Installing the Unit

This section describes how to install the unit and screen, how to connect the equipment from which you want to project the picture, etc.

The installation distance between the unit and a screen varies depending on the size of the screen or whether or not you use the lens shift features. Install this unit so that it fits the size of your screen. For details on the distance between the unit and the screen (the projection distance) and the size of projected video, see “Projection Distance and Lens Shift Range” (page 60).

1. Position the unit so that the lens is parallel to the screen.

   Top view

2. Project an image on the screen and adjust the picture so that it fits the screen (page 7).

Note

When using a screen with an uneven surface, stripes pattern may rarely appear on the screen depending on the distance between the screen and the unit or the zooming magnifications. This is not a malfunction of the unit.
Adjusting the Picture Position

Project an image on the screen and then adjust the picture position.

Tips
- The I/○ (ON/STANDBY), INPUT, MENU, and ↑/↓/←/→/□ (joystick) buttons on the side panel of the unit function the same as those on the remote control. The LENS button functions in the same way as the LENS ADJUSTMENT (FOCUS, ZOOM, SHIFT) buttons of the remote control.
- When adjusting the lens, each time you press the LENS button on the unit, the lens adjustment function switches between “Lens Focus,” “Lens Zoom” and “Lens Shift.”

1 After connecting the AC power cord to the unit, plug the AC power cord into a wall outlet.
The ON/STANDBY indicator lights in red and the unit goes into standby mode.

2 Press the I/○ (ON/STANDBY) button to turn on the unit.

Note
Depending on the installation location of the unit, you may not be able to control it with the remote control. In this case, point the remote control at the remote control detector of the unit or the screen.

3, 4, 5

Remote control detector

After connecting the AC power cord to the unit, plug the AC power cord into a wall outlet.
The ON/STANDBY indicator lights in red and the unit goes into standby mode.

Press the I/○ (ON/STANDBY) button to turn on the unit.

The ON/STANDBY indicator flashes in green, and then lights in green.

Lights in red.

Flashes in green for tens of seconds and then lights in green.

FOCUS → ZOOM → SHIFT
3 Adjust the focus.
Press the LENS ADJUSTMENT (FOCUS) button to display the Lens Focus adjustment window (test pattern). Then adjust the focus of the picture by pressing the ↑/↓/←/→ buttons.

Tips
• When “Lens Control” is set to “Off” on the Installation menu, you cannot adjust the focus, the picture size or the proper position by pressing the FOCUS, ZOOM or SHIFT buttons (page 37).
• When “Test Pattern” is set to “Off” on the Function menu, the test pattern is not displayed (page 35).

Note
Adjust the lens by using buttons on the remote control or the control panel of the unit. Never make adjustments by directly turning the lens with your hands, which may cause damage or malfunction to the unit.

4 Adjust the picture size.
Press the LENS ADJUSTMENT (ZOOM) button to display the Lens Zoom adjustment window (test pattern). Then adjust the size of the picture by pressing the ↑/↓/←/→ buttons.

To make the picture larger, press ↑. To make the picture smaller, press ↓/←.
5  Adjust the picture position.
Press the LENS ADJUSTMENT (SHIFT) button to display the Lens Shift adjustment window (test pattern). Then adjust to the proper position of the picture by pressing the \( \uparrow/\downarrow/\leftarrow/\rightarrow \) buttons.

**Tip**
Whenever you press the \( \oplus \) button, the test pattern disappears.

**Note**
When adjusting the window position, do not touch the lens unit, otherwise your fingers may be pinched by the moving parts.

---

**To adjust the horizontal position**

Press \( \leftrightarrow \).
The picture projected on the screen moves right or left by a maximum of 31% of the screen width from the center of the lens.

**Top view**

31% 1 screen width 31%

- : Picture position when moving the picture to the left at maximum
- : Picture position when moving the picture to the right at maximum
To adjust the vertical position

Press ↑/↓.
The picture projected on the screen moves up by a maximum of 85% or moves down by a maximum of 80% of the screen height from the center of the lens.

**Side view**

- 85%
- 1 screen height
- 80%

| Picture position when moving the picture upward at maximum | Picture position when moving the picture downward at maximum |

**Note**
The range to move the picture projected on the screen can be adjusted only within the octagon area illustrated below. For details, see “Projection Distance and Lens Shift Range” (page 60).

**Range of movement of the projected picture**

- 0.85V
- 0.31H
- 0.8V

H: Width of the projected picture
V: Height of the projected picture

**To adjust the tilt of the installation surface**

If the unit is installed on an uneven surface, use the front feet (adjustable) to keep the unit level.

**Notes**
- If the unit is tilted up or down, the projected image may be trapezoidal.
- Be careful not to catch your finger when turning the front feet (adjustable).
Lens adjustment window (test pattern)

1.78:1 (16:9)
1.33:1 (4:3)
2.35:1
1.85:1

The dashed lines show the screen sizes of each aspect ratio.
Connecting to Video Equipment or a Computer

You can enjoy high picture quality by connecting a DVD player/recorder, Blu-ray Disc player/recorder, or PlayStation® equipped with HDMI output to the HDMI input of the unit.

When making connections, be sure to do the following:

- Turn off all equipment before making any connections.
- Use the proper cables for each connection.
- Insert the cable plugs properly; poor connection at the plugs may cause a malfunction or poor picture quality. When pulling out a cable, be sure to pull it out from the plug, not the cable itself.
- Refer to the operating instructions of the connected equipment.

Use a high speed HDMI cable on which the cable type logo is specified. (Sony products are recommended.)
Notes

• Use a high-speed HDMI cable. With a standard HDMI cable, images of 1080p, DeepColor, 3D video and 4K video may not be displayed properly.

• When connecting an HDMI cable to the unit, make sure the ▼ mark on the upper part of the HDMI input of the unit and the ▲ mark on the connector of the cable is set at the same position.

• If the picture from equipment connected to the unit with an HDMI cable is not correct, check the settings of the connected equipment.

