SAFETY PRECAUTIONS

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE. DANGEROUS HIGH VOLTAGES ARE PRESENT INSIDE THE ENCLOSURE. DO NOT OPEN THE CABINET. REFER SERVICING TO QUALIFIED PERSONNEL ONLY.

FCC Radio Frequency Interference Statement

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiates radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

WARNING: Changes or modifications made to this equipment, not expressly approved by Toshiba, or parties authorized by Toshiba, could void the user's authority to operate the equipment.

Notice: This Class A digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

CAUTION: Laser beam is emitted when the laser button of the remote control is pressed. Do not look from the front of the remote control. Do not face toward a person or to a mirror.
Before use

IMPORTANT PRECAUTIONS

Save Original Packing Materials

The original shipping carton and packing materials will come in handy if you ever have to ship your LCD projector. For maximum protection, repack the set as it was originally packed at the factory.

Avoid Volatile Liquid

Do not use volatile liquids, such as an insect spray, near the unit. Do not leave rubber or plastic products touching the unit for a long time. They will mar the finish.

Moisture Condensation

Never operate this unit immediately after moving it from a cold location to a warm location. When the unit is exposed to such a change in temperature, moisture may condense on the crucial internal parts. To prevent the unit from possible damage, do not use the unit for at least 2 hours when there is an extreme or sudden change in temperature.

In the spaces provided below, record the Model and Serial No. located at the rear of your LCD projector.

Model No. ____________________ Serial No. ____________________

Retain this information for future reference.
CONTENTS

Before use

IMPORTANT SAFETY INSTRUCTIONS

CAUTION: PLEASE READ AND OBSERVE ALL WARNINGS AND INSTRUCTIONS GIVEN IN THIS OWNER’S MANUAL AND THOSE MARKED ON THE UNIT. RETAIN THIS BOOKLET FOR FUTURE REFERENCE.

This set has been designed and manufactured to assure personal safety. Improper use can result in electric shock or fire hazard. The safeguards incorporated in this unit will protect you if you observe the following procedures for installation, use and servicing. This unit is fully transistorized and does not contain any parts that can be repaired by the user. DO NOT REMOVE THE CABINET COVER, OR YOU MAY BE EXPOSED TO DANGEROUS VOLTAGE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL ONLY.

1. Read Owner’s Manual
   After unpacking this product, read the owner’s manual carefully, and follow all the operating and other instructions.

2. Power Sources
   This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

3. Source of Light
   Do not look into the lens while the lamp is on. The strong light from the lamp may cause damage to your eyes or sight.

4. Ventilation
   Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.
5. **Heat**
   The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

6. **Water and Moisture**
   Do not use this product near water – for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool and the like.

7. **Cleaning**
   Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

8. **Power-Cord Protection**
   Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

9. **Overloading**
   Do not overload wall outlets; extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

10. **Lightning**
    For added protection for this product during storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage to the product due to lightning and power-line surges.
Before use

IMPORTANT SAFETY INSTRUCTIONS

11. Object and Liquid Entry
Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

12. Do not place the product vertically
Do not use the product in the upright position to project the pictures at the ceiling, or any other vertical positions. It may fall down and dangerous.

13. Stack Inhibited
Do not stack other equipment on this product or do not place this product on the other equipment. Top and bottom plates of this product develops heat and may give some undesirable damage to other unit.

14. Attachments
Do not use attachments not recommended by the product manufacturer as they may cause hazards.

15. Accessories
Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer. A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.
16. Damage Requiring Service

Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

a) When the power-supply cord or plug is damaged.

b) If liquid has been spilled, or objects have fallen into the product.

c) If the product has been exposed to rain or water.

d) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.

e) If the product has been dropped or damaged in any way.

f) When the product exhibits a distinct change in performance – this indicates a need for service.

17. Servicing

Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Replacement Parts

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards. (Replacement of the lamp only should be made by users.)

19. Safety Check

Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

20. Do not get your hands between the camera arm and the main unit when setting the camera arm back in its original position.

To avoid injury, be careful not to get your hands caught when setting the camera arm back in its original position. Families with children should be particularly careful.
21. Do not carry by the camera arm.
   Do not carry the projector by the camera arm.
   Doing so can result in damage or injury.

22. Do not leave documents on the unit for long periods of time while using the document imaging function.
   Do not leave texts, papers or other documents for projection on the unit for long periods of time. The heat could erase the letters on a thermal paper.

23. Do not move the projector while the arm is still erect.
   Always store the arm back in position when moving the projector. Otherwise injury or damage may result.

24. Do not look into the arm light while it is lit.
   The strong light may cause damage to your eyes or sight.

25. If glass components, including lens and lamp, should break, contact your dealer for repair service.
   This product incorporates glass components, including a lens and a lamp. If such parts should break, please handle with care to avoid injury and contact your dealer for repair service. The broken pieces of glass may cause injury.
### Power supply cord selection

If your line voltage is 220 to 240, use one of the following types of cable.

   - **Pointer control* [26]**
     - To select items or adjust values on the menu.
     - To shift a picture after changing its size with the RESIZE button.
     - To move the marker displayed with the MARKER button.
     - To move the pointer of the computer.*
     - To substitute for the L-CLICK button by pressing the center.*
Installing batteries

1) Open the cover.

2) Install the batteries. Make sure that the +/- polarities match the illustration in the compartment.

