This Liquid Crystal Projector can display various computer signals and NTSC/PAL/SECAM video signals.

Outline

This Liquid Crystal Projector can display various computer signals and NTSC/PAL/SECAM video signals.

Features

(1) High brightness
   A highly efficient optical system with a UHP lamp ensures high brightness.

(2) High resolution
   Three separate high-definition liquid crystal panels are used for the R, G and B signals.

(3) Compact size, light weight for portability

(4) RGB output terminal

(5) RS232C Communication

(6) Mouse emulation

(7) Power zoom and power focus functions

(8) Complies with VESA DDC1/2B specifications

(9) Auto-adjustment function
FOR THE CUSTOMERS IN U.K

THIS PRODUCT IS SUPPLIED WITH A TWO PIN MAINS PLUG FOR USE IN MAINLAND EUROPE. FOR THE U.K PLEASE REFER TO THE NOTES ON THIS PAGE.

IMPORTANT FOR UNITED KINGDOM

WORDING FOR CLASS I EQUIPMENT INSTRUCTION BOOKS AND LABELS

The mains lead on this equipment is supplied with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA or BSI approved BS 1362 fuse must be used of the same rating. If the fuse cover is detachable never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug. Fuse covers are available from your dealer.

DO NOT cut off the mains plug from this equipment. If the plug fitted is not suitable for the power points in your home or the cable is too short to reach a power point, then obtain an appropriate safety approved extension lead or consult your dealer.

Should it be necessary to change the mains plugs, this must be carried out by a competent person, preferable a qualified electrician.

If there is no alternative to cutting off the mains plug, ensure that you dispose of it immediately, having first removed the fuse, to avoid a possible shock hazard by inadvertent connection to the mains supply.

WARNING: THIS EQUIPMENT MUST BE EARTHED

IMPORTANT:

The wires in the mains lead are coloured in accordance with the following code:

Green and Yellow=Earth, Blue=Neutral, Brown=Live.

As these colours may not correspond with the coloured makings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Green and Yellow must be connected to the terminal in the plug which is marked with the letter E or by the earth symbol ☼ or coloured Green or Green and Yellow.

The wire coloured Blue must be connected to the terminal marked with the letter N or coloured BLUE or BLACK. The wire coloured BROWN must be connected to the terminal marked with the letter L or coloured BROWN or RED.
**WARNING:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**Instructions to Users:**

This equipment complies with the requirements of FCC (Federal Communication Commission) Class A equipments provided that following conditions are met.

1. **Video signal cables:**
   Double shielded coaxial cables (so called FCC shield cable) must be used and the outer shield must be connected to the ground. Or, if normal coaxial cables are used, the cables must be enclosed in metal pipes or similar way to reduce the interference noise radiation.

2. **Power cord:**
   Shielded power cord must be used. The outer shield must be connected to the ground.

3. **Video inputs:**
   The input signal amplitude must no exceed the specified level.

**Before use**

<table>

<tr>
<th>(Before Use)</th>
<th>Illustrated marks</th>
<th>Various illustrated marks are used in this product and instruction manual so the product is used correctly and safely, and also to protect you and others from danger and your property from being damaged.</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Warning]</td>
<td>This shows that a person could be killed or injured if the wrong operation is done by ignoring this indication.</td>
<td></td>
</tr>
<tr>
<td>![Caution]</td>
<td>This shows that a person could be injured or material may be damaged if the wrong operation is done by ignoring this indication.</td>
<td></td>
</tr>
</tbody>
</table>

**Examples of illustrated marks**

- ![△] The △ mark informs you that there is a warning (including caution). The concrete details of the warning (the left diagram shows the caution for an electric shock hazard) is shown in the diagram.
- ![∅] The ∅ mark informs you of a prohibited action. The concrete prohibited action (the left diagram shows the prohibition of disassembly) is drawn in the diagram or near it.
- ![●] The ● mark informs you of actions you must do. The concrete instruction details (the left diagram shows "Disconnect the power plug from the power outlet") is drawn in the diagram.
[Safety precaution]

⚠️ Warning

■ If any abnormality occurs.
- When there is an abnormal smell or smoke, if you use this unit as it is, this could cause a fire or electric shock, etc. When an abnormality is found, immediately turn off the power switch and pull out the power plug from the power outlet. Check that there is no smoke, etc., then contact your dealer to repair the unit. Do not repair it yourself as it is very dangerous.
- Do not use this unit as it is after trouble has occurred, such as "No picture", "No sound", "Abnormal sound", etc. This may cause a fire, electric shock, etc. In this case immediately turn off the power switch and disconnect the power plug, then contact your dealer to repair the unit.
- If water, etc. enters inside the unit, turn off the power switch of the unit first and disconnect the power plug and then contact your dealer. If you use it as it is, it may cause a fire, electric shock, etc.