• If you set your computer, such as a notebook type, to output the signal to both computer’s display and this equipment, the picture of the equipment may not appear properly. Set your computer to output the signal to only the external monitor. For details, refer to the computer’s operating instructions supplied with your computer. For settings of the computer, consult with the manufacturer of the computer.
Projecting the Picture

This section describes how to operate the unit to view the picture from the equipment connected to the unit. It also describes how to adjust the quality of the picture to suit your taste.

1. Turn on both the unit and the equipment connected to the unit.
2. Press INPUT to display the input palette on the screen.
3. Select the equipment from which you want to display images. Press INPUT repeatedly or press ‹/›/ › (enter) to select the equipment from which to project.

Tip
When “Status” is set to “Off” on the Setup menu, the input palette does not appear. Press the INPUT button to switch between input terminals in sequence.

Turning Off the Power

1. Press the I/◦ (ON/STANDBY) button.
   A message “POWER OFF?” appears on the screen.
2. Press the I/◦ (ON/STANDBY) button again before the message disappears. The ON/STANDBY indicator flashes in green and the fan continues to run to reduce the internal heat. First, the ON/STANDBY indicator flashes quickly, during which you will not be able to light up the ON/STANDBY indicator with the I/◦ (ON/STANDBY) button.

   The fan stops and the ON/STANDBY indicator changes from flashing green to remaining red.

   The power is turned off completely, and you can disconnect the AC power cord.

Note
Never disconnect the AC power cord while the indicator is flashing. You can turn off the unit by holding the I/◦ (ON/STANDBY) button for about 1 second, instead of performing the above steps.

To view the picture from | Press INPUT to display
---|---
Equipment connected to the HDMI 1 connector | HDMI 1
Equipment connected to the HDMI 2 connector | HDMI 2
Watching 3D Video Images

You can enjoy powerful 3D video images, such as from 3D games and 3D Blu-ray Discs, using the optional Active 3D Glasses (TDG-BT500A).

1 Turn on the HDMI equipment for 3D compatibility connected to the unit, then play the 3D content.
   For details on how to play 3D content, refer to the operating instructions for the connected equipment.

2 Turn on the unit and project the 3D video image onto the screen.
   For details on how to project the image, see “Projecting the Picture” (page 14).

3 Turn on the 3D glasses, and then put them on so that they fit comfortably.
   For details on how to use the 3D glasses, see “Using the 3D Glasses” (page 15).

Tips
- The factory default setting for “2D-3D Display Sel.” is “Auto” to allow projecting 3D video images automatically when the unit detects 3D signals.
- To convert 3D video images to 2D video images, set “2D-3D Display Sel.” to “2D” (page 34).

Notes
- It may not be possible to display 3D video image, depending on the type of signal. Set the “2D-3D Display Sel.” to “3D,” and “3D Format” to “Side-by-Side” or “Over-Under” to suit the format of the 3D content you want to watch (page 34).
- Use the 3D glasses within the communication range (page 15).
- There are differences in perception of 3D video images among individuals.
- When the temperature of the usage environment is low, the 3D effect may be diminished.

Adjusting/Setting the 3D functions
You can adjust/set the 3D functions by pressing the 3D button on the remote control or with the “3D Settings” of the Function menu. For details, see “3D Settings” (page 34).

Using the 3D Glasses

1 Turn on the 3D glasses, and register them on the unit.
   For details on how to register the 3D glasses, refer to the operating instructions supplied with the 3D glasses.

2 Put on the 3D glasses.

3 Turn toward the screen.

Precautions for use
Misoperation may occur if:
- The viewing position is too far from the projector
- There are other communication devices, such as a wireless LAN (IEEE802.11 b/g/n) or a microwave with a bandwidth of 2.4 GHz, near the unit

3D glasses communication range
Figure below indicate the communication range of the 3D glasses. If you try to watch 3D video images from a distance greater than the communication range or install the unit outside the communication range, the 3D glasses may not be able to display the images properly. Also, the distance varies depending on the environment of the room and installation environment of the unit.
Using the Picture Position

You can store up to five combinations of lens settings (focus, picture size, picture position) and aspect ratio, and you can recall those settings.

1. Press POSITION.

The Picture Position selecting palette is displayed.

2. Press POSITION repeatedly, or press ↑/↓/←/→ to select the position. The settings of the position selected is recalled.

Store or delete the lens settings and aspect ratio in the “Picture Position” of the Screen menu (page 30). A position where lens settings and aspect ratio are not stored is displayed as “---.”
**Image of the lens moving**

In the example below, the images with aspect ratio of 1.78:1 (16:9) and 2.35:1 are projected on a 2.35:1 screen.

![Diagram showing lens movement](image)

When a 1.78:1 (16:9) image is input

![Diagram showing lens movement](image)

When a 2.35:1 image is input

> Press the POSITION button.

![Diagram showing lens movement](image)

The 2.35:1 image expands to fill the screen.

**Notes**

- After you have selected and confirmed the lens position, the lens starts to move. Do not touch, or place anything near, the lens, otherwise it may cause injury or a malfunction.
- If you press any button on the remote control or the unit while the lens is moving, the lens stops. In this case, select the lens position again or adjust the lens manually.
- The Picture Position function is not guaranteed to reproduce the lens settings precisely.
- When you use the subtended screen angle of two or more aspects using lens zoom, install the unit within the specified parameters referring to “Projection distance” (page 61). With some setting positions, the range of lens shift may be restricted, even though the unit is installed within the specified parameters.
Selecting the Aspect Ratio According to the Video Signal

You can select an aspect ratio best suited for the video signal received.

Press ASPECT. Each time you press the button, you can select the “Aspect” setting. You can also select it using the menu (page 31).

Selecting the Aspect Ratio According to the Video Signal

Selectable aspect modes vary depending on the input signal (page 58).

The aspect cannot be selected for an input signal from a computer, or an input signal with a resolution of 4096 × 2160 (page 53).

