IMPORTANT

• For your assistance in reporting the loss or theft of your Projector, please record the Model and Serial Number located on the bottom of the projector and retain this information.

• Before recycling the packaging, please ensure that you have checked the contents of the carton thoroughly against the list of “Supplied accessories” on page 11.

Model No.: 
Serial No.:
SPECIAL NOTE FOR USERS IN THE U.K.
The mains lead of this product is fitted with a non-rewireable (moulded) plug incorporating a 10A fuse. Should the fuse need to be replaced, a BSI or ASTA approved BS 1362 fuse marked ☐ or ☐ and of the same rating as above, which is also indicated on the pin face of the plug, must be used. Always refit the fuse cover after replacing the fuse. Never use the plug without the fuse cover fitted. In the unlikely event of the socket outlet in your home not being compatible with the plug supplied, cut off the mains plug and fit an appropriate type.

DANGER:
The fuse from the cut-off plug should be removed and the cut-off plug destroyed immediately and disposed of in a safe manner. Under no circumstances should the cut-off plug be inserted elsewhere into a 13A socket outlet, as a serious electric shock may occur. To fit an appropriate plug to the mains lead, follow the instructions below:

WARNING:
THIS APPARATUS MUST BE EARTHED.

IMPORTANT:
The wires in this mains lead are coloured in accordance with the following code:
- Green-and-yellow : Earth
- Blue : Neutral
- Brown : Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
• The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ☐ or coloured green or green-and-yellow.
• The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
• The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

IF YOU HAVE ANY DOUBT, CONSULT A QUALIFIED ELECTRICIAN.
The supplied CD-ROM contains operation instructions in English, German, French, Spanish, Italian, Dutch, Swedish, Portuguese, Chinese and Korean. Carefully read through the operation instructions before operating the projector.

---

---

Le CD-ROM fourni contient les instructions de fonctionnement en anglais, allemand, français, espagnol, italien, néerlandais, suédois, portugais, chinois et coréen. Veuillez lire attentivement ces instructions avant de faire fonctionner le projecteur.

---

Den medföljande CD-ROM-skivan innehåller bruksanvisningar på engelska, tyska, franska, spanska, italienska, holländska, svenska, portugisiska, kinesiska och koreanska. Läs noga igenom bruksanvisningen innan projektorn tas i bruk.

---

El CD-ROM suministrado contiene instrucciones de operación en inglés, alemán, francés, español, italiano, holandés, sueco, portugués, chino y coreano. Lea cuidadosamente las instrucciones de operación antes de utilizar el proyector.

---

Il CD-ROM in dotazione contiene istruzioni per l’uso in inglese, tedesco, francese, spagnolo, italiano, olandese, svedese, portoghese, cinese ecoreano. Leggere attentamente le istruzioni per l’uso prima di usare il proiettore.

---

---

O CD-ROM fornecido contém instruções de operação em Inglês, Alemão, Francês, Espanhol, Italiano, Holandês, Sueco, Português, Chinês e Coreano. Leia cuidadosamente todas as instruções de operação antes de operar o projetor.

---

附送之CD-ROM光碟中，有用英文、德文、法文、西班牙文、意大利文、荷蘭文、瑞典文、葡萄牙文、中文和韓國文所寫的使用說明書。在操作本投影機之前，請務必仔細閱讀整本使用說明書。

---

 제공된 CD-ROM에는 영어, 독일어, 프랑스어, 스페인어, 이탈리아어, 네덜란드어, 스웨덴어, 포르투갈어, 중국어, 그리고 한국어로 작성된 조작 설명서가 포함되어 있습니다. 프로젝터를 조작하기 전에 조작 지침을 상세하게 숙지하십시오.
There are two important reasons for prompt warranty registration of your new SHARP Projector, using the REGISTRATION CARD packed with the projector.

1. **WARRANTY**
   This is to assure that you immediately receive the full benefit of the parts, service and labor warranty applicable to your purchase.

2. **CONSUMER PRODUCT SAFETY ACT**
   To ensure that you will promptly receive any safety notification of inspection, modification, or recall that SHARP may be required to give under the 1972 Consumer Product Safety Act, PLEASE READ CAREFULLY THE IMPORTANT "LIMITED WARRANTY" CLAUSE.

---

**WARNING:** High brightness light source. Do not stare into the beam of light, or view directly. Be especially careful that children do not stare directly into the beam of light.

**WARNING:** To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

---

**WARNING:** FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user’s authority to operate this equipment.

---

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk or electric shock to persons.

The exclamation point within a triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
INFORMATION
This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the operation manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

The enclosed computer cable must be used with the device. The cable is provided to ensure that the device complies with FCC Class A verification.

WARNING:
This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

PRODUCT DISPOSAL
This product utilizes tin-lead solder, and lamp containing a small amount of mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities, the Electronics Industries Alliance: www.eiae.org, the lamp recycling organization www.lamprecycle.org, or Sharp at 1-800-BE-SHARP.

Caution Concerning Lamp Replacement
See “Replacing the Lamp” on page 57.

This SHARP projector uses a DLP® chip. This very sophisticated panel contains 1,024,000 pixels (micromirrors). As with any high technology electronic equipment such as large screen TVs, video systems and video cameras, there are certain acceptable tolerances that the equipment must conform to.
This unit has some inactive pixels within acceptable tolerances which may result in inactive dots on the picture screen. This will not affect the picture quality or the life expectancy of the unit.

SHARP ELECTRONICS (Europe) GmbH
Sonnenstraße 3, D-20097 Hamburg
How to Read this Operation Manual

- The specifications are slightly different, depending on the model. However, you can connect and operate all models in the same manner.
- In this operation manual, the illustration and the screen display are simplified for explanation, and may differ slightly from the actual display.

Using the Menu Screen

Menu Selections (Adjustments)

Example: Adjusting “Bright”.
- This operation can also be performed by using the buttons on the projector.

1. Press MENU/HELP. The “Picture” menu screen for the selected input mode is displayed.
2. Press ▲ or ▼ and select “Picture” to adjust.

On-screen display

CAUTION: Please read all of these instructions before you operate this product and save these instructions for later use.

Electrical energy can perform many useful functions. This product has been engineered and manufactured to assure your personal safety. BUT IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARDS. In order not to defeat the safeguards incorporated in this product, observe the following basic rules for its installation, use and servicing.

1. Read Instructions
   All the safety and operating instructions should be read before the product is operated.

2. Retain Instructions
   The safety and operating instructions should be retained for future reference.

3. Heed Warnings
   All warnings on the product and in the operating instructions should be adhered to.

4. Follow Instructions
   All operating and use instructions should be followed.

5. Cleaning
   Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

6. Attachments
   Do not use attachments not recommended by the product manufacturer as they may cause hazards.

7. Water and Moisture
   Do not use this product near water—for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool; and the like.

8. Accessories
   Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.

9. Transportation
   A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

10. Ventilation
    Slots and openings in the cabinet are provided for ventilation to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.

11. Power Sources
    This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

12. Grounding or Polarization
    This product is provided with one of the following types of plugs. If the plug should fail to fit into the power outlet, please contact your electrician. Do not defeat the safety purpose of the plug.
    a. Two-wire type (mains) plug.
    b. Three-wire grounding type (mains) plug with a grounding terminal.
    This plug will only fit into a grounding type power outlet.

13. Power-Cord Protection
    Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

14. Lightning
    For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power-line surges.
15. Overloading
Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

16. Object and Liquid Entry
Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

17. Servicing
Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Damage Requiring Service
Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   a. When the power-supply cord or plug is damaged.
   b. If liquid has been spilled, or objects have fallen into the product.
   c. If the product has been exposed to rain or water.
   d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
   e. If the product has been dropped or damaged in any way.
   f. When the product exhibits a distinct change in performance, this indicates a need for service.

19. Replacement Parts
When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

20. Safety Check
Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. Wall or Ceiling Mounting
This product should be mounted to a wall or ceiling only as recommended by the manufacturer.

22. Heat
This product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

• All other company or product names are trademarks or registered trademarks of their respective companies.
• Some IC chips in this product include confidential and/or trade secret property belonging to Texas Instruments. Therefore you may not copy, modify, adapt, translate, distribute, reverse engineer, reverse assemble or discompile the contents thereof.
Observe the following safeguards when setting up your projector.

**Caution concerning the lamp unit**
- Potential hazard of glass particles if lamp ruptures. In case of lamp rupture, contact your nearest Sharp Authorized Projector Dealer or Service Center for replacement. See “Replacing the Lamp” on page 57.