3) Attach the cover.
Before use

Remote control operation

Point the remote control at the infrared remote sensor and press a button.

Front side

Rear side

Notes

• Do not leave the remote control unit turned the face down as it may make the buttons pressed to hasten the battery end.
• The remote control may not operate when there is sunlight or other strong light such as a fluorescent lamp shining on the remote sensor.
• Operate the remote control from a position where the remote sensor is visible.
• Do not drop the remote control or otherwise jolt it.
• Keep the remote control out of locations with excessively high temperature or humidity.
• Do not get water on the remote control or place wet objects on it.
• Do not disassemble the remote control.

Using batteries incorrectly can cause them to leak or burst. Strictly observe the following.
• Install the batteries with their + and – ends facing correctly.
• Do not charge, heat, disassemble, or short the batteries or throw them into a fire.
• Do not leave exhausted batteries in the remote control.
• Do not mix different types of batteries or new and old batteries.
• When you will not be using the remote control for a prolonged period, take the batteries out of the remote control.
• When the remote control stops working or only works from very close distance, replace all the batteries with new ones.
• When replacing the batteries, use a more longer life alkaline batteries.
• If a battery leaks, carefully wipe off any residue inside the battery case before loading new batteries.

Distance: within about 5 meters from the front of the remote sensor.
Angle: within about 15° of the remote sensor in every direction.
Connections and installation

Connections

Connecting an IBM PC or compatible computer (DOS/V)

Check that the power for the projector and computer is off before connecting the cables.

Notes
- The projector cannot be connected to a computer that does not have an analog RGB output terminal. For details, refer to the computer manual.
- You may not be able to connect some computers to the projector. For details, consult the dealer.
- If NTSC/PAL/SECAM signals are input to the RGB INPUT connector, they cannot be displayed. (Input NTSC/PAL/SECAM signals to the VIDEO INPUT jack.)

Connecting a Macintosh computer

- Attach the supplied adapter for Macintosh computers.
- Check that the power for the projector and computer is off before connecting the cables.

Notes
- The projector cannot be connected to a computer that does not have an analog RGB output terminal. For details, refer to the computer manual.
- You may not be able to connect some computers to the projector. For details, consult the dealer.
- The adapter for Macintosh computers is conformable to MULTIPLE SCAN 21.

(Continued)
Connections and installation

(Continued)

Connecting video equipment

Check that the power for the projector and computer is off before connecting the cables.

![Diagram of video equipment connection]

- Connect a stereo system for dynamic sound.
- You can connect an extra monitor to view the picture.
- You can connect a computer to control the projector.

Output terminals

Check that the power for the projector and computer is off before connecting the cables.

![Diagram of output terminals connection]

- You can connect an extra monitor to view the picture.
- Sound of the source which you select is output to the connected stereo system, etc.
- The MONITOR OUTPUT (RGB output) connector always sends out a signal which is input to the RGB INPUT (RGB input) connector regardless of your source selection.
- Even while the projector is in standby mode, the MONITOR OUTPUT (RGB output) connector continues its output.

**Note**

Signal input to the S-VIDEO jack takes priority over that to the VIDEO jack.

**Notes**

- Sound of the source which you select is output to the connected stereo system, etc.
- The MONITOR OUTPUT (RGB output) connector always sends out a signal which is input to the RGB INPUT (RGB input) connector regardless of your source selection.
- Even while the projector is in standby mode, the MONITOR OUTPUT (RGB output) connector continues its output.
Connections and installation

**Projector placement**

There are four ways of installing this projector as shown right. This section explains the standard case of the floor-mounted front projection.

**CAUTION**
- When a ceiling mount is required, please consult with the dealer.
- When carrying the unit, always handle the carrying handle.

**Preparation**
- Select a room that can be darkened.
- Refer to the table on the next page for the screen size and required distance.

---

**Floor-mounted front projection**
Viewing a picture projected on the front of the screen from a floor.

**Floor-mounted rear projection**
Viewing a picture projected through the back of the screen from a floor installation.

**Ceiling-mounted front projection**
(The document imaging camera model could not be mounted on the ceiling.)
Viewing a picture projected on the front of the screen from a ceiling installation.

**Ceiling-mounted rear projection**
(The document imaging camera model could not be mounted on the ceiling.)
Viewing a picture projected through the back of the screen from a ceiling installation.

• When installed the projector in the way except the floor-mounted front projection, make the setting of the projecting orientation on the menu.

(Continued)
Connections and installation

(Continued)

1 Place the projector on a steady, level surface such as a table.
   Point the projector squarely at the screen for the best possible picture.

   Top view
   Screen
   90°

Point the lens straight at the center of the screen as above.

   Side view
   Screen
   90°

Place the projector horizontally so that the projecting light hits the screen squarely.

2 Adjust the distance between the lens and the screen.
The projection size depends on the distance between the lens and the screen.
Adjust the projection size by changing the distances as shown below.

   a: Distance between the lens and the screen
   b: Distance between the lens height and the bottom of projection area

</tbody>
</table>

• The values are approximations.

3 Connect the power cord.
   • Insert one end in the AC IN socket on the projector.
   • Insert the other end in a wall outlet.

To a wall outlet.
The ON indicator lights in orange and the projector turns to standby mode.

