Information for your safety and comfort

Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on the product.

Turning the product off before cleaning

Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

Caution for plug as disconnecting device

Observe the following guidelines when connecting and disconnecting power to the external power supply unit:

• Install the power supply unit before connecting the power cord to the AC power outlet.
• Unplug the power cord before removing the power supply unit from the projector.
• If the system has multiple sources of power, disconnect power from the system by unplugging all power cords from the power supplies.

Caution for Accessibility

Be sure that the power outlet you plug the power cord into is easily accessible and located as close to the equipment operator as possible. When you need to disconnect power to the equipment, be sure to unplug the power cord from the electrical outlet.

⚠️ Warnings! ⚠️

• Do not use this product near water.
• Do not place this product on an unstable cart, stand or table. If the product falls, it could be seriously damaged.
• Slots and openings are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface.

This product should never be placed near or over a radiator or heat register, or in a built-in installation unless proper ventilation is provided.
• Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind onto or into the product.
To avoid damage of internal components and to prevent battery leakage, do not place the product on a vibrating surface.

Never use it under sporting, exercising, or any vibrating environment which will probably cause unexpected short current or damage rotor devices, lamp.

Using electrical power

This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.

Do not allow anything to rest on the power cord. Do not locate this product where people will walk on the cord.

If an extension cord is used with this product, make sure that the total ampere rating of the equipment plugged into the extension cord does not exceed the extension cord ampere rating. Also, make sure that the total rating of all products plugged into the wall outlet does not exceed the fuse rating.

Do not overload a power outlet, strip or receptacle by plugging in too many devices. The overall system load must not exceed 80% of the branch circuit rating. If power strips are used, the load should not exceed 80% of the power strip’s input rating.

This product's AC adapter is equipped with a three-wire grounded plug. The plug only fits in a grounded power outlet. Make sure the power outlet is properly grounded before inserting the AC adapter plug. Do not insert the plug into a non-grounded power outlet. Contact your electrician for details.

Warning! The grounding pin is a safety feature. Using a power outlet that is not properly grounded may result in electric shock and/or injury.

Note: The grounding pin also provides good protection from unexpected noise produced by other nearby electrical devices that may interfere with the performance of this product.

Use the product only with the supplied power supply cord set. If you need to replace the power cord set, make sure that the new power cord meets the following requirements: detachable type, UL listed/CSA certified, type SPT-2, rated 7A 125V minimum, VDE approved or its equivalent, 4.6 meters (15 feet) maximum length.
Product servicing

Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks. Refer all servicing to qualified service personnel.

Unplug this product from the wall outlet and refer servicing to qualified service personnel when:

• the power cord or plug is damaged, cut or frayed
• liquid was spilled into the product
• the product was exposed to rain or water
• the product has been dropped or the case has been damaged
• the product exhibits a distinct change in performance, indicating a need for service
• the product does not operate normally after following the operating instructions

Note: Adjust only those controls that are covered by the operating instructions, since improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal condition.

Warning! For safety reasons, do not use non-compliant parts when adding or changing components. Consult your reseller for purchase options.

Your device and its enhancements may contain small parts. Keep them out of the reach of small children.

Additional safety information

• Do not look into the projector's lens when the lamp is on. The bright may hurt your eyes.
• Turn on the projector first and then signal sources
• Do not place the product in following environments:
  • Space that is poorly ventilated or confined. At least 50cm clearance from walls and free flow of air around the projector is necessary.
  • Locations where temperatures may become excessively high, such as inside of a car with all windows rolled up.
  • Locations where excessive humidity, dust, or cigarette smoke may contaminate optical components, shortening the life span and darkening the image.
  • Locations near fire alarms.
  • Locations with an ambient temperature above 40 °C/104 °F.
  • Locations where the altitudes are higher than 10000 feet.
• Unplug immediately if there is something wrong with your projector. Do not operate if smoke, strange noise or odor comes out of your projector. It
might cause fire or electric shock. In this case, unplug immediately and contact your dealer.

