-AW251N: 16:10 (fixed)

• ASPECT button does not work when no proper signal is inputted.
• NORMAL mode keeps the original aspect ratio setting.
• The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM, KEYSTONE and KEYSTONE. Changing the values of ASPECT, D-ZOOM, KEYSTONE and KEYSTONE may fix the symptom.
Adjusting the projector's elevator

The projector has Front foot for inclinations and Rear foot for horizontals. Spacers on the each elevator foot are installed at the time of shipment, and projector is in a condition to be able to just project. If necessary, detach the spacer, and the elevator feet can be manually twisted to make more precise adjustments.

![Front foot](image1)

![Rear foot](image2)

![Spacer](image3)

![Spacer (Large)](image4)

![Spacer (Small)](image5)

**WARNING** ▶ Keep the spacers away from children and pets. Be careful not to let them swallow the spacers. If swallowed consult a physician immediately for emergency treatment.

**NOTE** • The adjustment angle can be adjusted up to plus or minus 1° each of FRONT and REAR foot.
• After the foot is adjusted, it is possible to return it to the state of the shipment with a spacer. Install Large on the Front foot and Small on the Rear foot of the spacer. If change the setting place of the projector, it will recommend keep and reuse the spacers.

Adjusting the zoom and focus

Press the **D-ZOOM +** or **D-ZOOM –** button on the remote control to display D-ZOOM dialog on screen.

Use the **D-ZOOM +** and **D-ZOOM –** buttons to adjust the picture size.

To finish the operation, do not touch these buttons for a few seconds until the dialog is disappeared.

• If you want to expand a part of the image, use the magnify function (26).
Using the automatic adjustment feature

1. Press AUTO button on the remote control.

Pressing this button performs the following.

- **For a computer signal**
  The vertical position, the horizontal position and the horizontal phase will be automatically adjusted.
  Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.

- **For a video signal and s-video signal**
  The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (39). The vertical position and horizontal position will be automatically set to the default.

- **For a component video signal**
  The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.

- The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input.
- When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.
- When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the PC model.
- The items adjusted by this function may vary when the FINE or DISABLE is selected for the AUTO ADJUST item of the SERVICE item in the OPTION menu (59).
Adjusting the position

1. Press the POSITION button on the remote control while no menu is on screen, to display the D-SHIFT (42) dialog on screen.

2. Use the ▲, ▼, ◄ and ► buttons to adjust the picture position. Press the POSITION button again to finish this operation.

- This is a function to shift the position of the shrunken picture by the D-ZOOM (42) function.
- When an OSD (On Screen Display) menu is displayed, this operation moves the position of the OSD menu, but the picture position is not (29).
- The D-SHIFT adjustment values are not valid when the D-ZOOM is set to 256 (full screen). (CP-A221N, CP-A301N)
- The D-SHIFT adjustment values are not valid when the D-ZOOM is set to 320 (full screen). (CP-AW251N)

Correcting the keystone distortions

1. Press KEYSTONE button on the remote control. A dialog will appear on the screen to aid you in correcting the distortion.

2. Use the ▲/▼ cursor buttons to select MANUAL or PERFECT FIT operation, and press the ► button to perform the following.
   (1) MANUAL displays a dialog for keystone correction.
       Use the ▲/▼ buttons to select KEYSTONE / KEYSTONE, then use the ◄/► buttons for adjustment.
   (2) PERFECT FIT displays a dialog for adjusting the shape of the projected image in each of the corners and sides.

To close the dialog and complete this operation, press KEYSTONE button again. Even if you do not do anything, the dialog will automatically disappear after a few seconds.

- The adjustable range of this function will vary among inputs. For some input, this function may not work well.
- This function will be unavailable when Transition Detector is on (75).
Using the magnify feature

1. Press the MAGNIFY ON button on the remote control. The picture will be magnified, and the MAGNIFY dialog will appear on the screen. When the MAGNIFY ON button is pressed for the first time after the projector is turned on, the picture will be zoomed by 1.5 times. On the dialog, triangle marks to show each direction will be displayed.

2. The display magnification of the projector switches in order with every press of the MAGNIFY ON button.
   - For computer signals, HDMI™ (RGB) signals, input signals from the LAN or USB TYPE B port
     1.5 times → 2 times → 3 times → 4 times → 1 time
   - For video signals, s-video signals, component video signals or HDMI™ (Component) signals
     1.5 times → 2 times → 1 time

3. While the triangles are displayed on the dialog, use the ▲/▼/◄/► cursor buttons to shift the magnifying area.

4. Press the MAGNIFY OFF button on the remote control to exit magnification.

- The MAGNIFY dialog will automatically disappear in several seconds with no operation. The dialog will appear again if the MAGNIFY ON button is pressed when the dialog has automatically disappeared.
- The magnification is automatically disabled when the displaying signal or its display condition is changed.
- While the magnification is active, the keystone distortion condition may vary. It will be restored when the magnification is disabled.
- Some horizontal stripes might be visible on the image while magnification is active.
- This function is not available in the following cases:
  - The USB TYPE A port is selected as the input source.
  - A sync signal in the range not supported is input.
  - There is no input signal.
Temporarily freezing the screen

1. Press the FREEZE button on the remote control.
   The “FREEZE” indication will appear on the screen (however, the indication will not appear when the OFF is selected for the MESSAGE item in the SCREEN menu (48)), and the projector will go into the FREEZE mode, which the picture is frozen.
   To exit the FREEZE mode and restore the screen to normal, press the FREEZE button again.

   ● The projector automatically exits from the FREEZE mode when some control buttons are pressed.
   ● If the projector continues projecting a still image for a long time, the LCD panel might possibly be burned in. Do not leave the projector in the FREEZE mode for too long.
   ● Images might appear degraded when this function is operated, but it is not a malfunction.

Temporarily blanking the screen

1. Press BLANK button on the remote control.
   The BLANK screen will be displayed instead of the screen of input signal. Please refer to BLANK item in SCREEN menu (50).
   To exit from the BLANK screen and return to the input signal screen, press BLANK button again.

   ● The projector automatically exits from the BLANK mode when some control buttons are pressed.

⚠️ CAUTION  ► If you wish to have a blank screen while the projector’s lamp is on, use the BLANK function above.
   Taking any other action may cause the damage on the projector.

NOTE  • The sound is not connected with the BLANK screen function. If necessary, set the volume or mute first. To display the BLANK screen and mute the sound at one time, use AV MUTE function (58).
Using the menu function

This projector has the following menus: PICTURE, IMAGE, INPUT, SETUP, AUDIO, SCREEN, OPTION, NETWORK, SECURITY and EASY MENU.

EASY MENU consists of functions often used, and the other menus are classified into each purpose and brought together as the ADVANCED MENU.

Each of these menus is operated using the same methods. While the projector is displaying any menu, the MENU button on the projector works as the cursor buttons. The basic operations of these menus are as follows.

1. To start the MENU, press the MENU button. The MENU you last used (EASY or ADVANCED) will appear. EASY MENU has priority to appear just after powered on.

2. In the EASY MENU
   (1) Use the ▲/▼ cursor buttons to select an item to operate. If you want to change it to the ADVANCED MENU, select the ADVANCED MENU.
   (2) Use the ◄/► cursor buttons to operate the item.