**Caution concerning the setup of the projector**
- For minimal servicing and to maintain high image quality, SHARP recommends that this projector be installed in an area free from humidity, dust and cigarette smoke. When the projector is subjected to these environments, the vents and lens must be cleaned more often. As long as the projector is regularly cleaned, use in these environments will not reduce the overall operation life of the unit. Internal cleaning should only be performed by a Sharp Authorized Projector Dealer or Service Center.

**Do not set up the projector in places exposed to direct sunlight or bright light.**
- Position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the screen in a sunny or bright room.

**Caution regarding placing of the projector**
- Place the projector on a level site within the adjustment range (8 degrees) of the adjustment foot.
- After the projector is purchased, a faint smell from the vent may appear when the power is first turned on. This is normal and is not a malfunction. It will disappear after the projector is used for a while.

**When using the projector in high-altitude areas such as mountains (at altitudes of approximately 1,500 meters (4,900 feet) or more)**
- When you use the projector in high-altitude areas with thin air, set “Fan Mode” to “High”. Neglecting this can affect the longevity of the optical system.

**Warning about placing the projector in a high position**
- When placing the projector in a high position, make certain it is carefully secure to avoid personal injury caused by the projector falling down.

**Do not subject the projector to hard impact and/or vibration.**
- Protect the lens so as not to hit or damage the surface of the lens.

**Rest your eyes occasionally.**
- Continuously watching the screen for long hours will cause eye strain. Take regular breaks to rest your eyes.

**Avoid locations with extremes of temperature.**
- The operating temperature of the projector is from 41°F to 95°F (+5°C to +35°C).
- The storage temperature of the projector is from –4°F to 140°F (–20°C to +60°C).

**Do not block the exhaust and intake vents.**
- Allow at least 11 13/16 inches (30 cm) of space between the exhaust vent and the nearest wall or obstruction.
- Ensure that the intake vent and the exhaust vent are not obstructed.
- If the cooling fan becomes obstructed, a protection circuit will automatically put the projector into standby mode to prevent overheating damage. This does not indicate a malfunction. (See pages 55 and 56.) Remove the projector power cord from the wall outlet and wait at least 10 minutes. Place the projector where the intake and exhaust vents are not blocked, plug the power cord back in and turn on the projector. This will return the projector to the normal operating condition.
Caution regarding usage of the projector

■ If you are not to use the projector for a long time or before moving the projector, make certain you unplug the power cord from the wall outlet, and disconnect any other cables connected to it.
■ If the power cord is unplugged while the cooling fan is running, some parts of the projector may still be hot. Use caution when handling the projector.
■ Do not carry the projector by holding the lens.
■ When storing the projector, ensure you attach the lens cap to the projector. (See page 12.)
■ Do not expose the projector to direct sunlight or place next to heat sources. Doing so may affect the cabinet color or cause deformation of the plastic cover.

Other connected equipment

■ When connecting a computer or other audio-visual equipment to the projector, make the connections AFTER unplugging the power cord of the projector from the AC outlet and turning off the equipment to be connected.
■ Please read the operation manuals of the projector and the equipment to be connected for instructions on how to make the connections.

Using the projector in other countries

■ The power supply voltage and the shape of the plug may vary depending on the region or country you are using the projector in. When using the projector overseas, make sure you use an appropriate power cord for the country you are in.

Temperature monitor function

■ If the projector starts to overheat due to setup problems or blockage of the air vents, “  and “ TEMP. ” will illuminate in the lower left corner of the picture. If the temperature continues to rise, the lamp will turn off, the temperature warning indicator on the projector will blink, and after a 60-second cooling-off period the projector will enter standby mode. Refer to “Maintenance Indicators” on page 55 for details.

Info

• The cooling fan regulates the internal temperature, and its performance is automatically controlled. The sound of the fan may change during projector operation due to changes in the fan speed. This does not indicate malfunction.
• Even if you unplug the power cord after projector operation, the cooling fan continues to run for a while.
How to Access the PDF Operation Manuals

PDF operation manuals in several languages are included in the CD-ROM. To utilize these manuals, you need to install Adobe® Reader® on your computer (Windows® or Macintosh®).

Please download Adobe® Reader® from the Internet (http://www.adobe.com).

Accessing the PDF Manuals

For Windows®:
1. Insert the CD-ROM in the CD-ROM drive.
2. Double click the “My Computer” icon.
3. Double click the “CD-ROM” drive.
4. **When you want to view the operation manual**
   1) Double click the “MANUALS” folder.
   2) Double click the language (name of the folder) that you want to view.
   3) Double click the pdf file to access the projector manuals.

For Macintosh®:
1. Insert the CD-ROM in the CD-ROM drive.
2. Double click the “CD-ROM” icon.
3. **When you want to view the setup manual**
   1) Double click the “MANUALS” folder.
   2) Double click the language (name of the folder) that you want to view.
   3) Double click the pdf file to access the projectors manuals.

**Note**
- If the desired pdf file cannot be opened by double clicking the mouse, start Adobe® Reader® first, then specify the desired file using the “File”, “Open” menu.

**SETUP MANUAL**

Refer to the “SETUP MANUAL” contained on the supplied CD-ROM for details.

Part Names and Functions

Numbers in refer to the main pages in this operation manual where the topic is explained.

**Projector**

**Top View**
- **Power indicator**
- **Lamp indicator**
- **Temperature warning indicator**
- **VOL (Volume) buttons (−/+/−)**
  For adjusting the speaker sound level.
- **INPUT buttons (⌜/⌟)**
  For switching input mode.
- **MENU/HELP button**
  For displaying adjustment and setting screens, and help screen.
- **Adjustment buttons (▲/▼/◄/►)**
  For selecting menu items.

**STANDBY/ON button**
For turning the power on and putting the projector into standby mode.

**ENTER button**
For setting items selected or adjusted on the menu.

**KEYSTONE button**
For entering the Keystone Correction mode.

**Front View**
- **Focus ring**
  For adjusting the focus.
- **Zoom ring**
  For enlarging/reducing the picture.
- **Remote control sensor**
- **HEIGHT ADJUST lever**
  Push both sides of the lens cap to attach or remove.

Push both sides of the lens cap to attach or remove.
Numbers in □ refer to the main pages in this operation manual where the topic is explained.

**Rear View**

**Terminals**

MONITOR OUT terminal (Output terminal for computer RGB, component and DVI analog signals. Shared for COMPUTER/COMPONENT and DVI-I)
Terminal for connecting a monitor.

DVI-I input terminal
Terminal for DVI digital, computer RGB, and component signals.

COMPUTER/COMPONENT input terminal
Terminal for computer RGB and component signals.

AUDIO 1 input terminal

AUDIO OUT terminal
Audio output terminal of equipment connected to the audio input terminal.

RS-232C terminal
Terminal for controlling the projector using a computer.

AC socket
Connect the supplied power cord.

Rear adjustment foot

Using the Kensington Lock
• This projector has a Kensington Security Standard connector for use with a Kensington MicroSaver Security System. Refer to the information that came with the system for instructions on how to use it to secure the projector.
**Part Names and Functions (Continued)**

**STANDBY button**
For putting the projector into the standby mode.

**ON button**
For turning the power on.

**FREEZE button**
For freezing images.

**COMPUTER, DVI, S-VIDEO, VIDEO buttons**
For switching to the respective input modes.

**BREAK TIMER button**
For displaying the break time.

**AV MUTE button**
For temporarily displaying a black screen and turning off the sound.

**PAGE UP/PAGE DOWN buttons**
Same as the [Page Down] and [Page Up] keys on a computer keyboard, when with the USB connection (using a USB cable or the optional remote receiver).

**PAGE UP/PAGE DOWN buttons**
For switching to the respective input modes.

**SPOT button**
For displaying the spotlight.

**MOUSE/Adjustment buttons (△/▼/◄/►)**
- For moving the computer cursor when with the USB connection (using a USB cable or the optional remote receiver).
- For selecting and adjusting menu items.

**ENTER button**
For setting items selected or adjusted on the menu.

**MENU/HELP button**
For displaying adjustment and setting screens, and help screen.

**RESIZE button**
For switching the picture size (NORMAL, STRETCH, etc.).

**PICTURE MODE button**
For selecting the appropriate picture.

**L-CLICK button**
For the Left click when with the USB connection (using a USB cable or the optional remote receiver).

**R-CLICK/RETURN button**
- For the Right click when with the USB connection (using a USB cable or the optional remote receiver).
- For returning to the previous menu screen during menu operations.

