FEATURES

This liquid crystal projector is used to project various computer signals as well as NTSC / PAL / SECAM video signals onto a screen. Little space is required for installation and large images can easily be realized.

**Outstanding Brightness**
The UHB lamp and high-efficiency optical system assure a high level of brightness.

**Partial Magnification Function**
Interesting parts of images can be magnified for closer viewing.

**Distortion Correction Function**
Distortion-free images are quickly available.

**Extra-low Noise Function**
Acoustic noise level from the unit can be reduced.

BEFORE USE

**Contents of Package**
Make sure all of the following items are included in the package. If anything is missing, please contact your dealer.

**NOTE**
- Keep the original packing material for future reshipment.

- **Projector**
- **Power Cord** (US, UK, Europe)
- **S-Video Cable**
- **Stereo Mini-Cable**
- **VGA Cable**
- **Video/Audio Cable** (with white lead)
- **Component Video Cable** (with green lead)
- **Mouse Cable** (PS/2, Serial)
- **Batteries** for Remote Control Transmitter
- **Remote Control Transmitter**
- **Operator's Guide**
- **Product Safety Guide**
- **Warranty**
- **Quick Start Guide**

REMOTE CONTROL TRANSMITTER
(Refer to P.9 "OPERATIONS")

These functions work when the mouse control function is activated. Remember, the POSITION, BLANK ON and MENU ON functions disable the mouse control function.

WARNING • The laser pointer of the remote control transmitter is used in place of a finger or rod. Never look directly into the laser beam outlet or point the laser beam at other people. The laser beam can cause vision problems.

CAUTION • Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

NOTE • Keep the remote control transmitter away from children and pets.
• Do not give the remote control transmitter any physical impact. Take care not to drop.
• Do not place the heavy objects on the remote control transmitter.
• Do not wet the remote control transmitter or place it on any wet object.
• Do not place the remote control transmitter close to the cooling fan of the projector.
• Do not disassemble the remote control transmitter.
**Loading the Batteries**

Install the AA batteries into the remote control transmitter.

1. Remove the battery cover.
   - Push the knob while lifting up the battery cover.
2. Load the batteries.
   - Make sure the plus and minus poles are correctly oriented.
3. Close the battery cover.

**NOTE**

- Replace the batteries when remote control transmitter operation becomes difficult.

---

**CAUTION**

- Use only the specified batteries with this remote control transmitter. Also, do not mix new and old batteries. This could cause battery cracking or leakage, which could result in fire or personal injury.
- When loading the batteries, make sure the plus and minus terminals are correctly oriented as indicated in the remote control transmitter. Incorrect orientation could cause battery cracking or leakage, which could result in personal injury or pollution of the surrounding environment.
- When you dispose the battery, you should obey the law in the relative area or country.
- Keep the battery away from children and pets.
- When not to be used for an extended period, remove the batteries from the remote control transmitter.
Installation of the Projector and Screen

Refer to the drawing and table below for determining the screen size and projection distance.

The projection distances shown in the table below are for full size (1024 x 768 dots).

\[ \text{a: Distance from the projector to the screen. (±10%)} \]

</table>

CAUTION • Install the projector in a suitable environment according to instructions of the “Product Safety Guide” and this manual.

• When you attach this unit to a metal mount you must properly ground the fixture; otherwise, fire or electrical shock can result.

Connect the ground terminal of AC inlet of this unit with the ground terminal provided at the building using an optional three-core power-supply cord.

• Please basically use liquid crystal projector at the horizontal position. If you use liquid crystal projector by the lens up position, the lens down position and the side up position, this may cause the heat inside to build up and cause damage. Be especially careful not to install it with ventilation holes blocked.

• Do not install LCD projector in smoke effected environment. Smoke residue may buildup on critical parts (i.e. LCD panel, Lens Assy etc.).

Angle Adjustment

Use the foot adjusters on the bottom of the projector to adjust the projection angle. It is variable within 0° to 9° approximately.

1. Lift up the front side of the projector, and pressing the foot adjuster button, adjust the projection angle.
2. Release the button to lock at the desired angle.
3. Use the foot adjusters for fine adjustment. Do not force the adjuster screws. This could damage the adjusters or cause the lock to fail.

CAUTION • Do not release the foot adjuster button unless the projector is being held; otherwise, the projector could overturn or fingers could get caught and cause personal injury.
Cabling
Refer to the table below for connecting each terminal of the projector to a device.

