Projector Features

The EF-100WATV/EF-100BATV projector includes these special features:

Bright, high-resolution projection system
• Up to 2000 lumens of color brightness (color light output) and white brightness (white light output)

  Note: Color brightness (color light output) and white brightness (white light output) will vary depending on usage conditions. Color light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.

  • High-definition mini cinema lens
  • Advanced 3LCD technology
  • Epson microlaser array projection technology
  • Up to 150 inches (12.5 ft diagonal) projected image size (no screen required)

Flexible connectivity
• HDMI port for streaming device or other HDMI sources
• Small, portable design
• Audio out port for connecting headphones or external speakers
• Audiophile BassReflex built-in speaker
• aptX Bluetooth connectivity
• One remote controls projector and streaming device

Innovative display and operation features
• Long-life laser light source
• More than 2,500,000:1 contrast ratio and Dynamic Contrast control for sharp, detailed images
• Epson's Direct Power On feature allows for quick and easy setup

Product Box Contents

Save all the packaging in case you need to ship the projector. Always use the original packaging (or equivalent) when shipping.

Make sure your projector box included all of these parts:

1. Projector
2. Streaming device
3. Projector remote control
4. Remote control for Android TV
5. Remote control batteries (4 AAA alkaline)
6. Power cord

Parent topic: Projector Features
Additional Components

Depending on how you plan to use the projector, you may need to obtain additional components.

**Note:** To connect a Mac that does not include a compatible HDMI output port, you need to obtain an adapter that allows you to connect to the HDMI port on the projector. Contact Apple for compatible HDMI adapter options. To connect a smartphone or tablet, you may need to obtain an adapter that allows you to connect to the projector. This allows you to mirror your smartphone or tablet screens, watch movies, and more. Contact your device manufacturer for compatible adapter options.

**Note:** The projector's HDMI port does not support MHL.

Unless listed as available from Epson in this table, see your local computer or electronics dealer for purchase information.

Optional Equipment and Replacement Parts

**U.S. and Canada:** You can purchase screens, other optional accessories, and replacement parts from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada. Or you can purchase online at epsonstore.com (U.S. sales) or epsonstore.ca (Canadian sales).

**Latin America:** You can purchase screens, other optional accessories, and replacement parts from an Epson authorized reseller. To find the nearest reseller, go to epson.com.jm. Or you can contact your nearest sales office as described in "Where to Get Help."
Note: Availability of accessories varies by country.

Epson offers the following optional accessories and replacement parts for your projector:

<table>
<thead>
<tr>

Warranty and Registration Information (U.S. and Canada)

Your projector comes with a basic warranty that lets you project with confidence. For details, see the warranty that came with your projector.

In addition, Epson offers free Extra Care Road Service. In the unlikely event of an equipment failure, you won't have to wait for your unit to be repaired. Instead, Epson will ship you a replacement unit anywhere in the United States, Canada, or Puerto Rico. See the Extra Care Road Service brochure for details.

Note: Availability varies by region.

Register your product online at this site: epson.com/webreg.
Registering also lets you receive special updates on new accessories, products, and services.

Notations Used in the Documentation

Follow the guidelines in these notations as you read your documentation:

• **Warnings** must be followed carefully to avoid bodily injury.
• **Cautions** must be observed to avoid damage to your equipment.
• **Notes** contain important information about your projector.
• **Tips** contain additional projection information.

Setting Up the Projector

Follow the instructions in these sections to set up your projector for use.

Projector Placement
Projector Connections
Installing Batteries in the Remote Control

Projector Placement

You can place the projector on almost any flat surface to project an image.

You can also install the projector in a ceiling mount or on a floor stand if you want to use it in a fixed location.

There is no vertical or horizontal limit to how the projector can be installed.

Keep these considerations in mind as you select a projector location:

• Place the projector on a sturdy, level surface or install it using a compatible mount.
• Leave plenty of space around and under the projector for ventilation, and do not place it on top of or next to anything that could block the vents.
• Place the projector parallel to the screen.
• Position the projector within reach of a grounded electrical outlet or extension cord.

Parent topic: Setting Up the Projector

Projector Setup and Installation Options

You can set up or install your projector in the following ways:
Front

Rear

Front ceiling
Rear ceiling

Toward the ceiling

**Note:** Make sure the rear cover is securely attached.

**Parent topic:** [Projector Placement](#)

**Projection Distance**

The distance at which you place the projector from the screen determines the approximate size of the image. The image size increases the farther the projector is from the screen, but can vary depending on the zoom factor, aspect ratio, and other settings.
Use the tables here to determine approximately how far to place the projector from the screen based on the size of the projected image. (Conversion figures may have been rounded up or down.) You can also use the Projection Distance Calculator here (U.S.), here (Canada), or here (Caribbean).

1 Projection distance
2 Distance from the center of the lens to the base of the screen

*Epson cannot guarantee optimal focus performance for projection distances over 134 inches (340 cm).

### Projector Connections

See these sections to connect the projector to a variety of projection sources.
Caution: If you will use the projector at altitudes above 4921 feet (1500 m), turn on High Altitude Mode to ensure the projector's internal temperature is regulated properly.

Connecting the Streaming Device
Connecting to an HDMI Video Source
Connecting Headphones
Connecting to a Bluetooth Audio Device

Additional Components
Projector Feature Settings - Settings Menu

Connecting the Streaming Device
You can connect the streaming device included with your projector to the projector's HDMI port. Connecting the USB power cable provides power to the streaming device.

Note: To use video-on-demand or Android TV features through the streaming device, you must first pair the projector remote control to the projector.

1. Remove the rear cover from the projector.
2. Open the USB power cable clamp.

3. Connect the streaming device to the projector's HDMI extension cable.
4. Connect the USB power cable to the streaming device’s USB power port and fit the device securely inside the projector.

**Caution:** Do not force the streaming device into the projector; you may damage the projector and/or the device.

5. Make sure the device is securely connected as shown. Pass the USB power cable through the cable clamp, then close the cable clamp to secure the cable.
6. Replace the rear cover and push it into place.

Parent topic: Projector Connections

Related tasks
Pairing the Projector Remote Control

Connecting to an HDMI Video Source

If your video source has an HDMI port, you can connect it to the projector using an HDMI cable. The video source's sound is output to the projector's speaker.

Note: You can also connect a computer or laptop to the projector using an HDMI cable.

Caution: Do not turn on the video source before connecting it to the projector; otherwise, you may damage the projector.
1. Remove the rear cover from the projector.

2. Connect one end of an HDMI cable to your video source's HDMI port.

3. Connect the other end of the HDMI cable to the projector's HDMI extension cable.

4. Pass the HDMI cable through the cable path as shown.
5. Replace the rear cover and push it into place.

Parent topic: Projector Connections

Related tasks
Controlling the Volume with the Volume Buttons

Connecting Headphones

You can connect headphones to the projector's audio out port. You can control the volume using the projector remote control.

Note: The projector's audio out port only supports 3.5mm stereo headphones. If you use any other type of headphones, audio may not be output normally.
1. Open the audio out port cover.