In the ADVANCED MENU
   (1) Use the ▲/▼ cursor buttons to select a menu. If you want to change it to the EASY MENU, select the EASY MENU.
   The items in the menu appear on the right side.
   (2) Press the ► cursor button or ENTER button to move the cursor to the right side. Then use the ▲/▼ cursor buttons to select an item to operate and press the ► cursor button or ENTER button to progress. The operation menu or dialog of the selected item will appear.
   (3) Use the buttons as instructed in the OSD to operate the item.

(continued on next page)
Using the menu function (continued)

3. To close the MENU, press the MENU button again or select EXIT and press the ► cursor button or ENTER button. Even if you do not do anything, the dialog will automatically disappear after about 30 seconds.

- If you want to move the menu position, use the cursor buttons after pressing the POSITION button.
- Some functions cannot be performed when a certain input port is selected, or when a certain input signal is displayed.
- When you want to reset the operation, press RESET button on the remote control during the operation. Note that some items (ex. LANGUAGE, VOLUME) cannot be reset.
- In the ADVANCED MENU, when you want to return to the previous display, press the ◄ cursor button or ESC button on the remote control.

Indication in OSD (On Screen Display)

The meanings of the general words on the OSD are as follows.

<table>
<thead>
<tr>
<th>Indication</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>EXIT</td>
<td>Selecting this word finishes the OSD menu. It's the same as pressing the MENU button.</td>
</tr>
<tr>
<td>RETURN</td>
<td>Selecting this word returns the menu to the previous menu.</td>
</tr>
<tr>
<td>CANCEL or NO</td>
<td>Selecting this word cancels the operation in the present menu and returns to the previous menu.</td>
</tr>
<tr>
<td>OK or YES</td>
<td>Selecting this word executes the prepared function or shifts the menu to the next menu.</td>
</tr>
</tbody>
</table>
From the EASY MENU, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons. Then perform it according to the following table.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASPECT</td>
<td>Using the ◄/► buttons switches the mode for aspect ratio. See the ASPECT item in IMAGE menu (35).</td>
</tr>
<tr>
<td>D-ZOOM</td>
<td>Using the ◄/► cursor buttons adjusts the magnification ratio. Small ⇔ Large. See the D-ZOOM item in the SETUP menu (42). • The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM, □ KEYPSTONE and □ KEYPSTONE. Changing the values of ASPECT, D-ZOOM, □ KEYPSTONE and □ KEYPSTONE may fix the symptom.</td>
</tr>
<tr>
<td>□ KEYPSTONE</td>
<td>Using the ◄/► buttons corrects the vertical keystone distortion. See the □ KEYPSTONE item in SETUP menu (43).</td>
</tr>
<tr>
<td>□ KEYPSTONE</td>
<td>Using the ◄/► buttons corrects the horizontal keystone distortion. See the □ KEYPSTONE item in SETUP Menu (43).</td>
</tr>
<tr>
<td>PERFECT FIT</td>
<td>Pressing the ► button displays the dialog for adjusting the shape of the projected image in each of the corners and sides. See the PERFECT FIT item in SETUP menu (44).</td>
</tr>
</tbody>
</table>

### PICTURE MODE

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Using the ◄/► buttons switches the picture mode. The picture modes are combinations of GAMMA and COLOR TEMP settings. Choose a suitable mode according to the projected source.</td>
</tr>
<tr>
<td></td>
<td>![NORMAL] ⇔ [CINEMA] ⇔ [DYNAMIC] ⇔ [BOARD(BLACK)] ⇔ [DAYTIME] ⇔ [WHITEBOARD] ⇔ [BOARD(GREEN)]</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>GAMMA</th>
<th>COLOR TEMP</th>
</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
<td>1 DEFAULT</td>
</tr>
<tr>
<td>CINEMA</td>
<td>2 DEFAULT</td>
</tr>
<tr>
<td>DYNAMIC</td>
<td>3 DEFAULT</td>
</tr>
<tr>
<td>BOARD(BLACK)</td>
<td>4 DEFAULT</td>
</tr>
<tr>
<td>BOARD(GREEN)</td>
<td>4 DEFAULT</td>
</tr>
<tr>
<td>WHITEBOARD</td>
<td>5 DEFAULT</td>
</tr>
<tr>
<td>DAYTIME</td>
<td>6 DEFAULT</td>
</tr>
</tbody>
</table>

- When the combination of GAMMA and COLOR TEMP differs from pre-assigned modes above, the display on the menu for the PICTURE MODE is “CUSTOM”. Please refer to the GAMMA and COLOR TEMP (32, 33) items in PICTURE menu.
- Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction.

### ECO MODE

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Using the ◄/► buttons changes the eco mode setting. See the ECO MODE item in SETUP menu (45).</td>
</tr>
</tbody>
</table>

### MIRROR

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Using the ◄/► buttons switches the mode for mirror status. See the MIRROR item in SETUP menu (45).</td>
</tr>
</tbody>
</table>

### RESET

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Performing this item resets all of the EASY MENU items except the FILTER TIME and LANGUAGE. A dialog is displayed for confirmation. Selecting the OK using the ► button performs resetting.</td>
</tr>
</tbody>
</table>

### FILTER TIME

<table>
<thead>
<tr>

<tr>
<td>GAMMA</td>
<td>Using the ▲/▼ buttons switches the gamma mode. 1 DEFAULT ⇔ 1 CUSTOM ⇔ 2 DEFAULT ⇔ 2 CUSTOM ⇔ 3 DEFAULT ◄ 6 CUSTOM 3 CUSTOM ◄ 6 DEFAULT ⇔ 5 CUSTOM ⇔ 5 DEFAULT ⇔ 4 CUSTOM ⇔ 4 DEFAULT</td>
</tr>
</tbody>
</table>

### To adjust CUSTOM

Selecting a mode whose name includes CUSTOM and then pressing the ► button or the ENTER button displays a dialog to aid you in adjusting the mode. This function is useful when you want to change the brightness of particular tones.

Choose an item using the ◄/► buttons, and adjust the level using the ▲/▼ buttons.

You can display a test pattern for checking the effect of your adjustment by pressing the ENTER button. Each time you press the ENTER button, the pattern changes as below.

- No pattern ⇔ Gray scale of 9 steps
- Ramp ⇔ Gray scale of 15 steps

The eight equalizing bars correspond to eight tone levels of the test pattern (Gray scale of 9 steps) except the darkest in the left end. If you want to adjust the 2nd tone from left end on the test pattern, use the equalizing adjustment bar “1”. The darkest tone at the left end of the test pattern cannot be controlled with any of equalizing adjustment bar.

- Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction.

(continued on next page)
### COLOR TEMP

Using the ▲/▼ buttons switches the color temperature mode.

- 1 HIGH → 1 CUSTOM → 2 MID → 2 CUSTOM
- 6 CUSTOM
- 6 Hi-BRIGHT-3
- 5 CUSTOM → 5 Hi-BRIGHT-2 → 4 CUSTOM → 4 Hi-BRIGHT-1

**To adjust CUSTOM**

Selecting a mode whose name includes CUSTOM and then pressing the ► button or the ENTER button displays a dialog to aid you in adjusting the OFFSET and GAIN of the selected mode.

OFFSET adjustments change the color intensity on the whole tones of the test pattern.

GAIN adjustments mainly affect color intensity on the brighter tones of the test pattern.

Choose an item using the ◄/► buttons, and adjust the level using the ▲/▼ buttons.

You can display a test pattern for checking the effect of your adjustment by pressing the ENTER button.