</tbody>
</table>

**CAUTION**
- Incorrect connecting could result in fire or electrical shock.
- Please read this manual and the “Product Safety Guide”.
- Before connecting, turn off all devices to be connected. This is not needed for a USB device because USB is plug & play capable.
- The cables may have to be used with the core set to the projector side. Use the cables which are included with the projector or specified.

**NOTE**
- Before connecting, read instruction manuals of the devices to be connected, and make sure that the projector is compatible with the device.
- Secure the screws on the connectors and tighten.
- For some RGB input modes, the optional Mac adapter is necessary.
- To select the DVI input, the computer may need some settings. See the manuals of the computer for details.
- Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
- Refer to the “TECHNICAL” section for the pin assignment of connectors and RS-232C communication data.
- When the DVI terminal is used, the RGB OUT terminal may not function.
**Power Connection**

Use the correct power cord depending on the power outlet to be used. Connect the AC inlet of the projector to the power outlet firmly by the power cord.

**Example of System Setup**

**NOTE** • When connecting with a notebook computer, set the proper RGB external image output (setting CRT display or simultaneous display of LCD and CRT). Please read instruction manual of the notebook for more information.

**Plug & Play**

This projector is VESA DDC 1/2B compatible. Plug & play is possible by connecting to a computer that is VESA DDC (Display Data Channel) compatible. Please use this function by connecting the VGA cable with RGB IN 1 terminal (DDC 1/2B compatible), or by connecting a DVI cable with DVI terminal (DDC 2B compatible). Plug & play may not operate by other connections.

**NOTE** • Plug & play is a system configured with peripheral equipment including a computer, display and an operating system.
• This projector is recognized as a plug & play monitor. Use the standard display drivers.
• Plug & play may not operate by the computer to connect. Use the RGB IN 2 terminal if plug & play does not operate correctly.
OPERATIONS

Power ON
1. Check that the power cord is connected correctly.
2. Set the power switch to [ | ]. The standby mode is selected, and the POWER indicator is turned to orange.
3. Press the STANDBY/ON button on the control panel or the remote control transmitter. Warm-up begins and the POWER indicator blinks in green.
4. The POWER indicator ceases blinking and turns to green when power is on. Remove the lens cap.
5. Adjust picture size using the zoom knob.
6. Adjust focus using the focus ring.

Power OFF
1. Press the STANDBY/ON button on the control panel or the remote controller. Then, the message “Power off?” will appear on the screen, and the message will disappear by any operation or no operation for 5 seconds. During this message indication, press the STANDBY/ON button again. The projector lamp is extinguished and lamp cooling begins. The POWER indicator blinks orange during lamp cooling. Pressing the STANDBY/ON button has no effect while the POWER indicator is blinking.
2. The system assumes the Standby mode when cooling is complete, and the POWER indicator ceases blinking and changes to orange. Check that the indicator is orange and set the power switch to [O].
3. The POWER indicator is extinguished when power is off. Do not forget to attach the lens cap.

WARNING • Please read this manual, and the “Product Safety Guide” thoroughly before using the equipment. Always ensure that the equipment is used safely.

NOTE • Except in emergencies, follow the above-mentioned procedure for turning power off. Incorrect procedure will reduce the life of the projector lamp and LCD panel.
• To prevent any trouble, turn on/off the projector when the computer or video tape recorder is OFF. Providing a RS-232C cable is connected, turn on the computer before the projector.
• When a projector continues projecting the same image, the image may remain as an afterimage. Please do not project the image same for a long time.
## Basic Operation

The basic operations shown in Table 3 is performed from the supplied remote control transmitter or the projector control panel. Items indicated by (*) may be used from the control panel.