■ Do not install this unit in an unstable place.
Avoid placing it in an unstable place such as weak base, inclined floor, etc. This may cause it to drop or fall over, resulting in injury.

■ Do not open the cabinet.
Do not open the cabinet.
There are high voltage parts inside the cabinet and this may cause an electric shock. Ask your dealer to check inside and adjust and repair the unit.

■ Do not use this in a bathroom, etc.
Do not use this unit in a bathroom, etc. This may cause a fire, electric shock, etc.

■ Do not look directly at the lens when the lamp is lit.
Do not look directly at the lens when the lamp is lit. Since a strong light is used, it could damage you vision, etc. Especially pay attention if children are present.

■ Do not insert any foreign object.
- Do not insert a metal or flammable object inside through the ventilation holes, etc. This may cause a fire, electric shock, etc.
- If foreign matter enters inside, turn the power switch off and disconnect the power plug from the power outlet and contact your dealer. If you use as it is, it may cause a fire, electric shock, etc. Be careful especially if children could touch the unit.

■ Do not apply any shock.
If you drop this unit or if the cabinet is broken, turn off the power switch, disconnect the power plug and contact your dealer. If you use it as it is, it may cause a fire, electric shock, etc.

■ Do not remodel this unit.
Do not remodel this unit. It may cause a fire, electric shock, etc.

■ Do not put a container, etc. with liquid on this unit.
Do not put a vase, flowerpot, cosmetic container, medicine or water and small metal objects on this unit. If liquid spills and enter inside the unit, it may cause a fire, electric shock, etc.

■ Do not use power supplies other than that specified.
Do not use this unit with a power voltage other than specified power supply voltage. It may cause a fire, electric shock, etc.
Warning

Be careful in handling the power cord.
- Do not scratch, damage or process the power cord. Do not bend it forcibly. Also do not put a heavy object on it, do not heat it and do not pull it. If you do, the power cord may be damaged and it may cause a fire, electric shock, etc.
  - Do not pull the cord.
  - Do not put a heavy object on it.
  - Do not damage the cord.
  - Do not put it near a heating device.
- Be careful that this unit is not placed on the power cord. The power cord may be damaged and it may cause a fire, electric shock, etc. If the cord is covered with a carpet, etc. a heavy object may be put on it without your realizing it.
- If the cord is damaged (core wire is exposed, disconnected, etc.), ask your dealer to replace it. It may cause a fire, electric shock, etc.
- Check that no dirt adheres to the power plug and fully insert without any play. If dirt adheres or the connection is incomplete, it may cause a fire, electric shock, etc.
- The outer shield of power cord must be connected to ground. If you do not, it may cause an electric shock.

Do not stare directly into the laser aperture.
- The laser pointer on the remote control unit radiates the laser beam from the laser aperture.
- Do not stare into the laser aperture or radiate the laser beam to other persons as the laser emitted is a class 2 laser and it could damage your vision, etc. Especially pay attention if children are present.
- The three labels below are caution labels for the laser beam.
Do not step on this unit or do not put a heavy object on it.
- Do not step on this unit. Especially pay attention if children are present. If you do, the unit may fall over or may be broken causing an injury.
- Do not put a heavy object on this unit. If you do, the unit may fall due to its imbalance or it may drop, causing an injury.

Do not block the ventilation holes.
Do not block the ventilation holes. If the ventilation holes are blocked, the heat inside may build up and it may cause a fire. Do not use this unit in the following ways: On its side. In a poorly ventilated, narrow place. On a carpet or bedspread. Covered with a tablecloth. Place this unit so that the ventilation holes are kept 50cm or more away from the wall.

Cleaning
Be sure to pull out the power plug from the power outlet for safety when cleaning.

Set the caster stoppers.
When this unit is installed on the table with casters, set the caster stoppers. If the table moves, it may fall over, causing an injury.

Use of batteries.
- Do not use batteries not specified for this unit. Do not use new batteries mixed together with old ones. This may cause a fire, injury due to burst of battery, liquid leakage.
- When inserting batteries in this unit, pay attention to the direction of the + and – polarity indications and insert the batteries correctly. If the polarities are confused, it may cause injury or damage near the unit due to burst batteries, liquid leakage, etc.

Do not place this unit in a moist or dusty place.
- Do not place this unit in a moist or dusty place. It may cause a fire, electric shock, etc.
- Do not place this unit where it would be exposed to soot or steam, near a cooking stove or humidifier, etc. It may cause a fire, electric shock, etc.

Handle the power cord carefully.
- Do not bring the power cord near a heating device. The shield of the cord may melt and it may cause a fire, electric shock, etc.
- Do not insert / disconnect the power plug with wet hands. It may cause an electric shock.
- When the power plug is to be disconnected, do not pull the power cord. The power cord may be damaged and it may cause a fire, electric shock, etc.