2. Insert the headphone jack into the audio out port.
Connecting to a Bluetooth Audio Device

You can connect your projector to Bluetooth audio devices such as speakers or headphones to output audio from a streaming device or other video source connected to the projector.

**Note:** The Bluetooth audio device must be A2DP compliant. There may be a slight delay in audio output. Bluetooth audio devices are not supported in some countries and regions.

1. Turn on the projector.
2. Press and hold the menu button on the projector remote control for about three seconds to display the Bluetooth menu.
3. Press the arrow buttons on the projector remote control to select the **Bluetooth Audio** setting and press **Enter**.
4. Select **On** and press **Enter**.
5. Make sure the Bluetooth audio device you want to connect to is in pairing or discovery mode (see your Bluetooth audio device manual for details).
6. Select **Search Bluetooth Device** and press **Enter** to display a list of available devices.
7. Select the device you want to connect to and press **Enter**.
8. Press the menu button to exit the menu or the return button to return to the previous screen.
The next time you turn on the projector, the last connected device is automatically connected. To change the connected device, repeat these steps.

**Parent topic:** Projector Connections

## Installing Batteries in the Remote Control

The remote control uses the two AAA batteries that came with the projector.

**Caution:** Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.

1. Remove the battery cover.

2. Insert the batteries with the + and – ends facing as shown.

**Warning:** Make sure the batteries are inserted in the correct positions. If the batteries are not inserted correctly, they could explode or leak, causing a fire, injury, or damage to the product.
3. Replace the battery cover and press it down until it clicks into place.

**Warning:** Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

**Parent topic:** Setting Up the Projector
Using Basic Projector Features

Follow the instructions in these sections to use your projector's basic features.

Turning On the Projector
Turning Off the Projector
Remote Control Operation
Pairing the Projector Remote Control
Selecting the Language for the Projector Menus
Projection Modes
Adjusting the Image Height
Image Shape
Focusing the Image Using the Focus Lever

Turning On Automatic Luminance Adjustment
Adjusting Light Output (Brightness)
Saving Settings to Memory and Using Saved Settings
Controlling the Volume with the Volume Buttons

Turning On the Projector

Turn on the projector before you turn on the video source you want to use.

Caution: Do not turn on the video source before connecting it to the projector; otherwise, you may damage the projector.
1. Connect the power cord to the projector's power inlet.

2. Plug the power cord into an electrical outlet.

   **Note:** If the **Direct Power On** setting is turned on, the projector turns on as soon as you plug it in.

3. Press the \( \bigcirc \) power button on the projector or the projector remote control to turn on the projector.
   The status light flashes blue as the projector warms up. After about 30 seconds, the status light stops flashing and turns blue.

   **Warning:** Never look into the projector lens when the laser is on. This can damage your eyes and is especially dangerous for children and pets.

   **Caution:** Make sure no objects are blocking the light from the projector lens. Objects blocking the lens for an extended time can melt and light that is reflected back into the lens can cause the projector to malfunction.

The Welcome Guide is displayed the first time you turn on the projector. To display the guide again, press the \( \bigcirc \) menu button on the projector remote control and select **Settings > Display > Welcome Guide**.

**Parent topic:** Using Basic Projector Features

- Projector Feature Settings - Settings Menu
Turning Off the Projector

Turn off the projector after use.

**Note:** Turn off this product when not in use to prolong the life of the projector. Laser life will vary depending upon mode selected, environmental conditions, and usage. Brightness decreases over time.

1. Press the power button on the projector or the projector remote control.
   The projector displays a shutdown confirmation screen.

![Power Off?]

   Yes: Press button
   No: Press any other button

2. Press the power button again. (To leave it on, press any other button.)
   The laser turns off and the status light turns off.

   **Caution:** Do not turn the projector on immediately after turning it off. Turning the projector on and off frequently may shorten the life of the laser.

3. To transport or store the projector, make sure the power light is blue (but not flashing) and the status light is off, then unplug the power cord.

**Parent topic:** Using Basic Projector Features
Remote Control Operation
The remote control lets you control the projector from almost anywhere in the room, up to 16.4 feet (5 m) away. You can point it at the front or back of the projector.

1 16.4 feet (5 m)

**Note:** Avoid using the remote control in conditions with bright fluorescent lights or in direct sunlight, or the projector may not respond to commands. If you will not use the remote control for a long time, remove the batteries.

**Parent topic:** Using Basic Projector Features

Pairing the Projector Remote Control
To use Android TV and video-on-demand features, you must pair the projector remote control with the projector.

**Note:** When you first turn on the projector, instructions for pairing the projector remote control are displayed on the screen.

1. Turn on the projector.
2. Press and hold the home and **Enter** buttons on the projector remote control until the command light on the remote control starts blinking.
A message appears on the screen when the projector remote control is paired.

**Parent topic:** Using Basic Projector Features

Connecting the Streaming Device

### Selecting the Language for the Projector Menus

If you want to view the projector's menus and messages in another language, you can change the Language setting.

1. Turn on the projector.
2. Press the menu button on the projector remote control.
3. Press the arrow buttons to select the **Settings** menu and press **Enter**.
4. Select the **Language** setting and press **Enter**.
5. Select the language you want to use and press **Enter**.
6. Press the menu button to exit the menu or the return button to return to the previous screen.

**Parent topic:** Using Basic Projector Features
Projection Modes

Depending on how you positioned the projector, you may need to change the projection mode so your images project correctly.

- **Front** (default setting) lets you project from a table in front of the screen or onto the ceiling.
- **Front/Upside Down** flips the image over top-to-bottom to project upside-down from a ceiling or wall mount.
- **Rear** flips the image horizontally to project from behind a translucent screen.
- **Rear/Upside Down** flips the image over top-to-bottom and horizontally to project from the ceiling and behind a translucent screen.

**Changing the Projection Mode Using the Menus**

**Parent topic:** Using Basic Projector Features

**Changing the Projection Mode Using the Menus**

You can change the projection mode to flip the image over top-to-bottom and/or left-to-right using the projector menus.

**Note:** You can also press and hold the A/V mute button on the projector remote control for about 6 seconds to flip the image upside-down.

1. Turn on the projector and display an image.
2. Press the ❌ menu button on the projector remote control.
3. Press the arrow buttons to select the Settings menu and press Enter.

4. Select the Installation setting and press Enter.

5. Select the Projection setting and press Enter.

6. Select the projection mode you want to use and press Enter.

7. Press the menu button to exit the menu or the return button to return to the previous screen.

Parent topic: Projection Modes

Adjusting the Image Height

If you are projecting from a table or other flat surface and the image is too high or low, you can adjust the image height using the projector's adjustable foot.

1. Turn on the projector and display an image.
2. Press and hold the foot release lever to extend or retract the front adjustable foot.

![Adjustable Foot Illustration]

**Note:** You can adjust the position up to 11°.

3. Release the lever to lock the foot when the image is at the position you want.

If the projected image is unevenly rectangular, you need to adjust the image shape.

