OPERATION MANUAL

(The picture shown above is of the XR-1S.)
IMPORTANT
For your assistance in reporting the loss or theft of your Projector, please record the Model and Serial Number located on the bottom of the projector and retain this information. Before recycling the packaging, please be sure that you have checked the contents of the carton thoroughly against the list of "Supplied accessories" on page 11.

Model No.:
Serial No.:

SPECIAL NOTE FOR USERS IN THE U.K.
The mains lead of this product is fitted with a non-rewireable (moulded) plug incorporating a 5A fuse. Should the fuse need to be replaced, a BSI or ASTA approved BS 1362 fuse marked ☚ or ☛ and of the same rating as above, which is also indicated on the pin face of the plug, must be used.
Always refit the fuse cover after replacing the fuse. Never use the plug without the fuse cover fitted.
In the unlikely event of the socket outlet in your home not being compatible with the plug supplied, cut off the mains plug and fit an appropriate type.

DANGER:
The fuse from the cut-off plug should be removed and the cut-off plug destroyed immediately and disposed of in a safe manner.
Under no circumstances should the cut-off plug be inserted elsewhere into a 5A socket outlet, as a serious electric shock may occur.
To fit an appropriate plug to the mains lead, follow the instructions below:

WARNING:
THIS APPARATUS MUST BE EARTHED.

IMPORTANT:
The wires in this mains lead are coloured in accordance with the following code:
- Green-and-yellow : Earth
- Blue : Neutral
- Brown : Live
As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
• The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ☚ or coloured green or green-and-yellow.
• The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
• The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

IF YOU HAVE ANY DOUBT, CONSULT A QUALIFIED ELECTRICIAN.

Dieses Gerät entspricht den Anforderungen der EG-Richtlinien 89/336/EGW und 73/23/EGW mit Änderung 93/68/EGW.

Ce matériel répond aux exigences contenues dans les directives 89/336/CEE et 73/23/CEE modifiées par la directive 93/68/CEE.

Dit apparaat voldoet aan de eisen van de richtlijnen 89/336/EEG en 73/23/EEG, gewijzigd door 93/68/EEG.

Dette udstyr overholder kravene i direktiv nr. 89/336/EEC og 73/23/EEC med tillæg nr. 93/68/EEC.

Quest' apparecchio è conforme ai requisiti delle direttive 89/336/EEC e 73/23/EEC, come emendata dalla direttiva 93/68/EEC.

Αυτή η συσκευή συμμορφώνεται με τις απαιτήσεις των οδηγιών του Συμβουλίου 89/336/EOK και 73/23/EOK όπως τροποποιήθηκαν από την οδηγία του Συμβουλίου 93/68/EOK.

Este equipamiento obedece às exigências das directivas 89/336/CEE e 73/23/CEE, na sua versão corrigida pela directiva 93/68/CEE.

Este aparato satisface las exigencias de las Directivas 89/336/CEE y 73/23/CEE, modificadas por medio de la 93/68/CEE.

Denna utrustning uppfyller kraven enligt riktlinjerna 89/336/EEC och 73/23/EEC så som kompletteras av 93/68/EEC.

Dette produktet oppfyller betingelsene i direktivene 89/336/EEC og 73/23/EEC i endringen 93/68/EEC.

Tämä laite täyttää direktiivien 89/336/EEC ja 73/23/EEC vaatimukset, joita on muutettu direktiivillä 93/68/EEC.

Tento přístroj je v souladu s požadavky směrnice rady 89/336/EEC a 73/23/EEC, tak jak byly upraveny směrnici rady 93/68/EEC.

Ez a készülék megfelel a Tanács által kiadott, 89/336/EGK és 73/23/EGK irányelveknek és az utóbbi módosító 93/68/EGK irányelvnek.

Ši ierīce atbilst tehniskam prasībām pec 89/336/EEC un 73/23/EEC direktivam papildināts ar direktīvu 93/68/EEC.

To urządzenie spełnia wymagania dyrektyw 89/336/EEC i 73/23/EEC wraz z poprawkami dyrektywy 93/68/EEC.

Tento prístroj je v súlade s požiadavkami smerníc rady 89/336/EEC a 73/23/EEC tak ako boli upravené smernicou rady 93/68/EEC.

Ta aparat je v skladu z zahtevami Direktiv Sveta 89/336/EEC in 73/23/EEC kot je navedeno v dopolnilu k Direktivi Sveta 93/68/EEC.
The supplied CD-ROM contains operation instructions in English, German, French, Swedish, Spanish, Italian, Dutch, Portuguese, Chinese (Traditional Chinese and Simplified Chinese) and Korean. Carefully read through the operation instructions before operating the projector.

Before using the projector, please read this operation manual carefully.

Introduction

There are two important reasons for prompt warranty registration of your new SHARP Projector, using the REGISTRATION CARD packed with the projector.

1. **WARRANTY**
   This is to assure that you immediately receive the full benefit of the parts, service and labor warranty applicable to your purchase.

2. **CONSUMER PRODUCT SAFETY ACT**
   To ensure that you will promptly receive any safety notification of inspection, modification, or recall that SHARP may be required to give under the 1972 Consumer Product Safety Act, PLEASE READ CAREFULLY THE IMPORTANT “LIMITED WARRANTY” CLAUSE.

**WARNING:** High brightness light source. Do not stare into the beam of light, or view directly. Be especially careful that children do not stare directly into the beam of light.

**WARNING:** To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

**CAUTION:** TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. NO USER-SERVICEABLE PARTS EXCEPT LAMP UNIT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

**WARNING:** FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

INFORMATION

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the operation manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.
WARNING:
The cooling fan in this projector continues to run for about 90 seconds after the projector enters standby mode. During normal operation, when putting the projector into standby mode always use the ON/STANDBY button on the projector or on the remote control. Ensure the cooling fan has stopped before disconnecting the power cord.

DURING NORMAL OPERATION, NEVER TURN THE PROJECTOR OFF BY DISCONNECTING THE POWER CORD. FAILURE TO OBSERVE THIS WILL RESULT IN PREMATURE LAMP FAILURE.

PRODUCT DISPOSAL
This projector utilizes tin-lead solder, and a pressurized lamp containing a small amount of mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities or, if you are located in the United States of America, the Electronic Industries Alliance: www.eiae.org.

CAUTION ON LITHIUM BATTERY (for Remote Control unit)
If a battery is reversed (positive end where the negative end belongs and vice versa), it can overheat and rupture. This has happened when young children install batteries backwards. Warn children not to take out batteries or install them. Parents should install the lithium battery in the remote control.

Caution Concerning Lamp Replacement
See “Replacing the Lamp” on page 55.

This SHARP projector uses a DMD panel. This very sophisticated panel contains 786,432 (XR-1X) / 480,000 (XR-1S) pixels micromirrors. As with any high technology electronic equipment such as large screen TVs, video systems and video cameras, there are certain acceptable tolerances that the equipment must conform to.