Each time you press the ENTER button, the pattern changes as below.

- No pattern → Gray scale of 9 steps → Ramp → Gray scale of 15 steps

- Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction.

### COLOR

Using the ◄/► buttons adjusts the strength of whole color.

- Weak ⇔ Strong

- This item can be selected only for a video, s-video and component video signal.

- For an HDMI™ signal, this item can also be selected if either (1) or (2) applies.
  (1) HDMI FORMAT item in the INPUT menu is set to VIDEO.
  (2) HDMI FORMAT item in the INPUT menu is set to AUTO, and the projector recognizes that it receives video signals.

### TINT

Using the ◄/► buttons adjusts the tint.

- Reddish ⇔ Greenish

- This item can be selected only for a video, s-video and component video signal.

- For an HDMI™ signal, this item can also be selected if either (1) or (2) applies.
  (1) HDMI FORMAT item in the INPUT menu is set to VIDEO.
  (2) HDMI FORMAT item in the INPUT menu is set to AUTO, and the projector recognizes that it receives video signals.

</thead>
</table>
| **H PHASE**   | Using the ◄/► buttons adjusts the horizontal phase to eliminate flicker.  
Right ⇨ Left  
• This item can be selected only for a computer signal or a component video signal. This function is unavailable for a signal from the **LAN, USB TYPE A, USB TYPE B** or **HDMI** port. |
| **H SIZE**    | Using the ◄/► buttons adjusts the horizontal size.  
Small ⇨ Large  
• This item can be selected only for a computer signal. This function is unavailable for a signal from the **LAN, USB TYPE A, USB TYPE B** or **HDMI** port.  
• When this adjustment is excessive, the picture may not be displayed correctly. In such a case, please reset the adjustment by pressing the **RESET** button on the remote control during this operation.  
• Images might appear degraded when this function is operated, but it is not a malfunction. |
| **AUTO ADJUST EXECUTE** | Selecting this item performs the automatic adjustment feature.  
**For a computer signal**  
The vertical position, the horizontal position and the horizontal phase will be automatically adjusted.  
Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.  
**For a video signal and s-video signal**  
The video format best suited for the respective input signal will be selected automatically. This function is available only when the **AUTO** is selected for the **VIDEO FORMAT** item in the **INPUT** menu (39). The vertical position and horizontal position will be automatically set to the default.  
**For a component video signal**  
The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.  
• The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input.  
• When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.  
• When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the PC model.  
• The items adjusted by this function may vary when the **FINE** or **DISABLE** is selected for the **AUTO ADJUST** item of the **SERVICE** item in the **OPTION** menu (59). |
From the INPUT menu, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ► cursor button or ENTER button to execute the item. Then perform it according to the following table.

</tr>
</thead>
</table>
| LANGUAGE    | Using the ▲/▼/◄/► buttons switches the OSD (On Screen Display) language.  
ENGLISH ⇔ FRANÇAIS ⇔ DEUTSCH ⇔ ESPAÑOL  
←→ ...... (shown in the LANGUAGE dialog) ...... ⦿  
Press the ENTER or INPUT button to save the language setting. |
| MENU POSITION | Using the ▲/▼/◄/► buttons adjusts the menu position.  
To quit the operation, press the MENU button on the remote control or keep no operation for about 10 seconds. |
| BLANK       | Using the ▲/▼ buttons switches the mode for the blank screen.  
The blank screen is a screen for the temporarily blanking feature (27). It is displayed by pressing the BLANK button on the remote control.  
MyScreen ⇔ ORIGINAL ⇔ BLUE ⇔ WHITE ⇔ BLACK  
←→ MyScreen : Screen can be registered by the MyScreen item (49).  
ORIGINAL : Screen preset as the standard screen.  
BLUE, WHITE, BLACK : Plain screens in each color.  
• To avoid remaining as an afterimage, the MyScreen or ORIGINAL screen will change to the plain black screen after several minutes. |
| START UP    | Using the ▲/▼ buttons switches the mode for the start-up screen.  
The start-up screen is a screen displayed when no signal or an unsuitable signal is detected.  
MyScreen ⇔ ORIGINAL ⇔ OFF  
←→ MyScreen : Screen can be registered by the MyScreen item (49).  
ORIGINAL : Screen preset as the standard screen.  
OFF : Plain black screen.  
• To avoid remaining as an afterimage, the MyScreen or ORIGINAL screen will change to the BLANK screen (above) after several minutes. If also the BLANK screen is the MyScreen or ORIGINAL, the plain black screen is instead used.  
• When the ON is selected to the MyScreen PASSWORD item in the SECURITY menu (73), the START UP is fixed to MyScreen. |

(continued on next page)
### MyScreen

This item allows you to capture an image for use as a MyScreen image which can be used as the BLANK screen and START UP screen. Display the image you want to capture before executing the following procedure.

1. Selecting this item displays a dialog titled “MyScreen”. It will ask you if you start capturing an image from the current screen. Please wait for the target image to be displayed, and press the ENTER or INPUT button when the image is displayed. The image will freeze and the frame for capturing will appear. To stop performing, press the RESET button on the remote control.

2. Using the ▲/▼/◄/► buttons adjusts the frame position. Please move the frame to the position of the image which you want to use. The frame may not be able to be moved for some input signals. To start registration, press the ENTER or INPUT button on the remote control. To restore the screen and return to the previous dialog, press the RESET button on the remote control. Registration may take several minutes. When the registration is completed, the registered screen and the following message is displayed for several seconds:

   “MyScreen registration is finished.”

   If the registration failed, the following message is displayed:

   “A capturing error has occurred. Please try again.”

   • This function cannot be selected when the ON is selected to the MyScreen Lock item (50).
   • This function cannot be selected when the ON is selected to the MyScreen PASSWORD item in SECURITY menu (73).
   • This function is unavailable for a signal from the LAN, USB TYPE A, USB TYPE B or HDMI port.

</thead>
<tbody>
<tr>
<td><strong>SERVICE</strong></td>
<td>Selecting this item displays the SERVICE menu. Select an item using the ▲/▼ buttons, and press the ► button or the ENTER button on the remote control to execute the item.</td>
</tr>
</tbody>
</table>

#### FAN SPEED
Using the ▲/▼ buttons switches the rotation speed of the cooling fans. If the projector is used at an altitude of about 1600 m or higher, select HIGH. Otherwise, select NORMAL. Note that the projector is noisier when the HIGH is selected.

- **HIGH**
- **NORMAL**

#### AUTO ADJUST
Using the ▲/▼ buttons to select one of the mode. When the DISABLE is selected, the automatic adjustment feature is disabled.

- **FINE** ↔ **FAST** ↔ **DISABLE**
  - **FINE**: Finer tuning including H.SIZE adjustment.
  - **FAST**: Faster tuning, setting H.SIZE to prearranged data for the input signal.

  * Depending on conditions, such as input image, signal cable to the projector, environment around the projector, etc., the automatic adjustment may not work correctly. In such a case, please choose DISABLE to disable the automatic adjustment, and make adjustment manually.

#### GHOST
1. Select a color element of ghost using the ◄/► buttons.
2. Adjust the selected element using the ▲/▼ buttons to disappear ghost.

#### FILTER MESSAGE
Use the ▲/▼ button to set the timer for notifying by the message when to replace the filter unit.

- 500h ↔ 1000h ↔ 2000h ↔ 3000h ↔ 4000h ↔ 5000h ↔ OFF

After choosing an item except OFF, the message “REMINDER *** HRS PASSED ....” will appear after the timer reaches the interval time set by this feature (100).

