SAFETY INSTRUCTIONS

USER'S MANUAL – Separate Volume

Before using this product, please read and understand the Safety Instructions thoroughly to ensure correct usage.

After reading, store the Safety Instructions together with the USER'S MANUAL.

ENGLISH

About the Symbols

Various symbols are used in this manual, the user's manual and on the product itself to ensure correct usage, to prevent danger to the user and others, and to prevent property damage. The meanings of these symbols are described below. It is important that you read these descriptions thoroughly and fully understand the contents.

Warning

This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.

Caution

This symbol indicates information that, if ignored, could result possibly in personal injury or physical damage due to incorrect handling.

Typical Symbols

This symbol indicates an additional warning (including cautions). An illustration is provided to clarify the contents.

This symbol indicates a prohibited action. The contents will be clearly indicated in an illustration or nearby (the symbol to the left indicates that disassembly is prohibited).

This symbol indicates a compulsory action. The contents will be clearly indicated in an illustration or nearby (the symbol to the left indicates that the power plug should be disconnected from the power outlet).

NOTE : "Remote control transmitter" may be called "Remote controller" in the "USER'S MANUAL".

SAFETY PRECAUTIONS

⚠ WARNING

Never use the projector if a problem should occur.

Abnormal operations such as smoke, strange odor, no image, no sound, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. can cause a fire or electrical shock.

In such case, immediately turn off the power switch and then disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer. Never attempt to make repairs yourself because this is dangerous this could be dangerous.

* The power outlet should be close to the projector and easily accessible.

Disconnect the plug from the power outlet.

Do not insert liquids or foreign object.

Penetration of liquids or foreign objects could result in fire or electrical shock. Use special caution in households where children are present.

If liquids or foreign object should enter the projector, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

* Do not place the projector in a bathroom.

* Do not expose the projector to rain or moisture.

* Do not place flower vases, pots, cups, cosmetics, liquids such as water, etc on or around the projector.

* Do not place metals, combustibles, etc on or around the projector.

Never modify.

The projector contains high voltage components. Modification could result in fire or electrical shock.

* Never open the cabinet.

* Ask your dealer to repair and clean insider.

Do not disassemble.

Do not give the projector any shock or impact.

If the projector should be shocked and/or broken, it could result in an injury, and continued use could result in fire or electrical shock.

If the projector is shocked, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Do not place the projector on an unstable surface.

If the projector should be dropped and/or broken, it could result in an injury, and continued use could result in fire or electrical shock.

* Do not place the projector on an unstable, slant or vibrant surface such as a wobbly or inclined stand.

* Use the caster brakes placing the projector on a stand with casters.

* Do not place the projector in the side up position, the lens up position or the lens down position.

SAFETY PRECAUTIONS (continued)

WARNING

Be cautious of High temperatures of the projector.

High temperatures are generated when the lamp is lit. It could result in fire or burn. Use special caution in households where children are present.

Do not touch about the lens, air fans and ventilation openings during use or immediately after use, to prevent a burn. Take care of ventilation.

* Keep a space of 30 cm or more between the sides and other objects such as walls.

* Do not place the projector on the metallic table.

* Do not place anything about the lens, air fans and ventilation openings of the projector.

* Never block the air fan and ventilation openings.

* Do not use with the ventilation opening facing downwards.

* Do not cover the projector with a tablecloth, etc.

* Do not place the projector on a carpet or bedding.

Never look through the lens or openings when the lamp is on.

The powerful light could adversely affect vision. Use special caution in households where children are present.

Use only the correct power outlet.

Incorrect power supply could result in fire or electrical shock. Use only the correct power outlet depending on the indication on the projector and the safety standard.

* The enclosed power cord must be used depending on the power outlet to be used.

Be cautious of the power cord connection.

Incorrect connection of the power cord could result in fire or electrical shock.

* Do not touch the power cord with a wet hand.

* Check that the connecting portion of the power cord is clean (with no dust), before using. Use a soft and dry cloth to clean the power plug.

* Insert the power plug into a power outlet firmly. Avoid using a loose, unsound outlet or contact failure.

Be sure to connect with ground wire.

When you fix this unit with a metal tool and the like, you must connect it with ground wire; otherwise, fire or electric shock can result.

Connect the ground terminal of AC inlet of this unit with the ground terminal provided at the building using an optional three-core power-supply cord.

Connect the
ground wire

SAFETY PRECAUTIONS (continued)

WARNING

Be careful in handling the the light source lamp.

Incorrect handling the lamp could result in explosion.

- * Since the lamp is made of glass, do not apply shock to it and not scratch it.
- * When replacing lamp, turn off and remove AC cord, waite 45 minutes to let lamp cool. High-pressure lamp when hot, may explode if improperly handled.
- * The lamp has a service life. For details, read the user's manual. Please contact your dealer or service company for replacement. Do not use old use old lamp. This could also cause explosion of the lamp.

Be careful in handling the power cord and external connection cables.

If you keep using a damaged the power cord or cables, it can cause a fire or electrical shock. Do not apply too much heat, pressure or tension to the power cord and cables.

If the power cord or cables is damaged (exposed or broken core wires, etc.), contact your dealer.

- * Do not place the projector or heavy objects on the power cord and cables. Also, do not place a spread, cover, etc, over them because this could result in the inadvertent placing of heavy objects on the concealed power cord or cables.
- * Do not pull the power cord and cables. When connecting and disconnecting the power cord or cables, do it with your hand holding the plug or connector.
- * Do not place the cord near the heater.
- * Avoid bending the power cord sharply.
- * Do not attempt to work on the power cord.

Be careful in handling the battery of the remote control transmitter.

Incorrect handling of the battery could result in fire or personal injury. The battery may explode if not handled properly.

- * Keep the battery away from children and pets. If swallowed consult a physician immediately for emergency treatment.
- * Do not allow the battery in a fire or water.
- * Avoid fire or high-temperature environment.
- * Do not hold the battery with the metallic tweezers.
- * Keep the battery in a dark, cool and dry play.
- * Do not short circuit the battery.
- * Do not recharge, disassemble or solder the battery.
- * Do not give the battery a physical impact.
- * Use only the battery specified in the user's manual.
- * Make sure the plus and minus terminals are correctly aligned when loading the battery.
- * If you observe a leakage of the battery, wipe out the flower and then replace the battery. If the flower adheres your body or clothes, rinse well with water.
- * Obey the local laws on disposing the battery.

SAFETY PRECAUTIONS (continued)

CAUTION

Be careful in moving the projector.

Neglect could result in an injury or damage.