This unit has some inactive pixels within acceptable tolerances which may result in inactive dots on the picture screen. This will not affect the picture quality or the life expectancy of the unit.
How to Read this Operation Manual

- The specifications of the XR-1X are slightly different from those of the XR-1S, however, you can connect and operate both models in the same manner. This operation manual uses the XR-1S for the purpose of explanation.
- In this operation manual, the illustration and the screen display are simplified for explanation, and may differ slightly from actual display.

Using the Menu Screen

The menu can be operated to achieve two functions, adjustment and setting. (For setting the menu items, see pages 38 and 39.)

Operating with the projector
When “PRJ - ADJ” - “Guide LEDs” is set to “On”, the buttons used for menu adjustment on the projector light up.
Example: When “W”, “Y” and the MENU/HELP button light up on the projector, you can use those buttons for operation.

Menu Selections (Adjustments)

Example: Adjusting “Bright”.
1 Press MENU.
   • The “Picture” menu screen for the selected input mode is displayed.
2 Press or to display the other menu screen.
   • The selected menu item is highlighted.

Operating with the projector
When “PRJ - ADJ” - “Guide LEDs” is set to “On”, the buttons used for menu adjustment on the projector light up.
Example: When “W”, “Y” and the MENU/HELP button light up on the projector, you can use those buttons for operation.

IMPORTANT SAFEGUARDS

CAUTION: Please read all of these instructions before you operate this product and save these instructions for later use.

Electrical energy can perform many useful functions. This product has been engineered and manufactured to assure your personal safety. BUT IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARDS. In order not to defeat the safeguards incorporated in this product, observe the following basic rules for its installation, use and servicing.

1. Read Instructions
All the safety and operating instructions should be read before the product is operated.

2. Retain Instructions
The safety and operating instructions should be retained for future reference.

3. Heed Warnings
All warnings on the product and in the operating instructions should be adhered to.

4. Follow Instructions
All operating and use instructions should be followed.

5. Cleaning
Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

6. Attachments
Do not use attachments not recommended by the product manufacturer as they may cause hazards.

7. Water and Moisture
Do not use this product near water—for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool; and the like.

8. Accessories
Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.

9. Transportation
A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

10. Ventilation
Slots and openings in the cabinet are provided for ventilation to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.

11. Power Sources
This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

12. Grounding or Polarization
This product is provided with one of the following types of plugs. If the plug should fail to fit into the power outlet, please contact your electrician. Do not defeat the safety purpose of the plug.
a. Two-wire type (mains) plug.
b. Three-wire grounding type (mains) plug with a grounding terminal.
   This plug will only fit into a grounding type power outlet.

13. Power-Cord Protection
Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

14. Lightning
For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power-line surges.
15. Overloading
Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

16. Object and Liquid Entry
Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

17. Servicing
Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Damage Requiring Service
Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

   a. When the power-supply cord or plug is damaged.
   b. If liquid has been spilled, or objects have fallen into the product.
   c. If the product has been exposed to rain or water.
   d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
   e. If the product has been dropped or damaged in any way.
   f. When the product exhibits a distinct change in performance, this indicates a need for service.

19. Replacement Parts
When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

20. Safety Check
Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. Heat
This product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

• Microsoft and Windows are registered trademarks of Microsoft Corporation in the United States and/or other countries.
• PC/AT is a registered trademark of International Business Machines Corporation in the United States.
• Adobe Reader is a trademark of Adobe Systems Incorporated.
• Macintosh is a registered trademark of Apple Computer, Inc. in the United States and/or other countries.
• All other company or product names are trademarks or registered trademarks of their respective companies.
Be sure to read the following safeguards when setting up your projector.

Caution concerning the lamp unit
■ Potential hazard of glass particles if lamp ruptures. In case of lamp rupture, contact your nearest Sharp Authorized Projector Dealer or Service Center for a replacement. See “Replacing the Lamp” on page 55.

Caution concerning the setup of the projector
■ For minimal servicing and to maintain high image quality, SHARP recommends that this projector be installed in an area free from humidity, dust and cigarette smoke. When the projector is subjected to these environments, the vents and lens must be cleaned more often. As long as the projector is regularly cleaned, use in these environments will not reduce the overall operation life of the unit. Internal cleaning should only be performed by a Sharp Authorized Projector Dealer or Service Center.

Do not set up the projector in places exposed to direct sunlight or bright light.
■ Position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the screen in a sunny or bright room.

Caution regarding placing of the projector.
■ Place the projector on a level site within the adjustment range of the adjustment foot.

Warning about placing the projector in a high position
■ When placing the projector in a high position, be sure to secure it carefully to avoid personal injury caused by the projector falling down.

Do not subject the projector to hard impact and/or vibration.
■ Take care with the lens so as not to hit or damage the surface of the lens.

Rest your eyes occasionally.
■ Continuously watching the screen for long hours will cause eye strain. Be sure to occasionally rest your eyes.

Avoid locations with extremes of temperature.
■ The operating temperature of the projector is from 41°F to 95°F (+5°C to +35°C).
■ The storage temperature of the projector is from –4°F to 140°F (–20°C to +60°C).

Do not block the exhaust and intake vents.
■ Allow at least 11 13/16 inches (30 cm) of space between the exhaust vent and the nearest wall or obstruction.
■ Be sure that the intake vent and the exhaust vent are not obstructed.
■ If the cooling fan becomes obstructed, a protection circuit will automatically put the projector into standby mode to prevent overheat damage. This does not indicate a malfunction. (See pages 53 and 54.) Remove the projector power cord from the wall outlet and wait at least 10 minutes. Place the projector where the intake and exhaust vents are not blocked, plug the power cord back in and turn on the projector. This will return the projector to the normal operating condition.
■ When turning off the projector, the cooling fan runs to decrease the internal temperature for a while. Unplug the power cord after the cooling fan stops. The period the cooling fan runs will vary, depending on the circumstances and the internal temperature.
Caution regarding transportation of the projector

■ When transporting the projector, be sure not to subject it to hard impact and/or vibration, as this can result in damage. Take extra care with the lens. Before moving the projector, be sure to unplug the power cord from the wall outlet, and disconnect any other cables connected to it.
■ Do not carry the projector by holding the lens.
■ When transporting the projector, be sure to place the projector in the supplied soft case. (See page 11.)

Other connected equipment

■ When connecting a computer or other audio-visual equipment to the projector, make the connections AFTER unplugging the power cord of the projector from the AC outlet and turning off the equipment to be connected.
■ Please read the operation manuals of the projector and the equipment to be connected for instructions on how to make the connections.

Using the projector in other countries

■ The power supply voltage and the shape of the plug may vary depending on the region or country you are using the projector in. When using the projector overseas, be sure to use an appropriate power cord for the country you are in.

Temperature monitor function

■ If the projector starts to overheat due to setup problems or blockage of the air vents, "TEMP. " and " " will illuminate in the lower left corner of the picture. If the temperature continues to rise, the lamp will turn off, the temperature warning indicator on the projector will blink, and after a 90-second cooling-off period the projector will enter standby mode. Refer to "Maintenance Indicators" on page 53 for details.