- Do not keep using this product to break or drop it. In this case contact your dealer for inspection.
- Do not face the projector lens to the sun. It can lead to fire.
- When switching the projector off, suggest to ensure the projector completes its cooling cycle before disconnecting power.
- Do not turn off the main power abruptly or unplug the projector during operation. It can lead to lamp breakage, fire, electric shock or other trouble. The best way is to wait for the fan to turn off before turning main power off.
- Do not touch air outlet grille and bottom plate which becomes hot.
- Clean the air filter frequently if have. The temperature inside may rise and cause damage when the filter/ventilation slots clogged with dirt or dust.
- Do not look into the air outlet grille when projector is operating. It may hurt your eyes.
- Always open the lens shutter or remove the lens cap when the projector is on.
- Do not block the projector lens with any object when the projector is under operation as this could cause the object to become heated and deformed or even cause a fire. To temporarily turn off the lamp, press HIDE on the remote control.
- The lamp becomes extremely hot during operation. Allow the projector to cool for approximately 45 minutes prior to removing the lamp assembly for replacement.
- Do not operate lamps beyond the rated lamp life. It could cause it to break on rare occasions.
- Never replace the lamp assembly or any electronic components unless the projector is unplugged.
- The product will detect the life of the lamp itself. Please be sure to change the lamp when is showing warning message.
- When changing the lamp, please allow unit to cool down, and follow all changing instructions.
- Reset the "Lamp Hour Reset" function from the Onscreen display "Management" menu after replacing the lamp module.
- Do not attempt to disassemble this projector. There are dangerous high voltages inside which may hurt you. The only user serviceable part is the lamp which has its own removable cover. Refer servicing only to suitable qualified professional service personnel.
- Do not stand the projector on end vertically. It may cause the projector to fall over, causing injury or damage.
- This product is capable of displaying inverted images for ceiling mount installation. Only use acer ceiling mount kit for mounting the projector and ensure it is securely installed.
Operating environment for using wireless function (Optional)

⚠️ Warning! For safety reasons, turn off all wireless or radio transmitting devices when using your machine under the following conditions. These devices may include, but are not limited to: wireless LAN (WLAN), Bluetooth and/or 3G.

Remember to follow any special regulations in force in any area, and always switch off your device when its use is prohibited or when it may cause interference or danger. Use the device only in its normal operating positions. This device meets RF exposure guidelines when used normally, and it and its antenna are positioned at least 1.5 centimeters (5/8 inches) away from your body. It should not contain metal and you should position the device the above-stated distance from your body.

To successfully transmit data files or messages, this device requires a good quality connection to the network. In some cases, transmission of data files or messages may be delayed until such a connection is available.

Ensure that the above separation distance instructions are followed until the transmission is completed.

Parts of the device are magnetic. Metallic materials may be attracted to the device, and persons with hearing aids should not hold the device to the ear with the hearing aid. Do not place credit cards or other magnetic storage media near the device, because information stored on them may be erased.

Medical devices

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions. Switch off your device in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF transmissions.

Pacemakers. Pacemaker manufacturers recommend that a minimum separation of 15.3 centimeters (6 inches) be maintained between wireless devices and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers should do the following:

- Always keep the device more than 15.3 centimeters (6 inches) from the pacemaker.
- Not carry the device near your pacemaker when the device is switched on. If you suspect interference, switch off your device, and move it.
Hearing aids. Some digital wireless devices may interfere with some hearing aids. If interference occurs, consult your service provider.

**Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection systems, electronic antiskid (antilock) braking systems, electronic speed control systems, and air bag systems. For more information, check with the manufacturer, or its representative, of your vehicle or any equipment that has been added. Only qualified personnel should service the device, or install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or enhancements. For vehicles equipped with an air bag, remember that air bags inflate with great force. Do not place objects, including installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed, and the air bag inflates, serious injury could result.

Using your device while flying in aircraft is prohibited. Switch off your device before boarding an aircraft. The use of wireless teledevices in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network, and may be illegal.

**Potentially explosive environments**

Switch off your device when in any area with a potentially explosive atmosphere and obey all signs and instructions. Potentially explosive atmospheres include areas where you would normally be advised to turn off your vehicle engine. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Switch off the device at refueling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage, and distribution areas; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), and areas where the air contains chemicals or particles such as grain, dust or metal powders.

**Caution for Listening**

To protect your hearing, follow these instructions.

