HITACHI
Liquid Crystal Projector
CP-S370W

USER'S MANUAL
Please read this user's manual thoroughly to ensure correct usage through understanding.

BEDIENUNGSANLEITUNG
Bitte lesen Sie diese Bedienungsanleitung zugunsten der korrekten Bedienung aufmerksam.

MANUEL D'UTILISATION
Nous vous recommandons de lire attentivement ce manuel pour bien assimiler le fonctionnement de l'appareil.

MANUALE D'ISTRUZIONI
Vi preghiamo voler leggere attentamente il manuale d'istruzioni in modo tale da poter comprendere quanto riportato ai fini di un corretto utilizzo del proiettore.

MANUAL DE USUARIO
Lea cuidadosamente este manual del usuario para poder utilizar correctamente el producto.

GEBRUIKSAANWIJZING
Lees voor het gebruik alstublieft deze handleiding aandachtig door, om volledig profijt te hebben van de uitgebreide mogelijkheden.

BRUKERHÅNDBOK
Vennligst les denne bruksanvisningen grundig for å være garantert driftssikker bruk.

INSTRUÇÕES DO PROPRIETÁRIO
Para assegurar o uso correto do equipamento, por favor leia atentamente este manual do usuário.

TECHNICAL
REGULATORY NOTICES
Thank you for purchasing this liquid crystal projector.

WARNING • Please read the accompanying manual “SAFETY INSTRUCTIONS” and this “USER’S MANUAL” thoroughly to ensure correct usage through understanding. After reading, store this instruction manual in a safe place for future reference.

NOTE • The information in this manual is subject to change without notice.
• The manufacturer assumes no responsibility for any errors that may appear in this manual
• The reproduction, transmission or use of this document or contents is not permitted without express written authority.

For “TECHNICAL” and “REGULATORY NOTICE”, see the end of this manual.
FEATURES

This liquid crystal projector is used to project various computer signals as well as NTSC / PAL / SECAM video signals onto a screen. Little space is required for installation and large images can easily be realized.

Outstanding Brightness
The UHB lamp and high-efficiency optical system assure a high level of brightness.

Partial Magnification Function
Interesting parts of images can be magnified for closer viewing.

Distortion Correction Function
Distortion-free images are quickly available.

Extra-low Noise Function
Acoustic noise level from the unit can be reduced.

BEFORE USE

Contents of Package
Make sure all of the following items are included in the package. If anything is missing, please contact your dealer.

NOTE • Keep the original packing material for future reshipment.
Part Names

**Before Use (continued)**

**Part Names**

- **Control Panel (Refer to P.9 "OPERATIONS")**
  - **STANDBY/ON Button**
  - **KEYSTONE Button**
  - **Foot Adjuster Button**
  - **Filter Cover (Air Filter and Intake for the Cooling Fan)**
  - **Rear Foot Adjuster**

**REAR/RIGHT VIEW OF THE PROJECTOR**

- **Terminal Panel (Refer below)**

**TERMINAL PANEL**

- **S-VIDEO Terminal**
- **COMPONENT VIDEO Y Terminal**
- **Cb/Pb Terminal**
- **Cr/Pr Terminal**
- **VIDEO IN Terminal**
- **AUDIO IN R Terminal**
- **AUDIO IN L Terminal**
- **AUDIO IN 1 Terminal**
- **AUDIO IN 2 Terminal**
- **AUDIO OUT Terminal**
- **Remote Control Sensor**
- **RGB IN 1 Terminal**
- **RGB IN 2 Terminal**
- **CONTROL Terminal**
- **RGB OUT Terminal**
- **USB Terminal**

**FRONT/LEFT VIEW OF THE PROJECTOR**

- **Zoom Knob**
- **Focus Ring**
- **Remote Control Sensor**
- **Lens**
- **Lens Cap**
- **Ventilation Openings (Intake)**
- **Speaker**
- **Handle Hook**
- **Power Switch**
- **AC Inlet (to the Power Cord)**
- **Ventilation Openings (exhaust)**
- **Foot Adjuster**

---

**Notes:**
- Always refer to the "OPERATIONS" section for detailed instructions.
- Ensure all parts are correctly identified for easy assembly and operation.