**Parent topic:** Using Basic Projector Features

## Image Shape

You can project an evenly rectangular image by placing the projector directly in front of the center of the screen and keeping it level. If you place the projector at an angle to the screen, or tilted up or down, or off to the side, you may need to correct the image shape for the best display quality.

**Correcting Image Shape with H/V Keystone**

**Correcting Image Shape with Quick Corner**

**Parent topic:** Using Basic Projector Features

## Correcting Image Shape with H/V Keystone

You can use the projector remote control or control panel buttons to correct the shape of an image that is unevenly rectangular on the sides.
**Note:** You can also adjust the keystone settings from the **Settings** menu.

![Keystone Correction Diagram]

**Note:** You cannot combine **Keystone** correction with other image shape correction methods.

1. Turn on the projector and display an image.
2. Press the ` Keystone ` button on the projector remote control.
3. Use the arrow buttons on the projector remote control to select between vertical and horizontal keystone correction, and to adjust the image shape as necessary.

**V-Keystone**

![Vertical Keystone Diagram]

**H-Keystone**

![Horizontal Keystone Diagram]
**Note:** You can also adjust the horizontal shape using the horizontal keystone buttons on the control panel.

4. Press the ↵ return button when you are finished.

After correction, your image is slightly smaller.

**Parent topic:** Image Shape

**Related references**

- Projector Feature Settings - Settings Menu

## Correcting Image Shape with Quick Corner

You can use the projector's Quick Corner setting to correct the shape and size of an image that is unevenly rectangular on all sides.

**Note:** To provide the best possible image quality, adjust the projector's position to correct the image shape. If this isn't possible, use the Quick Corner setting to correct the image shape.

![Quick Corner Correction Diagram]

**Note:** You cannot combine Quick Corner correction with other image shape correction methods.

1. Turn on the projector and display an image.
2. Press the ◀ menu button on the projector remote control.
3. Press the arrow buttons to select the **Settings** menu and press **Enter**.

   ![Settings Menu]

   **Note:** You can also press the keystone button on the projector remote control to display the Keystone adjustment screen.

4. Select the **Installation** setting and press **Enter**.

5. Select the **Keystone** setting and press **Enter**.

6. Select the **Quick Corner** setting and press **Enter** twice.

   **Note:** When the Keystone option is set to **Quick Corner**, the horizontal keystone buttons on the control panel are disabled.
You see the Quick Corner adjustment screen:

7. Use the arrow buttons on the projector remote control to select the corner of the image you want to adjust, then press **Enter**.
8. Press the arrow buttons to adjust the image shape as necessary, then press **Enter** to return to the area selection screen.

   **Note:** To reset your adjustments, press and hold the \( \text{ return button for at least 2 seconds to display a reset screen, then select Reset Quick Corner and Yes.}

9. Press the \( \text{ menu button to exit the menu or the return button to return to the previous screen.}

**Parent topic:** [Image Shape](#)

### Focusing the Image Using the Focus Lever

You can adjust the sharpness of the projected image using the focus lever on the projector.

1. Turn on the projector and display an image.
2. Move the lever left or right to adjust the focus.

Parent topic: Using Basic Projector Features

Resizing the Image Using Zoom

You can resize the displayed image.

1. Turn on the projector and display an image.
2. Press the menu button on the projector remote control.
3. Press the arrow buttons to select the **Settings** menu and press **Enter**.

![Menu Screen]

4. Select the **Installation** setting and press **Enter**.
5. Select the **Zoom** setting and press **Enter**.
6. Press the left or right arrow button to adjust the zoom setting.
7. Press the menu button to exit the menu or the return button to return to the previous screen.

**Parent topic:** Using Basic Projector Features

### Image Aspect Ratio

The projector can display images in different width-to-height ratios called aspect ratios. Normally the input signal from your video source determines the image's aspect ratio. However, for certain images you can change the aspect ratio to fit your screen.

If you always want to use a particular aspect ratio for a certain video input source, you can select it using the projector's menus.

**Changing the Image Aspect Ratio**

**Available Image Aspect Ratios**

**Parent topic:** Using Basic Projector Features

### Changing the Image Aspect Ratio

You can change the aspect ratio of the displayed image to resize it.
1. Turn on the projector and display an image.
2. Press the \( \text{Menu} \) menu button on the projector remote control.
3. Select the \textbf{Image} menu and press \textbf{Enter}.

4. Select the \textbf{Aspect} setting and press \textbf{Enter}.
5. Select the aspect ratio you want to use for your input signal and press \textbf{Enter}.
6. Press the \( \text{Menu} \) menu button to exit the menu or the \( \text{Return} \) return button to return to the previous screen.

\textbf{Parent topic: Image Aspect Ratio}

\textbf{Available Image Aspect Ratios}

You can select the following image aspect ratios, depending on the input signal from your image source.

<table>
<thead>
<tr>
<th>Aspect ratio setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Automatically sets the aspect ratio according to the input signal.</td>
</tr>
<tr>
<td>16:9</td>
<td>Converts the aspect ratio of the image to 16:9.</td>
</tr>
<tr>
<td>Full</td>
<td>Displays images using the full width of the projection area, but does not maintain the aspect ratio.</td>
</tr>
<tr>
<td>Zoom</td>
<td>Displays images using the full width of the projection area and maintains the aspect ratio of the image.</td>
</tr>
</tbody>
</table>
Color Mode

The projector offers different Color Modes to provide optimum brightness, contrast, and color for a variety of viewing environments and image types. You can select a mode designed to match your image and environment, or experiment with the available modes.

Changing the Color Mode

Available Color Modes

Parent topic: Using Basic Projector Features

Changing the Color Mode

If you want to view the projector's menus and messages in another language, you can change the Language setting.

1. Turn on the projector and display an image.
2. Press the menu button on the projector remote control.
4. Select the Color Mode setting and press Enter.
5. Select the color mode you want to use and press Enter.
6. Press the menu button to exit the menu or the return button to return to the previous screen.
Available Color Modes

You can set the projector to use these Color Modes, depending on the input source you are using:

<table>
<thead>
<tr>
<th>Color Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dynamic</td>
<td>Best for optimizing brightness</td>
</tr>
<tr>
<td>Bright Cinema</td>
<td>Best for projecting vivid images</td>
</tr>
<tr>
<td>Natural</td>
<td>Best for projecting the image as is (choose this mode when making color adjustments)</td>
</tr>
<tr>
<td>Cinema</td>
<td>Best for projecting movies</td>
</tr>
</tbody>
</table>

Turning On Automatic Luminance Adjustment

You can turn on the Dynamic Contrast setting to automatically optimize the image luminance. This improves the image contrast based on the brightness of the content you project.

1. Turn on the projector and display an image.
2. Press the menu button on the projector remote control.
3. Select the **Image** menu and press **Enter**.

4. Select the **Brightness** setting and press **Enter**.

5. Select the **Dynamic Contrast** setting and press **Enter**.

6. Choose one of the following options and press **Enter**:
   - **Off**: turns off Dynamic Contrast
   - **Normal**: adjusts brightness at the standard speed
   - **High Speed**: adjusts brightness as soon as a scene changes

7. Press the menu button to exit the menu or the return button to return to the previous screen.

**Parent topic**: Using Basic Projector Features

### Adjusting Light Output (Brightness)

You can adjust the brightness of the projector's light output.