**KEYSTONE button**
For entering the Keystone Correction mode.

**AUTO SYNC button**
For automatically adjusting images when connected to a computer.

**ECO+QUIET button**
For lowering the noise of the cooling fan and extending the lamp life.

**STANDBY button**
For putting the projector into the standby mode.

**BREAK TIMER button**
For displaying the break time.

**MAGNIFY buttons**
For enlarging/reducing part of the image.
Inserting the Batteries

1. Pull down the tab on the cover and remove the cover towards the direction of the arrow.

2. Insert the batteries.
   - Insert the batteries making sure the polarities correctly match the + and − marks inside the battery compartment.

3. Insert the lower tab of the cover into the opening, and lower the cover until it clicks in place.

Incorrect use of the batteries may cause them to leak or explode. Please follow the precautions below.

⚠️ Caution

- Danger of explosion if battery is incorrectly replaced. Replace only with alkaline or manganese batteries.
- Insert the batteries making sure the polarities correctly match the + and − marks inside the battery compartment.
- Batteries of different types have different properties, therefore do not mix batteries of different types.
- Do not mix new and old batteries. This may shorten the life of new batteries or may cause old batteries to leak.
- Remove the batteries from the remote control once they have run out, as leaving them in can cause them to leak. Battery fluid from leaked batteries is harmful to skin, therefore ensure you wipe them first and then remove them using a cloth.
- The batteries included with this projector may run down in a short period, depending on how they are kept. Be sure to replace them as soon as possible with new batteries.
- Remove the batteries from the remote control if you will not be using the remote control for a long time. Comply with the rules (ordinance) of each local government when disposing of worn-out batteries.

Usable Range

The remote control can be used to control the projector within the ranges shown in the illustration.

 precaution

- The signal from the remote control can be reflected off a screen for easy operation. However, the effective distance of the signal may differ depending on the screen material.

When using the remote control

- Ensure that you do not drop it or expose it to moisture or high temperature.
- The remote control may malfunction under a fluorescent lamp. In this case, move the projector away from the fluorescent lamp.
Quick Start

This section shows the basic operation (projector connecting with the computer). For details, see the page described below for each step.

Setup and Projection

In this section, connection of the projector and the computer is explained using one example.

1. Place the projector facing a wall or a screen ➤ P. 18

2. Connect the projector to the computer and plug the power cord into the AC socket of the projector

When connecting equipment other than a computer, see pages 22 and 23. ➤ PP. 21, 24, 25

3. Remove the lens cap and turn the projector on ➤ P. 26
Quick Start

4. Adjust the projected image with the Setup Guide

1. After the projector turns on, the Setup Guide appears.
   (When “Setup Guide” is set to “On”. See page 45.)

2. Follow the steps in the Setup Guide and adjust the focus, picture size, and height (angle).

3. After adjusting the focus, height (angle) and picture size, press ENTER to finish the Setup Guide.

5. Correct trapezoidal distortion

Correcting trapezoidal distortion using Keystone Correction.

On the projector

On the remote control

Shrinks upper side.

Shrinks lower side.

6. Select the INPUT mode

Select the “COMPUTER” using INPUT on the projector or COMPUTER on the remote control.

On the projector

On the remote control

INPUT list

On-screen display (RGB)

• When you press INPUT on the projector, the INPUT list appears. Press ▲/▼ to switch the INPUT mode.

7. Turn the computer on

8. Turn the power off

Press STANDBY/ON on the projector or STANDBY on the remote control, and then press the button again while the confirmation message is displayed to put the projector into standby mode.
Setting up the Projector

For optimal image quality, position the projector perpendicular to the screen with the projector's feet flat and level. Doing so will eliminate the need for Keystone correction and provide the best image quality. (See page 29.)

Standard Setup (Front Projection)
- Place the projector at the required distance from the screen according to the desired picture size. (See page 20.)

Example of standard setup

Side View

![Diagram of standard setup]

Note
- Refer to page 20 for additional information concerning “Screen Size and Projection Distance”.

Ceiling-mount Setup
- It is recommended that you use the optional Sharp ceiling-mount adaptor and unit for this installation. Before mounting the projector, contact your nearest Sharp Authorized Projector Dealer or Service Center to obtain the recommended ceiling-mount adaptor and unit (sold separately).
**Projection (PRJ) Mode**

The projector can use any of the 4 projection modes shown in the diagram below. Select the mode most appropriate for the projection setting in use. (You can set the PRJ mode in “SCR-ADJ” menu. See page 45.)

- **Table mounted, front projection**
  [Menu item → “Front”]

- **Ceiling mounted, front projection**
  [Menu item → “Ceiling + Front”]

- **Table mounted, rear projection**
  (with a translucent screen)
  [Menu item → “Rear”]

- **Ceiling mounted, rear projection**
  (with a translucent screen)
  [Menu item → “Ceiling + Rear”]

**Indication of the Projection Image Size and Projection Distance**

χ: Picture size (diag.) (in/cm)
L: Projection distance (m/ft)
L1: Minimum projection distance (m/ft)
L2: Maximum projection distance (m/ft)
H: Distance from the lens center to the bottom of the image (cm/in)

The formula for picture size and projection distance

\[
\begin{align*}
L_1 (ft) & = 0.02952 \chi / 0.3048 \\
L_2 (ft) & = 0.03408 \chi / 0.3048 \\
H (in) & = 0.10828 \chi / 2.54
\end{align*}
\]

### Note
- Refer to page 18 concerning “Projection distance [L]” and “Distance from the lens center to the bottom of the image [H]”.
- Allow a margin of error in the values in the diagrams above.
Connecting the Projector to Other Equipment

Before connecting, ensure that the power cord of the projector is unplugged from the AC outlet and turn off the equipment to be connected. After making all connections, turn on the projector and then the other pieces of equipment. When connecting a computer, ensure that it is the last equipment to be turned on after all the connections are made.

**IMPORTANT:**
Ensure that the appropriate input mode has been selected on the projector before you turn on the connected equipment.

- For more details of connection and cables, refer to the operation manual of the connecting equipment.
- You may need other cables or connectors not listed below.

## Terminals on the Projector

![Terminal Diagram]

<table>
<thead>

<td>DVI-I</td>
</tr>
<tr>
<td></td>
<td>DVI digital output terminal</td>
<td>DVI Digital cable (commercially available)</td>
<td></td>
</tr>
</tbody>
</table>

**Note**
- See page 61 “Computer Compatibility Chart” for a list of computer signals compatible with the projector. Use with computer signals other than those listed may cause some of the functions to not work.
- A Macintosh adaptor may be required for use with some Macintosh computers. Contact your nearest Macintosh Dealer.
- Depending on the computer you are using, an image may not be projected unless the computer’s external output port is switched on (e.g. Press “Fn” and “F5” keys simultaneously when using a SHARP notebook computer). Refer to the specific instructions in your computer’s operation manual to enable your computer’s external output port.
## Connecting the Projector to Other Equipment (Continued)

<td>Video output terminal</td>
<td>Cables for a camera or a video game</td>
<td>VIDEO</td>
</tr>
</tbody>
</table>

**Note**

- While the projector is connected to video equipment that has an HDMI output terminal, only the video signal can be input to the projector. (Connect the AUDIO input terminal for audio input.)
- Depending on specifications of video equipment or HDMI to DVI digital cable, the signal transmission may not work properly. (The HDMI specification does not support all connections to video equipment that has HDMI digital output terminal using HDMI to DVI digital cable.)
- For details on compatibility for connection, see support information on DVI connection provided by the video equipment manufacturer.
- When you connect video equipment with a 21-pin RGB output (Euro-scart) to the projector, use a commercially available cable that fits in the projector terminal you want to connect.
- The projector does not support RGBC signals via the Euro-scart.

</tr>
</tbody>
</table>

**Note**

- When using the ø3.5 mm mono audio cable, the volume level will be half of when using the ø3.5 mm stereo audio cable.
- You can select “Audio 1” or “Audio 2” for “Audio Input” in the “PRJ-ADJ” menu. (See page 47.)
- RGB signals and Component signals can be output to the monitor.
Controlling the Projector by a Computer

When the RS-232C terminal on the projector is connected to a computer with a DIN-D-sub RS-232C adaptor and an RS-232C serial control cable (cross type, commercially available), the computer can be used to control the projector and check the status of the projector. Refer to the “SETUP MANUAL” contained on the supplied CD-ROM for “RS-232C Specifications and Commands”.

When connecting to a computer using an RS-232C serial control cable and a DIN-D-sub RS-232C adaptor

![Diagram showing the connection between the projector and computer using RS-232C terminal, DIN-D-sub RS-232C adaptor, and RS-232C serial control cable.]

**Note**
- The RS-232C function may not operate if your computer terminal is not correctly set up. Refer to the operation manual of the computer for details.
- Refer to pages 2 to 8 of the “SETUP MANUAL” contained on the supplied CD-ROM for “Connecting Pin Assignments” and “RS-232C Specifications and Commands”.