---

**ENGLISH-3**
BEFORE USE (continued)

Part Names (continued)

These functions work when the mouse control function is activated. Remember, the POSITION, VOLUME, KEYSTONE, BLANK ON and MENU ON functions disable the mouse control function.

NOTE
• Keep the remote controller away from children and pets.
• Do not give the remote controller any physical impact. Take care not to drop.
• Do not place the heavy objects on the remote controller.
• Do not wet the remote controller or place it on any wet object.
• Do not place the remote controller close to the cooling fan of the projector.
• Do not disassemble the remote controller.
BEFORE USE (continued)

Loading the Battery

First Loading:
In original packing, the battery is installed in the battery holder of the remote controller with protection film (the transparent film some of which is inside the battery folder). Pull out the protection film to load the battery.

Replacing:
1. See the reverse side of the remote controller.
2. Pinch the groove and pull out battery holder as the drawing right.
3. Remove the worn battery.
4. Install the new battery with “+” side facing.
5. Push in and click the battery holder.

Loading the Battery

First Loading:
In original packing, the battery is installed in the battery holder of the remote controller with protection film (the transparent film some of which is inside the battery folder). Pull out the protection film to load the battery.

Replacing:
1. See the reverse side of the remote controller.
2. Pinch the groove and pull out battery holder as the drawing right.
3. Remove the worn battery.
4. Install the new battery with “+” side facing.
5. Push in and click the battery holder.

CAUTION • Incorrect handling of the battery could result in fire or personal injury. The battery may explode if not handled properly. Be careful in handling the battery according to instructions of accompanying manual "SAFETY INSTRUCTIONS" and this manual.
• Use the 3V micro lithium battery type no.CR2025 only.
• When loading the battery, make sure the plus and minus terminals are correctly oriented as indicated in the remote controller.
• When you dispose the battery, you should obey the law in the relative area or country.
• Keep the battery away from children and pets.
• When not to be used for an extended period, remove the battery from the remote controller.

NOTE Replace the batteries when remote control transmitter operation becomes difficult.

Fixing the Handle
Fix the enclosed handle if you need.
1. Raise up the handle hook, and pass one end of the handle through the hole of handle hook.
2. Buckle the end of the handle, as the right drawing.
3. Fix the other end of the handle to the other handle hook in the same way.

CAUTION • Make sure the handle is fixed before carrying the projector with the handle. If the projector should be dropped from the handle should be off, it could result in an injury, and continued use could result in fire or electrical shock. Do not flourish the projector with the handle.
Installation of the Projector and Screen

Refer to the drawing and table below for determining of the screen size and projection distance. The projection distances shown in the table below are for full size (800 x 600 dots).

a: Distance from the projector to the screen. (±10%)

Table 1. Installation Reference

</tbody>
</table>

Angle Adjustment

Use the foot adjusters on the bottom of the projector to adjust the projection angle. It is variable within 0˚ to 9˚ approximately.

1. Lift up the front side of the projector, and pressing the foot adjuster button, adjust the projection angle.
2. Release the button to lock at the desired angle.
3. Turn the rear foot adjuster to adjust the left-right slope. Do not force the foot adjuster screws. This could damage the adjusters or cause the lock to fail.

CAUTION • Do not release the foot adjuster button unless the projector is being held; otherwise, the projector could overturn or the fingers could get caught and cause personal injury.

ENGLISH-6
Cabling

Refer to the table below for connecting each terminal of the projector to each device.

</table>

⚠️ CAUTION • Incorrect connecting could result in fire or electrical shock. Please read this manual and the separate “SAFETY INSTRUCTIONS”.
• Before connecting, turn off to all devices to be connected, except for the USB cable.
• The cables may have to be used with the core set to the projector side. Use the cables which are included with the projector or specified.

NOTE • Before connecting, read instruction manuals of the devices to be connected, and make sure that the projector is compatible with the device.
• Secure the screws on the connectors and tighten.
• For some RGB input modes, the optional Mac adapter is necessary.
• Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
• Refer to the “TECHNICAL” section for the pin assignment of connectors and RS-232C communication data.
**INSTALLATION (continued)**

**Power Connection**
Use the correct one of the enclosed power cords depending on the power outlet to be used. Connect the AC inlet of the projector to the power outlet firmly by the power cord.