4 Take off the lens cover.

(Continued)
Connections and installation

(Continued)

Notes

• When the projector is moved from a cold location to a warm location, or when the ambient temperature in the projection room has risen suddenly, moisture may condense on the lens or the mirror to blur the projected pictures. In such a case, leave the projector for an adequate time (1 to 2 hours, depending on the room’s condition) before using it so it adjusts to the ambient temperature.

• If the screen is exposed to direct sunlight or other strong light, the projected picture becomes too faint to see. Shut out the light with curtains or other means.

• If the screen and the projector are not installed properly, the projected picture may be distorted.

• If the projector is tilted, the picture may be distorted. To obtain the best possible picture, place the projector so it faces the screen squarely.

How to use the foot adjuster

The tilt of the projector can be adjusted using the foot adjuster.

1) Lift the front of the projector until a tilt angle desired is obtained and hold down the foot adjuster release button.
   The foot adjuster will stretch.
   Release the button to lock in position.

2) Turn the foot adjuster to make fine adjustment of the height.
   Turn clockwise to lift up.
   Turn counterclockwise to lower.

3) To put the foot adjuster back, hold down the foot adjuster release button and lower the front slowly.
   The foot adjuster will put back.

Note

Be sure to hold the projector when putting the foot adjuster back so as not to let the front fall on your fingers.
Operations

Picture projection

CAUTION
Do not look into the projection lens while operating the projector.

Preparation
• Install and connect the projector properly.
• Take off the lens cover.
• Set the POINTER/PJ to “PJ”.

1 Press ON/STANDBY.
Both the ON and LAMP indicators light up in green.

2 Turn on the connected equipment and put it in playback mode.

3 Select the input source.
(On the remote control)
Press RGB or VIDEO.
(On the control panel of the main unit)
Press INPUT repeatedly.
Each time the button is pressed, the source indication on the screen changes as follows:

- RGB: To project pictures from a computer connected to RGB INPUT.
- Video: To project pictures from a video player connected to VIDEO INPUT.
- Camera: To project pictures from a document imaging camera.
  (For document imaging camera model only)

4 Adjust the picture size by turning the zooming ring.
Turn to the right to enlarge the picture.
Turn to the left to reduce the picture.

5 Focus on the picture by turning the focusing ring.
A still picture is recommended for focusing.

(Continued)
Operations

(Continued)

Notes

• “―|‖” is displayed on the screen if the projector does not receive any signal from the connected equipment. Put the equipment in playback mode.
• Due to the lamp characteristic, flickers may occasionally occur in a picture. This is not malfunction of the unit.
• When an RGB source is selected and no signal is sent from the computer for about 30 minutes, the projector turns to standby mode for power saving. It automatically turns on when the signal resumes. Pressing ON/STANDBY also turns it on.
• While operating the projector, “―|‖” may be displayed on the screen. This means that the operation cannot be completed.

Turning the power off

1) Press ON/STANDBY after using the projector.
   An instruction message appears.
2) Press ON/STANDBY again.
   The LAMP indicator turns off, and the projector turns to standby mode. (The ON indicator lights in orange.)
3) After confirming the exhaust fan stops, unplug the power cord.
   The ON indicator turns off.

Notes

• Even after turning the power off, the intake and exhaust fans continue to work for a while to cool the inside of the projector.
• Immediately after the power off, the projector may not be turned on while the LAMP indicator is flashing in green.
• Before unplugging the power cord, make sure that the fans are stopped.

Correcting the keystone distortion

A picture may be expanded on the upper side if projected upward from the projector lifted up by the foot adjuster. The projector can correct this keystone distortion automatically.
Press KEYSTONE.
The keystone distortion is corrected automatically.
To correct further, make the “Keystone” adjustment on the menu.

(Continued)
Adjusting the image automatically

An image which is flickering, blurred or is not centered, can be adjusted automatically.
Press AUTO SET.
The image is adjusted automatically.
To adjust further, make the “Image” adjustment on the menu. [31]

Cutting off the picture and sound temporarily

1) Press MUTE.
The sound is cut off temporarily.
“🔇” appears.

2) Press MUTE again.
The picture is also cut off temporarily.
“:hidden” appears.
To restore, press MUTE again.

Note
If you press MUTE while the menu is displayed, the menu disappears.

Freezing the picture

Press FREEZE.
The picture freezes.
“||” mark appears on the screen.
To release the picture, press FREEZE again.
Any other operations can also release the picture.

Note
This function is convenient for the case where you are using the document imaging camera model and change documents to project through the camera.

Displaying the input source information

Press CALL.
The current input source and the signal status information is displayed.
To close the display, press CALL again.

Note
If you press CALL while the menu is displayed, the menu disappears.
Changing the picture size

Pictures are projected at the maximal projection size regardless of the signal types. Optionally you can change the picture size to through size or enlarge it.

Press RESIZE.

Each time the button is pressed, the picture size changes from the center of the picture.

When the picture size does not correspond with the projection area, the picture can be moved by pressing \(\Delta, \nabla, \leftarrow, \rightarrow\).

When the picture size is smaller than the projection area:
\(\Delta\) : To move the picture upward  
\(\nabla\) : To move the picture down  
\(\leftarrow\) : To move the picture leftward  
\(\rightarrow\) : To move the picture rightward

When the picture size is larger than the projection area:
\(\Delta\) : To view the upper side of the picture  
\(\nabla\) : To view the lower side of the picture  
\(\leftarrow\) : To view the left side of the picture  
\(\rightarrow\) : To view the right side of the picture

Notes

• Picture size returns to normal after the power is turned off. The values are not saved.
• You may not change the picture size depending to the signal.
• Pictures of VGA signals, etc. may be slightly inferior in quality at the initial size because they are enlarged.
• The picture returns to the normal position when the RESET button is pressed after the picture is moved.
• The picture may not be projected properly while moving the picture.
Operating the computer by the remote control

If you connect the iREMOTE MOUSE RECEIVER to the computer, the supplied remote control can work as a mouse of the computer.