- Increase the volume gradually until you can hear clearly and comfortably.
- Do not increase the volume level after your ears have adjusted.
- Do not listen to music at high volumes for extended periods.
- Do not increase the volume to block out noisy surroundings.
- Decrease the volume if you can’t hear people speaking near you.
Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle. For more information on the Waste from Electrical and Electronics Equipment (WEEE) regulations, visit http://global.acer.com/about/sustainability.htm

Mercury advisory

For projectors or electronic products containing an LCD/CRT monitor or display:

Lamp(s) inside this product contain mercury and must be recycled or disposed of according to local, state or federal laws. For more information, contact the Electronic Industries Alliance at www.eiae.org. For lamp-specific disposal information, check www.lamprecycle.org
First thing first

Usage Notes

Do:
• Turn off the product before cleaning.
• Use a soft cloth moistened with mild detergent to clean the display housing.
• Disconnect the power plug from AC outlet if the product is not being used for a long period of time.

Don't:
• Block the slots and openings on the unit provided for ventilation.
• Use abrasive cleaners, waxes or solvents to clean the unit.
• Use under the following conditions:
  • In extremely hot, cold or humid environments.
  • In areas susceptible to excessive dust and dirt.
  • Near any appliance that generates a strong magnetic field.
  • Place in direct sunlight.

Precautions

Follow all warnings, precautions and maintenance as recommended in this user's guide to maximize the life of your unit.

Warning:
• Do not look into the projector's lens when the lamp is on. The bright light may hurt your eyes.
• To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.
• Please do not open or disassemble the product as this may cause electric shock.
• When changing the lamp, please allow unit to cool down, and follow all changing instructions.
• This product will detect the life of the lamp itself. Please be sure to change the lamp when it shows warning messages.
• Reset the "Lamp Hour Reset" function from the Onscreen display "Management" menu after replacing the lamp module.
• When switching the projector off, please ensure the projector completes its cooling cycle before disconnecting power.
• Turn on the projector first and then the signal sources.
• Do not use lens cap when projector is in operation.
• When the lamp reaches the end of its life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn back on until the lamp module has been replaced. To replace the lamp, follow the procedures listed under "Replacing the Lamp".
Introduction

Product Features

This product is a single-chip DLP® projector. Outstanding features include:

- **DLP® technology**
- **X1160 series**: Native 800 x 600 SVGA resolution
  **X1260 series**: Native 1024 x 768 XGA resolution
  4:3 / 16:9 aspect ratio supported
- **ColorBoost technology** comes with excellent color performance
- **Better Lumens brightness** and a 2000:1 contrast ratio
- **Versatile display modes** (Standard, Video, Bright, Blackboard, User 1, User 2) for optimum performance in any situation
- **NTSC / PAL / SECAM** compatible and HDTV (720p, 1080i) supported
- **The eCaring button** reveals Acer Empowering functions (eView, eTimer) for easy adjustment of settings
- **Advanced digital keystone correction** delivers optimum presentations
- **Multi-language onscreen display (OSD) menus**
- **X1160**: Manual focus and Fixed lens
  **X1260**: Manual focus projection lens zooms up to 1.1X
- **2X digital zoom** and pan move function
- **Microsoft Windows 2000, XP, Vista OS** compliant
Package Overview

This projector comes with all the items shown below. Check to make sure your unit is complete. Contact your dealer immediately if any thing is missing.

- Projector with lens cap
- Power cord
- VGA cable
- Composite video cable
- Battery
- Security card
- User’s guide
- Remote control
- Quick start guide

Note: To ensure the projector works well with your computer, please make sure the timing of the display mode is compatible with the projector.
Turning the Projector On/Off

Turning on the Projector

1. Remove the lens cap. (Illustration #1)
2. Ensure that the power cord and signal cable are securely connected. The Power indicator LED will flash red.
3. Turn on the projector by pressing "Power" button on the control panel, and the Power indicator LED will turn blue. (Illustration #2)
4. Turn on your source (computer, notebook, video player, etc.). The projector will detect your source automatically.
   - If the screen displays "Lock" and "Source" icons, it means the projector is locked onto a specific source type and there is no such type of input signal detected.
   - If the screen displays "No Signal", please make sure the signal cables are securely connected.
   - If you connect to multiple sources at the same time, use the "Source" button on the remote control to switch between inputs.
Turning off the Projector

1. To turn off the projector, press the "Power" button twice. The message below will display onscreen for 5 seconds.

   "Please press power button again to complete the shutdown process."