**CAUTION**
- Be careful in handling the power cord according to instructions of the accompanying manual "SAFETY INSTRUCTIONS" and this manual.
- Connect the power cord firmly. Avoid using a loose, unsound outlet or contact failure.

**Example of system setup**

- **DVD Player**
- **S-Video Tape Recorder**
- **Display Monitor**
- **Speaker with amplifier**
- **Computer (notebook type)**
- **Computer (desktop type)**

**NOTE**
- When connecting with notebook computer, set to validate the RGB external image output (setting CRT display or simultaneous display of LCD and CRT). Please read instruction manual of the notebook for more information.

**Plug & Play**
This projector is VESA DDC 1/2B compatible. Plug & play is possible by connecting to a computer that is VESA DDC (Display Data Channel) compatible. Please use this function by connecting the accessory RGB cable with RGB IN 1 terminal (DDC 1/2B compatible). Plug & play may not operate by other connecting.

**NOTE**
- Plug & play is a system configured with peripheral equipment including a computer and display, and an operating system.
- This projector is recognized as a plug & play monitor. Use the standard display drivers.
- Plug & play may not operate by the computer to connect. Use the RGB IN 2 terminal if plug & play does not operate correctly.
## OPERATIONS

### Power ON
1. Check that the power cord is connected correctly.
2. Set the power switch to [ ]. The standby mode is selected, and the POWER indicator is turned to orange.
3. Press the STANDBY/ON button on the control panel or the remote control transmitter. Warm-up begins and the POWER indicator blinks in green.
4. The POWER indicator ceases blinking and turns to green when power is on. Open the slide lens door.
5. Adjust picture size using the zoom knob.
6. Adjust focus using the focus ring.

### Power OFF
1. Press the STANDBY/ON button on the control panel or the remote controller. Then, the message "Power off?" will appear on the screen, and the message will disappear by any operation or no operation for 5 seconds. During this message indication, press the STANDBY/ON button again. The projector lamp is extinguished and lamp cooling begins. The POWER indicator blinks orange during lamp cooling. Pressing the STANDBY/ON button has no effect while the POWER indicator is blinking.
2. The system assumes the Standby mode when cooling is complete, and the POWER indicator ceases blinking and changes to orange. Check that the indicator is orange and set the power switch to [O].
3. The POWER indicator is extinguished when power is off. Do not forget to close the lens door.

---

**WARNING** • Please read this manual, and the separate “SAFETY INSTRUCTIONS” thoroughly before using the equipment. Always ensure that the equipment is used safely.

**NOTE** • Except in emergencies, follow the above-mentioned procedure for turning power off. Incorrect procedure will reduce the life of the projector lamp and LCD panel.
• To prevent any trouble, turn on/off the projector when the computer or video tape recorder is OFF. Providing a RS-232C cable is connected, turn on the computer before the projector.
• When a projector continues projecting the same image, the image may remain as an afterimage. Please do not project the image same for a long time.
**Basic Operation**

The basic operations shown in Table 3 is performed from the supplied remote control transmitter or the projector control panel. Items indicated by (*) may be used from the control panel.

