Sony LCD Data Projector
VPL-CX10/CS10

For Presentations with Maximum Quality and Minimal Effort.
The VPL-CX10 and VPL-CS10 projectors are ideal for various types of in-house meetings and presentations. You can carry them around (or install them, if you prefer), set them up quickly, and then use the supplied software and remote control for easy, effective presentations. Image quality is outstanding and their bright outputs (1,200/1,000 ANSI lumens) allow them to be used in large rooms with the lights on. They are stylishly designed, looking smart even when seen from the back. Handy features provide extra versatility and maximum quality at all times.

Only from Sony: superb quality and brightness in a stylishly portable unit.
**Bright and Compact, Multi-Purpose Projector**

The VPL-CX10 and VPL-CS10 offer an excellent light output of 1,200 ANSI lumens and 1,000 ANSI lumens respectively. It comes in a small package and is easy to carry with a carrying handle. You can also use this in a variety of installation situations – for ceiling, floor or rear projection – so you can project your images in any setting.

**Remote Control Function**

The supplied RM-PJM10 remote control unit has an integrated mouse receiver for point-and-click control of your connected computer. You can also control the 4-times Digital Zoom function with this remote control unit, zooming in on a section of the presentation for more detail.

**High Image Quality**

The VPL-CX10 provides true XGA (1024 x 768) resolution and the VPL-CS10 true SVGA (800 x 600) resolution, both utilizing three 0.9-inch LCD panels. The details of the original images are maintained, while rich and natural colors are reproduced.

**Simple Setup**

Setting up the VPL-CX10/CS10 with a computer is very simple. The rear panel cover reveals only the cable connectors needed for typical computer presentations (AC cable connector and D-sub 15-pin connector) while covering up the rest of the connectors. Also, 37 preset signal formats cover all video formats used worldwide and PC signals up to SXGA, eliminating the trouble of complex adjustments.

**Quiet Operation**

With an innovative cooling structure using a sirocco fan, the VPL-CX10/CS10 operates with a low noise level. The projector provides undisturbed, smooth presentations.

**USB Compatibility and PROJECTOR STATION Software**

The VPL-CX10/CS10 is USB-ready, and it serves as a USB hub for daisychain connection of multiple devices. With the USB connection the projector can be controlled by a computer, using the PROJECTOR STATION* USB application software. The software also helps you organize your presentation materials for quick access - you can open the files registered in the software with the function keys on the remote control unit.

*PROJECTOR STATION version 2.0 software requirements: Microsoft® Windows® 98, Windows® 98 SE or Windows® 2000 operating system.

**Digital Keystone Adjustment**

Keystone distortion caused by the projection angle can be electronically corrected, up to ±15 degrees, via the on-screen menu. You will be able to project square and detailed images on to the screen even with limited setup space.

**On-screen Display**

The on-screen display menu comes in seven languages: English, French, Spanish, German, Italian, Japanese and Chinese.

**Advanced APA**

Dot phase and image size or shift can be automatically adjusted to their optimal settings just by pressing the APA (Auto Pixel Alignment) button.

**Stereo Speakers**

The VPL-CX10/CS10 comes fully equipped with stereo speakers, to complement your presentation visuals.
Specifications

Optical

Projection system
3 LCD panels, 1 lens projection system

LCD panel
0.9-inch p-si TFT LCD panel with a Microlens Array. 2,359,296 pixels (786,432 pixels x 3)
0.9-inch p-si TFT LCD panel. 1,440,000 pixels (480,000 pixels x 3)

Projection lens
1.3 times zoom lens, f: 1.7 to 2.2, 153.6 to 42 mm

Chip
128 W UMP'ing