- * Do not move the projector during use. Before moving, disconnect the power cord and all external connections, and close the slide lens door.
- * Avoid any impact or shock to the projector.
- * For carrying, use the enclosed carrying bag if provided, depending on the manual of the carrying bag.

ENGLISH

Do not put anything on top of the projector.

Placing anything on the projector could result in loss of balance or falling, and cause an injury or damage. Use special caution in households where children are present.

Avoid a humid or dusty place.

Placing the projector in a highly humid, dusty place, oily soot or corrosive gas could result in fire or electrical shock.

- * Do not place near the kitchen, a humidifier or other place where there is oily smoke or humidity.

Avoid a high temperature environment.

The heat could have adverse influence on the cabinet of the projector and other parts. Do not place the projector, the remote control transmitter and other parts in direct sunlight or near a hot object such as heater, etc.

Remove the power cord for complete separation.

- * For safety purposes, disconnect the power cord if the projector is not to be used for prolonged periods of time.
- * Before cleaning, turn off and unplug the projector. Neglect could result in fire or electrical shock.

Disconnect the plug from the power outlet.

Ask your dealer to cleaning inside of the projector about every two years.

Accumulations of dust inside the projector cause result in fire or malfunction. Cleaning inside is more effective if performed before every humid periods such as rainy season.

- * Do not clean inside yourself because it is dangerous.

SAFETY PRECAUTIONS (continued)

NOTE

Do not give the remote control transmitter any physical impact.

A physical impact could cause damage or malfunction of the remote control transmitter.

- * Take care not to drop the remote control transmitter.
- * Do not place the projector or heavy objects on the remote control transmitter.

Take care of the lens.

- * Close the slide lens door to prevent the lens surface being scratched when the projector is not used.
- * Do not touch the lens to prevent fog or dirt of the lens that cause deterioration of display quality.
- * Use commercially available lens tissue to clean the lens (used to clean cameras, eyeglasses, etc.). Be careful not to scratch the lens with hard objects.

Take care of the air filter to normal ventilate.

When the air filter becomes clogged with dust, etc., the projector may display the message such as “CHECK THE AIR FLOW” or turn off the projector, to prevent the internal heat level rising.

- * Do not turn on the projector without air filter.
- * If the air filter is damaged or lost, order the air filter specified in the user's manual to your dealer.

Take care of the cabinet and the remote control transmitter.

Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

- * Use a soft cloth to clean the cabinet and control panel of the projector and the remote control transmitter. When excessively soiled dilute a neutral detergent in water, wet and wring out the soft cloth and afterward wipe with a dry soft cloth. Do not use undiluted detergent directly.
- * Do not use an aerosol sprays, solvents, volatile substances or abrasive cleaner.
- * Before using chemical wipes, be sure to read and observe the instructions.
- * Do not allow long-term close contact with rubber or vinyl.

SAFETY PRECAUTIONS (continued)

NOTE

Avoid strong rays.

Any strong ray (such as direct rays of the sun or room lighting) onto the remote control transmitter sensors could invalidate the remote control transmitter.

Avoid radio interference.

Any interfering radiation could cause disordered image or noises.

* Avoid radio generator such as a mobile telephone, transceiver, etc. around the projector.

About displaying characteristic.

The display condition of the projector (such as color, contrast, etc.) depends on characteristic of the screen, because the projector uses a liquid crystal display panel. The display condition can differ from the display of CRT.

* Do not use a polarized screen. It can cause red image.

Turn the power on/off in right order.

To prevent any trouble, turn on/off the projector in right order mentioned below unless specifying.

* Power on the projector before the computer or video tape recorder.

* Power off the projector after the computer or video tape recorder.

Take care not to fatigue your eyes.

Rest the eyes periodically.

Set the sound volume at a suitable level to avoid bothering other people.

* It is better to keep the volume level low and close the windows at night to protect the neighborhood environment.

Connecting with notebook computer

When connecting with notebook computer, set to valid the RGB external image output (setting CRT display or simultaneous display of LCD and CRT).

Please read instruction manual of the notebook for more information.

Liquid Crystal Projector

USER'S MANUAL

Thank you for purchasing this liquid crystal projector.

Please read the accompanying manual "SAFETY INSTRUCTIONS" and this "USER'S MANUAL" thoroughly to ensure correct usage through understanding. After reading, store this instruction manual in a safe place for future reference.

NOTE:

- The information in this manual is subject to change without notice.
- The manufacturer assumes no responsibility for any errors that may appear in this manual
- The reproduction, transmission or use of this document or contents is not permitted without express written authority.

FEATURES

This liquid crystal projector is used to project various computer signals as well as NTSC / PAL / SECAM video signals onto a screen. Little space is required for installation and large images can easily be realized.

- **Outstanding brightness**

The UHB lamp and high-efficiency optical system assure a high level of brightness.

- **Partial magnification function**

Interesting parts of images can be magnified for closer viewing.

- **Distortion correction function**

Distortion-free images are quickly available.

REMOTE CONTROL TRANSMITTER

(Refer to P.9 "OPERATIONS")

 : These functions work when the mouse control function is activated. Remember, the POSITION, BLANK ON and MENU ON functions disable the mouse control function.

NOTE: To prevent any malfunction;

- Do not give the remote control transmitter any physical impact. Take care not to drop.
- Do not place the heavy objects on the remote control transmitter.
- Do not wet the remote control transmitter or place it on any wet object.
- Do not place the remote control transmitter close to the cooling fan of the projector.
- Do not disassemble the remote control transmitter in case of malfunction. Please bring it to the service station.

Loading the Battery

CAUTION

Danger of explosion if battery is incorrectly replaced.

Be careful in handling the battery according to instructions of the accompanying manual “SAFETY INSTRUCTIONS” and this manual.

Replace only with the same or equivalent type recommended by the manufacturer.

Use the 3V micro lithium battery type no. CR2025 only.

When you dispose the battery, you must obey the law in the relative area or country.

Keep the battery away from children and pets.

First Loading:

In original packing, the battery is installed in the battery holder of the remote controller with protection film(the transparent filmsome of which is inside the battery folder). Pull out the protection film to load the battery.

Replacing:

1. See the reverse side of the remote controller.
2. Pinch the groove and pull out battery holder as the drawing right.
3. Remove the worn battery.
4. Install the new battery with “+” side facing.
5. Push in and click the battery holder.

Fixing the Handle

Fix the enclosed handle if you need.

1. Raise up the handle hook, and pass one end of the handle through the hole of handle hook.
2. Buckle the end of the handle, as the right drawing.
3. Fix the other end of the handle to the other handle hook in the same way.

