

We've reinvented the art of presentation.

The new CASIO projector XJ-350 and the accompanying multi-functional camera system offer unlimited opportunities for your ideas.

Arrive all relaxed and make a big impression: the new generation of CASIO projectors sets new standards in integrating high-end technology in the smallest space, thus providing perfect mobility and the maximum variety of applications. Despite the extremely light weight and small size – the XJ-350 is smaller than a sheet of B5 paper – you can use it to present your ideas brilliantly and in large format even in the brightest surroundings, thanks to 2,200 ANSI lumen. And the integrated double zoom lens means that you can convince your audience in small rooms just as well as in a spacious conference setting.

As if that wasn't enough, CASIO brings you another small revolution in the shape of a multi-functional camera system available in a set together with the XJ-350. Combined with our high-performance projectors, the camera system lets you do things while you're actually giving a presentation that you never dreamt of before. Thus you can incorporate up-to-date photos, newspaper clippings and handwritten notes into your presentation, or you can use this set as a documentation tool. Everything in top visual quality, for a perfect presentation that's sure to be a success!

XJ-350

Provide an environment for creativity.

Technical data XJ-350

Display	Technology	1 x 0.7" 12° DLP™
	Resolution	XGA 1,024 x 768
Image	Light flux	2,200 ANSI lumen
	Contrast	1000 : 1
	Colour depth	16.7 million
Lens	Technology	Optical double manual zoom
	Focal length/aperture	f: 20 - 40mm / F: 2.0 - 2.8
	Projection ratio	1.4 - 2.8 (distance : image width)
	Offset	100 %
	Min./max. distance	0.80 m / 5.40 m
	Focussing	Manual
Bulb	Type	200 W NSH
	Lifetime	Ca. 2000 hours
Trapezoid correction	Vertical	+/- 30° automatic
	Horizontal	+/- 8° manual
Connections	Computer	1 x 15pin HD
	Video	1 x RCA
	S-video	1 x mini-DIN
	Component	Opt. adapter via 15pin HD
	Audio	3.5 mm jack
	Mouse control	USB
Computer compatibility	Resolution	800 x 600 (expanded) up to 1,600 x 1,200 (condensed)
	Hor./vertical frequency	15 - 92 kHz/50 - 85 kHz
	Signal	Analogue RGB
Video compatibility	Standards	PAL-N, PAL-M, PAL60, SECAM, NTSC
	Signals	Composite video, YC, YPbPr
Audio system	Loudspeakers	1 x 1 W
Remote control	Technology	Wireless IR with mouse function & laser pointer
General	Measurements (W x H x D)	230 x 55 x 171 mm
	Weight	1.8 kg
	Casing	Magnesium alloy
	Colour	Silver
	Mains voltage	100 - 240 V AC 50/60 Hz
	Power consumption	Ca. 270 W
	Operating temperature	5 - 35 ° C.
	Operating noise	33 dB (A) whisper mode)
	Guarantee	3 years
	Bulb guarantee	500 hrs or 90 days
Other functions	Digital zoom, whisper mode, back projection, picture-within-picture, user logo, mute, freeze, Kensington slot	
included in package	mains cable, RGB cable, USB mouse cable, video cable, IR remote control, batteries, carrying case, operating manual on CD, short instructions, guarantee card

2x zoom

Fits in the smallest space: the optical double zoom adjusts as necessary.

The XJ-350 can cope with really large conference rooms. But sometimes you find yourself giving a presentation in a more confined space. Just as well that the XJ-350 has an integrated wide-angle, double zoom lens: this ensures that you'll make a big impression even over short projection distances. For an image 120 cm wide, the XJ-350 only needs a projection distance of 1.6 metres! And you can be flexible in your choice of projection location, too: the fully automatic vertical trapezoid correction and a manual horizontal correction mean that you just set up the projector – and you're good to go. Last but not least: to make sure that nothing disrupts your presentation in such intimate surroundings, the XJ-350 produces only 33 decibels in whisper mode.

Flexible presentations with the multi-functional camera system YC-400.

A complete innovation – in fact, nothing short of a revolution. With the optionally available multi-functional camera system YC-400, featuring a high-resolution digital camera with 4 million pixels, a tripod that folds up to B5 size and a document tray, you have new presentation techniques at your fingertips, such as direct document capture and projection of documents as with a classic overhead projector, immediate pictures of flipcharts or whiteboards, integration of up-to-date photos, and much more besides. And of course the camera can be removed from the system, so that you have a high-quality digital camera with you at all times. The simple connection to your computer's USB port and the software supplied with the system ensure that you're ready to start without delay.