1. Turn on the projector and display an image.

2. Press the menu button on the projector remote control.
3. Select the **Image** menu and press **Enter**.

4. Select the **Light Output** setting and press **Enter**.

5. Press the left or right arrow buttons to adjust the brightness between 50% (**ECO**) and 100% (**Normal**).

6. Press the menu button to exit the menu or the return button to return to the previous screen.

**Parent topic:** Using Basic Projector Features

**Saving Settings to Memory and Using Saved Settings**

You can save the customized **Image** menu settings for your video input and then select the saved settings whenever you want to use them.

1. Turn on the projector and display an image.
2. Press the menu button on the projector remote control.
3. Press the arrow buttons to select the **Settings** menu and press **Enter**.

4. Select the **Memory** setting and press **Enter**.

5. Choose one of the following options and press **Enter**:
   - **Load Memory**: overwrites your current settings with saved settings
   - **Save Memory**: saves your current settings to memory (10 memories with different names are available)

     **Note**: A memory name that has already been used is indicated by a blue mark. Saving over a previously saved memory overwrites the settings with your current settings.

   - **Erase Memory**: erases the selected memory settings
   - **Rename Memory**: renames a saved memory

     **Note**: To delete all saved memories, select the **Reset Memory** setting in the **Reset** menu.

6. Press the menu button to exit the menu or the return button to return to the previous screen.

**Parent topic:** [Using Basic Projector Features](#)
Controlling the Volume with the Volume Buttons

You can use the volume buttons to adjust the volume of the projector's internal speaker, any external speakers or headphones connected to the projector, or any Bluetooth audio device paired to the projector.

**Note:** You must adjust the volume separately for each connected input source.

1. Turn on the projector and start a video that includes audio.
2. To raise or lower the volume, press the volume up or volume down button on the control panel or the projector remote control.

A volume gauge appears on the screen.

**Parent topic:** Using Basic Projector Features
Adjusting Projector Features

Follow the instructions in these sections to use your projector's feature adjustments.

Operating Connected Devices Using the HDMI Link Features
Shutting Off the Picture and Sound Temporarily
Projector Security Features

Operating Connected Devices Using the HDMI Link Features

You can use the projector remote control to control certain features of devices connected to the projector's HDMI port.

**Note:** The connected device and HDMI cable must meet the HDMI CEC standard. The device must also be configured; see the documentation that came with the device. All devices or functions may not operate properly.

1. Press the ‹ menu button on the projector remote control.
2. Press the arrow buttons to select the **Settings** menu and press **Enter**.
   
   You see this screen:

3. Select the **Operation** setting and press **Enter**.
4. Select the **HDMI Link** setting and press **Enter**.
You see this screen:

5. Select the **HDMI Link** setting and press **Enter**. Then select **On** and press the return button.

6. Select the **Device Connections** setting and press **Enter**.

You see this screen:

Note: Linked devices are indicated by a blue mark. You cannot select grayed-out devices.

7. Select the device you want to control and project images from and press **Enter**.
8. Select the following HDMI Link options as necessary and press Enter:
   • **Power On Link**: select what happens when you turn on the projector or linked device. Select **PJ -> Device** or **Bidirectional** to turn the linked device on when the projector is turned on, or select **Device -> PJ** or **Bidirectional** to turn the projector on when the linked device is turned on.
   • **Power Off Link**: select whether linked devices are turned off when the projector is turned off.

9. Press the **menu** button to exit the menu or the **return** button to return to the previous screen.

Parent topic: Adjusting Projector Features

### Shutting Off the Picture and Sound Temporarily

You can temporarily turn off the projector's picture and sound. Any sound or video action continues to run, however, so you cannot resume projection at the point that you stopped it.

1. Press the **A/V mute** button on the projector remote control to temporarily stop projection and mute any sound.

2. To turn the picture and sound back on, press the **A/V mute** button again.

Parent topic: Adjusting Projector Features

### Projector Security Features

You can secure your projector to deter theft or prevent unintended use by setting up the following security features:

- Button lock security to block operation of the projector using the buttons on the control panel.
- Security cabling to physically cable the projector in place.

Parent topic: Adjusting Projector Features

#### Locking the Projector's Buttons

You can lock the buttons on the projector's control panel to prevent anyone from using the projector. You can lock all the buttons or all the buttons except the **power** button.

**Note:** You can still operate the projector using the projector remote control.

1. Press the **menu** button on the projector remote control.
2. Press the arrow buttons to select the **Settings** menu and press **Enter**. You see this screen:

![Settings menu]

3. Select the **Operation** setting and press **Enter**. You see this screen:

![Operation settings]

HDMI Link
Sleep Mode Off
Sleep Mode Timer 0 min.
Direct Power On Off
Illumination Off
Child Lock Off
Control Panel Lock Full Lock
USB Power in Standby Off
Rear Bay Cooling Low
4. Do one of the following:
   • To lock the projector's power button, select **Child Lock** and select **On**. You must turn the projector off and then on again to enable the setting.

   **Note:** To turn the projector on when this setting is enabled, you must press and hold the power button for about 3 seconds.

   • To lock all the projector's buttons, select **Control Panel Lock > Full Lock**. Select **Yes** at the confirmation screen.

   • To lock all the projector's buttons except the power button, select **Control Panel Lock > Partial Lock**. Select **Yes** at the confirmation screen.

5. Press the menu button to exit the menu or the return button to return to the previous screen.

**Unlocking the Projector's Buttons**

**Parent topic:** [Projector Security Features](#)

**Unlocking the Projector's Buttons**

If the projector's buttons have been locked, do one of the following:

• To disable the child lock setting, press the menu button on the projector remote control and select **Settings > Operation > Child Lock > Off**. You must turn the projector off and then on again to disable the setting.

• To release the control panel lock, press and hold the volume down button on the control panel for about 7 seconds. A message appears and the lock is released.

**Parent topic:** [Locking the Projector's Buttons](#)
Installing a Security Cable

You can use the security slot on the side of the projector to attach a Kensington lock. See your local computer or electronics dealer for purchase information.

1 Security slot

Adjusting the Menu Settings

Follow the instructions in these sections to access the projector menu system and change projector settings.

Using the Projector's Menus
Image Quality Settings - Image Menu
Projector Feature Settings - Settings Menu
Projector Information Display - Info Menu
Projector Reset Options - Reset Menu

Using the Projector's Menus

You can use the projector's menus to adjust the settings that control how your projector works. The projector displays the menus on the screen.

1. Press the $\mathbb{Menu}$ menu button on the projector remote control.
   
   You see a screen like this:

   ![Menu Screen]

2. Press the up or down arrow button to move through the menus listed on the left. The settings for each menu are displayed on the right.

   Note: The available settings depend on the current input source.
3. To change settings in the displayed menu, press **Enter**.
4. Press the up or down arrow button to move through the settings.
5. Change the settings using the buttons listed on the bottom of the menu screens.
6. To return all the menu settings to their default values, select **Reset**.
7. When you finish changing settings on a menu, press the ➔ return button.
8. Press the menu button to exit the menu or the ➔ return button to return to the previous screen.