Notes on switching the “Aspect” setting

- Select the aspect mode taking into account that changing the aspect ratio of the original picture will provide a different look from that of the original image.
- Note that if the unit is used for profit or for public viewing, modifying the original picture by switching the aspect may constitute an infringement of the rights of authors or producers, which are legally protected.

This section describes how to make various adjustments and settings using the menus.

**Operation through the Menus**

The unit is equipped with an on-screen menu for making various adjustments and settings. If you select an item name followed by an arrow (►), the next menu window with setting items appears.

1. Press MENU.

The menu window appears.

2. Press ↑/↓ to select a menu item, and press → or ◀.

The items that can be set or adjusted with the selected menu appear. The item presently selected is shown in white.

3. Press ↑/↓ to select an item you want to set or adjust and press → or ◀.

The setting items are displayed in a pop-up menu, in a setting menu, in an adjustment menu or in the next menu window.

Setting items

4 Make the setting or adjustment of an item.

When changing the adjustment level
To increase the value, press \( \uparrow / \rightarrow \). To decrease the value, press \( \downarrow / \leftarrow \).
Press \( \uparrow \) to store the setting and restore the original menu screen.

When changing the setting
Press \( \uparrow / \downarrow \) to change the setting. Press \( \uparrow \) to restore the original screen. You can restore the original screen using \( \leftarrow \) depending on the selected item.

To clear the menu
Press MENU.

To reset the picture that has been adjusted
Select “Reset” from the Picture menu.

When the screen display appears, select “Yes” using \( \leftarrow \) and press \( \uparrow \).
All of the following settings are reset to its factory preset value: “Reality Creation,” “Cinema Black Pro,” “Motionflow,” “Contrast,” “Brightness,” “Color,” “Hue,” “Color Temp.,” “Sharpness,” and “Expert Setting” on the Picture menu.

To reset the items that have been adjusted
Select an item in the menu screen, and display the pop-up menu, the setting menu, or the adjustment menu. Press RESET on the remote control to reset only the selected settings to its factory preset value.

Note
The RESET button on the remote control is available only when the adjustment menu or the setting menu is selected.
**Picture Menu**

The Picture menu is used for adjusting the picture.

</table>
| Motionflow   | **Smooth High:** Provides smoother picture movement; especially effective for film-based content.  
**Smooth Low:** Provides smoother picture movement for standard use.  
**Impulse:** Reproduces original picture quality. Provides cinema-like picture, which may flicker.  
**Combination:** Reduces motion blur while maintaining brightness for high-speed picture content.  
**True Cinema:** Images, such as a movie created in 24 frames per second, are reproduced at the original framerate.  
**Off:** The “Motionflow” function is not applied. |
|              | **Tips**  
- Select “Off” if the selected “Smooth High,” “Smooth Low,” “Impulse,” “Combination,” or “True Cinema” results in a distorted picture.  
- Depending on the picture content, you may not see the effect visually even if you have changed the settings. |
| Contrast     | Adjusts the contrast.  
Higher values increase the sharpness in images, while lower values decrease the sharpness.  
You can make adjustments by pressing the CONTRAST +/- on the remote control. |
| Brightness   | Adjusts the brightness of the picture.  
The higher the setting, the brighter the picture. The lower the setting, the darker the picture.  
You can make adjustments by pressing the BRIGHTNESS +/- on the remote control. |
| Color        | Adjusts the color density.  
The higher the setting, the greater the intensity. The lower the setting, the lower the intensity. |
| Hue          | Adjusts the color tone.  
The higher the setting, the more greenish the picture becomes. The lower the setting, the more reddish the picture becomes. |
| Color Temp.  | Adjusts the color temperature.  
**D93:** Equivalent to 9,300 K color temperature normally used in TVs. Gives white colors a blue tint.  
**D75:** Equivalent to 7,500 K color temperature used as an ancillary standard illuminant. Gives a neutral tint between “D93” and “D65.”  
**D65:** Equivalent to 6,500 K color temperature used as a standard illuminant. Gives white colors a red tint.  
**D55:** Equivalent to 5,500 K color temperature used as an ancillary standard illuminant. Gives white colors an even redder tint.  
**Custom 1 to 5:** Enables you to adjust, set, and store your favorite color temperature.  
The factory default settings are as follows.  
  - **Custom 1:** Same as “D93” color temperature setting.  
  - **Custom 2:** Same as “D75” color temperature setting.  
  - **Custom 3:** Same as “D65” color temperature setting.  
  - **Custom 4:** Same as “D55” color temperature setting.  
  - **Custom 5:** Setting that prioritizes brightness. |
| Sharpness    | Sharpens the outline of the picture, or reduces the noise.  
The higher the setting, the sharper the picture. The lower the setting, the softer the picture, thus reducing the noise.  
You can make adjustments by pressing the SHARPNESS +/- on the remote control. |

| Color Correction | **On:** Adjusts Hue, Color or Brightness of the selected colors. Repeat steps ① and ② described below to specify the target color.  
① Press ‹/› to select “Color Select,” then press ‹/› to select the color you want to adjust among “Red,” “Yellow,” “Green,” “Cyan,” “Blue” and “Magenta.”  
② Press ‹/› to select “Hue,” “Saturation” or “Brightness,” then adjust them to suit your taste using ‹/› while watching the projected picture.  
**Off:** The “Color Correction” effect is not applied. |
| Clear White | Emphasizes vivid whites.  
**High/Low:** You can adjust the “Clear White” effect.  
**Off:** The “Clear White” effect is not applied. |
| x.v.Color | Set this item when connecting the unit with equipment that supports x.v.Color and playing back an x.v.Color video signal.  
**On:** You can play back an x.v.Color video signal.  
**Off:** The “x.v.Color” function is not applied.  
For details on x.v.Color, see “About the x.v.Color” (page 47). |
| Tip | Setting x.v.Color to “On” disables gamma adjustment. |
| Color Space | Converts the color space.  
**BT.709:** An ITU-R BT.709 color space, which is used for high-definition television broadcast or Blu-ray Disc. The color space is equivalent to sRGB.  
**Color Space 1:** The color space suited for watching TV programs and video images, such as sport, concerts, etc.  
**Color Space 2:** The color space suited for watching TV programs, sport, concerts, and other video images in a bright environment, such as a living room.  
**Color Space 3:** The color space suited for watching movies in a bright environment, such as a living room.  
**Custom:** You can adjust the color space setting. |
Advanced Picture Menu

You can adjust the gaps in color that have occurred after a long period of use.

