Warranty clause

For Technical Support you can visit www.pyleaudio.com and take advantage of our FAQ or email us at support@pyleaudio.com.

If you need to return your unit for repair. Your item has a full 1 year manufacturer's warranty. Please send it in to Sound Around Service Center, 1600 63rd St.

Brooklyn, NY 11204, along with a letter explaining the issue in full detail to help our technician, include your return shipping and contact information, and also the receipt of purchase or customer invoice to show that the item is still under warranty. If the item is still under warranty, you will also need to include a \$20 money order to cover the return shipping. If your purchase date is less than 30 days, we suggest you attempt exchange with your original vendor or retailer whenever possible, it may avoid you from any additional shipping fee's depending on your vendors return policy. If you have not been successful communicating with your vendor. We will honor our manufacturer's warranty service and repair. If received within 30 days from purchase we can waive the return shipping fees from our facility back to you.

If the item is not under warranty, we may still be able to repair the item for you but it will be deemed as an out of warranty repair and we will contact you with a total upon evaluating your unit.

Thank you for your patience in resolving this issue.

We thank you for choosing Pyle,

Safety precautions

Warning:

When using this projector, please follow this manual carefully. unlawful use of this unit can cause shock and or fire. Do not try to repair this device on your own. Please comply with the following points.

1. Carefully read this manual before operating this projector. Follow all instructions.
2. When cleaning this projector please unplug the power cord. Use only a damp cloth and do not use any cleanser or solvent.
3. Please use only recommended accessories or damage may result.
4. Do not use in a damp environment or allow the projector to get wet.
5. Please be sure that projector is installed in a safe, stable way this it will not fall.
6. Please be sure that the projector receives proper air flow and ventilation at all times. DO not allow the filter to be clogged with dust, please clean filter regularly.
7. Please be sure that the power supply matches your projectors specifications, 110 V or 220 V.
8. Please only use 3 prong grounded outlet. Do not alter plug to fit a 2 prong outlet.
9. Please be sure that provided power cable is damage free and in good condition.
10. Please unplug the power cable during lightening storms.
11. Do not try to repair this unit by yourself, please contact a qualified repair technician for all problems.
12. Please keep projector away from sources of high heat.

Caution

About Installation

To protect your projector and to be sure that no damage occurs please install in a dry well ventilated area.

Do not place projector in direct sunlight.

Projector environment operating temperature should exceed or go below 32 to 158 degrees F

Do not block the ventilation-window of projector. If the projector's internal temperature gets to hot, the projector will shut off automatically. Please be sure to clean the air filter regularly. Do not allow dust to build upon the filter.

About Powering On

When powering on the projector, connect the power cable and be sure it is plugged into the correct 3 prong AC voltage outlet. Press the power button on the top of the unit.

The projector will power on, but the lamp will slowly grow brighter with time. After 5 minutes the lamp will be at normal brightness.

When turning off the projector, press the power button again. The lamp will shut off. The internal fans will remain running for an additional 5 minutes to continue cooling the internal electronic components and lamp. When turning of the projector to not unplug the power cable directly. After five minutes the projector will finish cooling and shut of automatically.

Warning:

The fans on this unit adjust the internal temperature. The fans will change speed as the internal temperature of the unit changes. The fan motor noise will fluctuate as well, this is normal operation. Please do not pull power cable while the projector is operation. If the fans lose power before the internal temperature of the unit cools, this may cause damage to the internal components.

Introductions

Projector Description

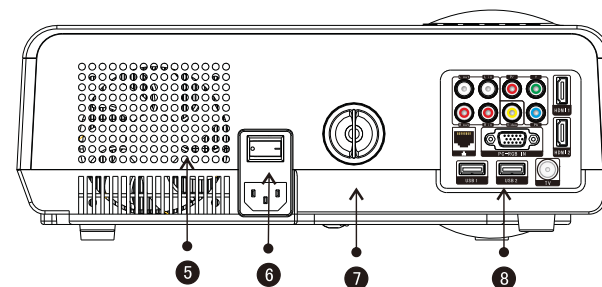

The projector is able to connect signals: HDMI,Y/Pb/Pr,VGA and TV(optional),as well as stereo audio input. Please connect in reference to the following diagrams