2. Immediately after powering off, the Power indicator LED will flash RED rapidly and the fan(s) will continue to operate for about 120 seconds. This is to ensure that the system cools correctly.

3. Once the system has finished cooling, the Power indicator LED will turn solid RED which means projector enter standby mode.

4. It is now safe to unplug the power cord.

   Warning: Do not turn on the projector immediately after powering off.

   Note: If you wish to turn the projector back on, you must wait for 60 seconds at least to press the "Power" button to restart the projector.

Warning indicators:

- If the projector automatically shuts down and the Power indicator quick flashing RED and steady BLUE by returns, please contact your local reseller or service center.

- If the projector automatically shuts down and the Power indicator quick flashing RED and steady BLUE by returns, this indicates that the projector has overheated. The message below will display onscreen if this is about to happen:

   "Projector Overheated. Lamp will automatically turn off soon."

- If the Power indicator quick flashing RED and steady BLUE by returns and the message below is displayed onscreen, please contact your local dealer or service center:

   "Fan fail. Lamp will automatically turn off soon."
Adjusting the Projected Image

Adjusting the Height of Projected Image

The projector is equipped with elevator feet for adjusting the height of image.

To raise/lower the image:
1. Use Tilt adjusting wheel (Illustration #1) to fine-tune the display angle.
How to optimize image size and distance

Consult the table below to find the optimal image sizes achievable when the projector is positioned at a desired distance from the screen.

- **X1160 series** Example: If the projector is 3 m from the screen, good image quality is possible for 76" image sizes.
- **X1260 series** Example: If the projector is 3 m from the screen, good image quality is possible for image sizes between 69" and 76".

**Note:** Remind as below figure, the space of 133 cm height is required when located at 3m distance.

**Figure:** Fixed distance with different zoom and screen size. (only for X1260 series, X1160 series is Fixed zoom lens)

How to get a preferred image size by adjusting distance and zoom

The table below shows how to achieve a desired image size by adjusting either the position or the zoom ring.

- **X1160 series** Example: to obtain an image size of 50" set the projector at 2 m distance from the screen.
- **X1260 series** Example: to obtain an image size of 50" set the projector at a distance 2 m and 2.2 m from the screen and adjust the zoom level accordingly.

User Controls

Acer Empowering Technology

Empowering Key

Acer Empowering Key provides three Acer unique functions, they are "Acer eView Management" and "Acer eTimer Management" respectively. Press "Esc" key for more than one second to launch the Onscreen display main menu to modify its function.

Acer eView Management

Press "Esc" to launch "Acer eView Management" submenu.

"Acer eView Management" is for display mode selection. Please refer to Onscreen Display Menus section for more detail.

Acer eTimer Management

Press "Esc" to launch "Acer eTimer Management" submenu.

"Acer eTimer Management" provides the reminding function for presentation time control. Please refer to Onscreen Display Menus section for more detail.
Onscreen Display (OSD) Menus

The projector has multilingual OSD that allow you to make image adjustments and change a variety of settings.

Using the OSD menus

- To open the OSD menu, press "MENU" on the remote control.
- When the OSD is displayed, use the ▲▼ keys to select any item in the main menu. After selecting the desired main menu item, press ► to enter submenu for feature setting.
- Use the ▲▼ keys to select the desired item and adjust the settings by using the ◀► keys.
- Select the next item to be adjusted in the submenu and adjust as described above.
- Press "MENU" on the remote control, the screen will return to the main menu.
- To exit OSD, press "MENU" on the remote control again. The OSD menu will close and the projector will automatically save the new settings.
## Color setting

### Display Mode
There are many factory presets optimized for various types of images.

- **Standard**: For common environment.
- **Video**: For playing video in a bright environment.
- **Bright**: For brightness optimization.
- **Blackboard**: Blackboard mode can improve displayed color when you project onto darker surfaces.
- **Utilizador 1**: Memorize user's settings.
- **Utilizador 2**: Memorize user's settings.