### Table 3. Basic Operation

<table>
<thead>

| **INPUT SELECT**    | **Select Input Signal** (*) : Press the INPUT button.  
RGB IN 1 → RGB IN 2 → DVI → VIDEO IN → S-VIDEO IN → COMPONENT VIDEO (→ RGB IN 1)  
**Select RGB Input** : Press the RGB button.  
VIDEO IN / S-VIDEO IN / COMPONENT VIDEO → RGB IN 1 / RGB IN 2 / DVI  
RGB IN 1 → RGB IN 2 → DVI (→ RGB IN 1)  
**Select Video Input** : Press the VIDEO button.  
RGB IN 1 / RGB IN 2 / DVI → VIDEO IN / S-VIDEO IN / COMPONENT VIDEO  
VIDEO IN → S-VIDEO IN → COMPONENT VIDEO (→ VIDEO IN)  
* The selected signal name is displayed for approximately 3 seconds when the input signal is changed. |
| **POSITION**        | **Set/Clear Position Adjustment Mode** : Press the POSITION button.  
The [icontent] icon is displayed in the POSITION mode.  
**Image Position Adjustment** : Press the , , and buttons in the POSITION mode.  
* Valid only in the MAGNIFY mode with a video signal is input.  
* After approximately 10 seconds of inactivity the [icontent] icon is extinguished and the POSITION mode is cleared automatically.  
* , , and buttons may operate as the mouse control button. Refer to page 4. |
| **RESET (*)**       | **Initialize Each Item** : Select an item and press the RESET button.  
**Initialize Position Adjustment** : Press the RESET button and the POSITION mode. This function is valid only when RGB signal is input.  
* Valid except for the VOLUME, LANGUAGE and H PHASE.  
* The RESET button may operate as the mouse control button. Refer to page 4. |
| **MAGNIFY**         | **Set MAGNIFY Mode** : Press the MAGNIFY button.  
**Move Magnified Area** : Run the POSITION in the MAGNIFY mode.  
**Adjust Magnification** : Press the MAGNIFY button in MAGNIFY mode.  
**Clear MAGNIFY Mode** : Press the MAGNIFY button.  
* The MAGNIFY mode is cleared by running or setting the AUTO, ASPECT, INPUT SELECT or VIDEO, or by changing the input signal. |
| **FREEZE**          | **Set/Clear FREEZE Mode** : Press the FREEZE button. The [II] icon is displayed, and the image is frozen, in the FREEZE mode.  
* The FREEZE mode is cleared by running or setting POSITION, VOLUME, MUTE, Automatic Adjustment, BLANK ON/OFF, or MENU ON/OFF, or by changing the input signal.  
* Do not forget to clear frozen static images. |

**NOTE**  
- Strong light and obstacles will interfere with operation of the remote control transmitter.
### Items indicated by (*) may be used from the control panel.

#### Table 3. Basic Operation (continued)

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>VOLUME</strong></td>
<td><strong>Volume Adjustment</strong>: Press the VOLUME ( \circlearrowleft / \circlearrowright ) button.</td>
</tr>
<tr>
<td><strong>MUTE</strong></td>
<td><strong>Set/Clear Mute Mode</strong>: Press the MUTE button. No sound is heard in the MUTE mode.</td>
</tr>
</tbody>
</table>
| **AUTO**           | **Automatic Adjustment at RGB Input**: Press the AUTO button. Horizontal position (H.POSIT), vertical position (V.POSIT), clock phase (H.PHASE), and horizontal size (H.SIZE) are automatically adjusted. Use with the window at maximum size in the application display. **Automatic Adjustment at Video Input**: Press the AUTO button. A signal type appropriate for the input signal is selected automatically. Valid only when AUTO is set for VIDEO on the menu.  
  • This operation requires approximately 10 seconds. It may not function correctly with some input signals. |
| **BLANK ON/OFF**   | **Set/Clear Blank Mode**: Press the BLANK button. No image is displayed in the Blank mode. The screen color is as set in BLANK on the Image menu. |
| **MENU ON/OFF (**)** | **Menu Display Start/Stop**: Press the MENU button.  
  • The menu display is terminated automatically after approximately 10 seconds of inactivity.  
  **Select Menu Type**: Press the MENU SELECT button. Allows the user to select the normal menu or the single menu. Only the selected item is displayed on the single menu, and other items are displayed with the \( \downarrow \) and \( \uparrow \) buttons as with the normal menu.  
  • Valid only when the Setup menu is used. Push the MENU SELECT button after selecting items such as "BRIGHTNESS".  
  • The MENU SELECT button may operate as the mouse control button. Refer to page 4. |
| **P.IN P. MODE**   | **Select Mode of P.IN P. Display**: Press the PinP button.  
  Small \( \rightarrow \) Large \( \rightarrow \) P.IN P. off \( \rightarrow \) Small  
  • P.IN P. function superimposes a video image over RGB or DVI signals. |
| **KEYSTONE**       | **Set / Clear KEYSTONE Mode (**)**: Press the KEYSTONE \( \circlearrowleft \) button.  
  **Select KEYSTONE Mode**: Press the \( \downarrow \) / \( \uparrow \) button in the KEYSTONE mode. Vertical \( \downarrow \leftrightarrow \uparrow \) Horizontal  
  **Adjust KEYSTONE**: Press the \( \circlearrowleft / \circlearrowright \) button. |
Setup Menu
The following adjustments and settings are possible when SETUP is selected at the top of the menu. Part of the Setup menu differs between RGB input and video input. Select an item with the † and ‡ buttons, and start operation. Use the Single menu to reduce menu size (see Table 3, MENU SELECT).