Front

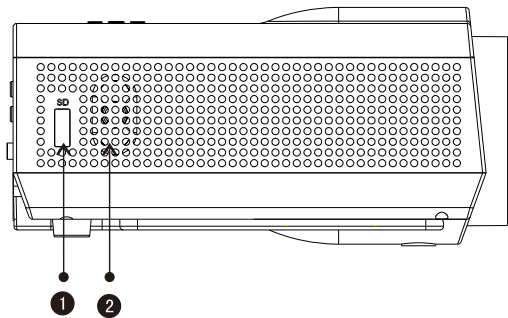

- ① Focus lens
- ② IR receiver
- ③ Hight-feet adjustment
- ④ Cool winds input Ventilation

Back

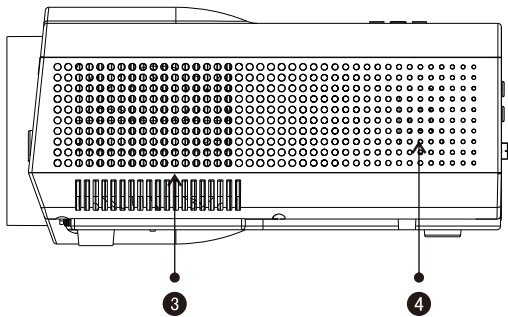

- ⑤ Hot winds output ventilation
 - ⑥ Power switch
 - ⑦ Keystone adjustment
 - ⑧ Input terminals
- Details at page 16
Details at page 10,11

Right

- 1 SD card slot (Only WIFI model support this function.)
- 2 Right channel speaker

Left

- 3 Cool wind input ventilation
- 4 Left channel speaker

FAQ:

- ① Q: Blue screen,no picture,no sound
A: Input cables connected right?
- ② Q: Picture right, no sound
A: Input cables connected right?
Volume at min. Or on Mute
- ③ Q: Audio right,no picture
A: Input signal connected right?
In VGA mode, The PC refresh rate >75Hz
In VGA mode, The PC contrast ratio is >1024*768
- ④ Q: Can' t find devices when plugged with hard drive or fresh drive
A: Re-plug the device
Check if the device is broken
- ⑤ Q: Can' t play the movies
A: The format of the video is right?
Files is broken?
Device is broken?
- ⑥ Q: There is picture ,no sound?
A: The decode system doesn' t match

VGA with notebook

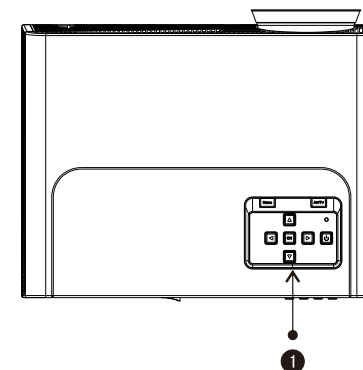

When connect the projector with the note book, you may need to press the Fn+F*(with  on the button)

VGA output function key

The projector is so easy to use as the TV. While some problems may occur because of the environment and voltage. Please try to recognize the fake malfunction before refer to the technicians

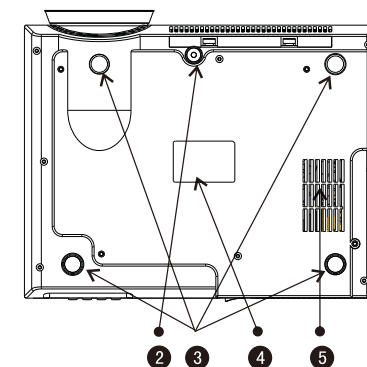

Problem	The possibility reason
1. When the power switch is turned on, the indicator light does not work	◎ The power is not connected well ◎ The power switch fuse is burned ◎ Check the over-heat protection system
2. The remote control can not turn on projector	◎ The power switch turn on or off? ◎ The remote control battery is depleted? ◎ Something is standing between the remote and IR ◎ Strong light on IR directly
3. No image on the screen	◎ Is the channel set-up correct? ◎ Is there an input signal? ◎ Is the input cable plugged in well? ◎ Under PC model, is the refresh rate >75KHz? ◎ When the projector is connected with the notebook, set the screen as VGA mode
4. Auto-off after working for a while	◎ The projector ventilation is blocked ◎ The voltage is not stable ◎ The over-heat protection system