### Brightness
Adjust the brightness of the image.

- Press **↓** to darken image.
- Press **↑** to lighten the image.

### Contrast
"Contrast" controls the difference between the lightest and darkest parts of the picture. Adjusting the contrast changes the amount of black and white in the image.

- Press **↓** to decrease the contrast.
- Press **↑** to increase the contrast.

### Color Temperature
Adjust the color temperature. At higher color temperatures, the screen looks colder; at lower color temperatures, the screen looks warmer.

### Degamma
Effects the representation of dark scenery. With greater gamma value, dark scenery will look brighter.

### Color R
Adjusts the red color.

### Color G
Adjusts the green color.

### Color B
Adjusts the blue color.

### Saturation
Adjusts a video image from black and white to fully saturated color.

- Press **↓** to decrease the amount of color in the image.
- Press **↑** to increase the amount of color in the image.
**Tint**

Adjusts the color balance of red and green.
- Press left arrow to increase the amount of green in the image.
- Press right arrow to increase the amount of red in the image.

---

**Image setting**

---

**Keystone**

Adjust image distortion caused by tilting projection. (±40 degrees)

---

**Aspect Ratio**

Use this function to choose your desired aspect ratio.
- Auto: Keep the image with original width-height ratio and maximize the image to fit native horizontal or vertical pixels.
- 4:3: The image will be scaled to fit the screen and displayed using a 4:3 ratio.
- 16:9: The image will be scaled to fit the width of the screen and the height adjusted to display the image using a 16:9 ratio.

---

**Projection**

- Front-Desktop: The factory default setting.
- Front-Ceiling: When you select this function, the projector inverts the image for ceiling-mounted projection.
### Rear-Desktop
- When you select this function, the projector reverses the image so you can project from behind a translucent screen.

### Rear-Ceiling
- When you select this function, the projector reverses and inverts the image at same time. You can project from behind a translucent screen with ceiling mounted projection.

### H. Position (Horizontal position)
- Press **←** to move the image left.
- Press **→** to move the image right.

### V. Position (Vertical position)
- Press **↓** to move the image down.
- Press **↑** to move the image up.

### Frequency
"Frequency" changes the projector's refresh rate to match the frequency of your computer's graphics card. If you can see a vertical flickering bar in the projected image, use this function to make the necessary adjustments.

### Tracking
Synchronizes the signal timing of the projector with the graphics card. If you experience an unstable or flickering image, use this function to correct it.

### Sharpness
Adjusts the sharpness of the image.
- Press **◄** to decrease the sharpness.
- Press **►** to increase the sharpness.

---

**Note:** "H. Position", "V. Position", "Frequency" and "Tracking" functions are not supported under DVI or Video mode.

**Note:** "Sharpness" functions is not supported under DVI and Computer mode.
## Management setting

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Auto Shutdown</strong></td>
<td>The projector will automatically shutdown when there is no signal input after the allocated time. (in minutes)</td>
</tr>
<tr>
<td><strong>Source Lock</strong></td>
<td>When source lock is turned &quot;off&quot;, the projector will search for other signals if the current input signal is lost. When source lock is turned &quot;on&quot;, it will &quot;lock&quot; the current source channel unless you press &quot;Source&quot; button on the remote control for the next channel.</td>
</tr>
<tr>

</tr>
</tbody>
</table>

### Security

This projector provides a useful security function for the administrator to manage usage of the projector.

Select "On" to enable the security function. The user has to enter a password to operate the projector. Please refer to the "User Password" section for details.

If "Off" is selected, then the user can turn on the projector without password.

#### Timeout(Min.)

Once "Security" is activated to "On", the administrator can set timeout function.

- Press  or  to select the timeout interval.
- The range is from 10 minute to 990 minutes.
- When the time is up, the projector will prompt the user to enter the password again.
- The factory default setting of "Timeout(Min.)" is "Off".
- Once the security function is enabled, the projector will request user to enter password when switch on the projector. Both "User Password" and "Administrator Password" can be accepted for this dialogue.
### User password

- Press 📡 to setup or change the "User Password".
- Press number keys to set your password on the remote control and press "MENU" to confirm.
- Press ◀️ to delete character.
- Enter the password when you see "Confirm Password" displayed.
- The password should be between 4 and 8 characters long.
- If you select "Request password only after plugging power cord", the projector will prompt the user to enter the password every time the power cord is plugged.
- If you select "Always request password while projector turns on", the user has to enter the password every time when the projector is turned on.