Caution when carrying it.
When this unit is to be moved, apply a cover to the lens and be sure to disconnect the power plug from the power outlet and check that all external connection cords are removed before moving it. If not, the cord may be damaged and it may cause a fire, electric shock, etc.

When you are not going to use for a long time.
When you are not going use this unit for a long time because you are going on a trip, etc., be sure to pull out the power plug from the power outlet for safety. And also apply cover to the lens so that the lens is not damaged.

Clean inside the unit at least once two years.
Ask your dealer to clean inside the unit at least once two years. If the unit is left with too much dust inside as it is for a long this without cleaning, it may cause a fire. Especially it is effective to clean before the rainy season starts. Consult your dealer for the cost of the cleaning the inside the unit.
Caution

- **Use of batteries.**
  - Do not use batteries not specified for this unit. Do not use new batteries mixed together with old ones. This may cause a fire, injury due to burst of battery, liquid leakage.
  - When inserting batteries in this unit, pay attention to the direction of the and polarity indications and insert the batteries correctly. If the polarities are confused, it may cause injury or damage near the unit due to burst batteries, liquid leakage, etc.

- **When you are not going to use for a long time.**
  When you are not going use this unit for a long time because you are going on a trip, etc., be sure to pull out the power plug from the power outlet for safety. And also apply cover to the lens so that the lens is not damaged.

- **Clean inside the unit at least once two years.**
  Ask your dealer to clean inside the unit at least once two years. If the unit is left with too much dust inside as it is for a long this without cleaning, it may cause a fire. Especially it is effective to clean before the rainy season starts. Consult your dealer for the cost of the cleaning the inside the unit.

[General cautions]

- **Do not place this unit where it gets hot.**
  Be careful since if you place the unit outdoors, in a place exposed to direct sunlight or near a heating device, the cabinet and parts could be affected.

- **Volume.**
  Use at the proper volume level so that it does not bother persons in the neighborhood. Especially, since the sound is likely to carry well at the night even at a low volume, consider the neighborhood to a good living environment.

- **Cleaning the lens.**
  To clean the lens, use a generally-available lens cleaning tissue (used for cleaning lens of camera, glasses, etc.). Be careful not to scratch the lens with a hard object.

- **Caution when replacing the lamp.**
  - When replacing the lamp, turn off the power of the projector and disconnect the power plug from the power outlet. Then wait for 45 minutes to allow the lamp cool. Failure to do so could result in a burn.
  - For disposal of used lamp, treat according to the instruction of community authorities.
  - Since the lamp is made of glass, do not apply shock to it and do not scratch it.
  - Also, do not use old lamp. This could also cause explosion of the lamp.
  - If it is probable that the lamp has exploded (explosive sound is heard), disconnect the power plug from the power outlet and ask your dealer to replace lamp. The lamp is covered by front glass and air-tight structure, but, in rare cases, the reflector and the inside of the projector may be damaged by scattered broken pieces of glass, and broken pieces could cause injury when being handled.
  - When the lamp has been replaced, reset the accumulated operation time of the lamp. Do not reset if the lamp has not been replaced.

- **Cleaning the cabinet.**
  - Since many plastic materials are used on the surface of the cabinet, if the surface is cleaned using benzene, thinner, etc., it may change in quality or the coating may be peeled off. Avoid using chemicals.
  - When a chemically-teated cloth is used, follow the cautions that come with the cloth.
  - Do not apply shock to it and do not scratch it.
  - Also, do not use old lamp. This could also cause explosion of the lamp.
  - If it is probable that the lamp has exploded (explosive sound is heard), disconnect the power plug from the power outlet and ask your dealer to replace lamp. The lamp is covered by front glass and air-tight structure, but, in rare cases, the reflector and the inside of the projector may be damaged by scattered broken pieces of glass, and broken pieces could cause injury when being handled.
  - When the lamp has been replaced, reset the accumulated operation time of the lamp. Do not reset if the lamp has not been replaced.

- **Rest your eyes occasionally when viewing for a long time.**
Contents of shipping box

Check that the carton contains the following items.

Liquid Crystal Projector
Remote Control Transmitter (batteries included)
Operating Guide

Power Cord
110V - US
220 - UK, Europe

3-Conductor Video/Audio Cable
RGB Cable (15-15 pin M/M)
Mac adapter with dip switch
Mouse cable x3

Names and functions of each part

Main unit

STANDBY / ON button
Power ON/OFF button.
OFF sets the unit in standby mode.
(see page 13-14)

MUTE button
Silences the sound. (Cancels the mute when the unit is set in mute mode.)