When the OFF is chosen, the message will not appear. Utilize this feature to keep the air filter clean, setting the suitable time according to your environment of this projector.

- Please take care of the filter unit periodically, even if there is no message. If the air filter becomes to be blocked by dust or other matter, the internal temperature will rise, which could cause malfunction, or reduce the lifetime of the projector.
- Please be careful with the operating environment of the projector and the condition of the filter unit.

| **KEY LOCK** | (1) Use the ▲/▼ buttons to select CONTROL PANEL or REMOTE CONTROL.  
(2) Use the ◄/► buttons to turn the key lock function on/off. When ON is selected, all buttons on the projector or remote control except the STANDBY/ON button are locked.  
• Please use this function to prevent tampering or accidental operation.  
• It is not possible to set both CONTROL PANEL and REMOTE CONTROL to ON. |
| **LENS DOOR LOCK** | Use the ▲/▼ cursor buttons to turn on/off the LENS DOOR LOCK function. Set LENS DOOR LOCK to ON to keep the lens door open even when power is turned off. Follow cautions below when you set LENS DOOR LOCK to ON and keep the lens door open all the time.  
• Do not apply excessive force on or allow impact to the lens door, as it incorporates a mirror.  
• Keep the projector out of the reach of children.  
• Never touch a lens door or mirror. If the mirror is broken, the projected image will be distorted. Close the lens door, and contact your dealer.  
When the LENS DOOR LOCK is set to ON and the lens door is not open completely for some reason, the image may shift or have keystone distortion. In that case use the LENS DOOR OPEN function (below) to open the lens door completely. |
| **LENS DOOR OPEN** | Use the LENS DOOR OPEN function to open the lens door if not open completely for some reason such as cleaning. |
| **LENS DOOR CLOSE** | Use the LENS DOOR CLOSE function to temporarily close the lens door when LENS DOOR LOCK is set to ON. Note that the lamp will be turned off when the lens door is closed. Press the STANDBY/ON button on the projector or the remote control to open the lens door and start the projector again. |

</table>
This projector is equipped with security functions. From the SECURITY menu, items shown in the table below can be performed.

To use SECURITY menu: User registration is required before using the security functions.

**Enter to the SECURITY menu**
1. Press the ► button. The ENTER PASSWORD box will be displayed.
2. Use the ▲/▼/◄/► buttons to enter the registered password. The factory default password is as follows.
   - CP-A221N, CP-A301N: 6215
   - CP-AW251N: 4615

This password can be changed (below). Move the cursor to the right side of the ENTER PASSWORD box and press the ► button to display the SECURITY menu.

- It is strongly recommended the factory default password to be changed as soon as possible.
- If an incorrect password is input, the ENTER PASSWORD box will be displayed again. If incorrect password is input 3 times, the projector will turn off. Afterwards the projector will turn off every time an incorrect password is input.

3. Items shown in the table below can be performed.

**If you have forgotten your password**
1. While the ENTER PASSWORD box is displayed, press and hold the RESET button on the remote control for about 3 seconds or press and hold the INPUT button for 3 seconds while pressing the ► button on the projector.
2. The 10 digit Inquiring Code will be displayed. Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.

- If there is no key input for about 55 seconds while the Inquiring Code is displayed, the menu will close. If necessary, repeat the process from (1).

</thead>
<tbody>
<tr>
<td>The MyScreen PASSWORD function can be used to prohibit access to the MyScreen function and prevent the currently registered MyScreen image from being overwritten.</td>
<td></td>
</tr>
</tbody>
</table>

#### 1 Turning on the MyScreen PASSWORD

1-1 Use the ▲/▼ buttons on the SECURITY menu to select MyScreen PASSWORD and press the ► button to display the MyScreen PASSWORD on/off menu.

1-2 Use the ▲/▼ buttons on the MyScreen PASSWORD on/off menu to select ON. The ENTER NEW PASSWORD box (small) will be displayed.

1-3 Use the ▲/▼/◄/► buttons to enter the password. Move the cursor to the right side of the ENTER NEW PASSWORD box (small) and press the ► button to display the NEW PASSWORD AGAIN box, enter the same PASSWORD again.

1-4 Move the cursor to the right side of the NEW PASSWORD AGAIN box and press the ► button to display the NOTE NEW PASSWORD box for about 30 seconds, please make note of the password during this time.

Pressing the ENTER button on the remote control or ► button on the projector will return to MyScreen PASSWORD on/off menu.

When a password is set for MyScreen:

- The MyScreen registration function (and menu) will be unavailable.
- The MyScreen Lock menu will be unavailable.
- The START UP setting will be locked on MyScreen (and the menu will be unavailable).

Turning the MyScreen PASSWORD off will allow normal operation of these functions.

- Please do not forget your MyScreen PASSWORD.

#### 2 Turning off the MyScreen PASSWORD

2-1 Follow the procedure in 1-1 to display the MyScreen PASSWORD on/off menu.

2-2 Select OFF to display the ENTER PASSWORD box (large). Enter the registered password and the screen will return to the MyScreen PASSWORD on/off menu.

If an incorrect PASSWORD is input, the menu will close. If necessary, repeat the process from 2-1.

#### 3 If you have forgotten your password

3-1 Follow the procedure in 1-1 to display the MyScreen PASSWORD on/off menu.

3-2 Select OFF to display the ENTER PASSWORD box (large). The 10 digit Inquiring Code will be displayed inside the box.

3-3 Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.

(continued on next page)
PIN LOCK is a function which prevents the projector from being used unless a registered Code is input.

1 Turning on the PIN LOCK
1-1 Use the ▲/▼ buttons on the SECURITY menu to select PIN LOCK and press the ► button or the ENTER button to display the PIN LOCK on/off menu.

1-2 Use the ▲/▼ buttons on the PIN LOCK on/off menu to select ON and the Enter PIN Code box will be displayed.

1-3 Input a 4 part PIN code using the ▲/▼/◄/►, COMPUTER or INPUT button.

The PIN Code again box will appear. Reenter the same PIN code. This will complete the PIN code registration.

- If there is no key input for about 55 seconds while the Enter PIN Code box or the PIN Code again box is displayed, the menu will close. If necessary, repeat the process from 1-1.

Afterwards, anytime the projector is restarted after AC power is turned off the Enter PIN Code box will be displayed. Enter the registered PIN code. The projector can be used after entering the registered PIN code. If an incorrect PIN code is input, the Enter PIN code box will be displayed again. If an incorrect PIN code is input 3 times, the projector will turn off. Afterwards the projector will turn off every time an incorrect PIN code is input. The projector will also turn off if there is no key input for about 5 minutes while the Enter PIN code box is displayed. This function will activate only when the projector is started after AC power is turned off.

- Please do not forget your PIN code.

2 Turning off the PIN LOCK
2-1 Follow the procedure in 1-1 to display the PIN LOCK on/off menu.

2-2 Use the ▲/▼ buttons to select OFF and the Enter PIN Code box will be displayed.

Enter the registered PIN code to turn the PIN LOCK function off.
If an incorrect PIN code is input 3 times, the projector will turn off.

3 If you have forgotten your PIN code
3-1 While the Enter PIN code box is displayed, press and hold the RESET button for 3 seconds or press and hold the INPUT button for 3 seconds while pressing the ► button on the projector.