**Parent topic:** Adjusting the Menu Settings

## Image Quality Settings - Image Menu

Settings on the Image menu let you adjust the quality of your image for the input source you are currently using. The available settings depend on the currently selected input source.

Maintaining and Transporting the Projector

Follow the instructions in these sections to maintain your projector and transport it from place to place.

**Projector Maintenance**

Air Filter and Vent Maintenance
Replacing the Remote Control Batteries
Transporting the Projector

**Projector Maintenance**

Your projector needs little maintenance to keep working at its best.

You may need to clean the projection window periodically, and clean the air filter and air vents to prevent the projector from overheating due to blocked ventilation.

The only parts you should replace are the air filter and remote control batteries. If any other part needs replacing, contact Epson or an authorized Epson servicer.

This projector uses a sealed laser light source which does not need servicing and cannot be replaced.

**Warning:** Before cleaning any part of the projector, turn it off and unplug the power cord. Never open any cover on the projector, except as specifically explained in this manual. Dangerous electrical voltages in the projector can injure you severely.

**Warning:** Do not try to service this product yourself, except as specifically explained in this manual. Refer all other servicing to qualified servicers.

Cleaning the Projection Window
Cleaning the Projector Case

**Parent topic:** Maintaining and Transporting the Projector

**Cleaning the Projection Window**

Clean the projection window periodically, or whenever you notice dust or smudges on the surface.

- To remove dust or smudges, gently wipe the projection window with lens-cleaning paper.
• To remove stubborn smudges, moisten a soft, lint-free cloth with lens cleaner and gently wipe the projection window.

**Warning:** Do not use a lens cleaner that contains flammable gas. The high heat generated by the projector may cause a fire.

**Caution:** Do not use canned air, or the gases may leave a flammable residue. Do not use glass cleaner or any harsh materials to clean the projection window and do not subject the projection window to any impacts; you may damage it.

**Parent topic:** Projector Maintenance

### Cleaning the Projector Case

Before cleaning the projector case, turn off the projector and unplug the power cord.

• To remove dust or dirt, use a soft, dry, lint-free cloth.

• To remove stubborn dirt, use a soft cloth moistened with water and mild soap. Do not spray liquid directly on the projector.

**Caution:** Do not use wax, alcohol, benzine, paint thinner, or other chemicals to clean the projector case. These can damage the case. Do not use canned air, or the gases may leave a flammable residue.

**Parent topic:** Projector Maintenance

**Related tasks**

- Turning Off the Projector

### Air Filter and Vent Maintenance

Regular filter maintenance is important to maintaining your projector. Your Epson projector is designed with an easily accessible, user-replaceable filter to protect your projector and make regular maintenance simple. Filter maintenance intervals will depend on the environment.

If regular maintenance is not performed, your Epson projector will notify you when the temperature inside the projector has reached a high level. Do not wait until this warning appears to maintain your projector filter as prolonged exposure to high temperatures may reduce the life of your projector or laser.

Damage due to the failure to properly maintain the projector or its filter may not be covered by the projector’s Limited Warranty.
Cleaning the Air Filter and Vents
Replacing the Air Filter
Parent topic: Maintaining and Transporting the Projector

Cleaning the Air Filter and Vents
Clean the projector's air filter and vents if they get dusty, or if you see a message telling you to clean them.
1. Turn off the projector and unplug the power cord.
2. Gently remove the dust using a small vacuum designed for computers or a very soft brush (such as a paintbrush).

Note: You can remove the air filter to clean both sides. Do not use water or any other solvent to clean the air filter.

Caution: Do not use canned air. The gases may leave a flammable residue or push dust and debris into the projector's optics or other sensitive areas.

Parent topic: Air Filter and Vent Maintenance
Related tasks
Turning Off the Projector
Replacing the Air Filter
Replacing the Air Filter

You need to replace the air filter in the following situations:
• After cleaning the air filter, you see a message telling you to clean or replace it
• The air filter is torn or damaged

You can replace the air filter while the projector is mounted to the ceiling or placed upside-down on a table.

1. Turn off the projector and unplug the power cord.
2. Place the projector upside-down on a table.
3. Remove the air filter cover.
4. Pull the air filter out of the projector.
**Note:** Air filters contain ABS resin and polyurethane foam. Dispose of used air filters according to local regulations.

5. Place the new air filter in the projector as shown and push gently until it clicks into place.

![Air Filter Installation](image)

6. Replace the air filter cover.

---

**Replacing the Remote Control Batteries**

The remote control uses two AAA manganese or alkaline batteries. Replace the batteries as soon as they run out.

**Caution:** Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.
1. Remove the battery cover as shown.

![Image of battery cover being removed](image)

2. Remove the old batteries.

   **Warning:** If the battery fluid has leaked, wipe it away with a soft cloth and avoid getting the fluid on your hands. If it gets on your hands, wash them immediately to avoid injury.

3. Insert the batteries with the + and – ends facing as shown.

   ![Image of batteries being inserted](image)

   **Warning:** Make sure the batteries are inserted in the correct positions. If the batteries are not inserted correctly, they could explode or leak, causing a fire, injury, or damage to the product.
4. Replace the battery cover and press it down until it clicks into place.

**Warning:** Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

**Parent topic:** Maintaining and Transporting the Projector

**Transporting the Projector**

The projector contains precision parts, some of which are glass. Follow the guidelines here to transport, ship, or store the projector safely.

1. Turn off the projector.
2. Make sure the ⬇️ power light is blue (but not flashing) and the status light is off, then unplug the power cord.
3. Do one of the following:
   - When transporting the projector a long distance or as checked luggage, pack it in a firm box with cushioning around it and mark the box "Fragile."
   - When shipping the projector for repairs, place it in its original packing materials, if possible, or use equivalent materials with cushioning around the projector. Mark the box "Fragile."

**Note:** Epson shall not be liable for any damages incurred during transportation.

Projection Problem Tips

If the projector is not working properly, try turning it off and unplugging it. Then plug it back in and turn it on.

If this does not solve the problem, check the following:

• The lights on the projector may indicate what the problem is.
• The solutions in this manual can help you solve many problems.

If none of these solutions help, you can contact Epson for technical support.

Solutions to Bluetooth Audio Problems

Parent topic: Solving Problems

Solutions When No Image Appears

If no image appears, try the following solutions:

• Press the A/V mute button on the projector remote control to see if the image was temporarily turned off.

• Check the status lights to confirm the projector is operating normally.

• Make sure all necessary cables are securely connected and the power is on for the projector and connected video sources.

• Try using a shorter HDMI cable.

• Press the projector's power button to wake it from standby or sleep mode. Also see if your connected computer is in sleep mode or displaying a blank screen saver.

• If you are projecting from a streaming device, make sure it is powered by the USB power cable inside the projector. Turn on the connected streaming device or video source, and press the play button to start a video, if necessary.