**Input Menu**

The following functions are available when INPUT is selected on the menu. Select an item with the △ and □ buttons, and start or stop operation with the ◀ and ▶ buttons. The function indicated (**) are effective on video input mode only, not on RGB input mode, except in the P.IN P. window on RGB input mode.

**Table 5. Input Menu**

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| AUTO     | **Automatic Adjustment at RGB Input:** Select the EXECUTE with the △ button. Horizontal position (H.POSIT), vertical position (V.POSIT), clock phase (H.PHASE), and horizontal size (H.SIZE) are automatically adjusted. Use with the window at maximum size in the application display.  
**Automatic Adjustment at Video Input:** Select the EXECUTE with the △ button. A signal type appropriate for the input signal is selected automatically when EXECUTE is selected automatically. Valid only when AUTO is set for VIDEO on the menu.  
• This operation requires approximately 10 seconds. It may not function correctly with some input signals. Pressing the AUTO button in this case may correct this problem.  
• This function is the same as for the AUTO function in Basic operation. |
| RGB      | **Displays RGB Input Frequency:** Displays the horizontal and vertical sync signal frequencies for RGB input.  
• Valid only at RGB input. |
| VIDEO (**) | **Select Video Signal Type:** Select the signal type with the △ and □ buttons. Select NTSC, PAL, SECAM, NTSC4.43, M-PAL, or N-PAL as appropriate for the input signal. The selection of AUTO enables and executes the function AUTO (Automatic Adjustment at Video Input), except for the N-PAL input.  
• Use this function when the image becomes unstable (eg. the image becomes irregular, or lacks color) at VIDEO/S-VIDEO input.  
• Automatic Adjustment requires approximately 10 seconds. It may not function correctly with some input signals. Pressing the AUTO button in this case may correct this problem except for the N-PAL input.  
• For the COMPONENT VIDEO input, this function is not effective and the signal type is distinguished automatically. Refer to the item HDTV of the OPT. Menu for the signal of HDTV. |
| HDTV     | **Select HDTV mode:** Select the 1035i mode or 1080i mode suitable for the input signal with the △ / □ button. |
**Image Menu**

The following adjustments and settings are available when IMAGE is selected on the menu. Select an item with the ▲ and ▼ buttons, and start or stop operation with the ◄ and ► buttons.

</table>
| AUTO OFF      | **Set AUTO OFF:** Set 1~99 minutes with the / button. The system automatically enters the standby mode when a signal is not received for the set time.  
**Clear AUTO OFF:** Select STOP (0 min.) with the button. When STOP is selected the system does not enter the standby mode even if no signal is received. |
| SYNC ON G     | **SYNC ON G Valid:** Select TURN ON with the button.  
**SYNC ON G Invalid:** Select TURN OFF with the button.  
• May not be displayed correctly with some input signals when SYNC ON G is valid. In such cases, remove the signal connector so that no signal is received, set SYNC ON G to invalid, and reconnect the signal. |
| WHISPER       | **Set / Crear WHISPER Mode:** Press the button. When the WHISPER is selected, the WHISPER mode is active. In the WHISPER mode, acoustic noise level from the unit is reduced, and brightness level on screen is a little lower. |
| IR REMOTE     | **Select Remote Control Sensor:** Select the sensors to activate along the menu with the / button. Use this function if the remote does not work stably. The ambient light may affect the remote. |

- active
- inactive
No Signal Menu
The same adjustments and settings are available with the Image and Options menus when the MENU button is pressed during display of the “NO INPUT IS DETECTED ON ***” or “SYNC IS OUT OF RANGE ON ***” message while no signal is received. Select an item with the \( \textcircled{1} \) and \( \textcircled{2} \) buttons, and start or stop operation with the \( \textcircled{3} \) and \( \textcircled{4} \) buttons.