CAUTION

Make sure the handle is fixed before carrying the projector with the handle. If the projector should be dropped from the handle should be off, it could result in an injury, and continued use could result in fire or electrical shock. Do not flourish the projector with the handle.

INSTALLATION

Installation of the Projector and Screen

Refer to the drawing and table below for determining of the screen size and projection distance.

a: Distance from the LCD projector to the screen.

The projection distances shown in the table below are for full size (800 x 600 dots).

Table 1. Installation Reference

Screen size (inches)	a (inches)	
	Min.	Max.
40	65	78
60	98	117
80	131	157
100	163	196
120	196	236
150	246	295
200	328	394

CAUTION

- Install the projector in a suitable environment according to instructions of the accompanying manual “SAFETY INSTRUCTIONS” and this manual.
- Please basically use liquid crystal projector at the horizontal position. If you use liquid crystal projector by the lens up position, the lens down position and the side up position, this may cause the heat inside to build up and become the cause of damage. Be especially careful not to install it with ventilation holes blocked.

Angle Adjustment

Use the foot adjuster on the bottom of the projector to adjust the projection angle. It is variable within 0° to 9° approximately.

Foot Adjuster

Press the foot adjuster button

Rear Foot Adjuster

1. Lift up the front side of the projector, and pressing the foot adjuster button, adjust the projection angle.
2. Release the button to lock at the angle to be fixed.
3. Turn the rear foot adjuster to adjust the left-right slope.

CAUTION

Do not release the foot adjuster button unless the projector is being held; otherwise, the projector could overturn or the fingers could get caught and cause personal injury.

Cabling

RGB signal input:

Connect the RGB IN 1 or 2 terminal of the projector to the RGB signal output of the computer by the enclosed RGB cable.

For some modes, the optional Mac adapter is necessary. Consult your dealer to connect with the Apple computer.

Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.

Audio signal input (from computer) :

Connect the AUDIO IN 1 or 2 terminal of the projector to the audio signal output of the computer by the optional audio cable.

Video signal input:

Connect the VIDEO IN terminal of the projector to the video signal output of the video tape recorder by the enclosed video/audio cable except for S-Video signal.

For S-Video signal, use the S-VIDEO IN terminal of the projector and the optional S-Video cable with Mini DIN 4-pin jack.

Audio signal input (from video tape recorder) :

Connect the AUDIO IN R and L terminals of the projector to the audio output of the video tape recorder by the enclosed video/audio cable with RCA jack.

RGB signal output:

Connect the RGB OUT terminal of the projector to the RGB signal input terminal of the monitor by the optional RGB cable with D-sub 15-pin shrink jack and inch thread screws.

Audio signal output:

Connect the AUDIO OUT terminal of the projector to the audio signal input terminal of the speaker by the optional audio cable with stereo mini jack.

PS/2, ADB , Serial or RS-232C communication:

Connect the CONTROL terminal of the projector to the computer by an appropriate cable.

For PS/2 mouse control (for IBM and compatible) use the enclosed mouse cable. For others, consult your dealer.

USB communication (mouse control only):

Connect the USB jack (B type) of the projector to the USB jack (A type) of the computer by optional USB cable.

CAUTION

- Incorrect connecting could result in fire or electrical shock. Please read this manual and the separate "SAFETY INSTRUCTIONS".
- Before connecting, turn off all devices to be connected, except for the USB cable.
- The cables (Power cord, RGB cable and other cables) may have to be used with the core set to the projector side. Use the cables which are included with the projector or specified.

NOTE:

- Before connecting, read the instruction manuals of the devices to be connected, and make sure that the projector is compatible with the device.
- Secure the screws on the D-sub connectors and tighten.
- Refer to the TECHNICAL section for the pin assign of connectors and RS-232C communication data.

Power Connection

Use the correct one of the enclosed power cords depending on the power outlet to be used. Connect the AC inlet of the projector to the power outlet firmly by the power cord.

WARNING

- Be careful in handling the power cord according to instructions of the accompanying manual "SAFETY INSTRUCTIONS" and this manual.
- Connect the power cord firmly. Avoid using a loose, unsound outlet or contact failure.

Example of system setup

NOTE:

When connecting with notebook computer, set to valid the RGB external image output (setting CRT display or simultaneous display of LCD and CRT). Please read instruction manual of the notebook for more information.

Plug & Play

This projector is VESA DDC 1/2B compatible. Plug & play is possible by connecting to a computer that is VESA DDC (Display Data Channel) compatible.

(Plug & play is a system configured with peripheral equipment including a computer and display, and an operating system.)

NOTE:

- Use the RGB cable included with this projector when using plug & play. With other cables, pins (12), (15) are sometimes not connected.
- Plug & play is available only when the RGB cable is connected to the RGB IN 1 terminal.

Switching the Power Supply ON/OFF

Switching Power ON

1. Check that the power cord is connected correctly.
2. Set the power switch to [I]. The standby mode is selected, and the Power indicator is turned on orange.
3. Press the STANDBY/ON (⏻) button on the control panel or the remote control transmitter. Warm-up begins and the Power indicator blinks in green.
4. The Power indicator ceases blinking and turns to green when power is on. Open the slide lens door.
5. Adjust picture size using the projection lens Zoom Knob.
6. Adjust focus using the projection lens Focus Ring.

Switching Power OFF

1. Press the STANDBY/ON (⏻) button on the control panel or the remote control transmitter for approximately two second. The projector lamp is extinguished and lamp cooling begins. The Power indicator blinks orange during lamp cooling. Pressing the STANDBY/ON (⏻) button has no effect while the Power indicator is blinking.
2. The system assumes the Standby mode when cooling is complete, and the Power indicator ceases blinking and changes to orange. Check that the indicator is orange and set the Power switch to [O].
3. The Power indicator is extinguished when power is off. Do not forget to close the lens door.

WARNING

Please read this manual, and the separate "SAFETY INSTRUCTIONS" thoroughly before using the equipment. Always ensure that the equipment is used safely.

NOTE:

- Except in emergencies, do not turn off unless the Power indicator is orange as it will reduce the life of the projector lamp.
- To prevent any trouble, turn on/off the projector when the computer or video tape recorder is OFF. Providing a RS-232C cable is connected, turn on the computer before the projector.

OPERATIONS (continued)

Basic Operation

The Basic operations shown in Table 2 is performed from the projector control panel or the supplied remote control transmitter. (items indicated by * may be used from the control panel)

NOTE: Use the remote control transmitter at a distance of approximately 3m from the sensor on the front of the projector, and within a range of 30° left-right. Strong light and obstacles will interfere with operation of the remote control transmitter.