Connecting the REMOTE MOUSE RECEIVER

Check that the power of the computer is turned off.
Connect the REMOTE MOUSE RECEIVER.
Remove the mouse actually used and change it to the supplied cable.

Notes

- To operate the projector and the computer by the remote control, place the REMOTE MOUSE RECEIVER close to the projector.
- When connecting the REMOTE MOUSE RECEIVER to an IBM PC/DOS V computer, use the supplied PS/2 mouse adapter if you are using a PS/2 mouse, or connect the supplied IBM/MAC cable directly to your computer if you are using a serial mouse.
- When connecting the REMOTE MOUSE RECEIVER to the USB PORT for the first time, insert the “Windows98 CD-ROM” and install the device drivers for a USB interchangeability device and a USB human interface devices (two kinds). The installation starts automatically when you connect a USB mouse cable connected to the remote mouse receiver to the USB port of your computer.

(Continued)
Operations

(Continued)

Operating the computer by the remote control

Use the supplied remote control pointing it at the connected REMOTE MOUSE RECEIVER.

To move the pointer
Press the pointer control.
The pointer moves to the pressed direction.

To left-click
Press L-CLICK.

To right-click
Press R-CLICK.

To drag and drop
While holding down the center of the pointer control, press the rim and release the center.

Notes
- The remote control operating range is about 5 meter from the front of the remote sensor.
- The remote control may not operate when there is sunlight or other strong light such as a fluorescent lamp shining on the remote sensor.

Preparation
Set the POINTER/PJ selector to “POINTER”.

POINTER/PJ selector

### Save

**Save data** : To save the adjustments and settings on the menu.

**All preset** : To restore the adjustments and settings on the menu to the factory set.
Initial settings – Default

Make the basic settings for projecting.

Preparation
• Display the image as explained in “Picture Projection”.
• Set the POINTER/PJ selector to “PJ”.

1. Press MENU to display the menu.
2. Press ▲ or ▼ to select .
3. Press ▲ or ▼ to select a preferred item.
4. Press ▲ or ▼ to make the setting.

To select another item, go back to step 3.

Language
Select a language for the menu or on-screen displays.
- English: English
- Français: French
- Deutsch: German
- Italiano: Italian
- Español: Spanish
- Portugués: Portuguese
- 日本語: Japanese

Proj. mode
Confirm your installation type on the chart on page 18.
- Standard: Floor-mounted front projection
- Rear: Floor-mounted rear projection
- Ceiling: Ceiling-mounted front projection
- R. ceil.: Ceiling-mounted rear projection

RGB input
To set the signal type of RGB input.
- RGB: RGB signal
- Y/Pb/Pr: Color difference (Component) video signal from the DVD video player, etc.

Video signal
To set the signal type of video input.
- Auto: Automatic signal detection works on video input. If it does not properly, set the signal type of the source from the followings.
- NTSC M: NTSC M signal
- NTSC443A: NTSC4.43A signal
- NTSC J: NTSC J signal
- NTSC N: NTSC N signal
- NTSC443B: NTSC4.43B signal
- PAL: PAL signal
- PAL N: PAL N signal
- SECAM: SECAM signal
- PAL443: PAL4.43 signal
- PAL M: PAL M signal

Press MENU.
The menu disappears.

Notes

- These settings are stored until you turn the power off.
- To store the settings even if the power is turned off, follow the procedure of “Saving data”. [34]
- Pressing RESET will return the adjustment or setting currently selected to default.
Adjustments

Keystone correction
– Keystone

Preparation
• Display the image as explained in “Picture Projection”. [21]
• Set the POINTER/PJ selector to “PJ”.

1 Press MENU to display the menu.
2 Press ◄ or ► to select \(\square\).
   ![Keystone Menu]
3 Press ▼ to select “Auto set”.
4 Press ENTER.
   The keystone distortion is corrected automatically. For further correction, follow the below steps.
5 Press ▼.
6 Press ◄ or ► to correct the distortion.
   ◄ (−): To reduce the upper width.
   ► (+): To reduce the lower width.
7 Press MENU.
   The menu disappears.

Notes
• Pressing KEYSTONE on the remote control can also correct the keystone distortion automatically. [22]
• These adjustments are stored until you turn the power off.
• Pressing RESET will return the adjustment or setting currently selected to default.
• Pictures may be slightly deteriorated by the keystone correction.

0 degrees setting for the automatic keystone correction

Depending on the operating condition such as vibration, the distortion may be beyond the automatic keystone correction. The horizontal condition setting (0 degrees setting) may be disordered. In such a case, perform the following 0 degrees setting to correct the distortion.

1) Place the projector on a level surface.
2) On the menu, select “Auto set” in “Keystone”.
3) Press RESET.