TOP

- ① Control panel

Projector Installation

Standard setting (Front projection)

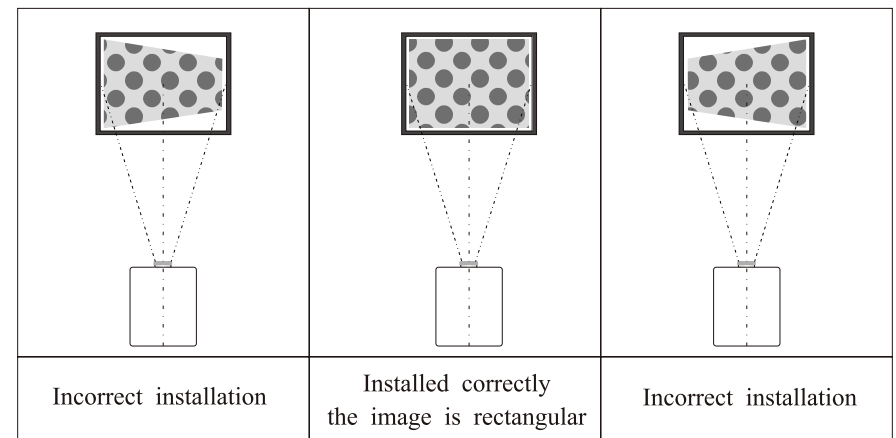

Please refer to the below sheet, install the projector in distance according to the screen size. Please make sure the projector is placed on stable mount, Take care of the ventilation condition (nothing near 15 inches blocking)

Distance	4:3	16:9
60"	2.5m	2.16m
84"	3.43m	2.97m
100"	4.05m	3.5m
120"	4.77m	4.15m

The data may have 3% error, due to the image size according to the projector and screen. If the distance is less than 2M or more than 5M , the image may appears unclear

Warning:

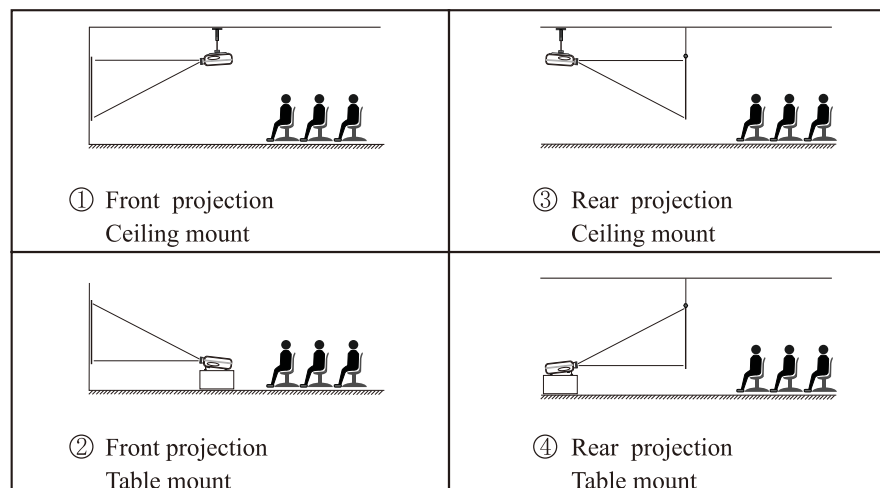

Please check the following pictures for the trapezoid adjustment

Projector Installation

Installation method

Contact a professional service man to mount this projector to a ceiling
Follow the instruction below for the correct projector positions:

Warning:

1) This projector might be damage beyond repair when it is incorrectly mounted on a ceiling or when it is in correctly installed on a incorrect surface.

It may also inflict damage to people nearby if it falls.