RESET button
Resets unit to factory settings.
(See page 16)

LAMP indicator
This lights or blinks when the lamp does not light. (See page 32)

ON indicator
This blinks in the standby mode and lights in the operation mode. (See page 32)

INPUT button
To select the input source.
Each time this button is pressed, the input source is changed in sequence as shown below. (See page 13)

RGB1 ➔ RGB2 ➔ VIDEO

MENU button
Picture adjustments.
Refer to page 16~19 for details.

TEMP indicator
This lights or blinks when temperature inside the projector is too high or when fan is abnormal. (See page 32)

ZOOM knob
Adjusts picture size.
(See page 13)

Remote control sensor

Lens sensor

Lens cap

• Use the remote control transmitter within the range of about 16 feet from the remote control sensor and within 30° to both the left and right.

Speaker

冷却风扇 (进气)

冷却风扇 (排气)

Handle
Names and functions of each part (continued)

**RGB input terminal**
- D-sub 15pin shrink terminal (1/2)
- RGB input terminal
- RGB input can be displayed even in the standby mode.

**RGB output terminal**
- D-sub 15pin shrink terminal
- RGB output can be displayed even in the standby mode.

**AUDIO input terminal**
- Stereo mini jack (1/2)

**AUDIO output terminal**
- (RGB/VIDEO) Stereo mini jack

**CONTROL terminal**
- D-sub 15pin shrink terminal

**VIDEO input terminal**
- (on video-equipped models only)
- S-VIDEO input terminal
- Mini DIN 4pin connector
- VIDEO input terminal
- RCA Jack
- AUDIO L/R input terminal
- RCA Jack

**REMOTE control sensor**

**AC IN socket**
- Connect the provided power cord.

**MAIN POWER switch**
- Main power ON/OFF switch.
- O : OFF
- I : ON
Names and functions of each part (continued)

Remote control transmitter

STANDBY / ON button
Power ON/OFF button.
OFF sets the unit in standby mode.
(See page 13, 14)

FREEZE Button
Pressing this button displays a still picture
(by freezing). (See page 15)

MAGNIFY button
Pressing this button partially magnifies a
displayed picture. (See page 15)

POSITION button
Moves the picture by DISK PAD after
pressed the POSITION ON button.
(Only RGB signal input)
While the back light on, you can operate
POSITION. *1

DISK PAD
① When the back light of MENU ON button
on, selects or adjusts the menu item.
(See page 16)
② When removes the on-screen menus,
works as mouse.
③ When the back light of the POSITION ON
button on, moves picture. *2

MENU ON button
Displays the on-screen menus.
And back light on. (See page 16 ~ 19)
While the back light on, you can operate
MENU.

BLANK ON button
① The blank screen which is displayed by
pressing BLANK.
② And the blank screen will be revealed
down by pressing BLANK again.
(See page 19)

INPUT SELECT button
Selects the input source. (See page 13)

MUTE button
Silences the sound. (Cancels the mute when
the unit is set in mute mode.)

VOLUME button
Adjusts volume. The sound is loud or low
while pressing the "+" or "-" button.

LASER button
Laser pointer ON button. Use as a stick (for
indication). (See page 11)

MOUSE LEFT button
Mouse left button is the left click of the
mouse. (bottom button) (See page 23)

RESET / RIGHT button
When displays the on-screen menus, resets
the menu item to factory settings.
When operates the mouse emulation, works
as right click of mouse in computer mode.
(See page 23)
After moving the picture (POSITION ON),
resets the position to factory settings.

MOUSE ON button
Mouse emulation mode starts.
(See page 23)
When menu are open or blank screen is
displayed or icon of position is displayed,
there are stopped and back light off.

TIMER ON / OFF button
Displays the setting time by count down.
See page 19 "TIMER" of menu when you set
the minutes of timer.

*1  POSITION ON icon
When presses POSITION ON button, back light on and icon is
displayed.
While displaying the icon, you can operate POSITION.
Icon is displaying in video mode, but can not operate POSITION.

*2 When the back light of MENU ON or POSITION ON button on
without displaying the icon of POSITION ON or MENU, can
operate DISK PAD too.
Displays the icon or MENU at the same time as starting the
operation.
When presses the MOUSE ON button, MENU mode or
POSITION on mode is stopped.
How to insert batteries

Insert the provided batteries (LR6 (alkal) into the remote control transmitter.

1. Remove the battery compartment cover.
2. Insert the batteries as illustrated inside the battery compartment.
3. Replace the cover.

Cautions on use of batteries

- Do not use batteries not specified for this unit. Also do not use old and new batteries together. It may cause a fire, injury due to burst of battery or liquid leakage.
- When inserting batteries, pay attention to the direction of the + and - polarity indications and insert the batteries correctly. If the polarities are confused, it may cause injury or damage near the unit due to a burst of battery or liquid leakage.

