ultra portable • smallest design • auto set-up • high quality

X10

The A+K AstroBeam X10 is proof that image quality is not dependent on projector size. Despite its minimal dimensions, this 1.5 kg light-weight DLP projector convinces with its brilliant XGA image and a brightness of 1100 ANSI lumen. It is the perfect projector for presentations on the road.

X10

Adapter for great connectivity

Delivery of the A+K AstroBeam X10 includes a small adapter with an integrated 1 Watt speaker for the presentation of video images as well as connection of digital and analogue computer sources.

Convincing presentations

DVI input

The A+K AstroBeam X10 is equipped with a so called DVI port (Digital Visual Interface). Thus, digital computer sources can be connected directly to the projector. Digital images are projected in perfect quality without a difficult synchronisation process.

Functions

Digital zoom, digital keystone correction, blank with reveal function, freeze, logo function, remote control with laser pointer, 16:9 video, auto-set up, resizing, ceiling / rear projection.

ARLS function

Another intelligent feature is the so-called ARLS function (automatic roomlight sensing) which automatically adapts the projector brightness to the surrounding light situation.

Quiet ventilation system

The extremely low noise level of less than 30 dB A guarantees for undisturbed presentations even in small groups.