2) This projector can only be used in an environment with a temperature not exceeding the range of 0-35 degree. The projector may malfunction if temperatures vary outside the normal operating rage

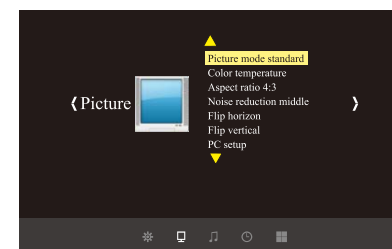

3) The sharpness of the screen might be interrupted when the projector is being used in a dusty, wet, moist or smoke filled environment. The projector might malfunction in a moist or wet environment

4) Take care of the sufficient ventilation around the projector. Otherwise this projector might overheat and cause life threatening situations

5) When you first turn on the projector there may be an unclear image, Please refer to the image adjustment for help

TV	Analog TV input (optional)

CAUTION

- ☆Turn off the power of projector and the device before connecting, Either on may cause a break down of machine
- ☆Check the shape of the plug,DO NOT try the wrong plug

Image adjustment

When you use the projector for the first time .It normally will appear image faintness or the image is trapezoid. This is caused by the wrong lens focus or trapezoid correction
Please follow the below steps to correct:

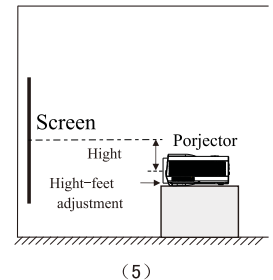

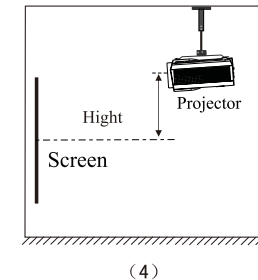

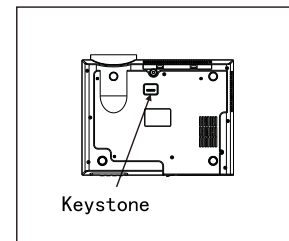

Focus adjustment

- 1、 Rotate the lens into projector, then rotate it out slowly. At the same time, looking at the resolution point carefully. When the image is clear, it is the best situation of the lens

Keystone

- 1、 If a projected picture has keystone distortion, correct image with Keystone adjustment. The image becomes trapezoid shape when the screen or projector is not leveled. Please reposition the projector to improve its angle to the screen. However, the circumference of the image may not be focused

Turn on/shut down

If the projector is a new one, please read the “projector install chapter, place the projector and connect the cables, follow the below steps to turn on/off

Turn on

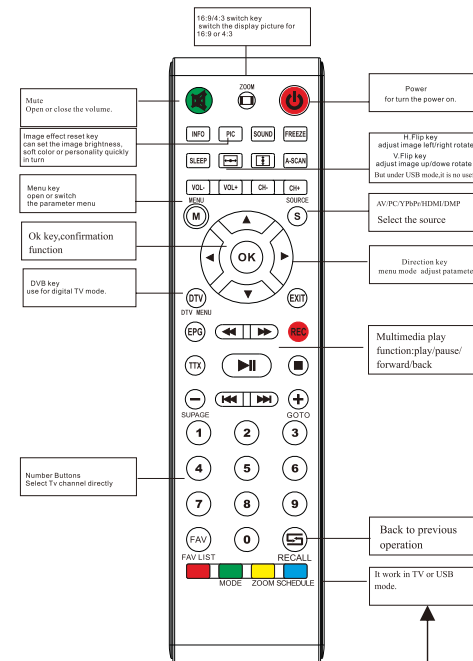

1. Put in two 7-size battery in the remote control before using
2. Pull the power switch on the backboard as the power light turn red
3. Press the power key on the remote or panel ,the indicator light turn green
4. The lamp start working 2 seconds later, image projected on the screen the machine is working smoothly
5. The new projector may have problems like image unclear or trapezoid distortion, Please read “image adjustment” chapter
6. After the image is clear ,you may enjoy the program, in the meantime ,you can still setup the system or adjust the parameters

Turn off

1. Press the power button during using will lead the projector to standby mode
2. when the projector switch into standby mode ,the light will turn green from red

Remote control

Remote control instruction
