bSure2 multimedia projector

- Ultra high brightness
- Easy-to-use
- Super silent
- Remote control with laserpointer

Maximum brilliance

PHILIPS
The new Philips bSure2 multimedia projector

You stride along the corridor towards your client's meetingroom carrying your Philips bSure XG2/SV2 Brilliance multimedia projector and your laptop. Having spent days preparing, you're going to make the most of your slot. With a dazzling array of video clips and statistics, the material virtually presents itself. Your ten minutes stretch to twenty - they're impressed, and you've got the job done.

Getting the message across

Philips' bSure XG2/SV2 Brilliance helps you get your message across to maximum effect. Thanks to its high-brightness/high-contrast picture performance and near-silent operation, every last detail comes across crystal-clear.

Accommodating a variety of media inputs, the bSure2 boasts outstanding video signal quality, also from DVD. Its excellent picture quality is enhanced by ColourTracking™, which automatically adjusts image settings to achieve natural colors or maximum brightness. And with the advanced cooling system keeping fan noise down to record-low levels, there's nothing to distract your audience from your presentation.

High impact, low costs

For a company, though, achieving success is not simply a question of making killer presentations: it's also vital to keep costs down. With the bSure's low running costs and high reliability, you get the benefit of high-impact presentations without the headache of high costs.

Hassle-free

The bSure takes away the stress often experienced when using technology aids in high-pressure situations. Featuring plug-and-play connectivity, intuitive one-touch operation and straightforward on-screen menus, it couldn't be easier to use, leaving you free to concentrate on your presentation.

Reliable and affordable

As anyone running a business will tell you, they must make value-for-money investment choices. The stylish, robust bSure builds upon Philips' tradition of offering advanced display functionality in a reliable and affordable package. Just how robust and reliable the bSure is can be seen by its extreme lamp life of 6,000 hours for the SV2 version, which is maximized by the SmartSave™ feature that automatically turns the lamp off when it's not in use. The bSure also comes with a full 3-year Philips Service Warranty.

Protect your investment

The bSure2 features a host of anti-theft devices, including ProtectionMax™ software - a non-erasable start-up screen that can be set up to display your company's name and address or other means of identification. In addition, the bSure2 can be set to shut down after a specified number of run hours, disabling the projector until your secret authorization code is entered. There is also a hardware solution to prevent theft – the Kensington lock.

The right choice

Philips' bSure2 line of multimedia projectors offers a choice of four models designed to facilitate effective communication. bSure - helping you to get your message across ... and the job done!

The Philips Guarantee

- The Philips range of advanced multimedia projectors combines portability, reliability and unsurpassed performance with a host of technological innovations. All of which ensures that you enjoy impressive and hassle-free projection wherever you are. What else would you expect from the innovative world leader in sound and vision technology?

3-years warranty and free support

Every bSure projector comes with a full three-year warranty. The first year this unique offer is backed up by the outstanding Philips First Choice™ services, including a toll-free helpline, that offers you assistance and advice seven days a week and in case you need servicing, you’ll receive a temporary replacement with free delivery, within 48 hours. It’s simply an unbeatable package.

Extreme compatibility

Philips projectors are extremely compatible with a whole range of data and video sources, thanks to their highly advanced scaling technology, which converts signals without any loss or deterioration. It’s a serious advantage when you need to make an extra special impression with a mind-blowing multimedia experience.
