- Bright 1300-lumen images for successful presentations any presentation environment

The InFocus LP™340 packs all the features you expect in a premium conference room projector into a stylish portable package. It's bright, quiet and ready for the technology of the future, with DVI digital and analog connectivity, through a single connector. With true SVGA resolution and amazing image quality, the LP340 is the ideal presentation tool. It's also the perfect solution for those new to data/video projectors with ease-of-use features that are second to none. InFocus Home Theater Quality™ video and HDTV compatibility round out this highly portable package, making it an excellent solution for the performance minded and the budget conscious. The LP340 makes it possible to put leading-edge projection technology into the hands of every employee, in any setting.

Bright, Crisp Images and Quiet Operation

The InFocus LP340 delivers bright, crisp images that clearly convey your messages with eye-catching graphics and animation. With 1300 lumens, presenting effectively in any environment is a snap. Just walk in the room and launch your show. There are no awkward delays for adjusting room lighting, and no distracting projector noise. The LP340 offers true SVGA resolution, ideal for typical chart-and-graph presentations. By offering an SVGA projector that has all the features of a premium XGA projector, InFocus has created the ideal solution for organizations on a budget. And, the LP340 offers Home Theater Quality video, with a picture superior to any large-screen TV on the market today.

Premium Features and Affordability Spell Value

The LP340 is an excellent value, stretching budget dollars with its versatility. Companies keeping a close eye on costs have learned that computer software coupled with InFocus projection enables a significant reduction in presentation expenses. Unlike 35mm slides, overheads or color printouts, there are no production charges from outside vendors. Most importantly, presenters remain in control of their presentations at all times. Because information is instantly accessible on the computer, it can be corrected or updated in real time — whether it's minutes before the meeting, or even during the presentation. Now, presenters will never get stuck showing slides with errors or be embarrassed by outdated information — that's value that can't be measured in dollars. And with the LP340 companies can afford to equip every sales rep with a projector from InFocus, the worldwide leader in data/video projection. Best of all, this economical unit requires no sacrifice of quality or features — the LP340 combines premier brightness, connectivity and portability to demonstrate once again why InFocus sells more personal projectors than any company.

On The Road Or On The Ceiling— It's Portable

The LP340 is the most portable projector with conference room features on the market. Compactly designed and weighing less than 7 lbs., it's easy to snap into a ceiling mount or take on a road trip.

Connectivity for Today and Tomorrow

The LP340 is future-ready with the M1-DA connector. Use it for everyday presentations with today's analog laptop and tomorrow's digital upgrade – it's fully compatible and ready to go. Trust InFocus to design a projector that delivers cutting-edge features, while protecting you from obsolescence by equipping you for technology's next advance.

The LP340 offers Home Theater Quality™ video and is HDTV compatible. Just touch a button to seamlessly switch from data or websites to training videos, with the same flawless image quality as your data presentation. Finally, the projector is carefully designed to make every connector instantly accessible. There is no confusing clutter of extraneous inputs and cables.

So Easy, You Can't Do It Wrong

InFocus takes ease of use to new heights with the LP340. It starts with no-hassle setup: just take the unit out of the box, plug in the power cord and connect the projector to your laptop. Setup is clear and intuitive; you simply can't do it wrong. In fact, it takes much longer to boot up the typical laptop than to setup your projector. With only seven buttons to control all features, the LP340 couldn't be simpler to run. Even first-time users just turn it on and project.

Service You Can Count On

Because we believe top performance must be backed with top service, InFocus offers you technical support 7 days a week, 24 hours a day* – We work whenever you work! (*Available In U.S., Canada, EU Countries and Switzerland only)