• Make sure the connected device meets the HDMI CEC standard. See the documentation supplied with the device for more information. If necessary, set the CEC function for the connected device again and restart the device. Turn off the projector and the connected streaming device or video source, and then turn them back on.
• Make sure the connected device does not require MHL; the projector's HDMI port does not support MHL.
• Turn off the projector and the connected streaming device or video source, and then turn them back on.
• Press the menu button on the projector remote control. If the projector menu displays, there may be a problem with the connected video source, cable connection, or port.
• If you are projecting from a laptop computer, make sure it is set up to display on an external monitor.
• Make sure the computer's display resolution does not exceed the projector's resolution and frequency limits. If necessary, select a different display resolution for your computer. (See your computer manual for details.)
• If the other solutions do not solve the problem, reset all of the projector settings using the options on the Reset menu.

Solutions When "No Signal" Message Appears

If the "No Signal" message appears, try the following solutions:
• Turn on the connected computer or video source, and press its play button to begin your presentation, if necessary.
• Check the connection from the projector to your video sources.
• If you are projecting from a laptop computer, make sure it is set up to display on an external monitor.
• If necessary, turn the projector and the connected computer or video source off and then on again.
• Try a different video cable.
• If the other solutions do not solve the problem, reset all of the projector settings using the options on the Reset menu.
Displaying From a PC Laptop

If you see the "No Signal" message when you display from a PC laptop, you need to set up the laptop to display on an external monitor.

1. Hold down the laptop's Fn key and press the key labeled with a monitor icon or CRT/LCD. (See your laptop manual for details.) Wait a few seconds for an image to appear. To display on both the laptop's monitor and the projector, try pressing the same keys again.

   **Note:** On Windows 7 or later, hold down the Windows key and press P at the same time, then click **Duplicate**.

2. If the same image is not displayed by the laptop and projector, check the Windows Display utility to make sure the external monitor port is enabled and extended desktop mode is disabled. (See your computer or Windows manual for instructions.)

3. If necessary, check your video card settings and set the multiple display option to **Clone**, **Mirror**, or **Duplicate**.

Displaying From a Mac Laptop

If you see the "No Signal" message when you display from a Mac laptop, you need to set up the laptop for mirrored display. (See your laptop manual for details.)

1. Open the **System Preferences** utility and select **Displays**, **Display**, or **Color LCD**.

2. Click the **Arrange** or **Arrangement** tab.

3. Select the **Mirror Displays** checkbox.

Parent topic: Solutions When "No Signal" Message Appears
Solutions When the Image is Not Rectangular

If the projected image is not evenly rectangular, try the following solutions:

• Place the projector directly in front of the center of the screen, facing it squarely, if possible.
• If you adjusted the projector height using the projector foot, press the keystone buttons on the projector to adjust the image shape.
• Adjust the image shape using the keystone settings in the projector's menu.
• Adjust the Quick Corner setting to correct the image shape.

Solutions When Only a Partial Image Appears

If only a partial computer image appears, try the following solutions:

• If you zoomed into or out of the image using the Zoom setting, press the return button on the projector remote control until the projector returns to a full display.
• Check the cables connecting the computer or video source to the projector. Try connecting different cables.
• Check your computer display settings to disable dual display and set the resolution within the projector's limits. (See your computer manual for details.)
• Check the resolution assigned to your presentation files to see if they are created for a different resolution than you are projecting in. (See your software help for details.)
• Make sure you selected the correct Projection setting.

Solutions When the Image Contains Noise or Static
If the projected image seems to contain electronic interference (noise) or static, try the following solutions:

- Check the cables connecting your computer or video source to the projector. They should be:
  - Separated from the power cord to prevent interference
  - Securely connected at both ends
  - Not connected to an extension cable
  - No longer than 24 feet (7.3 m) for HDMI cables
- Try decreasing the Sharpness setting in the Image menu.
- Try adjusting the Noise Reduction or MPEG Noise Reduction setting in the Image menu.
- Select a computer video resolution and refresh rate that are compatible with the projector.

Related references
Image Quality Settings - Image Menu

Related tasks
Connecting to an HDMI Video Source

Solutions When the Image is Fuzzy or Blurry
If the projected image is fuzzy or blurry, try the following solutions:

- Adjust the image focus.
- Clean the projection window.

  Note: To avoid condensation on the lens after bringing the projector in from a cold environment, let the projector warm up to room temperature before using it.

- Try another projection surface.
- Position the projector close enough to the screen, and directly in front of it.
- Adjust the Sharpness setting to improve image quality.
If you are projecting from a computer, adjust the computer's resolution to match the projector's native resolution, if possible.

Solutions When the Image Brightness or Colors are Incorrect

If the projected image is too dark or light, or the colors are incorrect, try the following solutions:

• Try selecting a color mode that best fits the image and environment.
• Check your video source settings.
• Adjust the available settings on the Image menu, such as **Brightness**, **Contrast**, **Tint**, and/or **Color Saturation**.
• Make sure you selected the correct **HDMI Video Range** setting in the Image menu.
• Make sure the HDMI cable is securely connected to the projector and your video device. If you connected a long cable, try connecting a shorter cable.
• Position the projector close enough to the screen.

Solutions to Sound Problems

If there is no sound when you expect it or the volume is too low or high, try the following solutions:

• Adjust the projector's volume settings.
• Press the A/V mute button on the projector remote control to resume video and audio if they were temporarily stopped.
• Check the cable connection between the projector and your video source.
• If you are using a Mac and you do not hear sound from an HDMI source, make sure your Mac supports audio through the HDMI port. If not, you need to connect an audio cable directly to your speaker system.
• HDMI audio is only supported using PCM. Make sure your audio source is set to the PCM setting.
• If you turn the projector on immediately after turning it off, the cooling fans may run at high speed momentarily and cause an unexpected noise. This is normal.

Solutions to Bluetooth Audio Problems
If you cannot connect to a Bluetooth audio device, try the following solutions:

• Make sure the Bluetooth Audio setting is turned on in the Settings menu. If you are using the projector’s speaker or headphones, turn this setting off.
• Select Search Bluetooth Device in the Settings menu when you pair a Bluetooth audio device for the first time or change to another Bluetooth audio device.
• Make sure the Bluetooth audio device is paired to the projector and not to another device.
• Make sure the Bluetooth audio device that is paired to the projector supports copyright protection (SCMS-T) and A2DP.
• Check the volume level on the paired Bluetooth audio device.
• Make sure there are no obstacles between the Bluetooth audio device and the projector and that the Bluetooth audio device is within the specified communication distance. Avoid using the projector near wireless networks, microwave ovens, 2.4 GHz cordless phones, or other devices that use the 2.4 GHz frequency band.