### Table 8. No Signal Menu

MAINTENANCE

Lamp

WARNING Before replacing the lamp, switch power OFF, remove the power cord from the power outlet, and wait approximately 45 minutes until the lamp has cooled. The lamp may explode if handled at high temperatures.

CONTACT YOUR DEALER before replacing the lamp.
For the Replacement lamp, see the item “ACCESSORIES” of P.24.

WARNING • The projector uses a high-pressure mercury glass lamp. For disposal of used lamp, treat according to the instruction of community authorities.
• Since the lamp is made of glass, do not apply shock to it and do not scratch it.
• Also, do not use old lamp. This could also cause explosion of the lamp.
• Premature lamp failure MAY be caused by an electronic component in the projector and not necessarily the lamp. If unsure contact your local service center.
• If it is probable that the lamp has exploded (explosive sound is heard), disconnect the power plug from the power outlet and ask your dealer to replace lamp. The lamp is covered by front glass, but in rare cases, the reflector and the inside of the projector may be damaged by scattered broken pieces of glass, and broken pieces could cause injury when being handled.
• Do not use the projector with the lamp door removed.

Lamp Life
Projector lamps have a finite life. The image will become darker, and hues will become weaker, after a lamp has been used for a long period of time.
Replace the lamp if the LAMP indicator is red, or the CHANGE THE LAMP message appears when the projector is switched ON. See Table 9 of P.20 and Table 10 of P.21.

NOTE • The LAMP indicator is also red when the lamp unit reaches high temperature. Before replacing the lamp, switch power OFF, wait approximately 20 minutes, and switch power ON again. If the LAMP indicator is still red, replace the lamp.
Replacing the Lamp

1. Switch the projector OFF, remove the power cord from the power outlet, and wait at least 45 minutes for the unit to cool.  
2. Prepare a new lamp.  
3. Check that the projector has cooled sufficiently, and gently turn it upside down.  
4. Loosen the two screws as shown in the diagram, and remove the lamp door.  
5. Loosen the three screws, and gently remove the lamp while holding the grips. Touching the inside of the lamp case may result in uneven coloring.  
6. Install the new lamp and tighten the three screws firmly. Also steadily push the opposite side of the screwed lamp into the unit.  
7. Replace the lamp door in position and tighten the two screws firmly.  
8. Gently turn the projector right-side up.

**NOTE**  
- Ensure that screws are tightened properly. Screws not tightened fully may result in injury or accidents.  
- Do not use the projector with the lamp door removed.

Resetting the Lamp Timer

Reset the lamp timer after replacing the lamp. When the lamp has been replaced after the LAMP indicator is red, or the CHANGE THE LAMP message is displayed, complete the following operation within ten minutes of switching power ON. The power will be turned off automatically in over 10 minutes.

1. Switch power ON, and press the RESET button, for approximately three seconds. The ‘LAMP xxxx hr’ message will appear on the lamp timer on the bottom of the screen.  
2. Press the MENU button on the remote control transmitter, or the RESET button on the control panel, while the lamp timer is displayed. The ‘LAMP xxxx □ → 0 ■ CANCEL’ message will then appear.  
3. Press the (☯) and select 0, and wait until the timer display is cleared.

**NOTE**  
- Do not reset the lamp timer without replacing the lamp. Reset the lamp timer always when replacing the lamp. The message functions will not operate properly if the lamp timer is not reset correctly.
Air Filter

Cleaning the air Filter
The air filter should be cleaned as described below at intervals of approximately 100 hours.

1. Switch the projector power supply OFF, and remove the power cord from the power outlet.
2. Clean the air filter with a vacuum cleaner.

Replacing the Air Filter
Replace the air filter if contamination cannot be removed, or if it is damaged.

1. Remove the filter cover.
2. Remove the old filter.
3. Set the new filter and the filter cover.

Other Maintenance

Maintenance Inside the Equipment
For safety reasons, ensure that the equipment is cleaned and checked by the dealer once every two years. Maintaining the equipment by yourself is dangerous.

Cleaning the Lens
Gently wipe the lens with lens cleaning paper. Do not touch the lens with your hands.

Cleaning the Cabinet and Remote control transmitter
Gently wipe with a soft cloth. If dirt and stains etc. are not easily removed, use a soft cloth dampened with water, or water and a neutral detergent, and wipe dry with a soft, dry cloth.