**Info**
- Do not connect the RS-232C cable to a port other than the RS-232C terminal on the computer. This may damage your computer or projector.
- Do not connect or disconnect an RS-232C serial control cable to or from the computer while it is on. This may damage your computer.
When connecting to the LAN terminal using a LAN cable

- **TX/RX LED (yellow)**
  Illuminates when transmitting/receiving data.
- **LINK LED (green)**
  Illuminates when linked.

* To ensure safety, do not connect the LAN terminal with any cables that may cause excessive voltage such as a telephone line.

**Note**
- When connecting to a hub, use a straight-through Category 5 (CAT.5) type cable (commercially available).
- When connecting to a computer, use a cross-over Category 5 (CAT.5) type cable (commercially available).

---

**Connecting the Power Cord**

Plug the supplied power cord into the AC socket on the rear of the projector. Then plug into AC outlet.
Turning the Projector On/Off

Turning the Projector on

Note that the connections to external equipment and power outlet should be done before performing the operations written below. (See pages 21 to 25.)

Remove the lens cap and press **STANDBY/ON** on the projector or **ON** on the remote control.
- The power indicator illuminates green.
- After the lamp indicator illuminates, the projector is ready to start operation.

**Note**
- **About the Lamp Indicator**
  The lamp indicator illuminates to indicate the status of the lamp.
  - **Green**: The lamp is on.
  - **Blinking in green**: The lamp is warming up.
  - **Red**: The lamp is shut down abnormally or the lamp should be replaced.
- When switching on the projector, a slight flickering of the image may be experienced within the first minute after the lamp has been illuminated. This is normal operation as the lamp's control circuitry is stabilising the lamp output characteristics. It should not be regarded as faulty operation.
- If the projector is put into standby mode and immediately turned on again, the lamp may take some time to start projection.
- When System Lock is set, the keycode input box appears. To cancel the keycode setting, input the keycode that you have already set. See page 47 for details.

Turning the Power off (Putting the Projector into Standby Mode)

Press **STANDBY/ON** on the projector or **STANDBY** on the remote control, then press that button again while the confirmation message is displayed, to put the projector into standby mode.
- The projector cannot be turned on while cooling.

**Info**
- **When “Auto Restart” is set to “On”**: If the power cord is unplugged from the outlet or the breaker switch is turned off when the projector is on, then the projector automatically turns on when the power cord is plugged into the AC outlet or the breaker switch is turned on. (See page 46.)
- English is the factory default language. If you want to change the on-screen display to another language, change the language according to the procedure on page 45.

**Info**
- **Direct Power Off function**: You can unplug the power cord from the AC outlet even if the cooling fan is still running.
- Even if you unplug the power cord after projector operation, the cooling fan continues to run for a while.
Image Projection

About the Setup Guide

After turning on the projector, the Setup Guide screen appears to assist you with projector setup.

Guidance items
1 FOCUS
2 HEIGHT ADJUST
3 ZOOM

Press ENTER to exit the Setup Guide screen.

Note
- The Setup Guide screen automatically highlights the items in the following order:
  1 FOCUS ➔ 2 HEIGHT ADJUST
  4 ENTER ← 3 ZOOM

However, you can adjust the focus, height (angle), or zoom regardless of the highlighted item.
- If you do not want to display the Setup Guide for the next time, set “Menu” - “SCR - ADJ” - “Setup Guide” to “Off”. (See page 45.)

Adjusting the Projected Image

1 Adjusting the Focus
You can adjust the focus with the focus ring on the projector.

Rotate the focus ring to adjust the focus while watching the projected image.

2 Adjusting the Picture Size
You can adjust the picture size using the zoom ring on the projector.

Rotate the zoom ring to enlarge or shrink the picture size.
3 Adjusting the Height

The height of the projector can be adjusted using the adjustment feet at the front and rear of the projector. When the screen is above the projector, the projection image can be made higher by adjusting the projector.

1 Lift the projector to adjust its height while lifting the HEIGHT ADJUST lever.

2 Remove your hands from the HEIGHT ADJUST lever of the projector after its height has been finely adjusted.
   - The angle of projection is adjustable up to 8 degrees from the surface on which the projector is placed.

3 Use the rear adjustment foot to make the projector level.
   - The projector is adjustable ±1 degree from the standard position.

Note
- When adjusting the height of the projector, trapezoidal distortion occurs. Follow the procedures in Keystone Correction to correct the distortion. (See pages 29 and 44.)

Info
- Do not apply too much pressure on the projector when the front adjustment foot comes out.
- When lowering the projector, be careful not to get your fingers caught in the area between the adjustment foot and the projector.
- Hold the projector firmly while lifting or carrying.
- Do not hold by the lens area.
Correcting Trapezoidal Distortion

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. The function for correcting trapezoidal distortion is called Keystone Correction.

Note
- The Keystone Correction can be adjusted up to an angle of approximately ±40 degrees and the screen can also be set up to an angle of approximately ±40 degrees (when the resize mode is set to “NORMAL” (see page 31)).

Press KEYSTONE to enter the Keystone Correction mode.
- You can also display the on-screen display of the Keystone Correction mode with KEYSTONE on the projector.

Press ▲/▶ or ▼/◄ to adjust the Keystone Correction.
- You can also adjust the Keystone Correction using the adjustment buttons on the projector.

Note
- To return to the default setting, press RETURN while the on-screen display of the Keystone Correction mode is on the screen.

Press KEYSTONE.
- The on-screen display of the Keystone Correction mode will disappear.
- You can also use KEYSTONE on the projector.

About the Auto Keystone Correction
- The projector automatically detects tilt and the AUTO KEYSTONE feature automatically corrects trapezoidal distortion.

Info
- While adjusting the image using Keystone Correction, straight lines and the edges of the image may appear jagged.

Note
- Automatic Keystone Correction may not work well in some cases, such as when the screen is leaning, temperature is extremely high or low, or zoom is at maximum or minimum. In these cases, fine adjust the Keystone Correction following steps 1 to 3.
- You can select “On” or “Off” for the Auto Keystone Correction mode. (See page 44.)

On-screen display (Keystone Correction mode)

Adjustment buttons (▲/▼/◄/▶)

RETURN button

KEYSTONE button

Shrinks upper side. (Move the slide bar in the + direction.)

Shrinks lower side. (Move the slide bar in the - direction.)
Image Projection (Continued)

Switching the Input Mode

Select the appropriate input mode for the connected equipment.

Press COMPUTER, DVI, S-VIDEO or VIDEO on the remote control to select the input mode.
• When you press INPUT on the projector or DVI on the remote control, the INPUT list appears. Press ▲/▼ to switch the INPUT mode.

Adjusting the Volume

Press VOL +/- on the remote control or –◄/►+ on the projector to adjust the volume.

Note
• Pressing VOL–◄ will lower the volume.
• Pressing VOL+/► will raise the volume.
• When the projector is connected to external equipment, the volume level of the external equipment changes in accordance with the volume level of the projector. Set the projector’s volume to the lowest level when turning the projector on/off or when changing the input signal.
• When you do not want to output the sound from the projector’s speaker while the projector is connected to external equipment, set “Speaker” in “PRJ-ADJ” menu to “Off”. (See page 46.)

Displaying the Black Screen and Turning off the Sound Temporarily

Press AV MUTE on the remote control to temporarily display a black screen and turn off the sound.

Note
• Pressing AV MUTE again will turn the projected image back on.
Resize Mode

This function allows you to modify or customize the resize mode to enhance the input image. Depending on the input signal, you can choose a desired image.

Press RESIZE.
• See page 44 for setting on menu screen.

---

### About Copyrights
- When using the RESIZE function to select an image size with a different aspect ratio to a TV program or video image, the image will look different from its original appearance. Keep this in mind while choosing an image size.
- The use of the Resize or Keystone Correction function to compress or stretch the image for commercial purposes/public displays in a café, hotel, etc. may be an infringement of copyright protected by law for copyright holders. Please use caution.
- While watching non-widescreen images (4:3), if you use the RESIZE function to fill the screen, parts of the outer edge of the image will be cut off or distorted. To watch original images as the producers intended, set RESIZE to “NORMAL”.

---

*32*
Operating with the Remote Control

Displaying the Pointer

1. Press **POINTER** and press **△/▼/◄/►** on the remote control to move the pointer.
2. Press **POINTER** again. • The pointer will disappear.

Using the Spot Function

1. Press **SPOT** and press **△/▼/◄/►** on the remote control to move the spot area.
2. Press **SPOT** again. • The spot area will disappear.