Notes
• Do not make the 0 degrees setting on an inclined or unstable surface or in a shaky place as it may not be performed properly.
• To store this setting even if the power is turned off, follow the procedure of “Saving data”. [34]
Adjustments

Projection adjustments – Image

Preparation
• Display the image as explained in “Picture Projection”.  
• Set the POINTER/PJ selector to “PJ”.

1 Press MENU to display the menu.
2 Press ◄ or ► to select  
3 Press ▼ to select “Auto sync.”
4 Press ENTER.
   The image is automatically adjusted.
   For further adjustments, follow the below steps.
5 Press ▲ or ▼ to select a preferred item.
6 Press ◄ or ► to adjust the item.
   To select another item, go back to step 5.
   Phase: To reduce flickers.
   H-position: To shift the image to the left (–), to the right (+).
   V-position: To shift the image down (–), to up (+).
   Clock: To remove vertical stripes.
7 Press MENU.
   The menu disappears.

Notes
• When performing the automatic projection adjustment, use a bright and distinctly edged picture.
• Pressing AUTO SET on the remote control can also adjust the image automatically.
• If you project an image from a computer with an LCD screen while monitoring the image on the computer, the image may not be projected properly, depending on the computer model. In this case, turn off the computer display, or make the necessary picture adjustments on the projector. For details on controlling the computer display, etc., refer to the computer’s manual and description on the software for the computer used.
• During adjustments of “H-position” or “V-position”, the image may not be projected properly.
• While using, an aberration of the phase may occur. In that case, adjust “Phase” again.
• Some item may be displayed in gray depending on an input source. The item displayed in gray cannot be adjusted and/or set.
• These adjustments are stored until you turn the power off.
• To store the adjustments even if the power is turned off, follow the procedure of “Saving data”.
• Pressing RESET will return the adjustment or setting currently selected to default.
Adjustments

Picture adjustments
– Picture

Preparation
• Display the image as explained in “Picture Projection”. 21
• Set the POINTER/PJ selector to “PJ”.

1 Press MENU to display the menu.

2 Press ◄ or ► to select .

3 Press ▲ or ▼ to select a preferred item.

4 Press ◄ or ► to adjust the item.

To select another item, go back to step 3.

Contrast : (−) Lower (+) Higher
Brightness: (−) Darker (+) Brighter
Color: (−) Duller (+) Brighter
Tint: (−) Redder (+) Greener
Sharpness: (−) Softer (+) Sharper
R-level: (−) To reduce red (+) To increase red
G-level: (−) To reduce green (+) To increase green
B-level: (−) To reduce blue (+) To increase blue

5 Press MENU.
The menu disappears.

Notes
• The adjustment can be stored on each input source (RGB, Video, Camera).
• Some item may be displayed in gray depending on an input source. The item displayed in gray cannot be adjusted and/or set.
• These adjustments are stored until you turn the power off.
• To store the adjustments even if the power is turned off, follow the procedure of “Saving data”. 34
• Pressing RESET will return the adjustment or setting currently selected to default.

Camera gain: (For document imaging camera model only)
(−) To lower the camera sensitivity when the subject is too bright.
(+) To raise the camera sensitivity when the subject is too dark.
**Sound adjustments**

*– Audio*

**Preparation**

- Display the image as explained in “Picture Projection”. 21
- Set the POINTER/PJ selector to “PJ”.

**Notes**

- These adjustments are stored until you turn the power off.
- To store the adjustments even if the power is turned off, follow the procedure of “Saving data”. 34
- Pressing RESET will return the adjustment or setting currently selected to default.

1. **Press MENU to display the menu.**

2. **Press ◄ or ► to select .**

3. **Press ▲ or ▼ to select a preferred item.**

4. **Press ◄ or ► to adjust the item.**

   To select another item, go back to step 3.

   - Volume:
     - (−) To turn down.
     - (+) To turn up.

   - Bass:
     - (−) To reduce the bass.
     - (+) To increase the bass.

   - Treble:
     - (−) To reduce the treble.
     - (+) To increase the treble.

5. **Press MENU.**

The menu disappears.
Adjustments

Saving data – Save

Preparation
• Display the image as explained in “Picture Projection”.
• Set the POINTER/PJ selector to “PJ”.

1 Press MENU to display the menu.

2 Press ◀ or ▶ to select 📀.

3 Press ▲ or ▼ to select a preferred item.

   Save data : To save the adjustments and settings on the menu.
   All preset : To restore the adjustments and settings on the menu to the factory set.

4 Press ENTER.

5 Press MENU.
   The menu disappears.
Part names and functions of document imaging camera

CAUTION
- When using the camera, be careful to not pinch your hand or fingers into the arm.
- Do not look into the projection lens while operating the projector.

On the document imaging camera model, you can project pictures using the document imaging camera. The document imaging camera can directly project any materials (documents, illustrations, etc.) without using an OHP film.

Camera control panel

1. OVERLAY button
   To activate the overlaying projection.

2. PHOTO/TEXT button
   To switch modes between text and photo.

3. ARM LIGHT button
   To turn on or off the light.

4. LOCK (W.BALANCE) indicator
   Lights when the white balance is locked.

5. W.BALANCE button
   To switch white balance settings between automatic adjustment and lock.

6. CAMERA button
   To select the camera source. Press again to return to the previous input source.

(Continued)
Camera
(Continued)

Preparation of the document imaging camera

1) Raise up the arm.
2) Stretch the arm.
3) Turn the arm.
4) Open the camera head.
5) Turn the camera head.
6) Pull up the light.
7) Turn the light.