Info

• The cooling fan regulates the internal temperature, and its performance is automatically controlled. The sound of the fan may change during projector operation due to changes in the fan speed. This does not indicate malfunction.
• Do not unplug the power cord during projection or cooling fan operation. This can cause damage due to rise in internal temperature, as the cooling fan also stops.
How to Access the PDF Operation Manuals

PDF operation manuals in several languages are included in the CD-ROM, so that you can work with the projector, even if you do not have this manual. To utilize these manuals, you need to install Adobe Reader on your computer (Windows or Macintosh).

Please download Adobe Reader from the Internet (http://www.adobe.com).

Accessing the PDF Manuals

For Windows:
1. Insert the CD-ROM in the CD-ROM drive.
2. Double click the “My Computer” icon.
3. Double click the “CD-ROM” drive.
4. Double click the language (name of the folder) that you want to view.
5. Double click the “XR1” pdf file to access the projector manuals.

For Macintosh:
1. Insert the CD-ROM in the CD-ROM drive.
2. Double click the “CD-ROM” icon.
3. Double click the language (name of the folder) that you want to view.
4. Double click the “XR1” pdf file to access the projector manuals.

Note
• If the desired pdf file cannot be opened by double clicking the mouse, start Adobe Reader first, then specify the desired file using the “File”, “Open” menu.
### Accessories

#### Supplied accessories

- Remote control: RRMCGA256WJSA
- Lithium battery: (CR2025) UBATL0011TZZ
- Soft case: GCASNA011WJZZ
- RGB/USB cable: (6’ (1.8 m)) QCNWGA047WJPZ
- Power cord*:
  1. For U.S., Canada, etc. (6’ (1.8 m)) QACCDA029WJPZ
  2. For Europe, except U.K. (6’ (1.8 m)) QACCVA006WJPZ
  3. For U.K., Hong Kong and Singapore (6’ (1.8 m)) QACCBA015WJPZ
  4. For Australia, New Zealand and Oceania (6’ (1.8 m)) QACCLA024WJPZ
- Cable tie x 2: UBNDTA015WJZZ
- Projector manual CD-ROM: UDSKA045WJN1
- Operation manual (this manual)

* Use the power cord that corresponds to the wall outlet in your country.

#### Optional accessories

- 3 RCA to 15-pin D-sub cable (9’10” (3.0 m)): AN-C3CP
- Lamp unit: AN-XR1LP

#### Note

- Some of the optional accessories may not be available depending on the region. Please check with your nearest Sharp Authorized Projector Dealer or Service Center.

#### Carrying the Projector

**Using the Soft Case**

- Tie the cable using the supplied cable ties.

**Info**

- Be sure the projector has cooled down sufficiently before placing it in the case.
- This soft case is only for storing and carrying the projector.
- Shipping the projector in the soft case as a parcel may cause damage to the projector. If you send the projector in the carrying case as a parcel, be sure to place it in a sturdy case and with enough shock absorbing material to avoid any damage.

**Note**

- You cannot store the supplied cables within the soft case. When transporting the projector, prepare a bag for these cables.

</table>
Numbers in refer to the main pages in this operation manual where the topic is explained.

**Side View**

**Terminals** Refer to "INPUT Terminals and Connectable Main Equipment" on page 21.

**INPUT 1 terminal**
Terminal for computer RGB and component signals.

**INPUT 2 terminal**
Terminal for connecting video equipment with an S-video terminal.

**INPUT 3 terminal**
Terminal for connecting video equipment.

**USB terminal**
Terminal connecting with the USB terminal on the computer for using the supplied remote control as the computer mouse.

**AC socket**
Connect the supplied Power cord.

**Exhaust vent**

**Kensington Security Standard connector**

**Rear adjustment foot**

**Intake vent**

**Remote control sensor**

**Using the Kensington Lock**
- This projector has a Kensington Security Standard connector for use with a Kensington MicroSaver Security System. Refer to the information that came with the system for instructions on how to use it to secure the projector.
**Inserting the Lithium Battery**

1. While pressing the tab (1), pull the battery holder (2).
2. Pull the battery holder.
3. Insert the supplied lithium battery (CR2025).
   - Insert the lithium battery with the + side of the battery facing the + mark of the battery holder.
4. Insert the battery holder into the remote control.
**Usable Range**

The remote control can be used to control the projector within the ranges shown in the illustration.

**Note**
- The signal from the remote control can be reflected off a screen for easy operation. However, the effective distance of the signal may differ depending on the screen material.

When using the remote control
- Be sure not to drop, expose to moisture or high temperature.
- The remote control may malfunction under a fluorescent lamp. In this case, move the projector away from the fluorescent lamp.

**Notes the Use of the Lithium Battery**

**CAUTION** The battery used in this device may present a risk of fire or chemical burn if misused. Do not recharge, disassemble, heat above 212°F (100°C), or incinerate. Replace battery with the type CR2025 only. Use of another battery may present a risk of fire or explosion. Dispose of used battery promptly. Keep away from children. Do not disassemble and do not dispose of in fire.
- See page 2 for caution on the lithium battery.
- Do not short-circuit, recharge, disassemble, or heat the lithium battery.
- Should the lithium battery leak, wipe the battery compartment clean, and then insert a new battery.

**Replacement of lithium battery**
- Replace with a new battery (CR2025) if remote control operation often fails.
- When disposing the battery, follow the recycling or disposal regulations in your community.
Quick Start

This section shows the basic operation (projector connecting with the computer). For details, see the page described below for each step.

Setup and Projection

In this section, connection of the projector and the computer is explained using one example.

1. Place the projector facing a wall or a screen

2. Connect the projector to the computer and plug the power cord into the AC socket of the projector

When connecting equipment other than the computer, see pages 24 and 25.

3. Press the ON/STANDBY button to turn the projector on

On the projector
On the remote control

P. 18
PP. 21–25
P. 26
Quick Start

1. After adjusting the focus, height and screen size, press \( \text{T ENTER} \) to finish the Setup Guide.

2. Focus (See page 27.)
   - Bring the projected image into focus using the focus ring.

3. Angle (See page 28.)
   - Adjust the projector angle using the HEIGHT ADJUST button.

4. Zoom (See page 28.)
   - Adjust the projected image size using the zoom knob.

5. Select the INPUT mode
   - When pressing the INPUT button on the projector, input mode switches in order of INPUT1 INPUT2 INPUT3.
   - When using the remote control, press the \( \text{C INPUT 1/ D INPUT 2/ E INPUT 3} \) button to switch the INPUT mode.

6. Turn the Power off
   - Press the ON/STANDBY button, then press that button again while the confirmation message is displayed, to put the projector into standby mode.
   - While the cooling fan is running, the Adjustment buttons blinks. (When “Guide LEDs” is set to “On”. page 48)
   - Unplug the power cord from the AC outlet after the cooling fan stops.

P. 28

P. 29

P. 26
Setting up the Projector

Position the projector perpendicular to the screen with the projector's feet flat and level to achieve an optimal image.

**Note**
- For an optimal image, position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the screen in a sunny or bright room.

**Standard Setup (Front Projection)**
- Place the projector at the required distance from the screen according to the desired picture size. (See page 19.)