Switching the Eco+Quiet Mode

Press **ECO+QUIET** to switch the Eco+Quiet mode between on and off.
• When the Eco+Quiet Mode is set to “ON”, the sound of the cooling fan will turn down, the power consumption will decrease, and the lamp life will extend.

Note
• Refer to “Lamp Setting” on page 43 for details of the Eco+Quiet mode.

![Remote Control Diagram]

Displaying and Setting the Break Timer

1. Press **BREAK TIMER**. • The timer starts to count down from 5 minutes.
   On-screen display
   ![Break Timer Display]

2. Press **△/▼/◄/►** to adjust the length of the break time.
   • Increases with △ or ►
     5 minutes → 6 minutes → 60 minutes
   • Shortens with ▼ or ◄
     4 minutes → 3 minutes → 1 minute
   • The break time can be set in units of one minute (up to 60 minutes).

Canceling the break timer display function
Press **BREAK TIMER**.

Note
• Break Timer does not function while the projector is operating the “Auto Sync”, “FREEZE” or “AV MUTE” functions.
Auto Sync (Auto Sync Adjustment)

Auto Sync function works when detecting input signal after the projector turns on. Press AUTO SYNC to manually adjust with Auto Sync function.

Note
• When the optimum image cannot be achieved with Auto Sync adjustment, use the help menu for manual adjustments. (See page 51.)

Freezing a Moving Image

1 Press FREEZE.
• The projected image is frozen.

2 Press FREEZE again to return to the moving image from the currently connected device.

Selecting the Picture Mode

You can select the appropriate picture mode for the projected image, such as movie or video game.

Press PICTURE MODE.
• When pressing PICTURE MODE, the picture mode changes in the following order:
  STANDARD ➔ PRESENTATION ➔ MOVIE ➔ GAME ➔ sRGB *

Note
• See page 41 for details on the picture mode.
* “sRGB” is displayed only when RGB signal is input.

Displaying an Enlarged Portion of an Image

Graphs, tables and other portions of projected images can be enlarged. This is helpful when providing more detailed explanations.

1 Press ( MENU) on the remote control.
• Enlarges the image.
• Pressing ( MENU) or ( MENU) enlarges or reduces the projected image.

Note
Press ( MENU).

×1 ➔ ×2 ➔ ×3 ➔ ×4

Press ( MENU).
• You can change the location of the enlarged image using ▲, ▼, ◄ and ►.

2 Press RETURN on the remote control to cancel the operation.
• The magnification then returns to ×1.

Note
• The selectable magnifications differ depending on the input signal.
• In the following cases, the image will return to the normal size (×1).
  - When switching the INPUT mode.
  - When RETURN has been pressed.
  - When the input signal is changed.
  - When the input signal resolution and refresh rate (vertical frequency) change.
  - When the Resize mode is changed.
  - When the Picture mode is changed.
  - When the Progressive mode is changed.
Using the Remote Control as the Wireless Computer Mouse

When connecting the projector and the computer with a USB cable, you can use the remote control as the computer mouse.

If the computer is placed too far away from the projector to be connected via the USB cable, the remote receiver (optional, AN-MR2) makes it possible to operate the projector with the remote control. For details, see the operation manual of the receiver.

Connecting with a USB cable

The mouse pointer can be operated in the following way after it is connected.

- **When moving the cursor**
  Press MOUSE/Adjustment buttons (▲/▼/◄/►).

- **When left-clicking**
  Press L-CLICK.

- **When right-clicking**
  Press R-CLICK.

- **When your computer supports only a one-click mouse (such as Macintosh)**
  Press L-CLICK or R-CLICK. L-CLICK and R-CLICK have common function.

- **When using [Page Up] or [Page Down]**
  Same as the [Page Up] and [Page Down] keys on a computer keyboard. Press PAGE UP or PAGE DOWN.

Note
- This function only works with the Microsoft® Windows® OS and Mac OS®. However, this function does not work with the following operation systems that do not support USB.
  - Versions earlier than Windows® 95
  - Versions earlier than Windows® NT4.0
  - Versions earlier than Mac OS® 8.5
- You cannot use this function when displaying the menu screen.
- Confirm that the computer recognizes the USB connection.
The following shows the items that can be set in the projector.

Useful Features
Using the Menu Screen (Continued)

3 Press ▲ or ▼ and select “Bright” to adjust.
   • The selected item is highlighted.

   To adjust the projected image while watching it
Press ENTER.
   • The selected item (e.g. “Bright”) is displayed by itself at the bottom of the screen.
   • When pressing ▲ or ▼, the following item (“Red” after “Bright”) will be displayed.

   Note
   • Press ENTER again to return to the previous screen.

4 Press ◄ or ► to adjust the item selected.
   • The adjustment is stored.

5 Press MENU/HELP.
   • The menu screen will disappear.

   Note
   • Menu buttons do not function while the projector is operating the “Auto Sync”, “Break Timer”, “FREEZE”, or “AV MUTE” functions.
Picture Adjustment (“Picture” Menu)

1 Selecting the Picture Mode

<table>
<thead>
<tr>
<th>Selectable Items</th>

</tr>
<tr>
<td>Game</td>
<td>Gives sharpness to the projected image.</td>
<td>0, 1, Bright</td>
</tr>
<tr>
<td>*sRGB</td>
<td>For high fidelity reproduction of images from a computer.</td>
<td>–, –, Bright</td>
</tr>
</tbody>
</table>

• “sRGB” is displayed only when RGB signal is input.
• You can set or adjust each item in the “Picture” menu to your preference. Any changes you make are retained in memory.

Note

- You can also press PICTURE MODE on the remote control to select the picture mode. (See page 34.)
- *sRGB is an international standard of color reproduction regulated by the IEC (International Electrotechnical Commission). As the fixed color area has been decided by the IEC, the images are displayed in a natural tint based on an original image, when "sRGB" is selected.
  For additional information about the sRGB function, visit "http://www.srgb.com/". You cannot set the items, “Red”, “Blue”, “CLR Temp”, “BrilliantColor™”, when “sRGB” is selected.

Info

- When “sRGB” is selected, the projected image may become dark, but this does not indicate a malfunction.

<tr>
<td>Blue*2</td>
<td>For weaker blue.</td>
<td>For stronger blue.</td>
</tr>
<tr>
<td>BrilliantColor™<em>2</em>3</td>
<td>For making the effect weaker.</td>
<td>For making the effect stronger.</td>
</tr>
</tbody>
</table>

*1 Not displayed in the RGB input mode.
*2 Not adjustable/ selectable when selecting “sRGB”.
*3 BrilliantColor™ uses Texas Instruments’ BrilliantColor™ technology. As the BrilliantColor™ level is increased, the image becomes brighter while the color reproduction is kept at a high level.

### Note
- “Red”, “Blue”, “BrilliantColor™” and “CLR Temp” cannot be set when “sRGB” is selected.
- To reset all adjustment items, select “Reset” and press ENTER.

### ③ Adjusting the Color Temperature

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>−1</td>
<td>For lower color temperature for warmer, reddish incandescent-like images.</td>
</tr>
<tr>
<td>0</td>
<td>For higher color temperature for cooler, bluish, fluorescent-like images.</td>
</tr>
<tr>
<td>1</td>
<td>For higher color temperature for cooler, bluish, fluorescent-like images.</td>
</tr>
</tbody>
</table>

### Note
- Values on “CLR Temp” are only for general standard purposes.

### ④ Adjusting the Colors

This function adjusts each of the six main colors that comprise the color wheel, altering their “Hue”, “Saturation”, or “Value”.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C.M.S.-Hue</td>
<td>Sets the hue of the main colors.</td>
</tr>
<tr>
<td>C.M.S.-Saturation</td>
<td>Sets the saturation of the main colors</td>
</tr>
<tr>
<td>C.M.S.-Value</td>
<td>Sets the brightness of the main colors.</td>
</tr>
<tr>
<td>Reset</td>
<td>The adjustments of “Hue”, “Saturation” and “Value” of all colors are reset to the default setting.</td>
</tr>
</tbody>
</table>

#### Adjusting “Hue”, “Saturation”, or “Value”.
1. Select “On” for “C.M.S. Setting” in the “Picture” menu and then press ENTER.
2. Select “C.M.S.” in the “Picture” menu and then press ENTER.
3. Press ▲ or ▼ to select either “Hue”, “Saturation”, or “Value” and then press ENTER.
4. Select the color to be adjusted with ▲ or ▼ and adjust it with ◀ or ▶.