**Table 3 . Basic Operation**

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| **INPUT SELECT** | **Select Input Signal** (*) : Press the INPUT button. RGB IN 1→RGB IN 2→ VIDEO IN → S-VIDEO IN → COMPONENT VIDEO (→ RGB IN 1)  
**Select RGB Input** : Press the RGB button. VIDEO IN / S-VIDEO IN / COMPONENT VIDEO → RGB IN 1 / RGB IN 2  
**RGB IN 1** → **RGB IN 2** (→ RGB IN 1)  
**Select Video Input** : Press the VIDEO button. RGB IN 1 / RGB IN 2 → VIDEO IN / S-VIDEO IN / COMPONENT VIDEO  
VIDEO IN → S-VIDEO IN → COMPONENT VIDEO (→ VIDEO IN)  
• The selected signal name is displayed for approximately 3 seconds when the input signal is changed. |
| **POSITION**  | **Set/Clear Position Adjustment Mode** : Press the POSITION button. The [ ] icon is displayed in the POSITION mode.  
**Image Position Adjustment** : Press the , , and buttons in the POSITION mode.  
• Valid only in the MAGNIFY mode with a video signal is input.  
• After approximately 10 seconds of inactivity the [ ] icon is extinguished and the POSITION mode is cleared automatically.  
• , , and buttons may operate as the mouse control button. Refer to page 4. |
| **RESET (*)** | **Initialise Each Item** : Select an item and press the RESET button. **Initialise Position Adjustment** : Press the RESET button and the POSITION mode. This function is valid only when RGB signal is input.  
• Valid except for the VOLUME, LANGUAGE and H PHASE.  
• The RESET button may operate as the mouse control button. Refer to page 4. |
| **MAGNIFY**   | **Set MAGNIFY Mode** : Press the MAGNIFY button. **Move Magnified Area** : Run the POSITION in the MAGNIFY mode. **Adjust Magnification** : Press the MAGNIFY / button in MAGNIFY mode.  
**Clear MAGNIFY Mode** : Press the MAGNIFY button.  
• The MAGNIFY mode is cleared by running or setting the AUTO, ASPECT, INPUT SELECT or VIDEO, or by changing the input signal. |
| **FREEZE**    | **Set/Clear FREEZE Mode** : Press the FREEZE button. The [ ] icon is displayed, and the image frozen, in the FREEZE mode.  
• The FREEZE mode is cleared by running or setting POSITION, VOLUME, MUTE, Automatic Adjustment, BLANK ON/OFF, or MENU ON/OFF, or by changing the input signal.  
• Do not forget to clear frozen static images. |

**NOTE** • Use the remote control transmitter at a distance of approximately 5m from the sensor on the front of the projector, and within a range of 30° left-right. Strong light and obstacles will interfere with operation of the remote control transmitter.
### OPERATIONS (continued)

Items indicated by (*) may be used from the control panel.

#### Table 3. Basic Operation (continued)

**Table 4. Setup Menu**

ENGLISH-12
**OPERATIONS (continued)**

**Input Menu**
The following functions are available when INPUT is selected on the menu. Select an item with the ▲ and ▼ buttons, and start or stop operation with the ◀ and ▶ buttons. The function indicated (**) are effective on video input mode only, not on RGB input mode.

Table 5. Input Menu

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| AUTO   | **Automatic Adjustment at RGB Input**: Select the EXECUTE with the ◀ button. Horizontal position (H.POSIT), vertical position (V.POSIT), clock phase (H.PHASE), and horizontal size (H.SIZE) are automatically adjusted. Use with the window at maximum size in the application display.  
**Automatic Adjustment at Video Input**: Select the EXECUTE with the ◀ button. A signal type appropriate for the input signal is selected automatically. Valid only when AUTO is set for VIDEO on the menu.  
• This operation requires approximately 10 seconds. It may not function correctly with some input signals. Pressing the AUTO button in this case may correct this problem.  
• This function is the same as for the AUTO function in Basic operation. |
| RGB    | **Displays RGB Input Frequency**: Displays the horizontal and vertical sync signal frequencies for RGB input.  
• Valid only at RGB input. |
| VIDEO  | **Select Video Signal Type**: Select the signal type with the ▲ and ▼ buttons. Select NTSC, PAL, SECAM, NTSC4.43, M-PAL, or N-PAL as appropriate for the input signal. The selection of AUTO enables and executes the function AUTO (Automatic Adjustment at Video Input), except for the N-PAL input.  
• Use this function when the image becomes unstable (eg. the image becomes irregular, or lacks color) at VIDEO/S-VIDEO input.  
• Automatic Adjustment requires approximately 10 seconds. It may not function correctly with some input signals. Pressing the AUTO button in this case may correct this problem except for the N-PAL input.  
• For the COMPONENT VIDEO input, this function is not effective and the signal type is distinguished automatically. |
| HDTV   | **Select HDTV mode**: Select the 1035i mode or 1080i mode suitable for the input signal with the ◀ / ▶ button.  
• When the selected HDTV mode is incompatible with the input signal, the image may be incorrect (eg. the display position or color is incorrect). |
**OPERATIONS (continued)**

### Image Menu

</thead>
<tbody>
<tr>
<td><strong>HIGH VOLTAGE</strong>&lt;br&gt;<strong>HIGH TEMPERATURE</strong>&lt;br&gt;<strong>HIGH PRESSURE</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Contact your dealer before replacing the lamp.  
For the optional lamp, see the item “Optional Parts” of the Table 12.  
Before replacing the lamp, switch power OFF, remove the power cord from the power outlet, and wait approximately 45 minutes until the lamp has cooled. The lamp may explode if handled at high temperatures.