**Example of standard setup**

![Side View](image)

**Projecting a Reversed Image**

**Projection from behind the Screen**
- Place a translucent screen between the projector and the audience.
- Reverse the image by setting “Rear” in the “PRJ Mode” menu. (See page 46.)

**Projection Using a Mirror**
- Place a mirror (normal flat type) in front of the lens.
- When the translucent screen is placed between the mirror and audience, set to “Front” in the “PRJ Mode” menu. (See page 46.)
- When the mirror is placed on the audience side, set to “Rear” in the “PRJ Mode” menu. (See page 46.)

**Info**
- When using a mirror, be sure to carefully position both the projector and the mirror so the light does not shine into the eyes of the audience.

</table>
Connecting to a Computer

Before connecting, be sure to unplug the power cord of the projector from the AC outlet and turn off the devices to be connected. After making all connections, turn on the projector and then the other devices. When connecting a computer, be sure that it is the last device to be turned on after all the connections are made.

Be sure to read the operation manuals of the devices to be connected before making connections.

"Plug and Play" function (when connecting to a 15-pin terminal)

- This projector is compatible with VESA-standard DDC 1/DDC 2B. The projector and a VESA DDC compatible computer will communicate their setting requirements, allowing for quick and easy setup.
- Before using the "Plug and Play" function, be sure to turn on the projector first and the connected computer last.

Note
- The DDC "Plug and Play" function of this projector operates only when used in conjunction with a VESA DDC compatible computer.
Connecting to Video Equipment

The projector has a COMPUTER/COMPONENT terminal, an S-VIDEO terminal and a VIDEO terminal for video input. See the illustration below to connect with the audio-visual equipment. The image quality is highest in order of the component signal, the S-video signal and the video signal. If your audio-visual equipment has a component output terminal, use the COMPUTER/COMPONENT terminal (INPUT1) on the projector for video connection.

When using a 3 RCA (Component) to 15-pin D-sub cable

When using an S-video cable
When using a composite video cable

To video output terminal

To audio output terminal

ø3.5 mm minijack to RCA audio cable (commercially available)

Composite video cable (commercially available)

To AUDIO INPUT terminal

To INPUT3 terminal

Note

- ø3.5 mm minijack to RCA audio cable (commercially available) is required for audio input.

Connecting the Power Cord

Plug the supplied power cord into the AC socket on the side of the projector.
Turning the Projector On/Off

### Turning the Projector on

Before performing the steps in this section, connect any equipment that you use with the projector. (See pages 23, 24 and 25.) Also connect the power cord to the projector. (See page 25.)

Press \( \text{ON/STANDBY} \) on the projector or \( \text{ON/STANDBY} \) on the remote control.
- When the lamp is warming up, the Adjustment buttons blink in a clockwise direction. (When “Guide LEDs” is set to “On”.
- When System Lock is set, the keycode input box appears. Enter the right keycode to start projection. See page 49 for details.

**Note**
- About the Lamp Indicator
  - The lamp indicator lights up or blinks, indicating the status of the lamp.
    - **Green:** The lamp is ready.
    - **Blinking in green:** The lamp is warming up or shutting down.
    - **Red:** The lamp is shut down abnormally or the lamp should be replaced.

- When switching on the projector, a slight flickering of the image may be experienced within the first minute after the lamp has been illuminated. This is normal operation as the lamp's control circuitry is stabilising the lamp output characteristics. It should not be regarded as faulty operation.
- If the projector is put into standby mode and immediately turned on again, the lamp may take some time to start projection.

### Turning the Power off (Putting the Projector into Standby Mode)

1. Press \( \text{ON/STANDBY} \) on the projector or \( \text{ON/STANDBY} \) on the remote control, then press that button again while the confirmation message is displayed, to put the projector into standby mode.

2. Unplug the power cord from the AC outlet after the cooling fan stops.
  - When the projector is turned off, the Adjustment buttons blink in a counterclockwise direction. (When “Guide LEDs” is set to “On”.

**Info**
- English is the factory default language. If you want to change the on-screen display to another language, change the language according to the procedure on page 46.

- Do not unplug the power cord during projection or cooling fan operation. This can cause damage due to rise in internal temperature, as the cooling fan also stops.
Image Projection

About the Setup Guide

After turning on the projector, the Setup Guide screen appears to assist you with projector setup.

Guidance items
1 FOCUS
2 HEIGHT ADJUST
3 ZOOM

Adjust the projector by following the illuminated buttons or Setup Guide indicators.

Press ENTER to turn off the Setup Guide screen.

Note
- The Setup Guide screen automatically highlights the items in order of 1 FOCUS→2 HEIGHT ADJUST→3 ZOOM→4 ENTER.
- You can adjust the focus, height or zoom anytime you want, regardless of the selection on the Setup Guide.
- If you do not want to display the Setup Guide for the next time, set “Menu”→“SCR - ADJ”→“Setup Guide” to “Off”. (See page 45.)

Adjusting the Projected Image

1 Adjusting the Focus

You can adjust the focus with the focus ring on the projector.

Rotate the focus ring to adjust the focus while watching the projected image.
Image Projection (Continued)

2 Adjusting the Height

The height of the projector can be adjusted using the adjustment feet at the front and rear of the projector.

When the screen is in a higher position than the projector, the projection image can be made higher by adjusting the projector.

1. Lift the projector to adjust its height while pressing the HEIGHT ADJUST button.

2. Remove your hands from the HEIGHT ADJUST button of the projector after its height has been finely adjusted.
   - The projector is adjustable ±1 degree from the standard position.

3. Use the rear adjustment foot to make the projector level.
   - The angle of projection is adjustable up to 7.5 degrees from the surface on which the projector is placed.

Note
- When adjusting the height of the projector, trapezoidal distortion occurs. When “Auto Keystone” is set to “On”, keystone correction functions automatically to correct trapezoidal distortion. When you want to adjust the automatically corrected image, use the manual keystone correction. (See page 44.)

Info
- Do not apply too much pressure on the projector when the front adjustment foot comes out.
- When lowering the projector, be careful not to get your fingers caught in the area between the adjustment foot and the projector.

3 Adjusting the Screen Size

You can adjust the screen size using the zoom knob on the projector.
Switching the Input Mode

Select the appropriate input mode for the connected equipment.

Press INPUT 1, INPUT 2 or INPUT 3 on the remote control to select the input mode.
- When pressing INPUT (△/▽) on the projector, input mode switches in order of INPUT1→INPUT2→INPUT3.
- When “Auto Search” is set to “On”, INPUT (△/▽) on the projector functions as the Auto Search buttons. (See page 47.)

Adjusting the Volume

Press ▲/▽ on the remote control or ◄/► on the projector to adjust the volume.

Note
- Pressing ▲/▽ will lower the volume.
- Pressing ◄/► will raise the volume.

Displaying the Black Screen and Turning off the Sound Temporarily

Press AV MUTE on the remote control to temporarily display a black screen and turn off the sound.

Note
- Pressing AV MUTE again will turn the projected image back on.
Resize Mode

This function allows you to modify or customize the resize mode to enhance the input image. Depending on the input signal, you can choose "NORMAL", "BORDER" or "STRETCH" image.