Cautions on use

- Do not drop the remote control transmitter or apply any shock to it.
- Do not let the remote control transmitter get wet and do not put it on a wet object. It may cause a malfunction.
- If you are not going to use it for a long time, remove the batteries from the remote control transmitter.
- If operation of the remote control becomes difficult, replace the batteries.

Cautions on use of the laser pointer

- The laser pointer on the remote control unit radiates the laser beam from the laser aperture.
- This laser pointer used as a stick (for indication).
- Do not stare directly into the laser aperture or radiate the laser beam to other persons as the laser emitted is a class 2 laser and it could damage you vision, etc. Especially pay attention if children are present.
- The three labels below are caution labels for the laser beam.

CAUTION
LASER RADIATION - DO NOT STARE INTO BEAM
WAVELENGTH: 670nm
MAX. OUTPUT: 1mW
CLASS 2 LASER PRODUCT

AVOID EXPOSURE LASER RADIATION IS EMITTED FROM THIS APERTURE

**How to use foot adjusters**

Adjust the projection position using the foot adjusters at the bottom of the projector.

1. Lift up the projector and press the button of the adjuster to release the lock.
2. Adjust the projection angle, release the button of the adjuster and securely lock it.
3. To adjust the angle slightly, revolve the foot adjusters.

**Caution**

- Do not unlock the foot adjusters while you do not support the projector, to avoid falling of the projector and causing an injury.
- Do not revolve the foot adjusters by force, the foot adjusters is damaged.
- Securely lock the adjuster.
- Do not apply unnecessary force from the upper side when lifting the projector. Otherwise, projector may be damaged or a finger could be caught and cause injury.
Basic operations

1. **To project the picture**

   1. Turn the MAIN POWER switch of the projector on.
      - The ON indicator will light up orange.

   2. Press the STANDBY/ON button.
      - The ON indicator blinks (green) during warm-up and then lights (green).
      - Power cannot be turned on even if the STANDBY/ON button is pressed within 60 seconds after power is turned off, since the lamp has cooled preparing for next lighting.

   3. Remove the lens cap.

   4. Adjust picture size using the projection lens ZOOM knob.

   5. Adjust focus using the projection lens FOCUS ring.

   6. Power on all connected equipment.
      The method of connecting various equipment, see on the page 20–28.

   7. Press the INPUT button or the INPUT SELECT (VIDEO or RGB) button to select the source of the signal to be projected on the screen.
      - The selected signal input is displayed at the bottom right of the screen for 3 seconds.

Example on-screen display

RGB1
Basic operations (continued)

To turn off the power

1 Press the STANDBY/ON button, for 1 second.
   • The ON indicator blinks orange and the lamp turns off. (About 1 minute later), the fan stops and
     the indicator lights up orange.
   • Press the STANDBY/ON button for short time (less than 1 second), the projector do not set in
     standby mode.

2 Turn the MAIN POWER switch of the projector off.[ ☺: OFF]

3 Install the lens cap.

Caution
   • To reduce temperature inside the projector, fan will rotate for about 1 minute after the lamp
     is turned off.
   • Do not turn off the MAIN POWER switch during the lamp on because the lamp is damaged.

PLUG&PLAY
This projector complies with VESA DDC1/2B specifications. PLUG&PLAY is a system with computer,
peripherals (including projectors), and operating system.
It works when the projector is connected to DDC (Display Data Channel) ready computer that is running
an operating system software that incorporates plug & play functionality.
(Only RGB 1)
Basic operations (continued)

**FREEZE FUNCTION**
This function can display a still picture (by freezing). This function can be used in combination with a MAGNIFY function.

1. **Press the FREEZE button.**
   The display image stops. A mark appears at the lower right of the screen for about 3 seconds during the FREEZE function.

2. **Press the FREEZE button.**
   The freeze function is cancelled. Furthermore, a mark appears at the bottom of the screen for 3 seconds or so when FREEZE is released.

**Caution**
- When the FREEZE Button is pressed, FREEZE and RELEASE can function alternately.
- What is more, FREEZE is released when an input selector button is pressed or when the display mode of a personal computer is switched over during display.
- The POSITION ON icon is not displayed during freeze. Also, scrolling using DISK PAD operation is not possible.
- When a still picture signal is given as input and the freeze function is ON, do not forget to cancel the freeze function.
- Some set up items can not be adjusted during freeze. (See page 17)

**MAGNIFYING FUNCTION**
It is possible to display a partially magnified picture. This function can be used in combination with a FREEZE function.

1. **Press the MAGNIFY + button.**
   By doing so, the center of the picture can be magnified as one part, becoming double in size.