Solutions to Projector Power or Shut-Off Problems

If the projector does not come on when you press the power button or it shuts off unexpectedly, try the following solutions:

• Make sure the power cord is securely connected to the projector and to a working electrical outlet.
• The projector's buttons may be locked for security. Unlock the buttons or use the projector remote control to turn on the projector.
• If the projector's laser shuts off unexpectedly, it may have entered standby mode after a period of inactivity. Press the power button to wake the projector and adjust the Sleep Mode setting to change the sleep interval.
• If the projector is installed on a lighting track, disconnect it from the lighting track and plug it into a power outlet to make sure it is working.
• If the projector's light source shuts off, the status light is flashing blue, and the temp light is orange, the projector has overheated and shut off. Check the solutions for this light status.
• The power cord may be defective. Try another power cord. If that doesn't work, disconnect the cord and contact Epson.

Solutions to Streaming Device Problems

If you cannot operate the Epson streaming device included with your projector using the projector remote control, try the following solutions:

- Make sure the streaming device is securely connected to the projector's HDMI extension cable and USB power cable.
- Make sure the streaming device is connected to Wi-Fi. You need an Internet connection to view online streaming content.
- Make sure the projector remote control is paired to the streaming device.
- Make sure you are using the projector remote control and not the remote control for Android TV.

Caution: The streaming device included with your projector is designed for use with this projector. Epson takes no responsibility for repair costs incurred by connecting any other streaming device to your projector.

Parent topic: Solving Projector or Remote Control Operation Problems

Related tasks

Pairing the Projector Remote Control

Solutions to Remote Control Problems

If the projector does not respond to remote control commands, try the following solutions:

- Check that the remote control batteries are installed correctly and have power. If necessary, replace the batteries.
- Make sure you are operating the remote control within the reception angle and range of the projector.
- Make sure the projector is not warming up or shutting down.
- Check to see if a button on the remote control is stuck down, causing it to enter sleep mode. Release the button to wake the remote control up.
- Make sure the projector remote control is paired to the streaming device to operate Android TV features (if applicable).
- Make sure you are using the projector remote control and not the remote control for Android TV.
- Strong fluorescent lighting, direct sunlight, or infrared device signals may be interfering with the projector's remote receivers. Dim the lights or move the projector away from the sun or interfering equipment.
- If you lose the remote control, you can purchase another from an authorized Epson reseller.
Solutions to HDMI Link Problems

If you cannot control an HDMI device using the HDMI Link buttons, try the following solutions:

• Make sure all necessary cables are securely connected and the power is on for the projector and connected video sources.
• Make sure the cables meet the HDMI CEC standard.
• Make sure the connected device meets the HDMI CEC standard. See the documentation supplied with the device for more information.
• Make sure the HDMI Link setting is set to On.
• Check if the device is available in the Device Connections list in the Settings menu. If the device does not appear, it does not meet the HDMI CEC standards. Connect a different device.
• Make sure the connected devices are turned on and in standby status. See the documentation supplied with the device for more information.
• If you connected a new device or changed any connections, make sure the CEC function is set for the connected device. You may need to restart the device.
• If you have connected a speaker or receiver, set the output to PCM.

Where to Get Help (U.S. and Canada)

If you need to contact Epson for technical support services, use the following support options.
Internet Support
Visit Epson’s support website at epson.com/support (U.S.), epson.ca/support (Canada), or epson.com.jm/support (Caribbean) and select your product for solutions to common problems with your projector. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
To use the Epson PrivateLine Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a projector support specialist by dialing (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are 6 AM to 8 PM, Pacific Time, Monday through Friday and 7 AM to 4 PM, Pacific Time, Saturday.

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Before you call, have the following information ready:
• Product name
• Product serial number (located on the bottom or rear of the projector, or in the menu system)
• Proof of purchase (such as a store receipt) and date of purchase
• Computer or video configuration
• Description of the problem

Purchase Supplies and Accessories
You can purchase screens, other optional accessories, and replacement parts from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada. Or you can purchase online at epsonstore.com (U.S. sales) or epsonstore.ca (Canadian sales).

To purchase a replacement remote control, call (562) 276-4394 (U.S.) or (905) 709-3839 (for dealer referral in Canada).

Where to Get Help (Latin America)
If you need to contact Epson for technical support services, use the following support options.
**Internet Support**

Visit Epson’s support website at epson.com.jm/support and select your product for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

**Speak to a Support Representative**

Before you call for support, please have the following information ready:

- Product name
- Product serial number (located on the bottom or rear of the projector, or in menu system)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer or video configuration
- Description of the problem

Then call:

Supported Video Display Formats

For best results, your computer's monitor port or video card resolution should be set to display in the projector's native resolution. However, your projector includes Epson's SizeWise chip that supports other computer display resolutions, so your image will be resized to fit automatically.

Your computer's monitor port or video card refresh rate (vertical frequency) must be compatible with the projector. (See your computer or video card manual for details.)

The table here lists the compatible refresh rate and resolution for each compatible video display format via HDMI (HDCP version 1.4).

Recycling

Epson offers a recycling program for end of life products. Please go to this site for information on how to return your products for proper disposal.

Parent topic: Notices

Important Safety Information

Caution: Never look into the projector lens when the laser is turned on; the bright light can damage your eyes. Never let children look into the lens when it is on. Never open any cover on the projector, except the filter covers. Dangerous electrical voltages inside the projector can severely injure you. Except as specifically explained in this User’s Guide, do not attempt to service this product yourself. Refer all servicing to qualified service personnel.

Warning: The projector and its accessories come packaged in plastic bags. Keep plastic bags away from small children to avoid any risk of suffocation.

Parent topic: Notices

Laser Safety Information

This projector is a Class 2 laser product that complies with the IEC/EN60825-1:2007 international standard for lasers. Follow these safety instructions when using the projector.
**Warning:** Possibly hazardous optical radiation emitted from this product. Do not look at operating light source. Eye injury may result.

- If an error occurs in the projector, turn off the power and unplug the projector immediately. Continuing to use the projector could result in an electric shock, fire, or visual impairment. Contact Epson support.
- Do not attempt to disassemble or modify the projector. The projector contains a high-power laser component. Serious injury could result.
- Do not look into the lens during projection. Also, do not look into the lens using optical devices, such as a magnifying glass or telescope. This could cause visual impairment.
- When turning on the projector at a distance using the remote control, make sure no one is looking into the lens.
- Do not allow small children to operate the projector. Children must be accompanied by an adult.
- Do not apply optical devices, such as a magnifying glass or reflector, to the projected image. Using the projector may result in physical harm, fire, or an accident.
- Do not block the light from the lens during projection. The high temperature in this area could cause burns, fire, or other damage. The lens may overheat due to the reflected light and could cause the projector to malfunction.
- Before using the projector, make sure there is nothing in the area that could reflect the projected image.
- When disposing of the projector, do not disassemble it. Dispose of the projector in accordance with your local or national laws and regulations.

Labels are attached to the projector to indicate it is a Class 2 laser product and complies with FDA performance standards for laser products except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007:

- **Inside**
• Side

As with any bright source, do not stare into the beam (RG2 IEC/EN 62471-5:2015).
Important Safety Instructions

Follow these safety instructions when setting up and using the projector:

• Do not look into the lens when the projector is on. The bright light can damage your eyes. Avoid standing in front of the projector so the bright light does not shine into your eyes.

• When turning on the projector at a distance using the remote control, make sure there is no one looking into the lens.