### WARNING

- For disposal of used lamp, treat according to the instruction of community authorities.
- Since the lamp is made of glass, do not apply shock to it and do not scratch it.
- Also, do not use old lamp. This could also cause explosion of the lamp.
- Premature lamp failure MAY be caused by an electronic component in the projector and not necessarily the lamp. If unsure contact your local service center.
- If it is probable that the lamp has exploded (explosive sound is heard), disconnect the power plug from the power outlet and ask your dealer to replace lamp. The lamp is covered by front glass, but in rare cases, the reflector and the inside of the projector may be damaged by scattered broken pieces of glass, and broken pieces could cause injury when being handled.
- Do not use the projector with the lamp cover removed.

### Lamp Life

Projector lamps have a finite life. The image will become darker, and hues will become weaker, after a lamp has been used for a long period of time.

Replace the lamp if the LAMP indicator is red, or the CHANGE THE LAMP message appears when the projector is switched ON. See Table 9 of P.20 and Table 10 of P.21.

### NOTE

- The LAMP indicator is also red when the lamp unit reaches high temperature. Before replacing the lamp, switch power OFF, wait approximately 20 minutes, and switch power ON again. If the LAMP indicator is still red, replace the lamp.
MAINTENANCE (continued)

Replacing the Lamp

1. Switch the projector OFF, remove the power cord from the power outlet, and wait at least 45 minutes for the unit to cool.
2. Prepare a new lamp.
3. Check that the projector has cooled sufficiently, and gently turn it upside down.
4. Loosen the two screws as shown in the diagram, and remove the lamp cover.
5. Loosen the three screws, and gently remove the lamp while holding the grips. Touching the inside of the lamp case may result in uneven coloring.
6. Install the new lamp and tighten the three screws firmly. Also steadily push the opposite side of the screwed lamp into the unit.
7. Replace the lamp cover in position and tighten the two screws firmly.
8. Gently turn the projector right-side up.

CAUTION • Ensure that screws are tightened properly. Screws not tightened fully may result in injury or accidents.
• Do not use the projector with the lamp cover removed.

Resetting the Lamp Timer
Reset the lamp timer after replacing the lamp. When the lamp has been replaced after the LAMP indicator is red, or the CHANGE THE LAMP message is displayed, complete the following operation within ten minutes of switching power ON. The power will be turned off automatically in over 10 minutes.

1. Switch power ON, and press the RESET button, for approximately three seconds. The ‘LAMP xxxx hr’ message will appear on the lamp timer on the bottom of the screen.
2. Press the MENU button on the remote control transmitter, or the RESET button on the control panel, while the lamp timer is displayed. The ‘LAMP xxxx → 0 CANCEL’ message will then appear.
3. Press the ☀ and select 0, and wait until the timer display is cleared.

NOTE • Do not reset the lamp timer without replacing the lamp. Reset the lamp timer always when replacing the lamp. The message functions will not operate properly if the lamp timer is not reset correctly.
Air Filter
Cleaning the air Filter
The air filter should be cleaned as described below at intervals of approximately 100 hours.
1. Switch the projector power supply OFF, and remove the power cord from the power outlet.
2. Clean the air filter with a vacuum cleaner.

Replacing the Air Filter
Replace the air filter if contamination cannot be removed, or if it is damaged.
1. Remove the filter cover.
2. Remove the old filter.
3. Set the new filter and the filter cover.