2. **Press the MAGNIFY + button.**
   When the button is pressed, more magnification of display takes place. (Maximum about 4 times)

3. **Press the MAGNIFY - button.**
   When the button is pressed, the magnified display reduces its size. (Minimum about 1.1 times)

**Caution**
- The MAGNIFY function is released when an input selector button is pressed or when the display mode of a personal computer is switched over during display.
- Some set up items can not be adjusted during magnify. (See page 17)
Adjustments and functions

1 Press the MENU (▲ ▼ ◀ ▶) buttons or the MENU ON / OFF button.
   • On-screen menus are displayed on the screen.

2 Select the menu to be adjusted using the MENU (◀ ▶) buttons or DISK PAD.
   • Menu displayed in green is selected.

3 Select the item to be adjusted using the MENU (▲ ▼ ◀ ▶) buttons or DISK PAD.
   • Item displayed in green can be adjusted.
   When no operation is done for about 5 ~ 10 seconds, menu screen will go off.

Memory function

Individual memory functions are provided for the VIDEO, RGB1 and RGB2 input terminals. Adjustments are saved after power off.

To return to the initial setting

• Resetting menu items (SETUP, INPUT, IMAGE, OPT.)
  (1) Select the menu item to return to the initial setting.
  (2) Press the RESET button.
  (3) Select the DEFAULT (To select the CANCEL is not changed).
     (Display shown on the right will appear.)

• Resetting adjustment items (VOLUME, BRIGHT etc.)
  (1) Select the adjustment item to return to the initial setting.
  (2) Press the RESET button.
Adjustments and functions (continued)

The menu SET UP serves for the change of parameters influencing the picture and for the move picture position.

How to use the SET UP menu

1. Bar display items (VOLUME, BRIGHT etc.)
   Move the green cursor to the item you wish to adjust, then move the MENU buttons on the unit, or the DISK PAD, to left and right to adjust the length of the bar display. Some items can not be adjusted during freeze or during magnify. (Please refer to the above table.)

2. Numerical display items (V POSIT, H POSIT etc.)
   Use either manual operation or auto-adjustment. Some items can not be adjusted during freeze or during magnify. (Please refer to the above table.)

< Manual Operation >

Adjust optional items manually.
(1) Use the MENU buttons on the unit or the DISK PAD on the remote control to move the green cursor to the number of the item you wish to adjust.
(2) With the green cursor on the number, use the MENU buttons on the unit or the DISK PAD on the remote control to raise or lower the value.
Adjustments and functions (continued)

< AUTO-adjustment >
The projector will automatically adjust four items (V POSIT, H POSIT, H PHASE, H SIZE, White level). When AUTO is selected (the cursor is moved from Manual Operation towards the right) the AUTO Confirm screen shown below will be displayed.

< AUTO-adjustment Confirm Screen >
While the AUTO confirmation screen is displayed as illustrated on the upper right, if you shift the cursor upward and select AUTO, the projector will perform auto-adjustment.
It will become as illustrated on the lower right.
If CANCEL is selected for three seconds, or if the RESET button on either the unit or the remote control is pressed, the green cursor will return to the value for the selected item (Manual Operation)

< During AUTO-adjustment >
At the lower right of the screen the word <AUTO> will flash in green letters.
When the auto-adjustment is completed the word <AUTO> will disappear. The auto-adjustment of the white level is cancelled by input switching and signal mode change.

Caution
- When start up screen is displayed ("NO INPUT IS DETECTED" or "SYNC IS OUT OF RANGE" is displayed), SETUP menu items other than VOLUME cannot be set.
- TINT cannot be adjusted with PAL/SECAM video signal input.
- TINT, COLOR and SHARPNESS cannot be adjusted with an RGB signal input.
- V.POSIT, H.POSIT, H.PHASE and H.SIZE cannot be adjusted with a VIDEO signal input.
- Auto-adjustment will take about 10 to 15 seconds to complete.
- In some cases auto-adjustment may not function normally, depending on the type of computer to which the unit is connected, and the signal sent.
- Auto-adjustment may not perform normally with some images. Do not use with animated or dark images.
- Carry out the auto-adjustment when the application, which is activated on the computer, is set to the maximum display.
- After auto-adjustment the screen may become slightly dark due to the auto-adjustment of the signal level.
- Auto-adjust can not be performed during freeze, during magnify, or during the initial screen display ("NO INPUT IS DETECTED" or "SYNC IS OUT OF RANGE").

INPUT
The menu INPUT serves for the selection of input source.

<table>

**Note 1:** Signal mode

**Note 2:** MAC adapter is necessary to the resolution mode.
- Projector is compatible with 13 inch mode and 16 inch mode.
- MAC13”mode=switch 1 and switch 2 are ON.
- MAC16”mode=switch 2 and switch 4 are ON.

**Note 3:** Display mode

- Some input source may not be displayed properly because they are not compatible with the projector.
- Some input source may not be displayed in full size as shown "Display Dots".
4. Initial set signals

The following signals are initially set. The settings may be different depending on the computer type. In this case, adjust the settings referring to pages 16, 17.