Notes
- Auto Calibration results in relatively coarse calibration. No warranty is given for the color settings to be the same as the factory default values.
- While performing “Pre Check” or “Adjust,” the colors are projected automatically. This is not a malfunction.
- Do not turn off the power or operate the remote control or control panel during “Pre Check” or “Adjust”, as the process may be canceled.

Tips
- dE is an indicator of changing color. The smaller the value of dE, the fewer the changes caused by the color.
- Perform the calibration after the power has been on for more than 30 minutes.
- It takes a few minutes for “Pre Check” or “Adjust” to complete.
- When “Pre Check” or “Adjust” starts, the screen position may shift, as the lens returns to its factory default position. After completion, the screen returns to its previous position automatically.
- If the environment changes, such as the brightness of the room, while performing “Pre Check” or “Adjust”, measurement may be affected.
- If the “Pre Check” or “Adjust” function fails, try it once again.

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Description</th>
</tr>
</thead>
</table>
| Auto Calibration | **Pre Check:** Checks the color difference against the factory default settings, before calibration starts.  
**Adjust:** Performs Auto Calibration.  
**Before/After:** Toggles the factory default setting and the setting after the calibration at a certain frequency. You can check the effect of the calibration by monitoring the actual image.  
**Reset:** Resets the calibration results, and returns to the factory default settings. |
Screen Menu

You can set the picture size, aspect mode, etc.

These items may not be available, depending on the type of input signal. For details, see “Input Signals and Adjustable/Setting Items” (page 55).

Item names in brackets represent those printed on the remote control.

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Description</th>
</tr>
</thead>
</table>
| Picture Position [POSITION] | You can store up to five combinations of lens settings and aspect ratio. After setting the lens and aspect, select from “1.85:1,” “2.35:1,” “Custom 1,” “Custom 2” or “Custom 3” depending on the subtended screen angle, and after confirming, continue by selecting “Save,” “Delete,” or “Select.”
|                             | **Save:** Stores the current lens settings (focus, window size, window position) in the selected position. If a setting is already stored in that position, it is overwritten. **Delete:** Deletes the stored setting. After the setting is deleted, “1.85:1,” “2.35:1,” “Custom 1,” “Custom 2,” or “Custom 3” in the display change to “--.--.” **Select:** Recalls the settings of the selected position. |

Tip

The optimal aspect ratio is preset for each picture position. The aspect ratio can be changed and saved for each picture position.

Notes

- After you have selected and confirmed the lens position, the lens starts to move. Do not touch the lens and the area around the lens, otherwise it may cause injury or a malfunction.
- If you press any button on the unit while the lens is moving, the lens stops. In this case, select the lens position again or adjust the lens manually.
- When you use a 2.35:1 or a 16:9 subtended screen angle with the Picture Position function, make sure that the installation position is suitable (page 16).
- The Picture Position function is not guaranteed to reproduce the lens settings precisely.
### Aspect [ASPECT]

You can set the aspect ratio of the picture to be displayed for the current input signal (page 18).

You can set the function only when a video signal other than a resolution of 4096 × 2160 pixels is input.

**1.85:1 Zoom:** A 1.85:1 aspect ratio picture is displayed in its original aspect ratio, enlarged so that black bands do not appear at the top and bottom of the screen.

**2.35:1 Zoom:** A 2.35:1 aspect ratio picture is displayed in its original aspect ratio, enlarged so that black bands at the top and bottom of the screen are as small as possible.

When you select “2.35:1 Zoom” from “Trigger Select 1/2” on the Installation menu, a 12 V signal is output from the TRIGGER 1 or TRIGGER 2 connector (page 37).

**Normal:** Input video is displayed in its original aspect ratio, enlarged to fill the screen. This mode is suitable for viewing 1.78:1 (16:9) and 1.33:1 (4:3) video.

**V Stretch:** This is the most suitable mode for using a 2.35:1 screen to view 2.35:1 video with a commercially available anamorphic lens.

When you select “V Stretch” from “Trigger Select 1/2” on the Installation menu, a 12 V signal is output from the TRIGGER 1 or TRIGGER 2 connector (page 37).

**Squeeze:** With this setting, 1.78:1 (16:9) and 1.33:1 (4:3) video will be displayed in their correct aspect ratios when you use a commercially available anamorphic lens.

**Stretch:** Displays video that has been squeezed to 1.33:1 (4:3) as 1.78:1 (16:9) aspect ratio.

### Tips

- When you select “V Stretch” or “Squeeze,” select the anamorphic lens type from “Anamorphic Lens” in the Installation menu.
- Selectable aspect modes vary depending on the input signal (page 58).
- The aspect cannot be selected for an input signal from a computer, or an input signal with a resolution of 4096 × 2160 (pages 53, 54, 58).

### Function Menu

The Function menu is used for changing the settings of the various functions of the unit.