Table 2 . Basic Operation

Item	Description
INPUT SELECT	Changes in input signal in sequence: Press INPUT  button.* RGB1 → RGB2 → VIDEO → S-VIDEO (→ RGB1) Select RGB input: Press RGB button. VIDEO/S-VIDEO → RGB1/RGB2 RGB2 ↔ RGB1 Select VIDEO/S-VIDEO input: Press VIDEO button. RGB1/RGB2 → VIDEO/S-VIDEO S-VIDEO ↔ VIDEO The selected signal name is displayed for approximately three seconds when the input signal is changed.
POSITION	Set/Clear position adjustment mode: Press POSITION button. The  icon is displayed in the POSITION mode. Image position adjustment: Press the , ,  and  buttons in the position adjustment mode. - Valid only in the MAGNIFY mode with VIDEO/S-VIDEO input. - The  icon is extinguished, and the position adjustment mode cleared automatically, after approximately ten seconds of inactivity. , ,  and  buttons may operate as the mouse control button. Refer to P.4.
RESET *	Initialise menu items: Select an item and press the RESET  button. Initialise position adjustment: Press the RESET  button and the POSITION mode. Valid only when RGB signal is input. - Valid except for VOLUME, LANGUAGE and H PHASE. - RESET button may operate as the mouse control button. Refer to P.4.
MAGNIFY	Set MAGNIFY mode: Press the MAGNIFY  button. Move magnified area: Run Position Adjustment in MAGNIFY mode. Adjust magnification: Press MAGNIFY  /  in MAGNIFY mode. Clear MAGNIFY mode: Press MAGNIFY  button. MAGNIFY is cleared by running or setting AUTO, ASPECT, INPUT SELECT or VIDEO, or by changing the input signal.
FREEZE	Set/Clear FREEZE mode: Press FREEZE button. The  icon is displayed, and the image frozen, in the FREEZE mode. - FREEZE is cleared by running or setting POSITION, VOLUME, MUTE, Auto Adjust, BLANK ON/OFF, or MENU ON/OFF, or by changing the input signal. - Do not forget to clear frozen static images.

Table 2. Basic Operation (continued)

Item	Description
VOLUME	Volume adjustment : Reduce VOLUME ☺ ↔ Increase VOLUME ☻
MUTE *	Set/Clear Mute mode: Press the MUTE Ⓜ button. No sound is heard in the MUTE mode.
AUTO	Automatic adjustment at RGB input: Press the AUTO button. Horizontal position(H.POSIT), vertical position (V.POSIT),clock phase (H.PHASE), and horizontal size(H.SIZE) are automatically adjusted. Use with the window at maximum size in the application display. Automatic adjustment at VIDEO/S-VIDEO input: Press the AUTO button. A signal type appropriate for the input signal is selected automatically. Valid only when AUTO is set for VIDEO on the menu. • This operation requires approximately ten seconds. It may not function correctly with some input signals.
TIMER ON/OFF	Timer start/stop: Press the TIMER button. Count-down and display by the minute from the initial value (1~99) set in TIMER on the Options menu to 0. • The timer is not displayed in the BLANK MODE or FREEZE MODE.
BLANK ON/OFF	Set/Clear Blank mode: Press the BLANK button. No image is displayed in the Blank mode. The screen color is as set in BLANK on the Image menu.
MENU ON/OFF *	Menu display start/stop: Press the MENU button. • The menu display is terminated automatically after approximately ten seconds of inactivity.
MENU SELECT	Select menu type: Press the MENU SELECT button. Allows the user to select the normal menu or the single menu. Only the selected item is displayed on the single menu, and other items are displayed with the ⬆ and ⬇ buttons as with the normal menu. • Valid only when the Setup menu is used. Push the MENU SELECT button after selecting items such as "BRIGHTNESS". • MENU SELECT button may operate as the mouse control button. Refer to P.4. Normal menu  (MENU SELECT) ↔ Single menu 

OPERATIONS (continued)

Setup Menu

The following adjustments and settings are possible when SETUP is selected at the top of the menu. Part of the Setup menu differs between RGB input and VIDEO/S-VIDEO input. Select an item with the Δ and ∇ buttons, and start operation. Use the Single menu to reduce menu size (see Table 2, MENU SELECT).

RGB

VIDEO/S-VIDEO

Table 3. Setup Menu

Item	Description	RGB	VIDEO S-VIDEO
BRIGHT	Adjustment: Dark $\Leftarrow$ $\leftrightarrow$ Light $\Rightarrow$	✓	✓
CONTRAST	Adjustment: Weak $\Leftarrow$ $\leftrightarrow$ Strong $\Rightarrow$	✓	✓
V POSIT	Adjustment: Down $\Leftarrow$ $\leftrightarrow$ Up $\Rightarrow$	✓	-
H POSIT	Adjustment: Left $\Leftarrow$ $\leftrightarrow$ Right $\Rightarrow$	✓	-
H PHASE	Adjustment: Left $\Leftarrow$ $\leftrightarrow$ Right $\Rightarrow$ • Adjust to eliminate flicker.	✓	-
H SIZE	Adjustment: Small $\Leftarrow$ $\leftrightarrow$ Large $\Rightarrow$ • The image may not be displayed correctly if the horizontal size is excessive. In such cases, press the RESET $\Rightarrow$ button, and initialize the horizontal size.	✓	-
SHARPNESS	Adjustment: Soft $\Leftarrow$ $\leftrightarrow$ Clear $\Rightarrow$	-	✓
COLOR	Adjustment: Light $\Leftarrow$ $\leftrightarrow$ Dark $\Rightarrow$	-	✓
TINT	Adjustment: Red $\Leftarrow$ $\leftrightarrow$ Green $\Rightarrow$ • Valid only when NTSC or NTSC 4.43 signal is received.	-	✓
COLOR BAL R	Adjustment: Light $\Leftarrow$ $\leftrightarrow$ Dark $\Rightarrow$	✓	✓
COLOR BAL B	Adjustment: Light $\Leftarrow$ $\leftrightarrow$ Dark $\Rightarrow$	✓	✓
ASPECT	Select image aspect ratio: 4:3[] $\Leftarrow$ $\leftrightarrow$ $\Rightarrow$ 16:9[] Select position of image: Press ∇ button while 16:9[] is selected. Center $\rightarrow$ ∇ Down $\rightarrow$ ∇ Up ($\rightarrow$ Center ∇)	✓	-
	Select image aspect ratio: 4:3[] $\Leftarrow$ $\leftrightarrow$ $\Rightarrow$ 16:9[] $\Leftarrow$ $\leftrightarrow$ $\Rightarrow$ 4:3 small[] Select position of image: Press ∇ button while 16:9[]/4:3 small[] is selected. Center $\rightarrow$ ∇ Down $\rightarrow$ ∇ Up ($\rightarrow$ Center ∇) • 4:3 small may not be displayed correctly with some input signals.	-	✓

Input Menu

The following functions are available when INPUT is selected on the menu. Select an item with the  and  buttons, and start or stop operation with the  and  buttons.

