**Overview**

**4K PRO-UHD\(^1\) Projection Technology**
A new type of 4K home theater experience utilizing advanced processing for resolution enhancement, color and image processing – resulting in an exceptional 4K home theater experience

**True 3-Chip Projector Design**
advanced 3LCD technology displays 100 percent of the RGB color signal for every frame without any "rainbow effect" or color brightness issues

**4K Resolution Processing**
Pixel-shifting technology precisely controls three individual, high-definition LCD chips to parallel process millions of pixels.

**Full 10-bit HDR\(^2\)**

**Digital Video Processing**

**Outstanding Brightness**
Accepts 100 percent of the HDR source information to faithfully reproduce HDR content for an amazing visual performance, plus HLG support.

Real-time, 12-bit analog-to-digital video processing for smooth tonal transitions; helps eliminate banding, blocking and other compression artifacts from the final visual performance.

An impressive 3,000 lumens for both color and white brightness; contrast ratio of up to 100,000:1 for rich black detail.

- Full 18 Gbps HDMI 2.0 support — compatible with virtually all color formats, depths and spaces while simultaneously supporting 4K HDR2 content at a full 60 Hz
- Epson Precision Lens — utilizes a multi element precision glass structure for outstanding image clarity and edge-to-edge focus uniformity, along with precision vertical and horizontal axis lens shift adjustment
- Built-in stereo speakers and aptX® Bluetooth® — rear-firing, dual 10 W speaker system for simple audio requirements and aptX Bluetooth for easy, wireless connectivity to external sound systems
- Active 3D support — offers support for high-performance, active 3D glasses to faithfully reproduce all the source 3D information to maximize the visual effect