Press \( \text{RESIZE} \).

* See page 43 for setting on menu screen.

- Area on which the image is not included in the original signals.
Adjusting/Operating with the Remote Control

Auto Sync (Auto Sync Adjustment)

Auto Sync function works when detecting input signal after the projector turns on.
Press AUTO SYNC to manually adjust with Auto Sync function.

Note
- When the optimum image cannot be achieved with Auto Sync adjustment, use the help menu for manual adjustments. (See page 51.)

Freezing a Moving Image

1. Press FREEZE.
   • The projected image is frozen.

2. Press FREEZE again to return to the moving image from the currently connected device.

Selecting the Picture Mode

You can select the suitable picture mode for the projected image, such as movie or video game.

Press PICTURE MODE.
- When pressing PICTURE MODE, the picture mode changes in order of Standard—Presentation—Cinema—Game

Note
- See page 40 for details on the picture mode.
Using Mouse Function

When connecting the projector and computer with the USB terminals, you can use the remote control as the computer mouse.

1. Connect the projector and the computer with the supplied RGB/USB cable.

2. Use the mouse functions.
   - MOUSE/Adjustment button (▲/▼/◄/►) functions to move cursor.
   - L CLICK button functions as the left click.
   - R CLICK button functions as the right click.
   - L CLICK and R CLICK have common function when your computer supports only a one-click mouse, such as Macintosh.

Note
- You cannot use this function when displaying the menu screen.
Menu Items

The following shows the items that can be set in the projector.

**“Picture” menu**

- Vertical stripes or flickering image appear
  - Auto Sync
  - Adjust vertical noise
  - Adjust horizontal noise
- Data image is not centered
  - Auto Sync
  - H-Pos
  - V-Pos
- Color is faded or poor
  - INPUT 1
    - Signal type: Auto/RGB/Component
    - Video System: Auto/PAL/S E C A M
    - NTSC3.58/NTSC4.375/NTSC4.43/PAL-M/PAL-N/PAL-60
  - INPUT 2 or INPUT 3
    - Video System: Auto/PAL
  - INPUT 4
    - Video System: Auto/PAL
  - Old Code
  - New Code
  - Reconfirm

* The selectable items vary depending on the input signal and the selected input mode.
Using the Menu Screen

The menu can be operated to achieve two functions, adjustment and setting. (For setting the menu items, see pages 38 and 39.)

Operating with the projector
When “PRJ - ADJ” - “Guide LEDs” is set to “On”, the buttons used for menu adjustment on the projector light up.

Example: When △, ▽ and the MENU/HELP button light up on the projector, you can use those buttons for operation.

![Menu Screen Diagram]

Menu Selections (Adjustments)

Example: Adjusting “Bright”.
- This operation can also be performed by using the buttons on the projector.

1. Press  MENU.
   - The “Picture” menu screen for the selected input mode is displayed.

2. Press ◀ or ▶ to display the other menu screen.
   - The selected menu item is highlighted.

![Menu Item Table]

Example: “Picture” screen menu for INPUT 1 (RGB) mode

Menu item
- Contrast
- Bright
- Red
- Blue
- CLR Temp
- Bright Boost
- sRGB
- Reset
3 Press ▲ or ▼ to select the item you want to adjust.
- The selected item is highlighted.

To adjust the projected image while watching it
Press □ ENTER.
- The selected single adjustment item (e.g., “Bright”) appears instead of the menu.
- When pressing ▲ or ▼, the following item (“Red” after “Bright”) will be displayed.

Note
- Press □ ENTER to return to the previous screen.

4 Press ◀ or ▶ to adjust the item selected.
- The adjustment is stored.

5 Press □ MENU.
- The menu screen will disappear.

Note
- Press □ RETURN to return to the previous screen when the menu is displayed.
Using the Menu Screen (Continued)

The menu can be operated to achieve two functions, adjustment and setting. (For adjusting the menu items, see pages 36 and 37.)

Menu Selections (Settings)

Example: Setting “Background”.
• This operation can also be performed by using the buttons on the projector.

1 Press MENU.  
• The “Picture” menu screen for the selected input mode is displayed.

2 Press ◄ or ► to display the other menu screen.  
• The selected menu item is highlighted.

Example: “Picture” screen menu for INPUT 1 (RGB) mode
3 Press ▲ or ▼ to select the item you want to set, and then press ◄ ENTER or ► to display the sub menu.  
• The selected item is highlighted.

Note  
• Press ◄ RETURN or ◄ to return to the previous screen.

4 Press ▲ or ▼ select the setting of the item displayed in the sub menu.

5 Press ◄ ENTER.

6 Press ◄ MENU.  
• The menu screen will disappear.
You can adjust the projector’s picture to your preferences using the “Picture” menu.

### Selecting the Picture mode

![Menu operation → Page 38](image)

**Example: “Picture” screen menu for INPUT 1 (RGB) mode**

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
<td>For standard image</td>
</tr>
<tr>
<td>Presentation</td>
<td>Brightens darker portions of image for more enhanced presentations.</td>
</tr>
<tr>
<td>Cinema</td>
<td>Gives greater depth to darker portions of image for a more exciting theater experience.</td>
</tr>
<tr>
<td>Game</td>
<td>For natural color gradation for playing a game, etc.</td>
</tr>
</tbody>
</table>

**Note**

- You can also press PICTURE MODE on the remote control to select the picture mode. (See page 32.)

### Adjusting the Image

![Menu operation → Page 36](image)

**Example: “Picture” screen menu for INPUT 1 (RGB) mode**

- **Adjustment Items**
  - Contrast: For less contrast.
  - Bright: For less brightness.
  - Red*: For weaker red.
  - Blue*: For weaker blue.
  - Color*: For less color intensity.
  - Tint**: For making skin tones purplish.
  - Sharp**: For less sharpness.

- **Note**
  - To reset all adjustment items, select “Reset” and press ENTER.

- *1 Not adjustable/selectable when you set “sRGB” menu item to “On”, or the input signal is component.
- *2 Not displayed in the RGB input mode.
**Adjusting the Color Temperature**

Menu operation ➔ Page 36

Example: “Picture” screen menu for INPUT 1 (RGB) mode

- Values on “CLR Temp” are only for general standard purposes.
- “CLR Temp” cannot be set when “sRGB” is set to “On”.

**Description of Items**

<table>
<thead>
<tr>
<th>Selectable Items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5500K</td>
<td>For lower color temperature for warmer, reddish incandescent-like images.</td>
</tr>
<tr>
<td>6500K</td>
<td></td>
</tr>
<tr>
<td>7500K</td>
<td></td>
</tr>
<tr>
<td>8500K</td>
<td></td>
</tr>
<tr>
<td>9300K</td>
<td></td>
</tr>
<tr>
<td>10500K</td>
<td>For higher color temperature for cooler, bluish, fluorescent-like images.</td>
</tr>
</tbody>
</table>

**Emphasizing the Contrast**

This function emphasizes the bright portions of images to obtain a higher contrast image.