• Do not cover the projection window. The internal temperature could rise and cause a fire.

• Do not place the projector on an unstable cart, stand, or table or on a surface that is unable to support its weight. Otherwise, it could fall or topple causing an accident and injury.

• If the projector is mounted on a ceiling or wall, it should be installed by qualified technicians using mounting hardware designed for use with this projector.

• When installing or adjusting a ceiling or wall mount, do not use adhesives to prevent the screws from loosening and do not use oils or lubricants. This may cause the projector case to crack and the projector to fall from its ceiling mount. This could cause serious injury to anyone under the mount and could damage the projector.
• Do not install the projector in locations exposed to high humidity and dust, such as on a kitchen counter, in the kitchen, or near a humidifier, or in locations exposed to oil smoke or steam. Doing so could cause fire or electric shock. In addition, the oil content could cause the projector’s outer case to deteriorate and could cause the projector to fall off from the ceiling where it is suspended.

• Do not use the projector near water, sources of heat, high-voltage electrical wires, or sources of magnetic fields.

• Do not use the device near any medical equipment or equipment that is automatically controlled, such as automatic doors or fire alarms. Electromagnetic interference from the device may cause such equipment to malfunction and cause an accident.

• Use the type of power source indicated on the projector. Use of a different power source may result in fire or electric shock. If you are not sure of the power available, consult your dealer or power company.

• Place the projector near a wall outlet where the plug can be easily unplugged.

• Take the following precautions when handling the plug: Do not hold the plug with wet hands. Do not insert the plug into a dusty outlet. Insert the plug firmly into the outlet. Do not pull the power cord when disconnecting the plug; always be sure to hold the plug when disconnecting it. Do not overload wall outlets, extension cords, or power strips. Failure to comply with these precautions could result in fire or electric shock.

• Do not place the projector where the cord can be walked on. This may result in fraying or damage to the plug.

• Unplug the projector from the wall outlet and allow to cool before cleaning. Use a dry cloth (or, for stubborn dirt or stains, a moist cloth that has been wrung dry) for cleaning. Do not use liquid or aerosol cleaners, any sprays containing flammable gas, or solvents such as alcohol, paint thinner, or benzine.

• Do not block the slots and openings in the projector case. They provide ventilation and prevent the projector from overheating. Do not operate the projector on a sofa, rug, or other soft surface, or set it on top of loose papers. Do not cover the projector with a blanket, curtain, or tablecloth. If you are setting up the projector near a wall, leave at least 7.9 inches (20 cm) of space between the wall and the projector.

• Do not operate the projector in a closed-in cabinet unless proper ventilation is provided.

• Never allow objects of any kind to enter any openings in the projector. Do not leave objects, especially flammable objects, near the projector. Never spill liquid of any kind into the projector.

• If you are using two or more projectors side-by-side, leave enough space between the projectors to allow for proper ventilation.

• You may need to clean the air filter and vent. A clogged air filter or vent can block ventilation needed to cool the projector. Do not use canned air, or the gases may leave a residue.

• Do not store the projector outdoors for an extended length of time.
• Except as specifically explained in this manual, do not attempt to service this product yourself. Refer all servicing to qualified personnel. Opening or removing covers may expose you to dangerous voltages and other hazards.

• Never open any covers on the projector except as specifically explained in this manual. Never attempt to disassemble or modify the projector. Refer all repairs to qualified service personnel.

• Unplug the projector from the wall outlet and refer servicing to qualified service personnel under the following conditions: if it does not operate normally when you follow the operating instructions, or exhibits a distinct change in performance; if smoke, strange odors, or strange noises come from the projector; if the power cord or plug is damaged or frayed; if liquid or foreign objects get inside the projector, or if it has been exposed to rain or water; if it has been dropped or the housing has been damaged.

• Do not touch the plug during an electrical storm. Otherwise, you may receive an electric shock.

• Unplug the projector when it will not be used for extended periods.

• Do not use the projector where it may be exposed to rain, water, or excessive humidity.

• Do not use or store the projector where it may be exposed to smoke, steam, corrosive gases, excessive dust, vibration, or shock.

• Do not use the projector where flammable or explosive gases may be present.

• Do not use or store the projector or remote control in a hot location, such as near a heater, in direct sunlight, or in a closed vehicle.

• If you use the projector in a country other than where you purchased it, use the correct power cord for that country.

• Do not stand on the projector or place heavy objects on it.

• Do not use the projector outside of the required temperature range below:
  41 to 95 °F (5 to 35 °C) at an altitude of 7500 feet (2286 m) or less, or 41 to 86 °F (5 to 30 °C) at an altitude of 7500 feet (2286 m) to 9842 feet (3000 m)

  Doing so may cause an unstable display and could lead to projector damage. Do not use or store the projector where it may be exposed to sudden changes in temperature.

• Do not store the projector outside of the required temperature range of 14 to 140 °F (–10 to 60 °C) or in direct sunlight for long periods of time. Doing so may cause damage to the case.

• Do not place anything that can become warped or damaged by heat near the exhaust vents. Do not bring your hands or face close to the vents while projection is in progress. Do not bring your face close to the projector while it is in use.
• Before you move the projector, make sure its power is turned off, the plug is disconnected from the outlet, and all cables are disconnected.

• Do not place the source of an open flame, such as a lit candle, on or near the projector.

• During projection, do not block the light from the projector with a book or other objects. If the light from the projector is blocked, the area on which the light shines becomes hot which could cause it to melt, burn, or start a fire. Also, the lens may get hot due to the reflected light which could cause the projector to malfunction. To stop projection, use the A/V Mute function, or turn off the projector.

• Do not modify the power cord. Do not place heavy objects on top of the power cord or bend, twist, or pull it excessively. Keep the power cord away from hot electrical appliances.

**Restriction of Use**

**Restriction of Use**

When this product is used for applications requiring high reliability/safety such as transportation devices related to aviation, rail, marine, automotive; disaster prevention devices; various safety devices; or functional/precision devices, you should use this product only after giving consideration to including fail-safes and redundancies into your design to maintain safety and total system reliability.

Because this product was not intended for use in applications requiring extremely high reliability/safety such as aerospace equipment, main communication equipment, nuclear power control equipment, or medical equipment related to direct medical care, please make your own judgment on this product's suitability after a full evaluation.

FCC Compliance Statement

For United States Users
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

WARNING
The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

1.1 Disputes. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 Binding Arbitration. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED.

Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 Pre-Arbitration Steps and Notice. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days, you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3840 Kilroy Airport Way, Long Beach, CA 90806 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.
1.5 **WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS.** YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.

1.6 **Arbitration Procedure.** If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at [http://www.jamsadr.com](http://www.jamsadr.com) or by calling 1-800-352-5267 (U.S. or Canada), or [https://www.jamsadr.com/about/](https://www.jamsadr.com/about/) or by calling +1-949-224-1810 (Latin America), and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) **Initiation of Arbitration Proceeding.** If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) **Write a Demand for Arbitration.** The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at [http://www.jamsadr.com](http://www.jamsadr.com) ("Demand for Arbitration").
(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in
accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.