CAUTION • Switch power OFF and remove the power cord from the power outlet before beginning maintenance work. Please read the separate “SAFETY INSTRUCTIONS” thoroughly to ensure that maintenance is performed correctly.
• Replace the air filter if contamination cannot be removed, or if it is damaged.
• Contact your dealer in such case. For the optional air filter, see the item “Option Parts” of the Table 12.
• Do not use the equipment with the air filter removed.
• When the air filter is clogged with dust etc. the power supply is switched OFF automatically to prevent the temperature rising inside the projector.

Other Maintenance
Maintenance Inside the Equipment
For safety reasons, ensure that the equipment is cleaned and checked by the dealer once every two years. Maintaining the equipment by yourself is dangerous.

Cleaning the Lens
Gently wipe the lens with lens cleaning paper. Do not touch the lens with your hands.

Cleaning the Cabinet and Remote control transmitter
Gently wipe with a soft cloth. If dirt and stains etc. are not easily removed, use a soft cloth dampened with water, or water and a neutral detergent, and wipe dry with a soft, dry cloth.

CAUTION • Switch power OFF and remove the power cord from the power outlet before beginning maintenance work. Please read the separate “SAFETY INSTRUCTIONS” thoroughly to ensure that maintenance is performed correctly.
• Do not use detergents or chemicals other than those noted above (e.g. benzene or thinners).
• Do not use cleaning sprays.
• Do not rub with hard materials, or tap the equipment.
# TROUBLESHOOTING

## OSD Message
The messages as described below may appear on the screen at power ON. Take the appropriate measures when such messages appears.

### Table 9. OSD Messages

<table>
<thead>
<tr>
<th>Message</th>
<th>Contents</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME.</td>
<td>The usage time of lamp will be reaching 2000 hr shortly. It is recommended to replace the lamp soon. Prepare a new lamp as a replacement. (*1)</td>
</tr>
<tr>
<td>CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME. THE POWER WILL TURN OFF AFTER ** hr.</td>
<td>The usage time of lamp will be reaching 2000 hr shortly. It is recommended to replace the lamp within ** hours. It might be happened that the lamp is cut off before ** hr by any chance. Power will be switched OFF automatically in ** hours. Replace the lamp as shown in P.17~18 “Lamp”. Always reset the lamp timer after replacing the lamp. (*1)</td>
</tr>
<tr>
<td>CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME. THE POWER WILL TURN OFF AFTER 0 hr.</td>
<td>The usage time of lamp is about to reach. Power will be switched OFF in a few minutes. Switch power OFF immediately and replace the lamp as shown in P.17~18 “Lamp”. Always reset the lamp timer after replacing the lamp.</td>
</tr>
<tr>
<td>NO INPUT IS DETECTED ON ***</td>
<td>No input signal found. Check signal input connections and signal sources.</td>
</tr>
<tr>
<td>SYNC IS OUT OF RANGE ON ***</td>
<td>The horizontal or vertical frequency of the input signal is not within the specified range. Check the specifications of the equipment and the signal source.</td>
</tr>
</tbody>
</table>

**NOTE**

(*1) This message is cleared automatically after approximately three minutes, and appears every time power is switched ON.

(*2) The unit has a function to turn the power off which will be active when the usage time reaches 2000 hr. However the life of lamp might be much different among lamps, so that it might be happened that a lamp is cut off before the function is active.
### TROUBLESHOOTING (continued)

#### Indicators Message
The POWER indicator, LAMP indicator, and TEMP indicator are lit and blank as follows. Take the appropriate measures.

**NOTE**
- Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
- Be sure to check jack type, signal level, timing and resolution before connecting this projector to a computer.
- Depending on the input signal, full-size display may not be possible in some cases. Refer to the number of display pixels above.
- The image may not be displayed correctly when the input sync. signal is "Composite Sync." or "Sync. on G".
Initial set signals

The following signals are used for the initial settings. The signal timing of some computer models may be different. In such case, refer to adjust the V.POSIT and H.POSIT of the menu.

Connection to the Mouse Control

1. PS/2, ADB or Serial Mouse

(1) Turn off the projector and computer, and connect the two units with the appropriate cable. For PS/2 mouse control (for IBM and compatible), use the enclosed mouse cable. For others, consult your dealer.

(2) Disconnect the USB cable from the projector if it is connected. Then turn on the projector.

(3) Turn on the computer.