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>3D Settings</strong></td>
<td>You can change the settings of the 3D function.</td>
</tr>
<tr>
<td><strong>2D-3D Display Sel.</strong></td>
<td>For Switching the video images to “2D” or “3D.”</td>
</tr>
<tr>
<td><strong>Auto:</strong></td>
<td>Displays 3D video images when HDMI signals with 3D information* are input. Displays 2D video images when other signals are input.</td>
</tr>
<tr>
<td><strong>3D:</strong></td>
<td>Displays 3D video images according to the 3D system selected in “3D Format.” However, when HDMI signals with 3D information are input to the unit, displays 3D video images according to the 3D system of those HDMI signals.</td>
</tr>
<tr>
<td><strong>2D:</strong></td>
<td>Displays 2D video images.</td>
</tr>
<tr>
<td><em>The 3D information is additional information to discriminate 3D. Some HDMI signals have additional information to discriminate 3D and some HDMI signals have none.</em>*</td>
<td></td>
</tr>
<tr>
<td><strong>3D Format:</strong></td>
<td>Set the 3D system when the input HDMI signals do not include 3D information.</td>
</tr>
<tr>
<td><strong>Simulated 3D:</strong></td>
<td>Converts 2D video images to 3D video images. The setting can be made only for input the HD signals. The simulated 3D feature may have limited effect, depending on the video source. There are differences in perception of 3D video images among individuals.</td>
</tr>
<tr>
<td><strong>Side-by-Side:</strong></td>
<td>Select this to display 3D images as two similar images, side-by-side.</td>
</tr>
<tr>
<td><strong>Over-Under:</strong></td>
<td>Select this to display 3D images as two similar images, one above the other.</td>
</tr>
</tbody>
</table>

### Tips
- “2D-3D Display Sel.” cannot be set to “3D” for some video sources. For available 3D signals, see “Compatible 3D Signals” (page 56). The simulated 3D feature may have limited effect, depending on the screen size (100 to 120 inches recommended) and the video source. The menu display has a ghost while a 3D video image is displayed and is best viewed with the 3D glasses.

| 3D Brightness | For adjusting the brightness of the picture when watching 3D video images. You can select the brightness “High” or “Standard.” |
### Function Menu

#### Using the Menus

**3D Depth Adjust**
For adjusting the depth of the 3D video images on the screen. The setting can be made only when a 3D Format other than “Simulated 3D” is selected.

<table>
<thead>
<tr>
<th>Depth</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>-2</td>
<td>Front</td>
</tr>
<tr>
<td>-1</td>
<td>Normal</td>
</tr>
<tr>
<td>0</td>
<td>Depth</td>
</tr>
<tr>
<td>+1</td>
<td></td>
</tr>
<tr>
<td>+2</td>
<td></td>
</tr>
</tbody>
</table>

We recommend that “3D Depth Adjust” be set to “0.” The 3D video images may be difficult to perceive, depending on the setting of “3D Depth Adjust.”

**Simulated 3D Effect**
For adjusting the 3D effect when 2D content is converted to 3D video images. You can select the effect from among “High,” “Middle,” and “Low.”

**Tip**
There are differences in perception of 3D video images converted by the simulated 3D function among individuals.

#### Dynamic Range
Sets the video input level for HDMI 1 and HDMI 2 connectors.

- **Auto**: Sets the video input level automatically.
- **Limited**: The video input level is set for signals of 16-235.
- **Full**: The video input level is set for signals of 0-255.

**Note**
If the video output setting of the connected HDMI device is not set correctly, light and dark parts of the video may appear too light or too dark.

#### Test Pattern
Displays a test pattern according to the setting.

- **On**: A test pattern appears on the screen to be used when adjusting the lens with “Lens Focus,” “Lens Zoom,” and “Lens Shift.”
- **Off**: A test pattern does not appear.

**Tip**
While the test pattern is displayed, it is only displayed in green to allow you to adjust the focus easily.

#### Settings Lock
Locks menu item settings to prevent operational error (page 36).

- **Off**: Cancels the Settings Lock.
- **Level A**: Group 1 items (below) are not displayed on the menu, and are not available.
- **Level B**: Group 1 and Group 2 items (below) are not displayed on the menus, and are not available.

## Installation Menu

The Installation menu is used for changing the installation settings.

### Setting items | Description
--- | ---
Image Flip | Flips the picture on the screen horizontally and/or vertically.  
**HV**: Flips the picture horizontally and vertically.  
**H**: Flips the picture horizontally.  
**V**: Flips the picture vertically.  
**Off**: The picture does not flip.  
Use this item for installation for the backside projection or ceiling installation.

Lens Control | Avoids any operation of the lens such as “Lens Focus,” “Lens Zoom,” and “Lens Shift,” by mistake.  
**On**: Enables adjustment of the lens.  
**Off**: Prevents any adjustment of the lens.

Anamorphic Lens | Select a setting to match the anamorphic lens conversion ratio.  
**1.24x**: Select this when you use an anamorphic lens with a horizontal rate of 1.24×.  
**1.32x**: Select this when you use an anamorphic lens with a horizontal rate of 1.32×.

Trigger Select | Switches the output function of the TRIGGER 1/TRIGGER 2 connector.  
**Off**: Turns off the TRIGGER connector function.  
**Power**: Outputs 12 V signals from the TRIGGER 1/TRIGGER 2 connectors when the unit is on. The TRIGGER 1/TRIGGER 2 connectors do not output any signals when the unit is in standby.  
**V Stretch**: Works with the “Aspect” setting’s “V Stretch” (page 31) and outputs a 12 V signal from the TRIGGER 1 or TRIGGER 2 connector.  
**2.35:1 Zoom**: Works with the “Aspect” setting’s “2.35:1 Zoom” (page 31) and outputs a 12 V signal from the TRIGGER 1 or TRIGGER 2 connector.

IR Receiver | Selects the remote control detectors (IR Receiver) on the front and rear of the unit.  
**Front & Rear**: Activates both the front and rear detectors.  
**Front**: Activates the front detector only.  
**Rear**: Activates the rear detector only.
Blanking

This feature allows you to adjust the displayable region within the four directions of the screen.
Select the edge to adjust by highlighting Left, Right, Top, or Bottom using the ↑/↓ buttons.
Adjust the amount of blanking using the ←/→ buttons.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Blanking</td>
<td>This feature allows you to adjust the displayable region within the four directions of the screen. Select the edge to adjust by highlighting Left, Right, Top, or Bottom using the ↑/↓ buttons. Adjust the amount of blanking using the ←/→ buttons.</td>
</tr>
</tbody>
</table>

Tip

Depending on the aspect ratio setting, right/left blanking may not be available.