#### Example of adjusting the “Hue”

<table>
<thead>
<tr>
<th>Main colors</th>
<th>◀ button</th>
<th>▶ button</th>
</tr>
</thead>
<tbody>
<tr>
<td>R (Red)</td>
<td>Closer to magenta</td>
<td>Closer to yellow</td>
</tr>
<tr>
<td>Y (Yellow)</td>
<td>Closer to red</td>
<td>Closer to green</td>
</tr>
<tr>
<td>G (Green)</td>
<td>Closer to yellow</td>
<td>Closer to cyan</td>
</tr>
<tr>
<td>C (Cyan)</td>
<td>Closer to green</td>
<td>Closer to blue</td>
</tr>
<tr>
<td>B (Blue)</td>
<td>Closer to cyan</td>
<td>Closer to magenta</td>
</tr>
<tr>
<td>M (Magenta)</td>
<td>Closer to blue</td>
<td>Closer to red</td>
</tr>
</tbody>
</table>

- When “Saturation” is selected, the selected color becomes ◀: lighter. ▶: thicker.
- When “Value” is selected, the selected color becomes ◀: darker. ▶: brighter.
- To reset the adjustment values of each color to the default settings, select “Reset” and press ENTER.
### Progressive

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2D Progressive</td>
<td>Useful to display fast-moving images such as sports.</td>
</tr>
<tr>
<td>3D Progressive</td>
<td>Useful to display relatively slow-moving images such as drama and documentary more clearly.</td>
</tr>
<tr>
<td>Film Mode</td>
<td>Reproduces the image of film source* clearly. Displays the optimized image of film transformed with three-two pull down (NTSC and PAL60Hz) or two-two pull down (PAL50Hz and SECAM) enhancement to progressive mode images.</td>
</tr>
</tbody>
</table>

*The film source is a digital video recording with the original encoded as is at 24 frames/second. The projector can convert this film source to progressive video at 60 frames/second with NTSC and PAL60Hz or at 50 frames/second with PAL50Hz and SECAM to play back a high-definition image.

### Note
- In NTSC or PAL60Hz, even if the 3D Progressive mode has been set, the three-two pull down enhancement will be enabled automatically when the film source has been entered.
- When the image is blurred or noisy, switch to the optimal mode.
- When using progressive inputs, inputs are directly displayed so that 2D Progressive, 3D Progressive and Film Mode cannot be selected.

### Lamp Setting

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Brightness and Power consumption</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eco + Quiet</td>
<td>Approx. 80%</td>
</tr>
<tr>
<td>Bright</td>
<td>100%</td>
</tr>
</tbody>
</table>

### Note
- In the Eco + Quiet mode, the fan sound and power consumption are lower than those in the Bright mode. (Projection brightness decreases as shown in the chart.) The lamp life will be approximately 3,000 hours (approximately 2,000 hours in the Bright mode).
Adjusting the Projected Image ("SCR - ADJ" Menu)

### Setting the Resize Mode

**Note**
- For details of the Resize mode, see pages 31 and 32.
- You can also press RESIZE on the remote control to set the resize mode. (See page 31.)

### Adjusting the Image Position

You can move the projected image vertically.

**Note**
- This function only works in some RESIZE modes. (See pages 31 and 32.)

### Keystone Correction

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. The function for correcting trapezoidal distortion is called Keystone Correction.

**For Auto Keystone Correction**

Set “Auto Keystone” on the “SCR - ADJ" menu to “On”.

**For Manual Keystone Correction**

Set “Auto Keystone” on the “SCR - ADJ” menu to “Off”, select “Keystone”, and then adjust with the slide bar.

**Manual Correction**

See page 29 for details of Keystone Correction.

**Note**
- The Keystone Correction can be adjusted up to an angle of approximately ±40 degrees (when “Resize” is set to “Normal”).
- You can also press KEYSTONE on the remote control or on the projector to adjust Keystone Correction.
### ④ Setting the On-screen Display

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>All on-screen displays are displayed.</td>
</tr>
<tr>
<td>Off</td>
<td>INPUT/VOLUME/AV MUTE/FREEZE/AUTO SYNC/RESIZE/PICTURE MODE/ECO+QUIET/MAGNIFY/ “An invalid button has been pressed.” are not displayed.</td>
</tr>
</tbody>
</table>

### ⑦ Reversing/Inverting Projected Images

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Front</td>
<td>Normal image (Projected from the front of the screen)</td>
</tr>
<tr>

Adjusting the Projector Function ("PRJ - ADJ" Menu)

Menu operation ➔ Page 39

1. Auto Sync (Auto Sync Adjustment)

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Auto Sync adjustment will occur when the projector is turned on or when the input signals are switched, when connected to a computer.</td>
</tr>
<tr>
<td>Off</td>
<td>Auto Sync adjustment is not automatically performed.</td>
</tr>
</tbody>
</table>

Note
- Auto Sync adjustment is also performed by pressing AUTO SYNC on the remote control.
- The Auto Sync adjustment may take some time to complete, depending on the image of the computer connected to the projector.
- When the optimum image cannot be achieved with Auto Sync adjustment, use manual adjustments. (See page 51.)

2. Auto Power Off Function

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>When no input signal is detected for more than 15 minutes, the projector will automatically enter standby mode.</td>
</tr>
<tr>
<td>Off</td>
<td>The Auto Power Off function will be disabled.</td>
</tr>
</tbody>
</table>

Note
- When the Auto Power Off function is set to “On”, 5 minutes before the projector enters standby mode, the message “Enter STANDBY mode in X min.” will appear on the screen to indicate the remaining minutes.

3. Auto Restart Function

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>If the power cord is unplugged from the outlet or the breaker switch is turned off when the projector is on, then the projector automatically turns on when the power cord is plugged into the AC outlet or the breaker switch is turned on.</td>
</tr>
<tr>
<td>Off</td>
<td>The projector does not turn on automatically when the power cord is plugged into the AC outlet or the breaker switch is turned on.</td>
</tr>
</tbody>
</table>

4. STANDBY Mode

When set to “Eco”, power consumption is reduced in standby mode.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eco</td>
<td>The monitor output, RS-232C and Network functions are switched off in standby mode.</td>
</tr>
<tr>
<td>Standard</td>
<td>The monitor output, RS-232C and Network functions are activated even if the projector is in standby mode.</td>
</tr>
</tbody>
</table>

5. Setting the Confirmation Sound (System Sound)

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>A confirmation sound is made when the projector turns on/off.</td>
</tr>
<tr>
<td>Off</td>
<td>No confirmation sound is made.</td>
</tr>
</tbody>
</table>

6. Speaker Setting

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>The audio signal is output from the internal speaker.</td>
</tr>
<tr>
<td>Off</td>
<td>The audio signal is not output from the internal speaker.</td>
</tr>
</tbody>
</table>
Audio Input
This function allows you to select an appropriate combination of audio input terminals for each input mode.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audio 1</td>
<td>The AUDIO 1 input terminal is used as an audio input terminal.</td>
</tr>
<tr>
<td>Audio 2</td>
<td>The AUDIO 2 input terminal is used as an audio input terminal.</td>
</tr>
</tbody>
</table>

Selecting the Transmission Speed (RS-232C)
Make sure that both the projector and computer are set for the same baud rate.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>9600bps</td>
<td>Transmission speed is slow.</td>
</tr>
<tr>
<td>115200bps</td>
<td>Transmission speed is rapid.</td>
</tr>
</tbody>
</table>

Fan Mode Setting
This function changes the fan rotation speed.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Suitable for normal environments.</td>
</tr>
<tr>
<td>High</td>
<td>Select this when using the projector at altitudes of approximately 1,500 meters (4,900 feet) or more.</td>
</tr>
</tbody>
</table>

When “Fan Mode” is set to “High”, the fan rotation speeds up, and the fan noise becomes louder.

System Lock Function
This function prevents unauthorized use of the projector. Once this function is activated, users must enter the correct keycode each time the projector is turned on. **We suggest you record the keycode in a safe place where only authorized users have access.**

Info
- If you lose or forget your keycode, contact your nearest Sharp Authorized Projector Dealer or Service Center (see page 64). Even if the product warranty is valid, the keycode reset will incur a charge.

Setting/Changing the keycode

1. Select “System Lock”, then press ENTER or ►.
2. Select “Next”, then press ENTER.
   - The screen for entering the keycode appears.
3. Press the 4 buttons on the remote control or on the projector to enter the preset keycode in “Old Code”.
   - When setting the keycode for the first time, press ▼ on the projector for four times.
4. Press the 4 buttons on the remote control or on the projector to enter the new keycode in “New Code”.