**Caution** Turn off the power of both the projector and computer before connecting.

Connect the computer to the control terminal of the projector using an appropriate cable. Refer to the instruction manual of each device before connecting.

2. Mouse emulation

(1) Connect the projector and the mouse terminal of computer using an appropriate cable, while the projector and the computer are turn off.

(2) Turn the main power switch of the projector on and press the STANDBY/ON button. The indicator will light. (The ON indicator will light up green.)

(3) Press the INPUT of the projector or RGB button of the remote control transmitter and select the input connection.

(4) Turn on the computer.

(5) Start mouse emulation mode.

If can not start mouse emulation, reset the computer. (With soft reset or reset switch)

(6) See on the page 9 about to operate the remote control transmitter.

**Caution**: Mouse cannot be operated while start up screen or menu screen is being displayed.

- In some note computers which have internal pointing device, mouse emulation don’t work without setting the internal pointing device disabled. In this case, set the internal pointing device disabled in BIOS setting. After setting in BIOS, operate (1) ~ (5) Please check its hardware manuals to disable internal pointing device in BIOS setting.
- In some computers, mouse emulation don’t work without the utility program. In this case, see and check the operating manuals of the computer.

Caution

Communication via RS-232C cannot be operated with Serial mouse cable.

Purchase RS-232C cable.

Type name: Cable serial interface
Parts No.: ZU 0243 70 0010
3. Communication

(1) Connect the projector and computer using RS 232C cable.
(2) Turn off the computer and after computer is setting up, turn on the projector.
(3) Select the data speed (COM.SPEED) and the data format (COM.BITS) of the projector. (See page 19)
(4) Start communication.

4. Control command table

If computer sends the undefined command code or data code, Projector cannot guarantee operation.

Command is consisted of 2 command bytes and following data bytes.

1-st byte indicates the kinds of commands and the length of command.

- '0xH': Error-reply Projector sends to computer.
- '1xH': Command reply Projector sends to computer.
- '2xH': Ask command Computer sends to Projector.
- '3xH': Set command Computer sends to Projector.
- '4xH': Default set command Computer sends to Projector.
- '5xH' - 'FxH': Reserved

'x' indicates the length of data bytes.

2-nd byte indicates the command code 'yy' as command table.

Data table shows the data byte.
Connection to the control signal terminal (continued)

The procedure of getting the Projector status
(1) Computer sends the command '20H'+'yyH' to Projector.
(2) Projector reply the command '1xH'+yyH'+data bytes.

The procedure of setting the Projector status
(1) Computer sends the command '3xH'+yyH'+data bytes.
(2) Projector changes it's status.
(3) Projector reply the command '1xH'+yyH'+data bytes which indicate status.

The procedure of default setting the Projector status
(1) Computer sends the command '40H'+yyH'
(2) Projector changes it's status to default setting.
(3) Projector reply the command '1xH'+yyH'+data bytes which indicate default.

The example of command error
When projector cannot accept command from PC, error code '00H'+yyH' is sent back.
(in a case when command code '2xH', '3xH' or '4xH'+yyH'+data is sent from PC to projector)

The example of data error
When projector cannot accept command from PC, error code with data '00H'+yyH'+data is sent back as it is.
(in a case when command code '2xH', '3xH' or '4xH'+yyH'+data is sent from PC to projector)
When data is longer than required data code length, projector ignores excess data code.
When data is shorter than required data code length, projector sends back error code shown above.

The example of framing error
Projector sends error code '70H'+70H' up to 10 times at intervals of 1 second until any answer is received.

The interval of command bytes and data bytes
After command code '2xH', '3xH' or '4xH' is sent from PC, if command or data is not sent within 500ms, projector sends back error command '70H'+70H'. If no answer is sent within 1 second from that time, framing error is assumed.

Caution
- The interval of command bytes and data bytes must be over 1mS and under 500mS. If it is under 1mS, it may be treat as framing error.
- After projector has sent back answer code, when next command is to be sent from PC, allow for an interval of 40ms or more between answer code and other code.
Example of system setup

Connecting various equipment.

- Computer (Desk type)
- Computer (Note type)
- VTR with S-VHS out (video model only)
- VTR, etc. (video model only)
- Audio amplifying equipment
- CRT Display
Cleaning the air filter

Clean the air filter about every 100 hours.

1. Turn the main power switch off and disconnect the power plug from the power outlet.

2. Remove the front filter cover.

3. Clean the air filter using a vacuum cleaner.
   • When air filter is very dirty, wash it using neutral detergent diluted with water, and dry well.