Notes
- Never give shocks or impacts to the camera or arm as this may cause breakdowns.
- While raising up the arm in step 2), be careful not to hit your face or your body.
Camera

Picture projection with the document imaging camera

Preparation
Display the image as explained in “Picture Projection”.

Press ARM LIGHT.
The light turns on.

Place a document (text, illustration) onto or around the projector, and turn the camera head to direction of the document.

Pressing CAMER A on the camera control panel or INPUT on the main unit can also select it.

“Camera” is displayed.

Move the camera head to adjust the size of the picture.

You can project around the projector by moving the arm and the camera head.

Press CAMERA to select the camera input mode.
Pressing CAMERA on the camera control panel or INPUT on the main unit can also select it.

“Camera” is displayed.

(Continued)
Camera

(Continued)

Focus on the picture by turning the focusing ring on the camera head.

Press PHOTO/TEXT to select the mode of the document.

PHOTO: when using a photograph.

TEXT: when using a text.

When finished, turn off the light and close it, and put back the arm.

Follow the steps of “Preparation of the document imaging camera” in reverse.

Notes

- “Camera gain” adjustment may improve view of a camera subject which is too dark or vivid.

Locking the white balance

Normally, this camera automatically adjusts the color balance to project the picture. If the adjustment is not sufficient, follow the steps below to lock the white balance.

1) Project a white paper and enlarge it to fill the screen.

2) Press W.BALANCE to turn the LOCK indicator on.

The white balance is locked.

To release the white balance, press W.BALANCE again to turn the LOCK indicator off.

Notes

- If you raise up the arm while the camera input is selected, the color of the picture may vary for an instant due to the white balance adjustment. This is not malfunction.

- If you put back the arm and raise it up while the white balance is locked (the LOCK indicator is lit), the projector releases the white balance but leaves the LOCK indicator on. In this case, press W.BALANCE to restore the indicator to the normal status.

Correcting illuminated defects

If there are some luminous dots on a projected picture, make the following correction.

1) While the camera is active, cover the camera lens with a black paper completely.

2) Press OVERLAY and ARM LIGHT at the same time.

When flickering occurs by a fluorescent lighting in the room

In this case, turn off the lighting of the room or adjust the Camera gain in the following manner.

1) Press ARM LIGHT to turn off the arm lighting.

2) Press MENU to display the menu.

3) Press ◀ or ► to select “Picture”.

4) Press ▲ or ▼ to select “Camera gain”.

5) Press ◀ or ► to adjust the value.

Notes

- The light turns off automatically when the arm is leaned.

- When the arm is not raised up, the camera source cannot be projected.

- In the camera input selected, audio signals from the RGB INPUT (AUDIO) is selected.
**Camera**

**Overlaying projection**

With the RGB input or the video input selected, you can draw on the screen with the pen.

**Preparation**

- Select either of the RGB input or the video input.
- Set the document imaging camera at the ready.

**Prepare a white paper to write on.**

**Press OVERLAY.**

The camera source is overlaid on the picture.

**Project the paper using the camera.**

4 **Write on the paper with a blue or red pen.**

The handwriting is superimposed on the picture.

**Notes**

- Handwriting in colors except blue and red cannot be displayed properly.
- Handwriting in fine lines may not be displayed properly.
- When Y/Pb/Pr signal enters, the overlaying projection function is not available.
Maintenance

Trouble indications

If there is some problem inside the projector, the indicators light up or flash.

**ON Indicator**
- Off or lit (red)

**LAMP Indicator**

</tbody>
</table>

The power turns off or does not come on.
→ Trouble with the intake fan.
  - Unplug the power cord and call the dealer.

<table>
<thead>
<tr>
<th>ON</th>
<th>Lit (red)</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAMP</td>
<td>–</td>
</tr>
<tr>
<td>TEMP</td>
<td>Flashing (red)</td>
</tr>
</tbody>
</table>

The power turns off or does not come on.
→ Trouble with the exhaust fan.
  - Unplug the power cord and call the dealer.

<table>
<thead>
<tr>
<th>ON</th>
<th>Lit (red)</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAMP</td>
<td>–</td>
</tr>
<tr>
<td>TEMP</td>
<td>Flashing (orange)</td>
</tr>
</tbody>
</table>

**Note**
Before attempting any maintenance, unplug the power cord.

**Air filter, lens and main unit cleaning**

**CAUTION**
If you use the projector mounted on the ceiling, ask the dealer to carry out the maintenance such as cleaning.

---

**Cleaning the air filter**

The filter under the air filter cover is the device to shut out dusts or dregs.

Do not use the projector with the filter taken off.

Give a frequent clean especially to the air filter. (The cleaning period is once per about 50 hours).

1) Unplug the power cord.
2) Take off the air filter cover.
   - The filter is on the right side of the projector.
   - Pull up the filter tabs.
3) Clean the air filter cover.
   - Remove dust and stains with a vacuum cleaner.
4) Attach the air filter cover.

---

**Cleaning the lens**

Use a blower or a lens cleaner to clean the lens.

Never rub or tap the lens with a hard object as the lens surface is fragile.

**Cleaning the main unit**

- Pull out the power cord before cleaning.
- Use a soft cloth to wipe off stains from the surface.
- To remove difficult stains, use a soft cloth slightly moistened with a weak solution of synthetic detergent and water, and finish with a soft, dry cloth.