Table 4. Input Menu

Item	Description
RGB	Displays RGB input frequency: Displays the horizontal and vertical sync signal frequency for RGB input. • Valid only at RGB input.
VIDEO	Select video signal type: Select the signal type with the  and  buttons. Select NTSC, PAL, SECAM, NTSC4.43, M-PAL, or N-PAL as appropriate for the input signal. Auto Adjust is valid at VIDEO/S-VIDEO input when AUTO is selected, and is then used for automatic selection of the signal type. • Use this function when the image becomes unstable (eg. the image becomes irregular, or lacks color). • Auto Adjust requires approximately ten seconds. It may not function correctly with some input signals. Pressing the AUTO button in this case may correct this problem.
AUTO	Automatic adjustment at RGB input: Select EXECUTE with the  button. Horizontal position, vertical position, clock phase, and horizontal size are automatically adjusted when EXECUTE is selected. Use with the window at maximum size in the application display. Automatic adjustment at VIDEO/S-VIDEO input: Select EXECUTE with the  button. A signal type appropriate for the input signal is selected automatically when EXECUTE is selected. Valid only if AUTO is selected in VIDEO (see above). • This operation requires approximately ten seconds. It may not function correctly with some input signals. Pressing the AUTO button in this case may correct this problem. • This function is the same as for Auto Adjust in Basic operation.

Image Menu

The following adjustments and settings are available when IMAGE is selected on the menu. Select an item with the ▲ and ▼ buttons, and start operation.

Table 5. Image Menu

Item	Description
KEYSTONE	Adjustment: Reduce size of bottom of image ◀ ↔ Reduce size of top of image ▶ • When this function is activated, the image may not be displayed correctly with some input signals.
BLANK	Select blank screen color: Select color with the ◀ and ▶ buttons. • The image is cleared when the BLANK mode is set with BLANK ON, or when there is no signal, and the entire screen is displayed in the selected color.
MIRROR	Operation start/stop: Press the ▶ or ◀ button. Select Mirror status: Select mirror status with ▲ and ▼ buttons.
START UP	Operation start/stop: Press the ▶ or ◀ button. Setup initial screen display: Select TURN ON with the ▲ button. Clear initial screen display: Select TURN OFF with the ▼ button. • Note that if TURN OFF is selected the blank screen is displayed in blue when there is no signal.

Options Menu

The following adjustments and settings are available when OPT. is selected on the menu. Select an item with the ▲ and ▼ buttons, and start operation.

Table 6. Options Menu

Item	Description
VOLUME	Volume adjustment: Reduce VOLUME ◀ ↔ Increase VOLUME ▶
MENU COLOR	Select menu background color: Select with the ▶ and ◀ buttons.
TIMER	Operation start/stop: Press the ▶ or ◀ button. Setup initial timer value: Set 1~99 minutes with the ▲ and ▼ buttons.
LANGUAGE	Operation start/stop: Press the ▶ or ◀ button. Select menu display language: Select with the ▲ and ▼ buttons.
AUTO OFF	Operation start/stop: Press the ▶ or ◀ button. Set AUTO OFF: Set 1~99 minutes with the ▲ and ▼ buttons. The system automatically enters the standby mode when a signal is not received for the set time. Clear AUTO OFF: Select STOP (0 min.) with the ▼ button. When STOP is selected the system does not enter the standby mode even if no signal is received.
SYNC ON G	Operation start/stop: Press the ▶ or ◀ button. SYNC ON G valid: Select TURN ON with the ▲ button. SYNC ON G invalid: Select TURN OFF with the ▼ button. • May not be displayed correctly with some input signals when SYNC ON G is valid. In such cases, remove the signal connector so that no signal is received, set SYNC ON G to invalid, and reconnect the signal.

No Signal Menu

The same adjustments and settings are available as with the Image and Options menus when the MENU button is pressed during display of the “NO INPUT IS DETECTED ON ***” or “SYNC IS OUT OF RANGE ON ***” message while no signal is received.

Table 7. No Signal Menu

Item	Description
VOLUME	Volume adjustment: Reduce VOLUME ◀ ↔ Increase VOLUME ▶
KEYSTONE	Adjustment: Reduce size of bottom of image ◀ ↔ Reduce size of top of image ▶
BLANK	Select blank screen color: Select color with the ◀ and ▶ buttons. • When the blank mode is set with BLANK ON, by absence of a signal, or by input of a non-standard signal, the image is cleared and the complete screen is displayed in the selected colour.
MIRROR	Operation start/stop: Press the ▶ or ◀ button. Select Mirror status: Select mirror status with ▲ and ▼ buttons.
START UP	Operation start/stop: Press the ▶ or ◀ button. Setup initial screen display: Select TURN ON with the ▲ button. Clear initial screen display: Select TURN OFF with the ▼ button. • Note that if TURN OFF is selected the blank screen is displayed in blue when there is no signal.
MENU COLOR	Select menu background color: Select with the ▶ and ◀ buttons.
TIMER	Operation start/stop: Press the ▶ or ◀ button. Setup initial timer value: Set 1~99 minutes with the ▲ and ▼ buttons.
LANGUAGE	Operation start/stop: Press the ▶ or ◀ button. Select menu display language: Select with the ▲ and ▼ buttons.
AUTO OFF	Operation start/stop: Press the ▶ or ◀ button. Set AUTO OFF: Set 1~99 minutes with the ▲ and ▼ buttons. The system automatically enters the standby mode when a signal is not received for the set time. Clear AUTO OFF: Select STOP (0 min.) with the ▼ button. When STOP is selected the system does not enter the standby mode even if no signal is received.
SYNC ON G	Operation start/stop: Press the ▶ or ◀ button. SYNC ON G valid: Select TURN ON with the ▲ button. SYNC ON G invalid: Select TURN OFF with the ▼ button. • May not be displayed correctly with some input signals when SYNC ON G is valid. In such cases, remove the signal connector so that no signal is received, set SYNC ON G to invalid, and reconnect the signal.