### Administrator Password

The "Administrator Password" can be used in both the "Enter Administrator Password" and "Enter Password" dialog boxes.

- Press 📡 to change the "Administrator Password".
- The factory default of "Administrator Password" is "1234".

If you forgot your administrator password, do the following to retrieve the administrator password:

- An unique 6-digit "Universal Password" which is printed on the Security Card (please check accessory in the box). This unique password is the number which will be accepted by projector anytime no matter what the Administrator Password is.
- If losing this security card and number, please contact with an Acer service center.

### Disable Power button

- When "ON" is selected, only the Power Key on the remote control can be used. If "OFF" is selected, then the Power Key on either the remote control or the control panel can be used to control the projector.

### Reset

- Press the button after choosing "Yes" to return the parameters on all menus to the factory default settings.
Audio setting

<table>
<thead>
<tr>
<th>Volume</th>
<th>Press left to decrease the volume.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

</tr>
<tr>
<td>Mute</td>
<td>Choose “On” to mute the volume.</td>
</tr>
<tr>
<td></td>
<td>Choose “Off” to restore the volume.</td>
</tr>
</tbody>
</table>

Note: Audio menu is for X1260 series.
Timer setting

- **Timer Start**: Press \( \rightarrow \) to start or stop the timer.
- **Timer Period**: Press \( \leftarrow \) or \( \rightarrow \) to adjust the timer period.
- **Timer Display**: Press \( \leftarrow \) or \( \rightarrow \) to which timer mode to display on the screen.
- **Timer Location**: Choose the location of the timer on the screen.

Language setting

- **Language**: Choose the multilingual OSD menu. Use the \( \uparrow \) or \( \downarrow \) key to select your preferred menu language.
  - Press \( \rightarrow \) to confirm the selection.
Appendices

Troubleshooting

If you experience a problem with your Acer projector, refer to the following troubleshooting guide. If the problem persists, please contact your local reseller or service center.

Image Problems and Solutions

<table>
<thead>
<tr>
<th>#</th>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| 1 | No image appears onscreen | • Connected as described in the "Getting Started" section.  
• Ensure none of the connector pins are bent or broken.  
• Check if the projector lamp has been securely installed. Please refer to the "Replacing the Lamp" section.  
• Make sure you have removed the lens cap and the projector is switched on. |
| 2 | Partial, scrolling or incorrectly displayed image (For PC (Windows 95/98/2000/XP)) | • Press "RESYNC" on the remote control.  
• For an incorrectly displayed image:  
  • Open "My Computer," open the "Control Panel," and then double-click the "Display" icon.  
  • Select the "Settings" tab.  
  • Verify that your display resolution setting is lower than or equal to SXGA (1280 x 1024) (X1160) or SXGA+ (1400 x 1050) (X1260).  
  • Click the "Advanced Properties" button.  
  • If the problem still appears, change the monitor display you are using and follow the steps below:  
    • Verify that the resolution setting is lower than or equal to SXGA (1280 x 1024)(X1160) or SXGA+ (1400 x 1050)(X1260).  
    • Click the "Change" button under the "Monitor" tab.  
    • Click "Show all devices". Next, select "Standard monitor types" under the SP box, and choose the resolution mode you need under the "Models" box.  
    • Verify that the resolution setting of the monitor display is lower than or equal to SXGA (1280 x 1024)(X1160) or SXGA+ (1400 x 1050)(X1260). |
| 3 | Partial, scrolling or incorrectly displayed image (For notebooks) | • Press "RESYNC" on the remote control.  
• For an incorrectly displayed image:  
  • Follow the steps for item 2 (above) to adjust the resolution of your computer.  
  • Press the toggle output settings. Example: [Fn]+[F4], Compaq [Fn]+[F4], Dell [Fn]+[F8], Gateway [Fn]+[F4], IBM [Fn]+[F7], HP [Fn]+[F4], NEC [Fn]+[F3], Toshiba [Fn]+[F5]  
  • If you experience difficulty changing resolutions or your monitor freezes, restart all equipment including the projector. |
| 4 | The screen of the notebook computer is not displaying your presentation | • If you are using a Microsoft® Windows® based notebook: Some notebook PCs may deactivate their own screens when a second display device is in use. Each has a different way to be reactivated. Refer to your computer's manual for detailed information.  
• If you are using an Apple® Mac® OS based notebook: In System Preferences, open Display and select Video Mirroring "On". |
| 5 | Image is unstable or flickering | • Adjust the "Tracking" to correct it. Refer to the "Image Setting" section for more information.  
• Change the display color depth settings on your computer. |
| 6 | Image has vertical flickering bar | • Use "Frequency" to make an adjustment. Refer to the "Image Setting" section for more information.  
• Check and reconfigure the display mode of your graphics card to make it compatible with the projector. |
| 7 | Image is out of focus | • Make sure the lens cap is removed.  
• Adjusts the focus ring on the projector lens.  
• Make sure the projection screen is within the required distance of 3.3 to 39.4 feet (1.0 to 12.0 meters) from the projector. Refer to the "How to Get a Preferred Image Size by Adjusting Distance and Zoom" section for more information. |
| 8 | Image is stretched when displaying a "widescreen" DVD title | When you play a DVD encoded in anamorphic or 16:9 aspect ratio you may need to adjust the following settings:  
• If you play an Letterbox(LBX) format DVD title, please change the format to Letterbox(LBX) in the projector OSD.  
• If you play a 4:3 format DVD title, please change the format to 4:3 in the projector OSD.  
• If the image is still stretched, you will also need to adjust the aspect ratio. Set up the display format to 16:9 (wide) aspect ratio on your DVD player. |
Problems with the Projector