The 10 digit Inquiring Code will be displayed.

- If there is no key input for about 5 minutes while the Inquiring Code is displayed, the projector will turn off.

3-2 Contact your dealer with the 10 digit Inquiring Code. Your PIN code will be sent after your user registration information is confirmed.

(continued on next page)
If this function is set to ON when the vertical angle of the projector or MIRROR setting at which the projector is turned on is different than the previously recorded, the TRANSITION DETECTOR ON alarm will be displayed and the projector will not display the input signal.

- To display the signal again, set this function OFF.
- After about 5 minutes of displaying the TRANSITION DETECTOR ON alarm, the lamp will turn off.
- Keystone adjustment feature has been prohibited as long as the Transition Detector function is on.

1 Turning on the TRANSITION DETECTOR
1-1 Use the ▲/▼ buttons on the SECURITY menu to select TRANSITION DETECTOR and press the ► or the ENTER button to display the TRANSITION DETECTOR on/off menu.
1-2 Use the ▲/▼ buttons on the TRANSITION DETECTOR on/off menu to select ON. Select ON and the current angle and MIRROR setting will be recorded. The ENTER NEW PASSWORD box (small) will be displayed.
1-3 Use the ▲/▼/◄/► buttons to enter a password. Move the cursor to the right side of the ENTER NEW PASSWORD box (small) and press the ► button to display the NEW PASSWORD AGAIN box, enter the same password again.
1-4 Move the cursor to the right side of the NEW PASSWORD AGAIN box and press the ► button to display the NOTE NEW PASSWORD box for about 30 seconds, please make note of the password during this time.

Pressing the ENTER button on the remote control or the ► button on the projector will return to the TRANSITION DETECTOR on/off menu.

- Please do not forget your TRANSITION DETECTOR password.
- This function will activate only when the projector is started after turning off the AC power.
- This feature may not function properly if the projector is not in a stable position when ON is selected.

2 Turning off the TRANSITION DETECTOR
2-1 Follow the procedure in 1-1 to display the TRANSITION DETECTOR on/off menu.
2-2 Select OFF to display the ENTER PASSWORD box (large). Enter the registered password and the screen will return to the TRANSITION DETECTOR on/off menu.

If an incorrect password is input, the menu will close. If necessary, repeat the process from 2-1.

3 If you have forgotten your password
3-1 Follow the procedure in 1-1 to display the TRANSITION DETECTOR on/off menu.
3-2 Select OFF to display the ENTER PASSWORD box (large). The 10 digit Inquiring Code will be displayed inside the box.
3-3 Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.

</tbody>
</table>
Presentation tools

The projector has the following two convenient tools that enable on-screen presentations easily and quickly:
- PC-LESS Presentation (below)
- USB Display (87)

PC-LESS Presentation

The PC-LESS Presentation reads image data from storage media inserted into the USB TYPE A port and displays the image on the following modes. The PC-LESS Presentation can be started by selecting the USB TYPE A port as the input source. This feature allows you to make your presentations without using your computer.

- Thumbnail mode (79)
- Full Screen mode (83)
- Slideshow mode (84)

[Supported storage media]
- USB memory (USB memory type, USB hard disk and USB card reader type)

NOTE
- USB readers (adapters) that have more than one USB slot may not work (if the adapter is acknowledged as multiple devices connected).
- USB devices with security software may not work.
- Be careful when inserting or removing a USB device. (12, 81)

[Supported format]
- FAT12, FAT16 and FAT32

NOTE
- NTFS is not supported.

[Supported file format]
- JPEG (.jpeg, .jpg)  *
- Bitmap (.bmp)  *
- PNG (.png)  *
- GIF (.gif)  *

NOTE
- Files with a resolution greater than XGA are not supported.
- Files with a resolution smaller than 36x36 are not supported.
- Files with a resolution smaller than 100x100 may not be displayed.
- Some supported files may not be displayed.
- Only a frame appears when the content of image data cannot be displayed in the Thumbnail mode.
**PC-LESS Presentation (continued)**

**Thumbnail mode**

The Thumbnail mode displays the images stored in a USB storage device on the Thumbnail screen. Maximum 20 images are displayed in a screen. If you wish, you can jump into the Full Screen mode or Slideshow mode, after you select some images in the Thumbnail mode. The Thumbnail mode will be started as the primary function of the PC-LESS Presentation after selecting the **USB TYPE A** port as the input source.
**Presentation tools**

**PC-LESS Presentation (continued)**

**Operating by buttons or keys**

You can control the images in the Thumbnail screen with the remote control or keypad or a web browser software. The following functions can be supported while the Thumbnail is displayed.

<td></td>
</tr>
</tbody>
</table>

**NOTE** • These operations are not accessible while the projector OSD is displayed. • It is not possible to change the input port by using the **INPUT** button when the Thumbnail screen, Slideshow, or Full Screen is displayed.

**Presentation tools**

*PC-LESS Presentation (continued)*

**Slideshow mode**

The Slideshow mode displays images in full screen and switches the images at intervals set in INTERVAL on the Thumbnail screen menu (79).

You can start this function from the Slideshow menu. To display the Slideshow menu, select the SLIDESHOW button in the Thumbnail mode and press the ENTER button on the remote control or INPUT button on the projector.

The following operations can be accessible while the Slideshow is displayed.

<table>
<thead>
<tr>
<th>Button operation</th>
<th>Functions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The remote control</td>
<td>The keypad on the projector</td>
</tr>
<tr>
<td>ENTER</td>
<td>INPUT</td>
</tr>
</tbody>
</table>

Displays thumbnail

* These operations are not accessible while the projector OSD is displayed.

**NOTE**

- It is not possible to change the input port by using the INPUT button when the Thumbnail screen, Slideshow, or Full Screen is displayed.
- When the Slideshow mode is set to ONE TIME, the last slide of the presentation will be held on screen till the ENTER button on the remote control or Web Remote Control, or INPUT button on the projector is pushed.
**PC-LESS Presentation (continued)**

You can play the Slideshow at your desired configuration. Configure the Slideshow items in the Thumbnail.

1) **RETURN** : Returns to the thumbnail mode.
2) **PLAY** : Play the Slideshow.
3) **START** : Set the beginning number of the Slideshow.
4) **STOP** : Set the end number of the Slideshow.
5) **INTERVAL** : Set the interval time of the Slideshow. It is not recommended to set the interval time very short something like several seconds, because it may take more than several seconds to read and display an image file if it is stored in very deep layer directory or if so many files are stored in the same directory.
6) **PLAY MODE** : Select the Slideshow mode.
   - **ONE TIME** : Play the Slideshow one time.
   - **ENDLESS** : Play the Slideshow endless.

**NOTE**
- The settings of the Slideshow are saved to the “playlist.txt” file that is stored in the storage media. If the file is not existed, it is generated automatically.
- The settings for the START, STOP, INTERVAL, and PLAY MODE are saved to the Playlist.
- If the storage media is under the write protection or the “playlist.txt” is the read only type file, it is impossible to change the settings of the Slideshow.
**Playlist**

The Playlist is a DOS format text file, which decides the order of displayed still image files in the Thumbnail or Slideshow. The playlist file name is "playlist.txt" and it can be edited on a computer. It is created in the folder that contains the selected image files when the PC-LESS Presentation is started or the Slideshow is configured.