WARNING
• Switch power OFF and remove the power cord from the power outlet before beginning maintenance work. Please read the “Product Safety Guide” thoroughly to ensure that maintenance is performed correctly.
• Replace the air filter if contamination cannot be removed, or if it is damaged. Contact your dealer in such case. For the optional air filter, see the item “ACCESSORIES” of P.24.
• Do not use the equipment with the air filter removed.
• When the air filter is clogged with dust etc. the power supply is switched OFF automatically to prevent the temperature rising inside the projector.

NOTE
• Do not rub with hard materials, or tap the equipment.
TROUBLESHOOTING

Service Information
For product information, product assistance, service information, or to order accessories, please call:
In U.S. or Canada: 1-800-328-1371
In other locations, contact your local 3M sales office.

OSD Message
The messages as described below may appear on the screen at power ON. Take the appropriate measures when such messages appears.

Table 9. OSD Message

<table>
<thead>
<tr>
<th>Message</th>
<th>Contents</th>
</tr>
</thead>
</table>
| CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME. | The usage time of lamp will be reaching 2000 hr shortly. (*2)
| | It is recommended to replace the lamp soon. Prepare a new lamp as a replacement. |
| CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME. THE POWER WILL TURN OFF AFTER ** hr. | The usage time of lamp will be reaching 2000 hr shortly. It is recommended to replace the lamp within ** hours. (*2)
| | It might be happened that the lamp is cut off before ** hr by any chance. Power will be switched OFF automatically in ** hours. Replace the lamp as shown in P.17~18 “Lamp”. Always reset the lamp timer after replacing the lamp. |
| CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIME. THE POWER WILL TURN OFF AFTER 0 hr. | The usage time of lamp is about to reach. Power will be switched OFF in a few minutes. (*2)
| | Switch power OFF immediately and replace the lamp as shown in P.17 ~18 “Lamp”. Always reset the lamp timer after replacing the lamp. |
| NO INPUT IS DETECTED ON *** | No input signal found. Check signal input connections and signal sources. |
| SYNC IS OUT OF RANGE ON *** | The horizontal or vertical frequency of the input signal is not within the specified range. Check the specifications of the equipment and the signal source. |

NOTE
(*1) This message is cleared automatically after approximately three minutes, and appears every time power is switched ON.
(*2) The unit has a function to turn the power off which will be active when the usage time reaches 2000 hr. However the life of lamp might be much different among lamps, so that it might be happened that a lamp is cut off before the function is active.
**Indicators Message**
The POWER indicator, LAMP indicator, and TEMP indicator are lit and blank as follows. Take the appropriate measures.

- **Contents**
  - The Standby mode has been set.
  - Warming up. Please wait.
  - ON. Normal operation possible.
  - Cooling. Please wait.
  - Cooling. Please wait.
  - The error is found. Take the appropriate measures when the POWER indicator ceases blinking.
  - Lamp is not lit. The interior of the equipment may be too hot. Switch power OFF, wait 20 minutes until the equipment cools, and check whether the ventilation openings are blocked, whether the air filter is dirty, or whether the ambient temperature exceeds 35 °C. And switch power ON again. Replace the lamp if the same problem occurs.
  - Lamp or lamp door is not found, or hasn’t been fitted in correctly. Switch power OFF, and wait for 45 minutes until the equipment cools. Check fitting of the lamp and lamp door, and switch power ON again. Contact your dealer if the same problem occurs again.
  - The cooling fan is not operating. Switch power OFF, and wait for 20 minutes until the equipment cools. Check for foreign matters in the fan, and switch power ON again. Contact your dealer if the same problem occurs again.
  - The interior of the equipment is too hot. Switch power OFF, and wait for 20 minutes until the equipment cools. Check whether the ventilation openings are blocked, whether the air filter is dirty, or whether the ambient temperature exceeds 35 °C. Then switch power ON again. Contact your dealer if the same problem occurs again.
  - The interior of the equipment is too cool. Check whether the ambient temperature is below 0°C. Contact your dealer if the same problem occurs when the ambient temperature is 0~35°C.

**NOTE**
When the internal temperature becomes excessive power is switched OFF automatically for safety reasons, and the indicator is extinguished. Set the power switch to [O] and wait for 20 minutes until the equipment has cooled sufficiently.
# Symptom

Before requesting repair, check in accordance with the following chart. If the situation cannot be corrected, then contact your dealer.