Panel Alignment

This feature allows you to adjust the gaps in the color of characters or the picture on the screen.
Adjust: Adjusts the gaps in the colors selecting “Adjust Color” or “Adjust Item.”
Adjust Item: Selects how to make adjustments from below.
Shift: Shifts the whole picture and makes adjustments.
Zone: Selects the desired range and makes adjustments.
Adjust Color: Assigns the desired color to adjust the gaps in color. Select “R” (Red) or “B” (Blue) to make adjustments based on “G” (Green).
Pattern Color: Select “R/G” (Red and Green) or “R/G/B” (White, all colors) when “Adjust Color” is “R” (Red). Select “B/G” (Blue and Green) or “R/G/B” (White, all colors) when the “Adjust Color” is “B” (Blue).
Adjust: The shift adjustment and zone adjustment of the color selected in “Adjust Color” can be made with ←/→. ↑/↓ buttons.
When “Shift” is selected: Assign the settings of the horizontal direction (H) with ←/→ buttons and the vertical direction (V) with ↑/↓ buttons on the shift adjustment screen.
When “Zone” is selected: Select the position to adjust with buttons for the horizontal position (H position) and buttons for the vertical position (V position), then press .

Set the amount to adjust with buttons for the horizontal direction (H direction) and with buttons for the vertical direction (V direction). You can select the position to adjust again by pressing .

**Reset:** Returns to the factory settings.
**Preset:** The optimized data has been preset.

**Note**
Depending on the adjustments made above, colors may become uneven or the resolution may change.

The Information menu displays the model name, serial number, input signal type, software version and the cumulated hours of usage of the lamp.

### Items

| Model Name | Displays the model name |
| Serial No. | Displays the serial number. |
| Signal type | Displays the type of the input signal. When input signals with 3D information are input, the type of input signals and the 3D format are displayed. |
| Software Version | Displays the software version. |
| Lamp Timer | Indicates how long the lamp has been turned on (total usage). |

**Note**

You cannot adjust or change the displays listed above.

### About the Preset Memory

This unit has default image data to adjust preset data for input signals appropriately according to the signals shown in “Preset Signals” (page 53) (the preset memory). When the preset signal is input, the unit automatically detects the signal type and recalls the data for the signal from the preset memory to adjust it to an optimum picture. The signal type is displayed in the Information menu.

**Note**

Depending on the computer input signal, parts of screen may be hidden or displayed incorrectly.
Using Network Features

Connecting the unit to the network

1. Connect the LAN cable.

   ![LAN cable diagram]

   LAN cable (straight type) (not supplied)

   Hub, router, etc.

2. Set the network settings for the unit using “Network Setting” on the Installation menu (page 39).

Supported network monitoring and control protocols

- SDAP (Advertisement)
- SDCP (PJ Talk)
- DDDP (AMX)

**Note**

The network functions above are constantly enabled.
## Troubleshooting

If the unit appears to be operating erratically, try to diagnose and correct the problem using the following instructions. If the problem persists, consult with qualified Sony personnel.

### Power

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause and Remedy</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The power is not turned on.</td>
<td>The power may not turn on if you turn the power off with I/◊ (ON/STANDBY) button and turn it on again in a short time. After about 1 minute, turn the power on.&lt;br&gt;Close the lamp cover securely, then tighten the screws securely.&lt;br&gt;Check warning indicators.</td>
<td>49</td>
</tr>
<tr>
<td>The power is suddenly turned off.</td>
<td>Check that “Power Saving” in the Setup menu is set to “Standby.”&lt;br&gt;Set “Power Saving” to “Off.”</td>
<td>33</td>
</tr>
</tbody>
</table>

### Picture

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause and Remedy</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>No picture.</td>
<td>Check that the connecting cable is connected to the external equipment properly.&lt;br&gt;Depending on the external equipment, the unit may not function correctly via the HDMI 1 connector. In this case, use the HDMI 2 connector, then select the input.&lt;br&gt;Select the input source correctly using the INPUT button.&lt;br&gt;Check that the computer signal is set for output to an external monitor.&lt;br&gt;If the notebook computer, etc., signal is output to its display and an external monitor, the external monitor’s image may not be displayed correctly. Set your computer to output the signal to only an external monitor.</td>
<td>12</td>
</tr>
<tr>
<td>The picture has ghosts.</td>
<td>Video images are displayed in 3D. Watch the 3D video images using the 3D glasses, and set “2D-3D Display Sel.” to “3D.”&lt;br&gt;To convert 3D video images to 2D video images, set “2D-3D Display Sel.” to “2D.”</td>
<td>15, 34</td>
</tr>
<tr>
<td>Bright or dark area of the video appears too bright or too dark.</td>
<td>This symptom may occur when signal level other than those of HDMI standard is input. Switch the output level of the connected equipment, or switch the Dynamic Range on the Function menu of the unit.</td>
<td>35</td>
</tr>
<tr>
<td>The picture is too dark.</td>
<td>Adjust “Contrast” or “Brightness” on the Picture menu properly.</td>
<td>26</td>
</tr>
<tr>
<td>The picture is not clear.</td>
<td>Adjust the focus.</td>
<td>8</td>
</tr>
<tr>
<td></td>
<td>Condensation has accumulated on the lens. Leave the unit for about 2 hours with the power on.</td>
<td>–</td>
</tr>
</tbody>
</table>
## Error Handling

### The color of characters or the picture is not appropriate.
Select the desired color registration in “Panel Alignment” of the Installation menu. Page 38

### Image is left on the screen. (image retention)
When high contrast non-moving images are displayed for a long period of time, there may be some image retention on the screen. This is only a temporary condition. Turning off the power for a while will eliminate the retained image.