<table>
<thead>
<tr>
<th>#</th>
<th>Condition</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>9</td>
<td>Image is too small or too large</td>
<td>• Adjust the zoom lever on the front of the projector. (X1260 series)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Move the projector closer to or further from the screen.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Press &quot;MENU&quot; on the remote control. Go to &quot;Image setting --&gt; Aspect Ratio&quot; and try different settings or press &quot;Aspect Ratio&quot; on the remote control to adjust directly.</td>
</tr>
<tr>
<td>10</td>
<td>Image has slanted sides</td>
<td>• If possible, reposition the projector so that it is centered on the screen.</td>
</tr>
<tr>
<td></td>

</tr>
<tr>
<td>11</td>
<td>Image is reversed</td>
<td>• Select &quot;Image --&gt; Projection&quot; on the OSD and adjust the projection direction.</td>
</tr>
</tbody>
</table>

1. The projector stops responding to all controls
   - If possible, turn off the projector, then unplug the power cord and wait at least 30 seconds before reconnecting power.

2. Lamp burns out or makes a popping sound
   - When the lamp reaches the end of its useful life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn on until the lamp module has been replaced. To replace the lamp, follow the procedures in the "Replacing the Lamp" section.
## OSD Messages

Replacing the Lamp

Use a screwdriver to remove the screw(s) from the cover, and then pull out the lamp.

The projector will detect the lamp life. You will be shown a warning message "Lamp is approaching the end of its useful life in full power operation. Replacement Suggested!" When you see this message, change the lamp as soon as possible. Make sure the projector has been cooling down for at least 30 minutes before changing the lamp.

**Warning:** The lamp compartment is hot! Allow it to cool down before changing the lamp.

To Change the Lamp

1. Turn off the projector by pressing the power button.
2. Allow the projector at least 30 mins to cool down.
3. Disconnect the power cord.
4. Use a screwdriver to remove the screw from the cover. (Illustration #1)
5. Push up and remove the cover.
6. Remove the two screws that secure the lamp module (Illustration #2) and pull up the lamp bar. (Illustration #3)
7. Pull out the lamp module by force. (Illustration #4)

To replace the lamp module, reverse the previous step.