Note
- You cannot use the following buttons for keycode: STANDBY/ON, ON, STANDBY, ENTER, L-CLICK, R-CLICK/RETURN and MENU/HELP.
- System lock function recognizes each button on the remote control or on the projector as an individual button, even if they share the same button name. If you used the buttons on the projector in setting your keycode, the keycode cannot be canceled with the remote control.
Adjusting the Projector Function (“PRJ - ADJ” Menu) (Continued)

5. Enter the same keycode in “Re-confirm”.

Note
To cancel the keycode that you have already set
• Press ▼ on the projector for four times in steps 4 and 5 above.
When the System Lock is set
• When System Lock is set, the keycode input screen appears after the power is turned on. When it appears, enter the right keycode to start projection.

Input screen for keycode

System Lock

11. Checking the Lamp Life Status

You can confirm the cumulative lamp usage time and the remaining lamp life (percentage).

<table>
<thead>
<tr>
<th>Lamp usage condition</th>
<th>Remaining lamp life</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Life”</td>
<td>100%</td>
</tr>
<tr>
<td>Operated exclusively with Lamp Setting set to “Eco +Quiet”</td>
<td>Approx. 3,000 hours</td>
</tr>
<tr>
<td>Operated exclusively with Lamp Setting set to “Bright”</td>
<td>Approx. 2,000 hours</td>
</tr>
</tbody>
</table>

Info
• It is recommended that the lamp be changed when the remaining lamp life becomes 5%.
• The lamp life may vary depending on the usage condition.

Keylock Function

Locking the Operation Buttons on the Projector
Use this function to lock the operation buttons on the projector.

■ Locking the Operation Buttons
Hold down ENTER on the projector for about 5 seconds while the projector is being turned on.

On-screen display

Keylock function ON
• The keylock function does not affect the operation with the remote control buttons.
• You cannot use the keylock function while the projector is warming up.

■ Taking the Keylock off
Hold down ENTER on the projector for about 5 seconds.

On-screen display

Keylock function OFF
• When the projector is in standby mode, you can release the keylock by holding down ENTER and STANDBY/ON on the projector simultaneously for about 5 seconds.

Info
• Keylock cannot be set while the projector is: displaying the “Setup Guide” or “Menu” screens, in standby mode, warming up, changing input signals, operating “Auto Sync” function, in “FREEZE” mode or on the “System Lock” screen during warming up.
Setting up the Projector Network Environment ("Network" menu)

Menu operation ➔ Page 39

### Setting a Password

If you do not want others to change the setting for the "Network" menu, set a password.

#### Setting a Password

1. **Select “Password”, then press ENTER or ▶.**
   - The screen for entering the password appears.

2. **Press ▲ or ▼ to set the first digit in “New Password”, then press ▶.**

3. **Enter the remaining 3 digits, then press ENTER.**
   - To return to the previous digit, press ◀.

4. **Enter the same password again in “Reconfirm”, then press ENTER.**
   - The status for “Password” changes to “Enable”.

#### Changing the Password

1. **Select “Password”, then press ENTER or ▶.**
   - The screen for entering the password appears.

2. **Enter the password in “Old Password” using ▲, ▼, ▶, and ◀, then press ENTER.**

3. **Enter the password in “New Password” using ▲, ▼, ▶, and ◀, then press ENTER.**

4. **Enter the same password again in “Reconfirm” using ▲, ▼, ▶, and ◀, then press ENTER.**

#### Note

- If you do not need the password protection for the “Network” menu settings anymore, press ENTER without entering new password in steps 3 and 4.
- To cancel the password settings, press RETURN.

### If you forget the password

If you forget the password, perform the following procedure to delete it, then set a new password.

**On the projector, press**

```
01 ➔ 02 ➔ 03 ➔ 03 ➔ 03 ➔ 03 ➔ RETURN.
```

#### Note

- If ENTER is held down for more than 5 seconds, the operation buttons on the projector will be locked. (See page 48.)
- You cannot use the buttons on the remote control to delete the password.
Setting up the Projector Network Environment ("Network" menu) (Continued)

② DHCP Client Setting

Connect the LAN cable before turning the projector on. If not, the DHCP Client function does not work.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Obtains configuration parameters for TCP/IP network automatically.</td>
</tr>
<tr>
<td>Off</td>
<td>Sets the TCP/IP manually.</td>
</tr>
</tbody>
</table>

Select “On” for “DHCP Client”. “Obtaining IP Address...” appears, then the menu screen appears. Confirm the parameters of IP Address, Subnet Mask and Gateway on the TCP/IP screen.

If the DHCP server is not available, “Could not obtain IP Address.” appears.

In this case, set the TCP/IP manually. (See the item ③.)

③ TCP/IP Setting

Set the TCP/IP manually.

1. Select “Off” for “DHCP Client”, then press ENTER.

2. Select “TCP/IP”, then press ENTER.

3. Enter “IP Address” using ▲, ▼, ▶ and ◄, then press ENTER.

4. Enter “Subnet Mask” using ▲, ▼, ▶ and ◄, then press ENTER.

5. Enter “Gateway” using ▲, ▼, ▶ and ◄, then press ENTER.

④ Confirming the Projector Information

You can confirm the MAC address and projector name.

<table>
<thead>
<tr>
<th>Displayed items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAC Address</td>
<td>The MAC address of the projector is displayed.</td>
</tr>
<tr>
<td>Projector</td>
<td>The projector name is displayed.</td>
</tr>
</tbody>
</table>

Note
- For information on how to change the projector name, see “SETUP MANUAL” contained in the supplied CD-ROM.
Troubleshooting with the “Help” Menu

This function advises you to solve the problems during usage.

Utilizing the “Help” Menu Functions

Example: When image flickering appears
Operation to solve image flickering when projecting the computer RGB signal.

1. Press MENU/HELP.

2. Press ▼ or ► to select “Help”, then press ENTER.

3. Press ▲ or ▼ to select “Vertical stripes or flickering image appears” on Help menu, then press ENTER.

   - Vertical stripes or flickering image appear
     ◦ There is no picture or audio
   - No Vertical stripes or flickering image appear
     ◦ Data image is not centered
     ◦ Color is faded or poor
     ◦ Picture is dark
     ◦ The image is distorted
     ◦ Reset all adjustments to default settings

   ✷ SEL. ➔ ENTER ➔ END
   Press ENTER.

4. Select “Initiate “Auto Sync” Adjustments”, then press ENTER.

5. If the image is not improved, select “Adjust horizontal noise”, then press ENTER.

6. Press ▼ or ► to adjust.

Note
- You can adjust the items with check marks (✔).
- The items in the “Help” menu change, depending on the input signal or setting that you have selected.
- If the problem is not solved, refer to “Troubleshooting” (see pages 62 and 63).
- When selecting “sRGB” in “Picture Mode”, the item “Color is faded or poor” is not displayed. This means you cannot change input signal types.
**Maintenance**

**Cleaning the projector**
- Ensure that you have unplugged the power cord before cleaning the projector.
- The cabinet as well as the operation panel is made of plastic. Avoid using benzene or thinner, as these can damage the finish on the cabinet.
- Do not use volatile agents such as insecticides on the projector. Do not attach rubber or plastic items to the projector for long periods. The effects of some of the agents in the plastic may cause damage to the quality or finish of the projector.
- Wipe off dirt gently with a soft flannel cloth.
- When the dirt is hard to remove, soak a cloth in a mild detergent diluted with water, wring the cloth well and then wipe the projector. Strong cleaning detergents may discolor, warp or damage the coating on the projector. Make sure to test on a small, inconspicuous area on the projector before use.

**Cleaning the lens**
- Use a commercially available blower or lens cleaning paper (for glasses and camera lenses) for cleaning the lens. Do not use any liquid type cleaning agents, as they may wear off the coating film on the surface of the lens.
- As the surface of the lens can easily get damaged, be careful not to scrape or hit the lens.

**Cleaning the exhaust and intake vents**
- Use a vacuum cleaner to clean dust from the exhaust vent and the intake vent.

---

**Maintenance**

**Cleaning the projector**

- Ensure that you have unplugged the power cord before cleaning the projector.

**Cleaning the lens**

- Use a commercially available blower or lens cleaning paper (for glasses and camera lenses) for cleaning the lens. Do not use any liquid type cleaning agents, as they may wear off the coating film on the surface of the lens.

**Cleaning the exhaust and intake vents**

- Use a vacuum cleaner to clean dust from the exhaust vent and the intake vent.

---

**Info**

- If you want to clean the air vents during projector operation, ensure you press **STANDBY/ON** on the projector or **STANDBY** on the remote control and put the projector into standby mode. After the cooling fan has stopped, clean the vents.
Cleaning the Dust Filters

Info
- The dust filters should be cleaned every 100 hours of use. Clean the filters more often when the projector is used in a dusty or smoky location.