Lamp

**HIGH VOLTAGE
HIGH TEMPERATURE
HIGH PRESSURE**

Contact your dealer before replacing the lamp.

(Option lamp: DT00331)

Before replacing the lamp, switch power OFF, remove the power cord from the power outlet, and wait approximately 45 minutes until the lamp has cooled. The lamp may explode if handled at high temperatures.

WARNING

- For disposal of used lamp, treat according to the instruction of community authorities.
- Since the lamp is made of glass, do not apply shock to it and do not scratch it.
- Also, do not use old lamp. This could also cause explosion of the lamp.
- If it is probable that the lamp has exploded (explosive sound is heard), disconnect the power plug from the power outlet and ask your dealer to replace lamp.
The lamp is covered by front glass, but, in rare cases, the reflector and the inside of the projector may be damaged by scattered broken pieces of glass, and broken pieces could cause injury when being handled.
- Do not use the projector with the lamp cover removed.

Lamp Life

Projector lamps have a finite life. The image will become darker, and hues will become weaker, after a lamp has been used for a long period of time.

Replace the lamp if the LAMP indicator is red, or the CHANGE THE LAMP message (see P.20 Table 8) appears when the projector is switched ON.

NOTE:

The LAMP indicator is also red when the lamp unit reaches high temperature. Before replacing the lamp, switch power OFF, wait approximately 20 minutes, and switch power ON again. If the LAMP indicator is still red, replace the lamp.

MAINTENANCE (continued)

Replacing the Lamp

1. Switch the projector OFF, remove the power cord from the power outlet, and wait at least 45 minutes for the unit to cool.
2. Prepare a new lamp.
3. Check that the projector has cooled sufficiently, and gently turn it upside down.
4. Loosen the two screws as shown in the diagram, and remove the lamp cover.
5. Loosen the three screws, and gently remove the lamp while holding the grips. Touching the inside of the lamp case may result in uneven coloring.
6. Install the new lamp and tighten the three screws firmly. Also steadily push the opposite side of the screwed lamp into the unit.
7. Replace the lamp cover in position and tighten the two screws firmly.
8. Gently turn the projector right-side up.

CAUTION

- Ensure that screws are tightened properly. Screws not tightened fully may result in injury or accidents.
- Do not use the projector with the lamp cover removed.

Resetting the Lamp Timer

Reset the lamp timer after replacing the lamp. When the lamp has been replaced after the LAMP indicator is red, or the CHANGE THE LAMP message is displayed, complete the following operation within ten minutes of switching power ON. The power will be turned off automatically in over 10 minutes.

1. Switch power ON, and press the TIMER button on the remote control transmitter, or the RESET  button on the control panel, for approximately three seconds. The 'LAMP xxxx hr' message will appear on the lamp timer on the bottom of the screen.
2. Press the MENU button on the remote control transmitter, or the RESET button on the control panel, while the lamp timer is displayed. The 'LAMP xxxx  → 0  CANCEL' message will then appear.
3. Press the  and select 0, and wait until the timer display is cleared.

NOTE:

Do not reset the lamp timer without replacing the lamp. Reset the lamp timer always when replacing the lamp. The message functions will not operate properly if the lamp timer is not reset correctly.

Air Filter Maintenance

The air filter should be cleaned as described below at intervals of approximately 100 hours.

1. Switch the projector power supply OFF, and remove the power cord from the power outlet.
2. Clean the air filter with a vacuum cleaner.

CAUTION

- Switch power OFF and remove the power cord from the power outlet before beginning maintenance work. Please read the separate “SAFETY INSTRUCTIONS” thoroughly to ensure that maintenance is performed correctly.
- Replace the air filter if contamination cannot be removed, or if it is damaged. Contact your dealer in such case.(Option Air filter : MU01421)
- Do not use the equipment with the air filter removed.
- When the air filter is clogged with dust etc. the CHECK AIR FLOW message appears on the screen and the power supply is switched OFF automatically to prevent the temperature rising inside the projector.

Other Maintenance

Maintenance Inside the Equipment

For safety reasons, ensure that the equipment is cleaned and checked by the dealer once every two years. Maintaining the equipment by yourself is dangerous.

Cleaning the Lens

Gently wipe the lens with lens cleaning paper. Do not touch the lens with your hands.

Cleaning the Cabinet and Remote control transmitter

Gently wipe with a soft cloth. If dirt and stains etc. are not easily removed, use a soft cloth dampened with water, or water and a neutral detergent, and wipe dry with a soft, dry cloth.

CAUTION

- Switch power OFF and remove the power cord from the power outlet before beginning maintenance work. Please read the separate “SAFETY INSTRUCTIONS” thoroughly to ensure that maintenance is performed correctly.
- Do not use detergents or chemicals other than those noted above (e.g. benzene or thinners).
- Do not use cleaning sprays.
- Do not rub with hard materials, or tap the equipment.

TROUBLESHOOTING

OSD Message

The messages as described below may appear on the screen at power ON. Take the appropriate measures when such a message appears.

Table 8. OSD Messages

Message	Contents
CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME. *1)	The message shown at left appears after the lamp has been used for more than 1700 hours. The lamp is approaching the end of its life. Power is switched OFF automatically when the lamp reaches the end of its life. Prepare a new lamp for installation. Always reset the lamp timer after replacing the lamp.
CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME. THE POWER WILL TURN OFF AFTER ** hr. *1)	The lamp will reach the end of its life in ** hours. Power will be switched OFF automatically in ** hours. Replace the lamp as shown in P.17 “Lamp”. Always reset the lamp timer after replacing the lamp.
CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME. THE POWER WILL TURN OFF AFTER 0 hr.	The lamp has reached the end of its life. Power will be switched OFF in a few minutes. Switch power OFF immediately and replace the lamp as shown in P.17 “Lamp”. Always reset the lamp timer after replacing the lamp.
NO INPUT IS DETECTED ON ***	No input signal found. Check signal input connections and signal sources.
SYNC IS OUT OF RANGE ON ***	The horizontal or vertical frequency of the input signal is not within the specified range. Check the specifications of the equipment and the signal source.
CHECK THE AIR FLOW	The internal temperature has risen. Switch power OFF, and wait 20 minutes until the equipment cools. Check the following and Switch power ON again. • Are the ventilation openings blocked? • Is the air filter dirty? • Is the ambient temperature in excess of 35°C?

*1) This message is cleared automatically after approximately three minutes, and appears every time power is switched ON.