---

**Replacing the intake, exhaust fans and air filter**

To maintain the efficiency of the projector, replace the intake and exhaust fans about every two to three years.

Ask the dealer for the replacement.

---

**Notes**
- When the air filter is dusty, the ventilation is impaired. This causes the temperature inside the projector to rise, and may damage the unit.
- Attach the air filter cover firmly after the cleaning. If it is not set correctly, the dusts will enter and they will be projected and overlapped on the picture.
**Lamp replacement**

The lamp will eventually begin to project dark or dull pictures and finally will not light up. (Lamp's life length depends on the use condition.) In such a case, replace the lamp with a new one.

**CAUTION**
- If you use the projector mounted on the ceiling, ask the dealer to carry out the maintenance such as cleaning or replacement of the lamp.
- When replacing, always use lamp “TLPL6” (for TLP450U, TLP451U, TLP650U, TLP651U, TLP470U, TLP471U, TLP670U, TLP671U) or “TLPL8” (for TLP650A, TLP651A) (sold separately). For detail, refer to the lamp instruction.
- If you have been using the projector, the lamp will be very hot, and may cause burn injuries. Wait for the lamp to cool (for longer than 1 hour) before replacing it.
- If the lamp should break, please handle with care to avoid injury due to broken pieces and contact your dealer for repair service.

1. **Unplug the power cord.**
2. **Wait until the lamp gets cold enough.**
3. **Take off the lamp cover on the bottom panel.**
   Loosen two screws, and pull off the lamp cover.
4. **Pull out the lamp.**
   Loosen the two fixing screws, and lift up the handle to pull out the lamp.
5. **Load a new lamp.**
   Slide until it hits the bottom and tighten the two fixed screws.
6. **Attach the lamp cover.**
   Slide the cover in place and tighten two screws.
7. **Reset the lamp timer.**
   Refer to the lamp instructions for resetting.

**Notes**
- The projector displays the total working time at every 1,000 hours (only when plugged in and turned on; ex. “ >1000H “, “ >2000H “).
- The lamp should be replaced if the total working time exceeds about 2,000 hours.
- Attach the lamp cover firmly after replacing the lamp. If it is not set correctly, the power will not turn on.
- Use a new lamp when replacing it.
- The lamp is made of glass and is very fragile. Do not touch the lamp with your bare hands and do not jolt or damage it. Do not use an exhausted lamp.
Others

**Before calling service personnel**

Check the following points before asking for support service.
Refer also to “Trouble indications”.

The power does not come on.

- The power cord is disconnected.
  → Firmly plug in the power cord.
- The lamp cover is not attached correctly.
  → Attach the cover correctly.

The power turns off while using the projector.

- The ambient temperature of the projection room is too high.
  → Lower the ambient temperature of the projection room, and turn the power on.

No image appears.

- The lens cover is on.
  → Take off the lens cover.
- The wrong input is selected.
  → Select the input source correctly.
- The muting mode is on.
  → Press MUTE to restore the picture.

The images are blurred. Focusing is uneven.

- The lens is dirty.
  → Clean the lens.
  Use a lens cleaner to clean the lens.

No sounds are heard.

- The wrong input is selected.
  → Select the input source correctly.
- The audio muting mode is on.
  → Press MUTE to restore the sound.
- The sound volume is at the minimum.
  → Adjust the sound volume on the menu.
- The source is not correctly connected to the projector.
  → Connect the source correctly to the projector.

The pictures are dim.

- The “Brightness” or “Contrast” adjustments are not correct.
  → Make the “Picture” adjustments.
- The lamp life is ending.
  → Replace the lamp.

The colors are faint. The colors are strange.

- The “Color”, “Tint”, “R-Level”, “G-Level” or “B-Level” adjustments are not correct.
  → Make the “Picture” adjustments.
- The lamp life is ending.
  → Replace the lamp.

(Continued)
Others

(Continued)

Image does not appear when using the document imaging camera.

• The wrong input is selected.
  → Select the correct input source. [37]

Image is out of focus or not clear when using the document imaging camera.

• The camera lens is dirty.
  → Clean the camera lens.
    Use a lens cleaner to clean the lens. [41]
• The document imaging camera is out of focus.
  → Focus the document imaging camera. [38]
• Focus between main unit and screen is not correct.
  → Focus the picture by turning the focusing ring. [21]
• The light is not on.
  The image may not be projected clearly if the light is not on.
  → Turn on the light. [37]

The remote control does not work.

• The remote control is not facing the remote sensor.
  → Face the remote control transmitter toward the remote sensor on the projector. [15]
• The remote control is too far.
  → Operate within about 5 meters. [15]
• There is an obstruction between the remote control and the remote sensor.
  → Remove the obstacle.
• The batteries are exhausted.
  → Replace the batteries. [14]
• The operating mode of the remote control is not set correctly.
  → Set the POINTER/PJ selector according to the equipment you want to control. [13]

**Notes**

- If the mode identification does not define the mode described on the chart above, adjust to the projection details.
- If the mode identification is carried out correctly, a normal display may be not obtained depending on the signal frequency.
- SXGA, UXGA signals can be projected since the projector has simplified compatibility with them. (However, letters and lines can be unequal or a part can be missing. Some signals may not be projected at all.)
- Some computers may have output modes which are not compatible with this projector. Check the compatibility of the connectors, signal levels, timing, and resolutions.