Menu operation ➔ Page 38

Example: “Picture” screen menu for INPUT 1 (RGB) mode

- When using this function, the image color may become pale or the tint may be inappropriate.
- “Bright Boost” cannot be set when “sRGB” is set to “On”.

**Note**

- When using this function, the image color may become pale or the tint may be inappropriate.
- “Bright Boost” cannot be set when “sRGB” is set to “On”.

**Description of Items**

- Contrast
- Bright
- Red
- Blue
- CLR Temp
- Bright Boost
- sRGB
- Reset
Progressive

Menu operation ➔ Page 38

Example: “Picture” screen menu for INPUT 2 mode

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2D Progressive</td>
<td>Useful to display fast-moving images such as sports and action films.</td>
</tr>
<tr>
<td>3D Progressive</td>
<td>Useful to display relatively slow-moving images such as drama and documentary more clearly.</td>
</tr>
<tr>
<td>Film Mode</td>
<td>Reproduces the image of film source* clearly. Displays the optimized image of film transformed with three-two pull down (NTSC and PAL60Hz) or two-two pull down (PAL50Hz and SECAM) enhancement to progressive mode images.</td>
</tr>
</tbody>
</table>

* The film source is a digital video recording with the original encoded as is at 24 frames/second. The projector can convert this film source to progressive video at 60 frames/second with NTSC and PAL60Hz or at 50 frames/second with PAL50Hz and SECAM to play back a high-definition image.

sRGB Setting

Menu operation ➔ Page 38

Example: “Picture” screen menu for INPUT 1 (RGB) mode

- An international standard of color reproduction regulated by the IEC (International Electrotechnical Commission). As the fixed color area has been decided by the IEC, the images are displayed in a natural tint based on an original image, when “sRGB” is set to “ON”.
- For additional information about the sRGB function, visit “http://www.srgb.com/”.
- You cannot set the items, “Red”, “Blue”, “CLR Temp”, “Bright Boost”, when “sRGB” is set to “On”.

Note

- In NTSC or PAL60Hz, even if the 3D Progressive mode has been set, the three-two pull down enhancement will be enabled automatically when the film source has been entered.
- When the image is blurred or noisy, switch to the optimal mode.
- When using progressive inputs, inputs are directly displayed so that 2D Progressive, 3D Progressive and Film Mode cannot be selected.

Info

- When “sRGB” is set to “On”, the projected image may become dark, but this does not indicate a malfunction.
Adjusting the Projected Image ("SCR - ADJ" menu)

You can adjust the projected image and on-screen display to your preferences using the "SCR - ADJ" menu.

Setting the Resize Mode

Menu operation ➔ Page 38

<table>
<thead>
<tr>
<th>Picture</th>
<th>SCR - ADJ</th>
<th>PRJ - ADJ</th>
<th>Help</th>

<td></td>
</tr>
<tr>
<td>PRJ Mode</td>
<td>Front</td>
<td>Front</td>
<td></td>
</tr>
<tr>
<td>Language</td>
<td>English</td>
<td>English</td>
<td></td>
</tr>
</tbody>
</table>

SEL / ADJ ➔ ENTER ➔ END

Note
- For details of the Resize mode, see pages 30 and 31.
- You can also press RESIZE on the remote control to set the resize mode. (See page 30.)

Adjusting the Image Position

You can move the projected image vertically.

Menu operation ➔ Page 36

Menu operation ➔ Page 38

Note
- You cannot set this item when "Resize" is set to "Normal".
- To reset this function, select "0".
- When adjusting the image shift, "Keystone" is set to "0" and "Auto Keystone" is set to "Off".

![Diagram showing image shift adjustments]
### Keystone Correction

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. The function for correcting trapezoidal distortion is called Keystone Correction.

**Auto Keystone Correction**

Set “Auto Keystone” on the “SCR - ADJ” menu to “On”.

Menu operation ➔ Page 38

**Manual Keystone Correction**

Set “Auto Keystone” on the “SCR - ADJ” menu to “Off”, and select “Keystone”, then adjust with the slide bar.

Menu operation ➔ Page 36

---

### Setting On-screen Display

This function allows you to turn the on-screen messages on or off.

Menu operation ➔ Page 38

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>On</strong></td>
<td>All On-screen Displays are displayed.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>INPUT/VOLUME/AV MUTE/FREEZE/AUTO SYNC/RESIZE/PICTURE MODE/“An invalid button has been pressed.” are not displayed.</td>
</tr>
</tbody>
</table>

---

### Manual Correction

- The Keystone Correction can be adjusted up to an angle of approximately ±13 degrees with the “Auto Keystone” and up to an angle of approximately ±15 degrees with the manual “Keystone”.
- When the screen is slanting or the image is deteriorated, set “Auto Keystone” to “Off”.
- When adjusting the keystone or when “Auto Keystone” is set to “On”, “Image Shift” is automatically set to “0”.

---

**Note**

- When adjusting the keystone, use the slide bar to correct the keystone.

<td>On</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Note

- This function is factory preset to “Off”.
- When “Eco/Quiet Mode” is set to “On”, the power consumption will decrease and the lamp life will extend. (Projection brightness decreases 10%.)

Auto Search Function

This function automatically searches for and switches to the input mode in which signals are being received, when the projector is turned on, or when the INPUT button is pressed.

Menu operation ➔ Page 38

Note

When “Auto Search” is set to “On”

- The projector automatically selects the available input source.
- If two or more input signals are found, the projector selects the input source in the order of INPUT 1 ➔ INPUT 2 ➔ INPUT 3 when you press INPUT (△/▽) on the projector.
- While “Auto Search” is set to “On”, press INPUT 1, INPUT 2 or INPUT 3 on the remote control to select an input mode other than the input mode selected by the projector.
- When “Auto Search” is set to “Off”, input mode switches in order of INPUT1 ➔ INPUT2 ➔ INPUT3 by pressing INPUT (△/▽) on the projector.
Setting the Projector Function (‘‘PRJ - ADJ’’ menu)  (Continued)

**Auto Power Off Function**

*Menu operation ➔ Page 38*

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>The indicators for operation guidance and the buttons for operation light up.</td>
</tr>
<tr>
<td>Off</td>
<td>No indicators or buttons for operation guidance blinks or lights up.</td>
</tr>
</tbody>
</table>

**Note**

- When the Auto Power Off function is set to “On”, 5 minutes before the projector enters standby mode, the message “Enter STANDBY mode in X min.” will appear on the screen to indicate the remaining minutes.
System Lock Function

This function prevents unauthorized use of the projector. Once this function is activated, users must enter the correct keycode each time the projector is turned on. We suggest you record the keycode in a safe place where only authorized users have access.

**Info**
- If you lose or forget your keycode, contact your nearest Sharp Authorized Projector Dealer or Service Center (see page 62). Even if the product warranty is valid, the keycode reset will incur a charge.

Menu operation ➔ Page 38

Setting/Changing the keycode

1. **Press the 4 buttons on the remote control or on the projector to enter the preset keycode in “Old Code”**.
   - When setting the keycode for the first time, press ▼ on the projector for four times.

2. **Press the 4 buttons on the remote control or on the projector to enter the new keycode in “New code”**.