Indicators Message

The POWER indicator, LAMP indicator, and TEMP indicator are lit and blank as follows. Take the appropriate measures.

Table 9. Indicators Message

POWER indicator	LAMP indicator	TEMP indicator	Contents
Lights orange	Turns off	Turns off	The Standby mode has been set.
Blinks green	Turns off	Turns off	Warming up. Please wait.
Lights green	Turns off	Turns off	ON. Normal operation possible.
Blinks orange	Turns off	Turns off	Cooling. Please wait.
Lights red	Lights red	Turns off	Lamp is not lit. The interior of the equipment may be too hot. Switch power OFF, wait 20 minutes until the equipment cools, and Switch power ON again. Replace the lamp if the same problem occurs.
Lights red	Blinks red	Turns off	Lamp or lamp cover is not found, or hasn't been fitted in correctly. Switch power OFF, and wait for 45 minutes until the equipment cools. Check fitting of the lamp and lamp cover, and switch power ON again. Contact your dealer if the same problem occurs again.
Lights red	Turns off	Blinks red	The cooling fan is not operating. Switch power OFF, and wait for 20 minutes until the equipment cools. Check for foreign matters in the fan, and switch power ON again. Contact your dealer if the same problem occurs again.
Lights red	Turns off	Lights red	The interior of the equipment is too hot. *1) Switch power OFF, and wait for 20 minutes until the equipment cools. Check whether the ventilation openings are blocked, whether the air filter is dirty, or whether the ambient temperature exceeds 35 °C. Then switch power ON again. Contact your dealer if the same problem occurs again.

*1) When the internal temperature becomes excessive power is switched OFF automatically for safety reasons, and the indicator is extinguished. Set the power switch to [O] and wait for 20 minutes until the equipment has cooled sufficiently.

TROUBLESHOOTING (continued)

Symptom

Before requesting repair, check in accordance with the following chart. If the situation cannot be corrected, then contact your dealer.

Table 10. Symptom

Symptom	Possible cause	Remedy	Page
The power is not turned on.	The main power switch is not turned on.	Turn on the main power switch.	8,9
	The power cord is disconnected.	Plug the power cord into an AC power outlet.	
No video or audio.	The input is not correctly set.	Use the projector or remote control transmitter to set.	10
	No signal input.	Connect correctly.	7,8
Video is present but no audio.	The projector is not correctly connected.	Connect correctly.	7,8
	The volume is set to minimum.	Press VOLUME  on the remote control or display the menu screen and adjust the volume.	11,15
	Mute is turned on.	Press the MUTE  button.	11
Audio is present but no video.	The projector is not correctly connected.	Connect correctly.	7,8
	The brightness adjustment knob is rotated fully clockwise.	Select BRIGHT with the MENU button and the press the  button.	12
	The slide lens door is still closed.	Open the slide lens door.	9
Colors are pale and color matching is poor.	Color density and color matching are not correctly adjusted.	Adjust the video.	12
Images are dark.	Brightness and contrast are not correctly adjusted.	Adjust the video.	12
	The lamp is nearing the end of its service life.	Replace with a new lamp.	17
Video is blurred.	Focus or H PHASE is out of adjustment.	Adjust the focus or H PHASE.	9,12

SPECIFICATIONS

NOTE : This specifications are subject to change without notice.

Table 11. Specifications

ENGLISH

Item		Specification
Product name		Liquid crystal projector
Liquid crystal panel	Panel size	2.3 cm (0.9 type)
	Drive system	TFT active matrix
	Pixels	480,000 pixels (800 horizontal x 600 vertical)
Lens		Zoom lens F=1.7 ~ 2.0 f=37.5 ~ 45.1 mm
Lamp		160 W UHB
Speaker		1.0 W + 1.0W (Stereo)
Power supply		AC100 ~ 120V, 2.8A / AC220 ~ 240V, 1.2A
Power consumption		250W
Temperature range		0 ~ 35°C (Operating)
Size		298 (W) x 94.6 (H) x 228 (D) mm
Weight (mass)		3.25 kg
RGB signal input	RGB IN 1/2	Video: Analog 0.7Vp-p, 75Ω terminator (positive) H/V. sync.: TTL level (positive/negative) Composite sync.: TTL level D-sub 15-pin shrink jack
	AUDIO IN 1/2	200mVrms, 50 kΩ (max. 3.0Vp-p) Stereo mini jack
Video signal input	VIDEO IN	1.0Vp-p, 75Ω terminator RCA jack
	S-VIDEO IN	Brightness signal: 1.0Vp-p, 75Ω terminator Color signal: 0.286Vp-p (burst signal), 75Ω terminator Mini DIN 4-pin jack
	AUDIO IN R/L	200mVrms, 50 kΩ (max. 3.0Vp-p) RCA jack
Signal output	RGB OUT	Video: Analog 0.7Vp-p, 75Ω output impedance (positive) H/V. sync.: TTL level (positive/negative) Composite sync.: TTL level D-sub 15-pin shrink jack
	AUDIO OUT	200mVrms, output impedance 1 kΩ (max. 3.0Vp-p) Stereo mini jack
Control functions	CONTROL	D-sub 15-pin shrink plug
	USB	USB jack (B type)

WARRANTY AND AFTER-SERVICE

If a problem occurs with the equipment, first refer to the P.20 “TROUBLESHOOTING” section and run through the suggested checks. If this does not resolve the problem contact your dealer or service company. If repairs are possible, and desirable, they will be charged.

Dimension Diagram

RGB Signal Pin Assignment

Pin No	Signal	Pin No	Signal
1	Video input Red	11	-
2	Video input Green	12	RGB IN 1: SDA(DDC)
3	Video input Blue		RGB IN 2: -
4	-		RGB OUT: -

1024 × 768	68.7	85.0	VESA	XGA (85Hz)	Zoom out
1280 × 1024	64.0	60.0	VESA	SXGA (60Hz)	Zoom out *

NOTE:

- Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
- Be sure to check jack type, signal level, timing and resolution before connecting this projector to a computer.
- Depending on the input signal, full-size display may not be possible in some cases. Refer to the number of display pixels above.

* It becomes the simple display of thinning out data.

Initial set signals

The following signals are used for the initial settings.
The signal timing of some computer models may be different. In such case, refer to adjust the V.POSIT and H.POSIT of the menu.