1. Press STANDBY/ON on the projector to put the projector into standby mode.
   - Wait until the cooling fan stops.
   - Disconnect the power cord and unplug the power cord from the AC socket.

2. Remove the filter holders.
   - Turn the projector over. To remove the filter holders, press in the tabs while lifting up.

3. Clean the dust off the dust filters and the holders with a hand broom.
Cleaning and Replacing the Dust Filters (Continued)

4 Replace the filter holders.
   • Align the tabs on the filter holders while replacing them, and then press down on the tabs to lock them in place.

Note
   • Be sure the filter holders are securely installed. The power will not turn on unless it is correctly installed.

Replacing the Dust Filters

Info
   • If the filters become too dirty to clean effectively, purchase new ones (PFILDA025WJZZ) from your nearest Sharp Authorized Projector Dealer or Service Center.

After removing the filter holders (see step 2 of “Cleaning the Dust Filters”), remove the dust filters, then replace with new ones.
   • Pick the dust filters up with your fingers and lift them out of the filter holders.
   • With the reinforcement seal facing down, place the dust filters underneath the tabs on the filter holders.
## Maintenance Indicators

- The warning lights (power indicator, lamp indicator and temperature warning indicator) on the projector indicate problems inside the projector.
- If a problem occurs, either the temperature warning indicator or the lamp indicator will illuminate red, and the projector will enter standby mode. After the projector has entered standby mode, follow the procedures given below.

### Top View

![Top View Diagram]

- Temperature warning indicator
- Lamp indicator
- Power indicator

### About the temperature warning indicator

![TEMP.]

If the temperature inside the projector increases, due to blockage of the air vents, or the setting location, TEMP. will illuminate in the lower left corner of the picture. If the temperature keeps on rising, the lamp will turn off and the temperature warning indicator will blink, the cooling fan will run, and then the projector will enter standby mode. After TEMP. appears, ensure you perform the measures described on page 56.

### About the lamp indicator

![Change The Lamp.]

- When the remaining lamp life becomes 5% or less, (yellow) and “Change The Lamp” will be displayed on the screen. When the percentage becomes 0%, it will change to (red), the lamp will automatically turn off and then the projector will automatically enter standby mode. At this time, the lamp indicator will illuminate in red.
- If you try to turn on the projector a fourth time without replacing the lamp, the projector will not turn on.

### Indicators on the Projector

<table>

<td>• The dust filter holder or lamp unit cover is open.</td>
<td>• If the power indicator blinks in red even when the dust filter holders and lamp unit cover are securely installed, contact your nearest Sharp Authorized Projector Dealer or Service Center (see page 64) for advice.</td>
</tr>
</tbody>
</table>

### Info

- If the temperature warning indicator illuminates, and the projector enters standby mode, follow the possible solutions above and then wait until the projector has cooled down completely before plugging in the power cord and turning the power back on. (At least 10 minutes.)
- If the power is turned off for a brief moment due to power outage or some other cause while using the projector, and the power supply recovers immediately after that, the lamp indicator will illuminate in red and the lamp may not be lit. In this case, unplug the power cord from the AC outlet, replace the power cord in the AC outlet and then turn the power on again.
- The cooling fan keeps the internal temperature of the projector constant and this function is controlled automatically. The sound of the cooling fan may change during operation because the fan speed may change and this is not a malfunction.
Regarding the Lamp

**Lamp**

- It is recommended that the lamp (sold separately) be replaced when the remaining lamp life becomes 5% or less, or when you notice a significant deterioration in the picture and color quality. The lamp life (percentage) can be checked with the on-screen display. (See page 48.)
- Purchase a replacement lamp of type AN-F310LP from your place of purchase, nearest Sharp Authorized Projector Dealer or Service Center.

**Caution Concerning the Lamp**

- This projector utilizes a pressurized mercury lamp. A loud sound may indicate lamp failure. Lamp failure can be attributed to numerous sources such as: excessive shock, improper cooling, surface scratches or deterioration of the lamp due to a lapse of usage time. The period of time up to failure largely varies depending on the individual lamp and/or the condition and the frequency of use. It is important to note that failure can often result in the bulb cracking.
- When the lamp replacement indicator and on-screen display icon are illuminated, it is recommended that the lamp be replaced with a new one immediately, even if the lamp appears to be operating normally.
- Should the lamp break, there is also a possibility that glass particles may spread inside of the projector. In such a case, it is recommended you contact your nearest Sharp Authorized Projector Dealer or Service Center to assure safe operation.
- Should the lamp break, the glass particles may spread inside the lamp cage or gas contained in the lamp may be vented into the room from the exhaust vent. Because the gas in this lamp includes mercury, ventilate the room well if the lamp breaks and avoid all exposure to the released gas. In case of exposure to the gas, consult a doctor as soon as possible.

**Replacing the Lamp**

- Do not remove the lamp unit from the projector right after use. The lamp will be very hot and may cause burns or injury.
- Wait at least one hour after the power cord is disconnected to allow the surface of the lamp unit to fully cool before removing the lamp unit.

- Carefully change the lamp by following the instructions described in this section. * If you wish, you may have the lamp replaced at your nearest Sharp Authorized Projector Dealer or Service Center.

* If the new lamp does not light after replacement, take your projector to the nearest Sharp Authorized Projector Dealer or Service Center for repair.
Removing and Installing the Lamp Unit

**Warning!**
- Do not remove the lamp unit from the projector right after use. The lamp and parts around the lamp will be very hot and may cause burns or injury.

**Info**
- Make sure that you remove the lamp unit by the handle. Do not touch the glass surface of the lamp unit or the inside of the projector.
- To avoid injury to yourself and damage to the lamp, make sure you carefully follow the steps below.
- Do not loosen other screws except for the lamp unit cover and lamp unit.

1. **Press STANDBY/ON** on the projector or **STANDBY** on the remote control to put the projector into standby mode.
   - Wait until the cooling fan stops.

2. **Disconnect the power cord.**
   - Unplug the power cord from the AC socket.
   - Leave the lamp until it has fully cooled down (about 1 hour).

3. **Remove the lamp unit cover.**
   - Turn the projector over. Loosen the user service screw (1) that secures the lamp unit cover. Remove the lamp unit cover (2).
4 Remove the lamp unit.
• Loosen the securing screws from the lamp unit. Hold the lamp unit by the handle and pull it in the direction of the arrow. At this time, keep the lamp unit horizontal and do not tilt it.

5 Insert the new lamp unit.
• Press the lamp unit firmly into the lamp unit compartment. Fasten the securing screws.

6 Replace the lamp unit cover.
• Align the tab on the lamp unit cover (1) and place it while pressing the tab (2) to close it. Then tighten the user service screw (3) to secure the lamp unit cover.

Info
• If the lamp unit and lamp unit cover are not correctly installed, the power will not turn on, even if the power cord is connected to the projector.

Resetting the Lamp Timer
Reset the lamp timer after replacing the lamp.

Info
• Make sure to reset the lamp timer only when replacing the lamp. If you reset the lamp timer and continue to use the same lamp, this may cause the lamp to become damaged or explode.

1 Connect the power cord.
• Plug the power cord into the AC socket of the projector.

2 Reset the lamp timer.
• While simultaneously holding down MENU/HELP, ENTER and ▼ on the projector, press STANDBY/ON on the projector.
• “LAMP 0000H” is displayed, indicating that the lamp timer is reset.
Storing the Projector

How to Use the Storage Case

When storing the projector, attach the lens cap to the lens, and place it in the supplied storage case.

1. Open the cover of the storage case.

2. Place the projector into the storage case.

   - Ensure the projector has cooled down sufficiently before placing it in the case.
   - When you place the projector into the storage case, make sure that the cooling fan has stopped.
   - Ensure the lens cap is attached to the lens for protection.
   - Place the projector into the storage case with the lens facing the handle.
   - Ensure the projector is held in place by using the fixing band.
   - Do not expose the storage case to direct sunlight or near heat sources. The storage case may change color or become deformed.

3. Close the cover of the storage case.

4. Place the accessories in the front pocket of the storage case.

   - Fixing band
   - Lens cap
   - Supplied accessories (Remote control, etc.)
Computer Compatibility Chart

- Multiple signal support
  - Horizontal Frequency: 15-110 kHz,
  - Vertical Frequency: 45-85 Hz,
- Pixel Clock: 12-170 MHz
- Sync signal: Compatible with TTL level
- Compatible with sync on green signal

The following is a list of modes that conform to VESA. However, this projector supports other signals that are not VESA standards.

<table>