**Example of “playlist.txt” files**

START setting : STOP setting : INTERVAL setting : PLAY MODE setting :

```
img001.jpg: : : :
img002.jpg:600: : :
img003.jpg:700:rot1: :
img004.jpg: : :SKIP:
img005.jpg:1000:rot2:SKIP:
```

The “playlist.txt” file contains the following information. Each piece of information requires to be separated by “:”, and “:” at the end of each line.

1st line: START, STOP, INTERVAL and PLAY MODE settings (85).

2nd line and after: file name, interval time, rotation setting and skip setting.

- **interval time**: It can be set from 0 to 999900 (ms) with an increment of 100 (ms).
- **rotation setting**: "rot1" means a rotation at 90 degrees clockwise; "rot2" and "rot3" increase another 90 degrees in order.
- **skip setting**: "SKIP" means that the image will not be displayed in the Slideshow.

**NOTE** • The maximum length in a line on the "playlist.txt" file is 255 characters including linefeed. If any line exceeds the limit, the "playlist.txt" file becomes invalid.

• Up to 999 files can be registered to the Playlist. However, if some folders exist in the same directory the limit number is decreased by the number of folders. Any files over the limit will not be shown in the Slideshow.

• If the storage device is protected or does not have sufficient space, the “playlist.txt” file cannot be created.

• For the Slideshow settings, refer to the section “**Slideshow mode**” (84).
USB Display

The projector can display images transferred from a computer via an USB cable (10).

Hardware and software requirement for computer

- **OS**: One of the following.
  - Windows® XP Home Edition /Professional Edition (32 bit version only)
  - Windows Vista® Home Basic/Home Premium/Business/Ultimate/Enterprise (32 bit version only)
  - Windows® 7 Starter/Home Basic/Home Premium/Professional/Ultimate/Enterprise (32 bit version only)
- **CPU**: Pentium 4 (2.8 GHz or higher)
- **Graphic card**: 16 bit, XGA or higher
- **Memory**: 512 MB or higher
- **Hard disk space**: 30 MB or higher
- **USB Port**
- **USB cable**: 1 piece

Select the USB DISPLAY for the USB TYPE B item in the OPTION menu. When you connect your computer to the USB TYPE B port on the projector using a USB cable, the projector will be recognized as a CD-ROM drive on your computer. Then, the software in the projector, “LiveViewerLiteUSB.exe”, will run automatically and the application, “LiveViewer Lite for USB”, will be ready on your computer for the USB Display. The application, “LiveViewer Lite for USB”, will close automatically when the USB cable is unplugged. However, it may remain displayed at times.

**NOTE**
- If the software does not start automatically (this is typically because CD-ROM autorun is disabled on your OS), follow the instructions below.
  1. Click on the [Start] button on the toolbar and select the “Run”
  2. Enter F:\LiveViewerLiteUSB.exe and then press the [OK]

  If your CD-ROM drive is not drive F on your computer, you will need to replace F with the correct drive letter assigned to your CD-ROM drive.
- CD-ROM autorun is disabled while the screen saver is running.
- The image transmission from the computer is suspended while the password-protected screen saver is running. To resume the transmission, exit the screen saver.
- If "Waiting for connection." remains displayed while the USB cable is connected, remove the USB cable and reconnect after a while.
- Please check and get the latest version at Hitachi Web site.
  - http://www.hitachi-america.us/digitalmedia or http://www.hitachidigitalmedia.com

Follow the instructions that can be obtained at the site for updating.
**USB Display (continued)**

This application will appear in the Windows notification area once it starts. You can quit the application from your computer by selecting “Quit” on the menu.

**NOTE**  • The “LiveViewer” (refer to the User's Manual - Network Guide) and this application cannot be used at the same time. If you connect your computer to the projector by using a USB cable while the “LiveViewer” is running, the following message will be displayed.
• Depending on the software installed on your computer, images on your computer cannot be transferred using “LiveViewer Lite for USB”.
• If any application software having the firewall function is installed into your computer, make the firewall function invalid with following the user’s manual.
• Some security software may block image transmission. Please change the security software setting to allow the use of "LiveViewer Lite for USB".
• If the computer in use is equipped with HDMI port, the audio setting will be changed and sound interruption or noise may occur when the HDMI cable is connected or disconnected during USB Display. In this case, restart USB Display.
• Image distortion or sound interruption may occur when LiveViewer is connected to LAN during USB Display. The above decline in performance is noticeable especially when multiple computers are connected to LiveViewer.
**USB Display (continued)**

**Right-Click menu**

The menu shown in the right will be displayed when you right-click the application icon in the Windows notification area.

<table>
<thead>
<tr>
<th>Display</th>
<th>Quit</th>
</tr>
</thead>
</table>

- **Display**: The Floating menu is displayed, and the icon disappears from the Windows notification area.
- **Quit**: The application is closed, and the icon disappears from the Windows notification area.

**NOTE** • If you wish to restart the application, you need to unplug the USB cable and plug it again.

**Floating menu**

If you select “Display” on the Right-Click menu, the Floating menu shown in the right will appear on your computer screen.

1. **Start capture button**
   The transmission to the projector is started and the images will be displayed.

2. **Stop button**
   The image transmission is stopped.

3. **Hold button**
   The image on the projector’s screen is temporally frozen. The last image before the button is clicked is remained on the screen. You can revise the image data on your computer without showing it on the projector's screen.

4. **Option button**
   The Options window is displayed.

5. **Minimize button**
   The Floating menu is closed, and the icon reappears in the Windows notification area.

**NOTE** • If you click the Start capture button and/or Stop button repeatedly, images may not be displayed on the screen.
**Presentation tools**

**USB Display (continued)**

**Options window**

If you select the Option button on the Floating menu, the Options window is displayed.

---

**Optimize Performance**

The “LiveViewer Lite for USB” captures screenshots in JPEG data and sends them to the projector. The “LiveViewer Lite for USB” has two options that have different compression rate of JPEG data.

**Transmission speed**

- Speed takes priority over Image quality. It makes JPEG compression rate higher.
- The screen on the projector is rewritten quicker because the transferred data is smaller, but the image quality is worse.

**Image quality**

- Image quality takes priority over Speed. It makes JPEG compression rate lower.
- The screen on the projector is rewritten slower because the transferred data is larger, but the image quality is better.

---

**Keep PC resolution**

If you remove the check mark from the [Keep PC resolution] box, the screen resolution of your computer will be switched as follows, and the display speed may be faster.

- CP-A221N, CP-A301N: 1024 x 768 (XGA)
- CP-AW251N: 1280 x 800 (WXGA)

If your computer does not support the display resolution specified above, a smaller resolution that is the largest among the resolutions that are supported by the computer will be selected.

---

**NOTE** • When the resolution is changed, the arrangement of icons on computer desktop screen may be changed.
**USB Display (continued)**

**Display LiveViewer Lite for USB**
If you want to display LiveViewer application window to the screen, please check the box.

**NOTE** • The annotation layer may not display on the projector image when this option is OFF.

**About**
The version information of the “LiveViewer Lite for USB”.

Replaced with a new lamp

Type number: DT01251

Replacing the lamp

A lamp has a finite product life. Using the lamp for long periods of time could cause the pictures darker or the color tone poor. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. Preparation of a new lamp and early replacement are recommended. To prepare a new lamp, make contact with your dealer and tell the lamp type number.