4. Attach the air filter on the cover.

Caution
• If air filter is strutted with dust, etc., protection circuit will turn the power off.
• Do not use with removed air filter.
Lamp

Light source lamp has a service life. The picture will become dark or color will be poor when the lamp is used for a long time. If usage of lamp is continued in such cases, it could cause a malfunction. Replace lamp with new one. As reference for replacement time, indicator will operate or message will be displayed when the power is turned on, as shown on page 30~31. In these cases the lamp should be replaced. Consult your dealer.

Caution
Also LAMP indicator will light when the lamp becomes too hot. Turn off the power and let the projector cool for 45 minutes. Turn on. If LAMP indicator still lights up red, contact your dealer.

1. How to replace lamp (Option lamp : Lamp unit DT00201)

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="WARNING ICONS" /></td>
<td>HIGH VOLTAGE</td>
<td>HIGH TEMPERATURE</td>
</tr>
<tr>
<td></td>
<td>HIGH PRESSURE</td>
<td></td>
</tr>
</tbody>
</table>

When replacing lamp, turn off and remove AC cord, wait 45 minutes to let lamp cool. High-pressure lamp when hot, may explode if improperly handled.

Caution
- For disposal of used lamp, treat according to the instruction of community authorities.
- Since the lamp is made of glass, do not apply shock to it and do not scratch it.
- Also, do not use old lamp. This could also cause explosion of the lamp.
- If it is probable that the lamp has exploded (explosive sound is heard), disconnect the power plug from the power outlet and ask your dealer to replace lamp. The lamp is covered by front glass and air-tight structure, but, in rare cases, the reflector and the inside of the projector may be damaged by scattered broken pieces of glass, and broken pieces could cause injury when being handled.

1. Turn the main power switch off and disconnect the power plug from the power outlet.

2. Remove the lamp cover.
- If lamp is hot at this time, this could cause burn. Wait for minimum 45 minutes until lamp is cooled down.
- Loosen a screw and remove the cover.

3. Loosen two screws and pull the handle to remove the lamp.
- If the screws are not loosened completely, your fingers may be damaged.
- Do not insert your hand into the box after the lamp is removed.
  (There are optical parts inside. If touched by hand, it may result in color unevenness, etc.)
Lamp (continued)

4 Replace the lamp with new one and fix it using the same two screws.
   • Firmly tighten the lamp screws. Loose screws may cause bad connection of the connector which in turn may result in malfunctioning.

5 Install the lamp cover and fix it using screws.
   • To prevent burn, install the lamp cover and secure it using the screws.
   • Do not turn on the power with lamp cover removed.

   • Whenever the lamp is replaced, reset the total operation time of the lamp. Do not reset if the lamp has not been replaced.
   • Do not perform resetting without changing the lamp, as this can cause lamp breakage.

2. Reset the lamp time

Please carry out the following operation within 10 minutes from power on, if you replaced the lamp after 2,000 hours.

1) Press the RESET button on projector for 3 seconds or remote control TIMER button for 3 seconds and display the total lamp used time.
   • When accumulated operation time of the lamp reaches 1500 hours, the following display will appear at the bottom of the screen.

   2) Press the RESET button on projector or remote control MENU ON button during displaying the lamp used time.

   3) Select the “0” on the screen using the MENU ( ) button or DISK PAD.

   LAMP 1500 h

   LAMP 1500 h → 0 CANCEL
On-screen display

The following messages are displayed on the screen.

<table>
<thead>
<tr>
<th>MESSAGE</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIMER.</td>
<td>Accumulated operation of lamp has exceeded 1,500 hours. It is recommended to replace lamp. Replace with new lamp. If accumulated operation reaches 2,000 hours, lamp will automatically turn off. *1</td>
</tr>
<tr>
<td>CHANGE THE LAMP AFTER REPLACING LAMP, RESET THE LAMP TIMER. THE POWER WILL TURN OFF AFTER 20 Hr.</td>
<td>Lamp has 1,979 hours on it. Call a maintenance person. *1 Time is 20 ~ 0. (count down.)</td>
</tr>
<tr>
<td>Blinking of CHANGE THE LAMP</td>
<td>When the lamp has 2,000 hours or more on it, the message will blink, and the power will turn off after 10 minutes. *2</td>

<td>Call a maintenance person.</td>
</tr>
</tbody>
</table>

When the LAMP indicator lights, turn the power off. If the problem cannot be recovered, contact your dealer. *1 When the suction fan is stopped and the inside becomes hot, the power is cut automatically for cooling. (The indicator light will go out.) In this case, turn off the power switch and allow the unit to cool down before turning the power switch on again. The lamp will light. If the lamp does not light because it is still automatically turned off, contact your dealer. *2 If temperature inside the unit increases because of blocked vents, the lamp may go off for protection, and the LAMP indicator will turn red. Should this happen, turn off the main switch, wait until the set cools down (about 45 minutes), then again turn on the main switch.
## When you think something wrong

Check the following again before asking for service. If the trouble cannot be recovered, consult your dealer.