(4) Start the mouse function. If the mouse has not been started, reboot the computer (soft reboot or reboot buttons). Refer to the descriptions of “DISC PAD” and “MOUSE/RIGHT button” of page 4.

2. USB Mouse

(1) Connect the projector and computer with a suitable commercially available USB cable. Consult your dealer to get the cable, if you need.

(2) Start the mouse function. Refer to the descriptions of “DISC PAD” and “MOUSE/RIGHT button” of page 4.

NOTE

• Before connecting, read the instruction manuals of the devices to be connected.

• In the case of notebook type computers with an internal pointing device, the mouse control function will not work unless the internal pointing device is disabled. In such case, disable the internal pointing device and change the BIOS setting to select an external mouse before the operations described in (1) to (4) above.

Also, some computers may not have a utility program to operate a mouse. Refer to the computer hardware manual for detail.

PS/2 Mouse

USB cable

USB jack (A type)
RS-232C communication

1) Turn off the projector and computer power supplies and connect with the RS-232C cable.
2) Turn on the computer power supply and, after the computer has started up, turn on the projector power supply.

Communications setting

19200bps, 8N1

1 Protocol
Consist of header (7 bytes) + command data (6 bytes).

2 Header
BE + EF + 03 + 06 + 00 + CRC_low + CRC_high
CRC_low : Lower byte of CRC flag for command data.
CRC_high : Upper byte of CRC flag for command data.

3 Command data

</tr>
</tbody>
</table>
Requesting projector status (Get command)
(1) Send the request code Header + Command data (‘02H’+‘00H’+ type (2 bytes) +’00H’+’00H’) from the computer to the projector.
(2) The projector returns the response code ‘1DH’+ data (2 bytes) to the computer.

Changing the projector settings (Set command)
(1) Send the setting code Header + Command data (‘01H’+‘00H’+ type (2 bytes) + setting code (2 bytes)) from the computer to the projector.
(2) The projector changes the setting based on the above setting code.
(3) The projector returns the response code ‘06H’ to the computer.

Using the projector default settings (Reset Command)
(1) The computer sends the default setting code Header + Command data (‘06H’+‘00H’+ type (2 bytes) +’00H’+’00H’) to the projector.
(2) The projector changes the specified setting to the default value.
(3) The projector returns the response code ‘06H’ to the computer.

Increasing the projector setting value (Increment command)
(1) The computer sends the increment code Header + Command data (‘04H’+‘00H’+ type (2 bytes) +’00H’+’00H’) to the projector.
(2) The projector increases the setting value on the above setting code.
(3) The projector returns the response code ‘06H’ to the computer.

Decreasing the projector setting value (Decrement command)
(1) The computer sends the decrement code Header + Command data (‘05H’+‘00H’+ type (2 bytes) +’00H’+’00H’) to the projector.
(2) The projector decreases the setting value on the above setting code.
(3) The projector returns the response code ‘06H’ to the computer.

When a command sent by the projector cannot be understood by the computer
When the command sent by the projector cannot be understood, the error command ‘15H’ is returned by the computer. Some times, the projector ignores RS-232C commands during other works. If the error command ‘15H’ is returned, please send the same command again.

When data sent by the projector cannot be practiced
When the command sent by the projector cannot be practiced, the the error code ‘1cH’+‘xxxxH’ is returned.
When the data length is greater than indicated by the data length code, the projector will ignore the excess data code.
Conversely, when the data length is shorter than indicated by the data length code, an error code will be returned to the projector.

NOTE
• Operation cannot be guaranteed when the projector receives an undefined command or data.
• Provide an interval of at least 40ms between the response code and any other code.
• The projector outputs test data when the power supply is switched ON, and when the lamp is lit. Ignore this data.
• Commands are not accepted during warm-up.

REGULATORY NOTICES

FCC Statement Warning

WARNING: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

INSTRUCTIONS TO USERS: This equipment complies with the requirements of FCC (Federal Communication Commission) equipment provided that the following conditions are met.
The cables may have to be used with the core set to the projector side. Use the cables which are included with the projector or specified.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

For the Customers in CANADA

NOTICE: This Class B digital apparatus complies with Canadian ICES-003.

Pour les utilisateurs au Canada

AVIS: Cet appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada.