Replacing the lamp

1. Turn the projector off, and unplug the power cord. Allow the projector to cool for at least 45 minutes.
2. Prepare a new lamp. If the projector is mounted on a ceiling, or if the lamp has broken, also ask the dealer to replace the lamp.
3. Loosen the screw (marked by arrow) of the lamp cover and then slide and lift the lamp cover to the side to remove it.
4. Loosen the 2 screws (marked by arrow) of the lamp, and slowly pick up the lamp by the handle. Never loosen any other screws.
5. Insert the new lamp, and retighten firmly the 2 screws of the lamp that are loosened in the previous process to lock it in place.
6. While putting the interlocking parts of the lamp cover and the projector together, slide the lamp cover back in place. Then firmly fasten the screw of the lamp cover.
7. Turn the projector on and reset the lamp time using the LAMP TIME item in the OPTION menu.
   (1) Press the MENU button to display a menu.
   (2) Point at the ADVANCED MENU in the menu using the ▼/▲ button, then press the ► button.
   (3) Point at the OPTION in the left column of the menu using the ▼/▲ button, then press the ► button.
   (4) Point at the LAMP TIME using the ▼/▲ button, then press the ► button. A dialog will appear.
   (5) Press the ► button to select “OK” on the dialog. It performs resetting the lamp time.

CAUTION Do not touch any inner space of the projector, while the lamp is taken out.

NOTE Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.
Replacing the lamp (continued)

Lamp warning

⚠️ HIGH VOLTAGE ⚠️ HIGH TEMPERATURE ⚠️ HIGH PRESSURE

⚠️ WARNING ⚠️ The projector uses a high-pressure mercury glass lamp. The lamp can break with a loud bang, or burn out, if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. In addition, if the bulb bursts, it is possible for shards of glass to fly into the lamp housing, and for gas containing mercury and dust containing fine particles of glass to escape from the projector’s vent holes.

About disposal of a lamp: This product contains a mercury lamp; do not put it in a trash. Dispose of it in accordance with environmental laws.
- For lamp recycling, go to www.lamprecycle.org (in the US).
- For product disposal, consult your local government agency or www.eiae.org (in the US) or www.epsc.ca (in Canada).
For more information, call your dealer.

- If the lamp should break (it will make a loud bang when it does), unplug the power cord from the outlet, and make sure to request a replacement lamp from your local dealer. Note that shards of glass could damage the projector’s internals, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself.
- If the lamp should break (it will make a loud bang when it does), ventilate the room well, and make sure not to inhale the gas or fine particles that come out from the projector's vent holes, and not to get them into your eyes or mouth.
- Before replacing the lamp, turn the projector off and unplug the power cord, then wait at least 45 minutes for the lamp to cool sufficiently. Handling the lamp while hot can cause burns, as well as damaging the lamp.

Never unscrew except the appointed (marked by an arrow) screws.
- Do not open the lamp cover while the projector is mounted on a wall or ceiling. This is dangerous, since if the lamp's bulb has broken, the shards will fall out when the cover is opened. In addition, working in high places is dangerous, so ask your local dealer to have the lamp replaced even if the bulb is not broken.
- Do not use the projector with the lamp cover removed. At the lamp replacing, make sure that the screws are screwed in firmly. Loose screws could result in damage or injury.

Use only the lamp of the specified type. Use of a lamp that does not meet the lamp specifications for this model could cause a fire, damage or shorten the life of this product.
- If the lamp breaks soon after the first time it is used, it is possible that there are electrical problems elsewhere besides the lamp. If this happens, consult your local dealer or a service representative.
- Handle with care: jolting or scratching could cause the lamp bulb to burst during use.
- Using the lamp for long periods of time, could cause it dark, not to light up or to burst.
When the pictures appear dark, or when the color tone is poor, please replace the lamp as soon as possible. Do not use old (used) lamps; this is a cause of breakage.
Cleaning and replacing the air filter

The air filter unit of this projector consists of a filter cover, two kinds of filters, and a filter frame. The new double large filters system is expected to function longer. However, please check and clean it periodically to keep ventilation needed for normal operation of the projector.

When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible. Replace the filters when they are damaged or too soiled. To prepare new filters, make contact with your dealer and tell the following type number.

**Type number : UX37191 (Filter set)**

When you replace the lamp, please replace the air filter. An air filter of specified type will come together with a replacement lamp for this projector.

1. Turn the projector off, and unplug the power cord. Allow the projector to sufficiently cool down.

2. Use a vacuum cleaner on and around the filter cover.

3. Slide the filter unit upward to take it off from the projector.

4. Use a vacuum cleaner for the filter vent of the projector.

5. Take the fine meshed filter out while holding the filter cover. It is recommended to leave the coarse meshed filter in the filter cover as it is.

6. Use a vacuum cleaner on both sides of the fine meshed filter while holding it so it will not be sucked in. Use a vacuum cleaner for the inside of the filter cover to clean up the coarse meshed filter. If the filters are damaged or heavily soiled, replace them with new ones.

7. Put the fine meshed filter on the coarse meshed one, turning its stitched side up.

8. Put the filter unit back into the projector.

(continued on next page)
Cleaning and replacing the air filter (continued)

9. Turn the projector on and reset the filter time using the FILTER TIME item in the EASY MENU.

   (1) Press the **MENU** button to display a menu.
   (2) Point at the FILTER TIME using the ▼/▲ button, then press the ► button. A dialog will appear.
   (3) Press the ► button to select “OK” on the dialog. It performs resetting the filter time.

⚠️ **WARNING**

Before taking care of the air filter, make sure the power cable is not plugged in, then allow the projector to cool sufficiently. Taking care of the air filter in a high temperature state of the projector could cause an electric shock, a burn or malfunction to the projector.

- Use only the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It could result in a fire or malfunction to the projector.
- Clean the air filter periodically. If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn or malfunction to the projector.

**NOTE**

- Please replace the air filter when it is damaged or heavily soiled.
- When you replace the projection lamp, please replace the air filter. An air filter of specified type will come together with a replacement lamp for this projector.
- Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.
- The projector may display the message such as “CHECK THE AIR FLOW” or turn off the projector, to prevent the internal heat level rising.
Replacing the internal clock battery

This projector has internal clock that uses a battery. When the clock of the network function does not work correctly, please try solution by replacement of the battery: HITACHI MAXELL or HITACHI MAXELL ENERGY, part number CR2032 or CR2032H.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.
2. After making sure that the projector has cooled adequately, slowly turn over the projector, so that the bottom is facing.
3. Turn the battery cover fully in the direction indicated “OPEN” using a coin or the like, and pick the cover up to remove it.
4. Pry up the battery using a flathead screwdriver or the like to take it out. While prying it up, put a finger lightly on the battery since it may pop out of the holder.
5. Replace the battery with a new HITACHI MAXELL or HITACHI MAXELL ENERGY, Part No. CR2032 or CR2032H. Slide the battery in under the plastic claw, and push it into the holder until it clicks.
6. Replace the battery cover in place, then turn it in the direction indicated “CLOSE” using such as coins, to fix.

NOTE • The internal clock will be initialized by removing the battery. For setting the clock, see the User’s Manual - Network Guide.