### On-screen display

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause and Remedy</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>On-screen display does not appear.</td>
<td>Set “Status” on the Setup menu to “On.”</td>
<td>32</td>
</tr>
<tr>
<td></td>
<td>Check if the ON/STANDBY indicator should light in green. When the ON/STANDBY indicator blinks in green, the unit is starting up. Wait until it stops blinking and remains lit in green.</td>
<td>7</td>
</tr>
<tr>
<td>The model name does not disappear from the screen.</td>
<td>The display mode of the unit may be set at the time of purchase. Consult with your local dealer or qualified Sony personnel.</td>
<td>–</td>
</tr>
</tbody>
</table>

### Remote control

<table>
<thead>
<tr>

Updating the Software

You can download files to update the software of the unit. Copy the downloaded files to your USB memory, insert the USB memory to the USB terminal of the unit, then perform the update.
To use the features updated, insert a USB memory device into a PC connected to the internet.
Download the update files from the following Sony website:
http://www.pro.sony.eu/pro/article/projectors-home-cinema-article
The website also explains how to install the update.

About the x.v.Color

• “x.v.Color” is a promotion name given to the products that have the capability to realize a wide color space based on the xvYCC specifications and is a trademark of Sony Corporation.
• xvYCC is an international standard of the technical specifications of the extended-gamut color space for video signals. The color gamut of xvYCC is wider than the one of sRGB that is used with the current television system.

About the simulated 3D feature

• Use the simulated 3D function taking into account that the picture will provide a different look from the original images, because this function converts the video images.
• Note that if the unit is used for profit or for public viewing, displaying 2D video images as 3D video images by converting to the simulated 3D may constitute an infringement of the rights of authors or producers, which are legally protected.
Replacing the Lamp

The lamp used for the light source has a certain lifespan. When the lamp dims, the color balance of the picture becomes strange, or “Please replace the Lamp.” appears on the screen, the lamp may be exhausted. Replace the lamp with a new one (not supplied) without delay.

Tools you need to get started:
- Projector Lamp LMP-H260 (Optional)
- Standard Phillips screwdriver
- Cloth (for scratch protection)

Caution
- The lamp remains hot after the unit is turned off with the ON/STANDBY button. If you touch the lamp, you may burn your fingers. When you replace the lamp, wait for at least 1 hour for the lamp to cool.
- Do not touch the surface of the lamp. If you touch it, wipe off the fingerprints with a soft cloth.
- Pay special attention to replacing the lamp when the unit is installed on the ceiling.
- When replacing the lamp of a unit which is on the ceiling, do not stand directly under the lamp cover. When removing the lamp door (inner cover), avoid twisting it. If the lamp explodes, fragments may cause injury.
- When removing the lamp unit, make sure it remains horizontal, then pull straight up. Do not tilt the lamp unit. If you pull out the lamp unit while tilted and if the lamp breaks, the pieces may scatter, causing injury.

Notes
- Be sure to use an LMP-H260 Projector Lamp for replacement. If you use lamps other than the LMP-H260, the unit may malfunction.
- Be sure to turn off the unit and unplug the power cord before replacing the lamp, then check the ON/STANDBY indicator has already been turned off.

1. Turn off the unit and unplug the AC power cord.

2. When setting the unit on a flat surface such as a desk etc., put a cloth to prevent the surface from being scratched. Place the unit on the cloth.

   Note

   Be sure that the unit is placed on a stable surface.

3. While pressing the part indicated in the lamp cover illustration, slide and then open the lamp cover.

4. Loosen the lamp door (inner cover) screw with a Phillips screwdriver, and then open the lamp door.
5 Loosen the 3 screws on the lamp with the Phillips screwdriver. Hold up the handle, then pull the lamp straight out.

![Image of lamp being removed](image)

**Handle**

**Notes**
- Do not loosen other screws except the 3 specified screws.
- Hold the lamp by the handle to remove and attach it.

6 Push in the new lamp by the handle securely until it reaches the end, and then tighten the 3 screws.

![Image of new lamp being installed](image)

**Note**
Be careful not to touch the optical block inside the unit.

7 Close the lamp door (inner cover), and then tighten the screw.

![Image of lamp door being closed](image)

8 Close the lamp cover.

![Image of lamp cover being closed](image)

9 Wipe dust off the ventilation holes (intake) with a soft cloth.

![Image of ventilation holes being wiped](image)
Replacing the Lamp

10 Turn on the unit, then select the lamp setting item on the Setup menu. The menu screen below will be appeared.

<table>
<thead>
<tr>
<th>Lamp Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Settings for lamp replacement. Has the projection lamp been replaced?</td>
</tr>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

**Tip**
If “Settings Lock” is set to “Level B,” set to “Off” once.

11 Select “Yes.”

<table>
<thead>
<tr>
<th>Lamp Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lamp replacement process is now complete.</td>
</tr>
</tbody>
</table>

**Caution**
Do not put your hands into the lamp replacement slot, and do not allow any liquid or other objects into the slot to avoid electrical shock or fire.

**Notes**
- The unit will not turn on unless the lamp is securely installed in place.
- The unit will not turn on unless the lamp cover are securely closed.
- To clear a message displayed on the screen, press any button either on the remote control or the control panel of the unit once.

**Note on replacing the lamp when broken, in the case of a ceiling installation**
If the lamp breaks, broken lamp pieces may scatter and cause injury. When the unit is on the ceiling, remove the lamp door (inner cover) by sliding it horizontally slowly after raising it with 30 degree opened. Avoid twisting the lamp door (inner cover).

**Disposal of the used lamp**
**For the customers in the USA**
Lamp in this product contains mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities or the Telecommunications Industry Association (www.eiae.org).

**Notes**
The lamp contains mercury. The disposal rules for used fluorescent tubes depend on where you live. Follow the waste disposal policy in your area.
Cleaning

Cleaning the cabinet

- To remove dust from the cabinet, wipe gently with a soft cloth. If dust is persistent, wipe with a soft cloth slightly moistened with a diluted mild detergent solution.
- Never use any type of abrasive pad, alkaline/acid cleaner, scouring powder, or volatile solvent, such as alcohol, benzene, thinner or insecticide.
- Clean the unit with a cleaning cloth. Wiping with a dirty cloth may scratch the unit.
- Using such materials or maintaining prolonged contact with rubber or vinyl materials may result in damage to the screen surface and cabinet material.