Computer / Signal	Horizontal signal timing (μs)			
	a	b	c	d
TEXT	2.0	3.0	20.3	1.0
VGA (60Hz)	3.8	1.9	25.4	0.6
Mac 13"mode	2.1	3.2	21.2	2.1
VGA (72Hz)	1.3	3.8	20.3	1.0

Connection to the Mouse Control

1. PS/2, ADB or Serial Mouse

- (1) Turn off the projector and computer, and connect the two units with the appropriate cable. For PS/2 mouse control (for IBM and compatible), use the enclosed mouse cable. For others, consult your dealer.
- (2) Disconnect the USB cable from the projector if it is connected. Then turn on the projector.
- (3) Turn on the computer.
- (4) Start the mouse function. If the mouse has not been started, reboot the computer (soft reboot or reboot buttons). Refer to the descriptions of “DISC PAD” and “MOUSE/RIGHT button” of page 4.

2. USB Mouse

- (1) Connect the projector and computer with a suitable commercially available USB cable. Consult your dealer to get the cable, if you need.
- (2) Start the mouse function. Refer to the descriptions of “DISC PAD” and “MOUSE/RIGHT button” of page 4.

NOTE:

- Before connecting, read the instruction manuals of the devices to be connected.
- In the case of notebook type computers with an internal pointing device, the mouse control function will not work unless the internal pointing device is disabled. In such case, disable the internal pointing device and change the BIOS setting to select an external mouse before the operations described in (1) to (5) above.

Also, some computers may not have a utility program to operate a mouse.
Refer to the computer hardware manual for detail.

PS/2 Mouse

ADB Mouse

Serial Mouse

USB Mouse

RS-232C communication

- (1) Turn off the projector and computer power supplies and connect with the RS-232C cable.
- (2) Turn on the computer power supply and, after the computer has started up, turn on the projector power supply.

Communications setting

19200bps, 8N1

1 Protocol

Consist of header (7 bytes) + command data (6 bytes).

2 Header

BE + EF + 03 + 06 + 00 + CRC_low + CRC_high
CRC_low : Lower byte of CRC flag for command data.
CRC_high : Upper byte of CRC flag for command data.

3 Command data

Command data chart

byte_0	byte_1	byte_2	byte_3	byte_4	byte_5
Action		Type		Setting code	
low	high	low	high	low	high

Action (byte_0 - 1)

Action	Classification	Content
1	SET	Change setting to desired value.
2	GET	Read projector internal setup value.
4	INCREMENT	Increment setup value by 1.
5	DECREMENT	Decrement setup value by 1.
6	EXECUTE	Run a command.

Requesting projector status (Get command)

- (1) Send the request code Header + Command data ('02H'+ '00H' + type (2 bytes) + '00H' + '00H') from the computer to the projector.
- (2) The projector returns the response code '1DH' + data (2 bytes) to the computer.

Changing the projector settings (Set command)

- (1) Send the setting code Header + Command data ('01H'+ '00H' + type (2 bytes) + setting code (2 bytes)) from the computer to the projector.
- (2) The projector changes the setting based on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

Using the projector default settings (Reset Command)

- (1) The computer sends the default setting code Header + Command data ('06H'+ '00H' + type (2 bytes) + '00H' + '00H') to the projector.
- (2) The projector changes the specified setting to the default value.
- (3) The projector returns the response code '06H' to the computer.

Increasing the projector setting value (Increment command)

- (1) The computer sends the increment code Header + Command data ('04H'+ '00H' + type (2 bytes) + '00H' + '00H') to the projector.
- (2) The projector increases the setting value on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

Decreasing the projector setting value (Decrement command)

- (1) The computer sends the decrement code Header + Command data ('05H'+ '00H' + type (2 bytes) + '00H' + '00H') to the projector.
- (2) The projector decreases the setting value on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

When a command sent by the projector cannot be understood by the computer

When the command sent by the projector cannot be understood, the error command '15H' is returned by the computer. Some times, the projector ignores RS-232C commands during other works. If the error command '15H' is returned, please send the same command again.

When data sent by the projector cannot be practice

When the command sent by the projector cannot be practiced, the the error code '1cH' + 'xxxxH' is returned.

When the data length is greater than indicated by the data length code, the projector will ignore the excess data code.

Conversely, when the data length is shorter than indicated by the data length code, an error code will be returned to the projector.

NOTE:

- Operation cannot be guaranteed when the projector receives an undefined command or data.
- Provide an interval of at least 40ms between the response code and any other code.
- The projector outputs test data when the power supply is switched ON, and when the lamp is lit. Ignore this data.
- Commands are not accepted during warm-up.

REGULATORY NOTICES

FCC Statement Warning

WARNING: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

INSTRUCTIONS TO USERS: This equipment complies with the requirements of FCC (Federal Communication Commission) equipment provided that the following conditions are met.

The cables (Power cord, RGB cable and other cables) may have to be used with the core set to the projector side. Use the cables which are included with the projector or specified.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For the Customers in CANADA

NOTICE: This Class B digital apparatus complies with Canadian ICES-003.

Pour les utilisateurs au Canada

AVIS: Cet appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada.

LEGAL INFORMATION

FIVE-YEAR LIMITED WARRANTY

This Dukane LCD projector is warranted to the original purchaser for a period of five (5) years from the original purchase date - in normal use and service - against defects in material and workmanship. DUKANE CORPORATION EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

During the warranty period, Dukane Corporation will repair or replace (at the manufacturer's option) any such defective parts (except for the lamp, which is subject to whatever warranties the manufacturer may provide) without charge to the purchaser for parts or labor when the product is returned, prepaid and insured, with proof-of-purchase date. This remedy is void if the product has been damaged by accident, unreasonable use, neglect, improper service or other causes not arising out of defects in material or workmanship.

Dukane Corporation disclaims all liability for incidental or consequential damage of any kind, including all damages arising out of any interruptions in operation of the product and all damages to software.

No person, firm, or representative is authorized to assume any obligation or to make any warranty on behalf of the Dukane Corporation other than as stated above.

**THIS LIMITED WARRANTY IS VALID FOR U.S.A AND CANADA.
FOR OTHER LOCATIONS, LOCAL WARRANTIES APPLY.**

LAMP REPLACEMENT SERVICE & REPAIR POLICY & PROCEDURE

For service and parts, contact the Dukane AV Service Department at 1 (800) 676-2487 within the USA or 1 (630) 584-2300 worldwide. If you would like to send a facsimile (FAX), dial 1 (630) 584-5156 worldwide.

When requesting warranty service, please have the sales receipt available along with the model name and serial number.

If it becomes necessary to return the projector, use the original packing material and box (if retained) or pack securely. Dukane Corporation will not be liable for any pick-up or delivery charges or any expenses incurred for service calls or service supplied by anyone other than the Dukane AV Service Department.