⚠️ WARNING ▶ Be careful of handling a battery, as a battery can cause explosion, cracking or leakage, which could result in a fire, an injury, and environment pollution.
• Use only the specified and perfect battery. Do not use a battery with damage, such as a scratch, a dent, rust or leakage.
• When replacing the battery, replace it with a new battery.
• When a battery leaked, wipe the leakage out well with a waste cloth. If the leakage adhered to your body, immediately rinse it well with water. When a battery leaked in the battery holder, replace the batteries after wiping the leakage out.
• Make sure the plus and minus terminals are correctly aligned when loading a battery.
• Do not work on a battery; for example recharging or soldering.
• Keep a battery in a dark, cool and dry place. Never expose a battery to a fire or water.
• Keep a battery away from children and pets. Be careful for them not to swallow a battery. If swallowed consult a physician immediately for emergency treatment.
• Obey the local laws on disposing a battery.
Caring for the mirror and lens

If the projection mirror or lens is flawed, soiled or fogged, it could cause deterioration of display quality. Please take care of the mirror and lens, being cautious of handling.

1. Turn the projector off and unplug the power cord from the power outlet. And cool the projector down by leaving it for a while as it is.

2. The lens door can be opened manually. Please hold both side of the lens door and slowly open it until it is locked with clicking sound.

3. Use an air blower to blow away dust on the lens and on the mirror before wiping. Wipe softly the mirror and lens with a damped soft cleaning cloth for lens on the market, being careful not to give any damage on the mirror and lens.

4. To close the lens door properly, please take the following procedure.
   (1) Insert the power cord with the lens door opened.
   (2) The power indicator will light in orange, and the lens door closes automatically. Do not touch the lens door when the door is closing. Do not allow anything to obstruct the lens door.

**NOTE**

- When the lens door is closed manually, it may not shut properly.
- The lens door may not close when the LENS DOOR LOCK function of the SERVICE item in the OPTION menu is set to ON. Refer to the LENS DOOR LOCK function of the SERVICE item in the OPTION menu (60).

**WARNING**

- Before caring for the projection mirror and lens, turn the projector off and unplug the power cord, then cool the projector sufficiently.
- Do not use a vacuum cleaner to clean the projection mirror or lens, since it might give some damage.
- Do not use cleaners or chemicals other than those specified in this manual. Pay special attention to the mirror and lens as these materials could cause serious damage to either.

**CAUTION**

- Be careful not to pinch your finger with the lens door, to prevent an injury.
Other care

Inside of the projector
In order to ensure the safe use of your projector, please have it cleaned and inspected by your dealer about once every year.

Caring for the cabinet and remote control
Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, lightly wipe with gauze or a soft cloth.
   If the projector is extremely dirty, dip soft cloth in water or a neutral cleaner diluted in water, and wipe lightly after wringing well. Then, wipe lightly with a soft, dry cloth.

⚠️ WARNING ⚠️
Before caring, make sure the power cord is not plugged in, and then allow the projector to cool sufficiently. The care in a high temperature state of the projector could cause a burn and/or malfunction to the projector.

Never try to care for the inside of the projector personally. Doing is so dangerous.

Avoid wetting the projector or inserting liquids in the projector. It could result in a fire, an electric shock, and/or malfunction to the projector.

• Do not put anything containing water, cleaners or chemicals near the projector.
• Do not use aerosols or sprays.

⚠️ CAUTION ⚠️
Please take right care of the projector according to the following. Incorrect care could cause not only an injury but adverse influence such as discoloration, peeling paint, etc.

Do not use cleaners or chemicals other than those specified in this manual.
Do not polish or wipe with hard objects.

NOTICE
Do not directly touch the lens surface with hands.
If an abnormal operation should occur, stop using the projector immediately.

⚠️ **WARNING** ► Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. should occur. In such cases, immediately disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact to your dealer or service company.

Otherwise if a problem occurs with the projector, the following checks and measures are recommended before requesting repair.

If this does not resolve the problem, please contact your dealer or service company. They will tell you what warranty condition is applied.

| Blinking In Red or Lighting In Red | Turned off | Lighting In Red | There is a possibility that the interior portion has become heated. Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again.  
• Is there blockage of the air passage aperture?  
• Is the air filter dirty?  
• Does the peripheral temperature exceed 35°C?  
• Is the projector used at an altitude of about 1600 m or higher? If the projector is used at an altitude of about 1600 m or higher, set FAN SPEED of the SERVICE item in the OPTION menu to HIGH (59). |
| Lighting In Red | Turned off | Turned off | The lens door is not opened properly. One of the followings has been happened.  
• The lens door is not opened properly, when the projector is turned on.  
• The lens door position is shifted, while the projector is working. Restart the projector, after confirming that there is nothing that the lens door hits while opening or closing. |
| Lighting In Green | Simultaneous blinking in Red | | It is time to clean the air filter. Please immediately turn the power off, and clean or change the air filter referring to the section “Cleaning and replacing the air filter”. After cleaning or changing the air filter, please be sure to reset the filter timer. After the remedy, reset the power to ON. |
| Lighting In Green | Alternative blinking in Red | | There is a possibility that the interior portion has become overcooled. Please use the unit within the usage temperature parameters (5°C to 35°C). After the treatment, reset the power to ON. |
| Blinking In Green for approx. 3 seconds. | Turned off | Turned off | At least 1 "Power ON" schedule is saved to the projector. Please refer to Schedule Settings section of User’s Manual - Network Guide. |

**NOTE** • When the interior portion has become overheated, for safety purposes, the projector is automatically shut down, and the indicator lamps may also be turned off. In such a case, disconnect the power cord, and wait at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.
## Resetting all settings

When it is hard to correct some wrong settings, the FACTORY RESET function of SERVICE item in OPTION menu (Page 64) can reset all settings (except settings such as LANGUAGE, LAMP TIME, FILTER TIME, FILTER MESSAGE, SECURITY and NETWORK) to the factory default.

<tr>
<td>Network does not work</td>
<td>The SAVING function is working. Select NORMAL for STANDBY MODE item in the SETUP menu.</td>
<td>45</td>
</tr>
<tr>
<td>NETWORK BRIDGE function does not work</td>
<td>The NETWORK BRIDGE function is turned off. Select NETWORK BRIDGE for COMMUNICATION TYPE item in the OPTION - SERVICE - COMMUNICATION menu.</td>
<td>62</td>
</tr>
<tr>
<td>Schedule function does not work</td>
<td>The SAVING function is working. Select NORMAL for STANDBY MODE item in the SETUP menu.</td>
<td>45</td>
</tr>
<tr>
<td>When the projector is connected to the network, it powers off and on as described below. Powers off ↓ POWER indicator blinks in orange a few times ↓ Goes into standby mode</td>
<td>Disconnect the LAN cable and check that the projector is working properly. If this phenomenon occurs after connecting to the network, there may be a loop between two Ethernet switching hubs within the network, as explained below. - There are two or more Ethernet switching hubs in a network. - Two of the hubs are doubly connected by LAN cables. - This double connection forms a loop between the two hubs. Such a loop may have an adverse effect on the projector as well as the other network devices. Check the network connection and remove the loop by disconnecting the LAN cables such that there is only one connecting cable between two hubs.</td>

</tbody>
</table>

**NOTE** • Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and it does not constitute or imply a machine defect.
Please see the **Specifications** in the **User's Manual (concise)** which is a book.

**End User License Agreement for the Projector Software**
- Software in the projector consists of the plural number of independent software modules and there exist our copyright or/and third party copyrights for each of such software modules.
- Be sure to read “End User License Agreement for the Projector Software” which is separated document. (in the CD)