The following signals are factory set as defaults in each mode. However, some computers may have different timings than those in the chart. Make the necessary adjustments if the picture has flickers or is blurred.

**Adjustments with RS-232C**

Conditioning of the Projection Unit can also be done by a computer via the RS-232C, as well as by the remote control.

### Interface format

1. **Communication method**
   - RS-232C
   - 9600 bps, No parity, Data length: 8 bit, Stop bit: 1 bit

2. **Communication format**
   - STX (02h) Command (3Byte) ETX (03h)
   - One command only can be used in one communication.

3. **Data format**
   - Command shall be composed of alphanumeric characters of ASCII description. Use only capital letters.

4. **Return value**
   - Acknowledge [ACK (06h)]
   - Not Acknowledge [NAK (15h)]

### Pin No. | Signal | Meaning
---|---|---
1 | RXD | Receiving data
2 | CTS | Consent to send
3 | DSR | Data set ready
4 | GND | Signal ground
5 | RTS | Request to send
6 | N.C | No connection
7 | TXD | Sending data
8 | N.C | No connection

Dimensions
TLP450U, TLP650U, TLP650A, TLP470U, TLP670U :
318 x 87 x 232 (mm) (W/H/D)
(Including the projecting sections)
TLP451U, TLP651U, TLP651A, TLP471U, TLP671U :
318 x 87 x 288 (mm) (W/H/D)
(Including the projecting sections)

Ambient environment
Temperature : 0°C to 35°C
Humidity : 30% to 70% RH

Lamp
TLP450U, TLP451U, TLP650U, TLP651U, TLP470U, TLP471U, TLP670U, TLP671U :
UHP lamp 150W
TLP650A, TLP651A :
UHP lamp 120W

Speaker
1W (monaural)

RGB INPUT
RGB signal : (D-sub 15-pin)
Audio: 1V(p-p), more than 22kΩ, Φ3.5mm stereo mini jack

VIDEO INPUT
S-video signal : Mini DIN 4-pin
Video signal : 1V(p-p), 75Ω
Audio : 1V(p-p), more than 22kΩ, RCA pin jack

MONITOR OUTPUT
RGB signal : D-sub 15-pin
Audio : 1V(p-p), less than 2.2kΩ, Φ3.5mm stereo mini jack

CONTROL terminal
Mini DIN 8-pin (RS-232C)

Cabinet Material
ABS resin

Document imaging camera

Lens
F = 1.8 – 2.3, f = 5.8 – 23.2mm
Manual operation

Iris
Auto/Level adjustment allowed

Image element
1/3 inch CCD

Total picture elements
810,000 pixels

Resolution
Horizontal 1024, vertical 768

Lighting
LED light

Liquid crystal display

Projection system
3-pannels transmission

Panel size
0.9 inches

Driving system

Projection lens

Lens
Zooming lens F = 1.8 – 2.1
f = 36 – 47mm

Focusing
Manual operation

Zooming
Manual operation

(Turned on)

LIMITED WARRANTY

TOSHIBA TLP600/400 Series 3LCD Data Projector

Toshiba America Consumer Products, Inc. (TACP) makes the following limited warranties. These limited warranties extend to the original end-user purchaser.

Limited two (2) Years Warranty of Parts and Labor

TACP warrants this product and its parts against defects in materials or workmanship for a period of two years after the date of original retail purchase.

For a period of two years after the date of original retail purchase, TACP will repair a defective product or a part, without charge to you. This warranty also covers accessories of 3LCD Data Projector. This warranty period of the lamp is ninety (90) days.

Your Responsibility

The above warranties are subject to the following conditions.
1. You must retain your bill of sale or provide other proof of purchase.
2. You must make a written notification within thirty (30) days after your discovery of a defective product or part.
3. All warranty servicing of this product or parts must be made by TACP or a service facility authorized by TACP.
4. These warranties are effective only if the product is purchased and operated in the USA.

5. Labor service charges for installation and adjustment of customer controls are not covered by this warranty.
6. Warranties extend only to defects in materials or workmanship as limited above and do not extend to any product or parts which have been lost or discarded by you or to damage to products or parts caused by misuse, accident, improper installation, improper maintenance or use in violation of instructions furnished by us; or to units which have been altered or modified without authorized of TACP or to damage to product or parts thereof which have had the serial number removed, altered, defaced or rendered illegible.
7. If it is determined after investigation that the claimed problem was not covered with this warranty, you shall pay the cost of investigation at prevailing rate.

Step-by-step procedure how to obtain warranty service

To obtain warranty servicing, you should:
1. Read the owners manual thoroughly before operating.
2. Please contact your dealer for an immediate service and an advice.
3. If your dealer is not able to assist you, please contact TACP Service Center listed below or a servicing facilities authorized by TACP for a warranty service within thirty (30) days after you find a defective product or part.
4. Arrange for a delivery of the product to TACP Service Center or a servicing facilities authorized by TACP.
5. The shipment of the product must be insured, safely and securely packed, preferably in the original carton or a carton with an equivalent protection. A letter explaining the defect and also a copy of the bill of sale or other proof of purchase must be enclosed. All transportation and insurance charges must be prepaid by you.

(Continued)
6. The repaired product is returned freight prepaid to the purchaser after warranty servicing.

7. If you have any questions about service, please contact the following TACP Service Center.

TACP is not obligated to provide purchasers with a substitute unit during the warranty period.