   **Note**
   - You can not use the following buttons for keycode:
     - ON/STANDBY
     - ENTER
     - RETURN
     - MENU/HELP
   - System lock function recognizes each button on the remote control or on the projector as an individual button, even if they share the same button name. If you set the keycode with the buttons on the projector, use only those buttons on the projector. If you set the keycode with the buttons on the remote control, use only those buttons on the remote control.

3. **Enter the same keycode in “Reconfirm”**.

   **Note**
   - If you input a wrong keycode, the cursor returns to the first point of the “Old Code”.
   - The preset keycode is 4 ▼ buttons on the projector. When this keycode is set, the keycode input screen does not appear.

   ![Setting the System Lock](image)

   ![Input screen for keycode](image)
Setting the Projector Function (“PRJ - ADJ” menu) (Continued)

Setting the Confirmation Sound

You can confirm the cumulative lamp usage time and the remaining lamp usage time (percentage).

Menu operation ➔ Page 38

<table>

</tr>
<tr>
<td>Operated exclusively in Eco/Quiet Mode “Off”</td>
<td>Approx. 3,000 hours</td>
</tr>
</tbody>
</table>

Note

- It is recommended that the lamp be changed when the remaining lamp life becomes 5%. For lamp replacement, contact your nearest Sharp Authorized Projector Dealer or Service Center.
- The lamp life may vary depending on the usage condition.
Troubleshooting with “Help” menu

This function advises you to solve the problems during usage.

Displaying “Help” menu screen

Example: When image flickering appears
Operation to solve image flickering when projecting the computer RGB signal.

1. Press [MENU/HELP].

2. Press ◄ or ► to select “Help”, then press [ENTER].

3. Press ▲ or ▼ to select “Vertical stripes or flickering image appears” on Help menu, then press [ENTER].

5. If the image is not improved, select “Adjust horizontal noise.”, then press [ENTER].

6. Press ◄ or ► to adjust.

Note
- You can adjust the items with check marks (✔).
- Some items in the Help menu may not appear, depending on the projected image.
- If the problem is not solved, refer to “Troubleshooting”. (see pages 60 and 61)
Maintenance

Cleaning the projector
■ Be sure to unplug the power cord before cleaning the projector.
■ The cabinet as well as the operation panel is made of plastic. Avoid using benzene or thinner, as these can damage the finish on the cabinet.
■ Do not use volatile agents such as insecticides on the projector.
Do not attach rubber or plastic items to the projector for long periods. The effects of some of the agents in the plastic may cause damage to the quality or finish of the projector.

Cleaning the lens
■ Use a commercially available blower or lens cleaning paper (for glasses and camera lenses) for cleaning the lens. Do not use any liquid type cleaning agents, as they may wear off the coating film on the surface of the lens.
■ As the surface of the lens can easily get damaged, be sure not to scrape or hit the lens.

Cleaning the exhaust and intake vents
■ Use a vacuum cleaner to clean dust from the exhaust vent and the intake vent.

Wipe off dirt gently with a soft flannel cloth.
■ When the dirt is hard to remove, soak a cloth in a mild detergent diluted with water, wring the cloth well and then wipe the projector.
Strong cleaning detergents may discolor, warp or damage the coating on the projector. Make sure to test on a small, inconspicuous area on the projector before use.
Maintenance Indicators

- The warning lights (ON/STANDBY button, lamp indicator and temperature warning indicator) on the projector indicate problems inside the projector.
- If a problem occurs, either the temperature warning indicator or the lamp indicator will illuminate red, and the projector will enter standby mode. After the projector has entered standby mode, follow the procedures given below.

### About the lamp indicator

- When the remaining lamp life becomes 5% or less, (yellow) and “Change The Lamp” will be displayed on the screen. When the percentage becomes 0%, it will change to (red), the lamp will automatically turn off and then the projector will automatically enter standby mode. At this time, the lamp indicator will illuminate in red.
- If you try to turn on the projector a fourth time without replacing the lamp, the projector will not turn on.

### About the temperature warning indicator

If the temperature inside the projector increases, due to blockage of the air vents, or the setting location, will illuminate in the lower left corner of the picture. If the temperature keeps on rising, the lamp will turn off and the temperature warning indicator will blink, the cooling fan will run, and then the projector will enter standby mode. After appears, be sure to perform the measures described on page 54.
If the temperature warning indicator illuminates, and the projector enters standby mode, follow the possible solutions above and then wait until the projector has cooled down completely before plugging in the power cord and turning the power back on. (At least 10 minutes.)

If the power is turned off for a brief moment due to power outage or some other cause while using the projector, and the power supply recovers immediately after that, the lamp indicator will illuminate in red and the lamp may not be lit. In this case, unplug the power cord from the AC outlet and then connect it again.

If you want to clean the air vents during projector operation, be sure to press ON/STANDBY on the projector or ON/STANDBY on the remote control and put the projector into standby mode. After the cooling fan has stopped, clean the vents.

The cooling fan keeps the internal temperature of the projector constant and this function is controlled automatically. The sound of the cooling fan may change during operation because the fan speed may change and this is not a malfunction.

Do not unplug the power cord after the projector has entered standby mode and while the cooling fan is running. The cooling fan runs for about 90 seconds.

---

**Info**

- The cooling fan keeps the internal temperature of the projector constant and this function is controlled automatically. The sound of the cooling fan may change during operation because the fan speed may change and this is not a malfunction.
- Do not unplug the power cord after the projector has entered standby mode and while the cooling fan is running. The cooling fan runs for about 90 seconds.
Regarding the Lamp

**Lamp**
- It is recommended that the lamp (sold separately) be replaced when the remaining lamp life becomes 5% or less, or when you notice a significant deterioration in the picture and color quality. The lamp life (percentage) can be checked with the on-screen display. (see page 50)
- Purchase a replacement lamp of type AN-XR1LP from your place of purchase, nearest Sharp Projector Dealer or Service Center.

**Caution Concerning the Lamp**
- This projector utilizes a pressurized mercury lamp. A loud sound may indicate lamp failure. Lamp failure can be attributed to numerous sources such as: excessive shock, improper cooling, surface scratches or deterioration of the lamp due to a lapse of usage time. The period of time up to failure largely varies depending on the individual lamp and/or the condition and the frequency of use. It is important to note that failure can often result in the bulb cracking.
- When the lamp replacement indicator and on-screen display icon are illuminated, it is recommended that the lamp be replaced with a new one immediately, even if the lamp appears to be operating normally.
- Should the lamp break, there is also a possibility that glass particles may spread inside of the projector. In such a case, it is recommended you contact your nearest Sharp Authorized Projector Dealer or Service Center to assure safe operation.
- Should the lamp break, the glass particles may spread inside the lamp cage or gas contained in the lamp may be vented into the room from the exhaust vent. Because the gas in this lamp includes mercury, ventilate the room well if the lamp breaks and avoid all exposure to the released gas. In case of exposure to the gas, consult a doctor as soon as possible.