**Warning:** To reduce the risk of personal injury, do not drop the lamp module or touch the lamp bulb. The bulb may shatter and cause injury if it is dropped.
Ceiling Mount Installation

If you wish to install the projector using a ceiling mount, please refer to the steps below:

1. Drill four holes into a solid, structurally sound part of the ceiling, and secure the mount base.

   ![Diagram of Ceiling Mount Installation]

   **Note:** Screws are not included. Please obtain the appropriate screws for your type of ceiling.

2. Secure the ceiling rod using the appropriate type of four-cylinder screws.

   ![Diagram showing the installation process]

   - Ceiling Mount Base
   - Long Rod
   - Extension Rod
   - Long Cylinder Cap
   - Allen Key
   - Tightening Screw
   - Medium Rod
   - Screw Type A: 50 mm length / 8 mm diameter
3 Use the appropriate number of screws for the projector size to attach the projector to the ceiling mount bracket.

**Note:** It is recommended that you keep a reasonable space between the bracket and the projector to allow for proper heat distribution. Use two washers for extra support, if deemed necessary.

4 Attach the ceiling bracket to the ceiling rod.
5 Adjust the angle and positioning as necessary.

Note: The appropriate type of screw and washer for each model is listed in the table below. 3 mm diameter screws are enclosed in the screw pack.

Regulations and safety notices

FCC notice

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the device and receiver.
• Connect the device into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/television technician for help.

Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

Notice: Peripheral devices

Only peripherals (input/output devices, terminals, printers, etc.) certified to comply with the Class B limits may be attached to this equipment. Operation with non-certified peripherals is likely to result in interference to radio and TV reception.

Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this projector.

Operation conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Notice: Canadian users

This Class B digital apparatus complies with Canadian ICES-003.
Remarque à l'intention des utilisateurs canadiens

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Canada — Low-power license-exempt radio communication devices (RSS-210)

a  Common information
   Operation is subject to the following two conditions:
   1. This device may not cause interference, and
   2. This device must accept any interference, including interference
      that may cause undesired operation of the device.

b  Operation in 2.4 GHz band
   To prevent radio interference to the licensed service, this device is
   intended to be operated indoors and installation outdoors is subject
   to licensing.

Declaration of Conformity for EU countries

Hereby, Acer, declares that this projector series is in compliance with the
essential requirements and other relevant provisions of Directive 1999/5/EC.
(Please visit http://global.acer.com/support/certificate.htm for complete
documents.)

Compliant with Russian regulatory certification

Radio device regulatory notice

Note: Below regulatory information is for models with wireless
LAN and/or Bluetooth only.

General

This product complies with the radio frequency and safety standards of any
country or region in which it has been approved for wireless use. Depending on
configurations, this product may or may not contain wireless radio devices (such
as wireless LAN and/or Bluetooth modules). Below information is for products
with such devices.
European Union (EU)

R&TTE Directive 1999/5/EC as attested by conformity with the following harmonized standard:

- **Article 3.1(a) Health and Safety**
  - EN60950-1:2001
  - EN50371:2002
- **Article 3.1(b) EMC**
  - EN301 489-1 V1.4.1:2002
  - EN301 489-17 V1.2.1:2002
- **Article 3.2 Spectrum Usages**
  - EN300 328 V1.5.1:2004

**List of applicable countries**

EU member states as of May 2004 are: Belgium, Denmark, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal, Finland, Sweden, United Kingdom Estonia, Latvia, Lithuania, Poland, Hungary, Czech Republic, Slovak Republic, Slovenia, Cyprus and Malta. Usage allowed in the countries of European Union, as well as Norway, Switzerland, Iceland and Liechtenstein. This device must be used in strict accordance with the regulations and constraints in the country of use. For further information, please contact local office in the country of use.
Federal Communications Commission
Declaration of Conformity

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Hereby declare that:

Product: DLP Projector
Trade Name: Acer
Model Number: DSV0705/DNX0708
Machine Type: X1160/X1260 series

Is compliant with the essential requirements and other relevant provisions of the following EC directives, and that all the necessary steps have been taken and are in force to assure that production units of the same product will continue comply with the requirements.

EMC Directive 89/336/EEC, amended by 92/31/EEC and 93/68/EEC as attested by conformity with the following harmonized standards:
- EN61000-3-2:2000, Class A

Low Voltage Directive 73/23/EEC as attested by conformity with the following harmonized standard:
- EN60950-1:2001

RoHS Directive 2002/95/EC on the Restriction of the Use of certain Hazardous Substances in Electrical and Electronic Equipment