Projection Distance and Lens Shift Range

The projection distance refers to the distance between the front of the lens and the projected surface.

The lens shift range represents the distance in percent (%) by which the lens can be shifted from the center of the projected image. The lens shift range is regarded as 0% when the point A in the illustration (point where a line drawn from the center of the lens and the projected image cross at right angles) is aligned with the center of the projected image and full width or full height of the projected image is regarded as 100%.

VS +:  Vertical lens shift range (up) [%]
VS -:  Vertical lens shift range (down) [%]
HS +:  Horizontal lens shift range (right) [%]
HS -:  Horizontal lens shift range (left) [%]
When projecting in 1.90:1 (Native Full Display 17:9) format

NOTICES AND LICENCES FOR SOFTWARE USED IN THIS PRODUCT

GPL/LGPL LICENSED SOFTWARE

The following GPL executables and LGPL libraries are used in this product and are subject to the GPL/LGPL License Agreements included as part of this documentation:

Package list:
- linux-kernel
- alsalib
- busybox
- crypto
- directfb
- dosfstools
- e2fsprogs
- exceptionmonitor
- fuse
- gdisk
- glibc
- iptables
- libmicrohttpd
- libnuma (in numactl)
- procps
- pump-autoip
- XZ utils

Source code for these executables and libraries, as well as other executables and libraries, can be obtained using the following link:
http://www.sony.net/Products/Linux/

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation’s software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it. For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software. Also, for each author’s protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors’ reputations.

Finally, any free program is threatened constantly by software patents. We wish to
avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone’s free use or not licensed at all. The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The “Program”, below, refers to any such program or work, and a “work based on the Program” means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term “modification”.) Each licensee is addressed as “you”.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program’s source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

   a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

   b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

   c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you: rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.
In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License.

However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free
NOTICES AND LICENCES FOR SOFTWARE USED IN THIS PRODUCT

redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances. It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. Each version is given a distinguishing version number.

If the Program specifies a version number of this License which applies to it and "any later version”, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM...
(INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms. To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the “copyright” line and a pointer to where the full notice is found.

<one line to give the program’s name and a brief idea of what it does.> Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type ‘show w’.

This is free software, and you are welcome to redistribute it under certain conditions; type ‘show c’ for details.

The hypothetical commands ‘show w’ and ‘show c’ should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ‘show w’ and ‘show c’; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a “copyright disclaimer” for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program ‘Gnomovision’ (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs.

If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

===============

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999
Copyright (C) 1991, 1999 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and
change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users.
This license, the Lesser General Public License, applies to some specially designated software packages—typically libraries—of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.
When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.
To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.
For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.
We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.
To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author’s reputation will not be affected by problems that might be introduced by others.
Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.
Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.
When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library. We call this license the “Lesser” General Public License because it does Less to protect the user’s freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.
For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is
little to gain by limiting the free library to free software only, so we use the Lesser General Public License. In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users’ freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library. The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a “work based on the library” and a “work that uses the library”. The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

**GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION**

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called “this License”). Each licensee is addressed as “you”.

A “library” means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables. The “Library”, below, refers to any such software library or work which has been distributed under these terms.

A “work based on the Library” means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term “modification”.)

“Source code” for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library’s complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed
when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy. This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange. If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a “work that uses the Library”. Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a “work that uses the Library” with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a “work that uses the library”. The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a “work that uses the Library” uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and
accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a “work that uses the Library” with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer’s own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable “work that uses the Library”, as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user’s computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the “work that uses the Library” must include any data and utility programs needed for reproducing the executable from it.

However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances. It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. Each version is given a distinguishing version number.

If the Library specifies a version number of this License which applies to it and “any later version”, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the
Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

**NO WARRANTY**

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

**END OF TERMS AND CONDITIONS**

**How to Apply These Terms to Your New Libraries**

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library’s name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public license as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.

Also add information on how to contact you by electronic and paper mail.
You should also get your employer (if you work as a programmer) or your school, if any, to sign a “copyright disclaimer” for the library, if necessary. Here is a sample; alter the names:
Yoyodyne, Inc., hereby disclaims all copyright interest in the library ‘Frob’ (a library for tweaking knobs) written by James Random Hacker.
signature of Ty Coon>, 1 April 1990

4. The names “OpenSSL Toolkit” and “OpenSSL Project” must not be used to endorse or promote products derived from this software without prior written permission. For written permission, please contact openssl-core@openssl.org.

5. Products derived from this software may not be called “OpenSSL” nor may “OpenSSL” appear in their names without prior written permission of the OpenSSL Project.

6. Redistributions of any form whatsoever must retain the following acknowledgment: “This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (<http://www.openssl.org/>)”

This product is provided by the OpenSSL Project “AS IS” and any expressed or implied warranties, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose are disclaimed. In no event shall the OpenSSL Project or its contributors be liable for any direct, indirect, incidental, special, exemplary, or consequential damages (including, but not limited to, procurement of substitute goods or services; loss of use, data, or profits; or business interruption) however caused and on any theory of liability, whether in contract, strict liability, or tort (including negligence or otherwise) arising in any way out of the use of this software, even if advised of the possibility of such damage.

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com). Original SSLeay License

----------------------
Copyright (C) 1995-1998 Eric Young (eay@cryptsoft.com)
All rights reserved.
This package is an SSL implementation written by Eric Young (eay@cryptsoft.com). The implementation was written so as to conform with Netscape SSL.
This library is free for commercial and non-commercial use as long as the following conditions are adhered to.
The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com). Copyright remains Eric Young’s, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All advertising materials mentioning features or use of this software must display the following acknowledgement: “This product includes cryptographic software
written by Eric Young (eay@cryptsoft.com).
The word ‘cryptographic’ can be left out if the routines from the library being used are
not cryptographic related:-).

4. If you include any Windows specific code
(or a derivative thereof) from the apps
directory (application code) you must
include an acknowledgement: “This product
includes software written by Tim Hudson
(tjh@cryptsoft.com)”.