**Replacing the Lamp**
- Do not remove the lamp unit from the projector right after use. The lamp will be very hot and may cause burn or injury.
- Carefully change the lamp by following the instructions described in this section. *If you wish, you may have the lamp replaced at your nearest Sharp Authorized Projector Dealer or Service Center.
* If the new lamp does not light after replacement, take your projector to the nearest Sharp Authorized Projector Dealer or Service Center for repair.

**IMPORTANT NOTE TO U.S. CUSTOMERS:**
The lamp included with this projector is backed by a 90-day parts and labor limited warranty. All service of this projector under warranty, including lamp replacement, must be obtained through a Sharp Authorized Projector Dealer or Service Center. For the name of the nearest Sharp Authorized Projector Dealer or Service Center, please call toll-free: 1-888-GO-SHARP (1-888-467-4277).

Hg LAMP CONTAINS MERCURY For State Lamp Disposal Information
www.lamprecycle.org or 1-800-BE-SHARP
Removing and Installing the Lamp Unit

• Be sure to remove the lamp unit using the handle. Be sure not to touch the glass surface of the lamp unit or the inside of the projector.
• To avoid injury to yourself and damage to the lamp, be sure to carefully follow the steps below.
• Do not loosen other screws except for the lamp unit cover and lamp unit.

Press ON/STANDBY on the projector or ON/STANDBY on the remote control to put the projector into standby mode.
• Wait until the cooling fan stops.

Warning!
• Do not remove the lamp unit from the projector right after use. The lamp and parts around the lamp will be very hot and may cause burns or injury.

1 Press ON/STANDBY on the projector or ON/STANDBY on the remote control to put the projector into standby mode.
• Wait until the cooling fan stops.

2 Disconnect the power cord.
• Unplug the power cord from the AC socket.
• Leave the lamp until it has fully cooled down (about 1 hour).

3 Remove the lamp unit cover.
• Turn the projector over. Loosen the user service screw (①) that secures the lamp unit cover. Remove the lamp unit cover (②).
Remove the lamp unit.
• Loosen the securing screws from the lamp unit. Hold the lamp unit by the handle and pull it in the direction of the arrow. At this time, keep the lamp unit horizontal and do not tilt it.

Insert the new lamp unit.
• Press the lamp unit firmly into the lamp unit compartment. Fasten the securing screws.

Replace the lamp unit cover.
• Align the tab on the lamp unit cover (1) and place it while pressing the tab (2) to close it. Then tighten the user service screw (3) to secure the lamp unit cover.

Resetting the Lamp Timer
Reset the lamp timer after replacing the lamp.

Info
• If the lamp unit and lamp unit cover are not correctly installed, the power will not turn on, even if the power cord is connected to the projector.

Connect the power cord.
• Plug the power cord into the AC socket of the projector.

Reset the lamp timer.
• While simultaneously holding down MENU, ENTER and \( \text{\textup{\textdegree}} \) on the projector, press and \( \text{\textup{\textdegree}} \text{ON/STANDBY} \) on the projector.
• “LAMP 0000H” is displayed, indicating that the lamp timer is reset.

### Note

- This projector may not be able to display images from notebook computers in simultaneous (CRT/LCD) mode. Should this occur, turn off the LCD display on the notebook computer and output the display data in “CRT only” mode. Details on how to change display modes can be found in your notebook computer's operation manual.
- When this projector receives 640 × 350 VESA format VGA signals, “640 × 400” appears on the screen.

## Specifications

<table>
<thead>
<tr>
<th>Product type</th>
<th>Projector</th>
</tr>
</thead>
<tbody>
<tr>
<td>Model</td>
<td>XR-1X / XR-1S</td>
</tr>
</tbody>
</table>

### Video system

### Display method
- Single Chip Digital Micromirror Device™ (DMD™) by Texas Instruments

### Lens
- [XR-1X] 1–1.16 × zoom lens, F2.80–3.10, f = 25.8–30.0 mm
- [XR-1S] 1–1.16 × zoom lens, F2.60–2.84, f = 19.8–23.2 mm

### Projection lamp
- 150 W DC lamp

### Component input signal
- 

### Horizontal resolution
- [XR-1X] 700 TV lines (DTV720P)
- [XR-1S] 520 TV lines (DTV720P)

### Computer RGB input signal
- 15-pin mini D-sub connector

### S-video input signal
- 15-pin mini D-sub connector

### Video input signal
- RCA connector: VIDEO, composite video, 1.0 Vp-p, sync negative, 75 Ω terminated

### Audio input signal
- a3.5 mm minijack: AUDIO, 0.5 Vrms, more than 22 kΩ (stereo)

### Speaker system
- 2.8 cm round × 1

### Rated voltage
- AC 100–240 V

### Input current
- 2.0 A

### Rated frequency
- 50/60 Hz

### Power consumption
- 195 W (Standard mode)/177 W (Eco/ Quiet mode “On”) with AC 100 V
- 190 W (Standard mode)/167 W (Eco/ Quiet mode “On”) with AC 240 V

### Power consumption (standby)
- 4 W (AC 100 V) – 5 W (AC 240 V)

### Heat dissipation
- 730 BTU/hour (Standard mode)/660 BTU/hour (Eco/ Quiet mode “On”) with AC 100 V
- 710 BTU/hour (Standard mode)/630 BTU/hour (Eco/ Quiet mode “On”) with AC 240 V

### Operating temperature
- 41°F to 95°F (+5°C to +35°C)

### Storage temperature
- 14°F to 140°F (–20°C to +60°C)

### Cabinet
- Plastic

### I/R carrier frequency
- 38 kHz

### Dimensions (approx.)
- 9 3/4” x 2 3/8” x 2 17/32” x 4 3/4” (247 (W) x 64 (H) x 122 (D) mm) (main body only)
- 9 3/4” x 2 3/8” x 2 17/32” x 4 3/4” (247 (W) x 64 (H) x 122 (D) mm) (including adjustment foot and projecting parts)

### Weight (approx.)
- 3.20 lbs. (1.45 kg)

### Supplied accessories
- Remote control, Lithium battery, Power cord for U.S., Canada etc. (6’, 1.8 m), Power cord for Europe, except U.K. (6’, 1.8 m), Power cord for U.K., Hong Kong and Singapore (QACCA015WJPZ), Power cord for Australia, New Zealand and Oceania (6’, 1.8 m), RGB/USB cable (6’, 1.8 m), Cable tie × 2, Soft case, Projector manual CD-ROM, Operation manual

### Replacement parts
- Lamp unit (Lamp/cage module) (AN-XR1LP), Remote control (RRMCGA256WJSA), Lithium battery, Power cord for U.S., Canada etc. (QACCCA029WJPZ), Power cord for Europe, except U.K. (QACCA006WJPZ), Power cord for U.K., Hong Kong and Singapore (QACCA015WJPZ), Power cord for Australia, New Zealand and Oceania (QACCLA024WJPZ), RGB/USB cable (QCNWGA047WJPZ), Cable tie (UBNDTA015WJZZ), Soft case (GCASNA011WJZZ), Projector manual CD-ROM (UDSKAA045WJN1), Operation manual (TINS-B148WJN1)
