

Where value counts

TLP-260/1

1500 ANSI lumens

True SVGA (800 x 600) resolution

3.2kg and 3.9kg respectively

LCD technology

Flexible input options

Choose freedom.

TOSHIBA

TLP-260/1

The value choice for smaller settings.

Here are two great projectors that fit a budget without cutting corners. They both feature a Short Throw Zoom Lens that will project a large and very bright image from quite short distances, making them ideal for smaller rooms, or where the presenter is also operating the equipment at the front of the room.

To make things easier, both the TLP-260 and TLP-261 also feature a Lens Shift that enables you to move the image up or down without resorting to a pile of books!

As with other projectors in the unbeatable Toshiba range, the TLP-261 has a Visualiser Arm, only here it's more discreet, with a short focus lens that will capture a large book, say, at close range. It also has an excellent depth of field, which means that the whole of a 3-dimensional object will be in focus.

There's no compromise on the specification of these beauties – a full 1500 ANSI lumens, SVGA resolution and an in-built amplifier and speaker give them all the impact you're likely to need for either computer or video material.

Add easy portability (3.2kg for the TLP-260, and just 3.9kg for the TLP-261) and you are sure to get maximum use from your investment.

Big impact in small spaces

- With its specially designed Short Throw Lens, there's no need for small spaces to cramp your style

Speedy set-up

- 'Plug and project' functionality ensures that even a novice will have the projector up and running in minutes

The power of LCD

- A dazzling 1500 ANSI lumen output
- SVGA resolution and 400:1 contrast
- Outstanding results from any video source
