VIPER PD8130 PD8150  HOME THEATER PROJECTORS
Experiences beyond mere satisfaction.

There is a line of home theater projectors from a company as passionate about excellence as you are. It’s as if your wish list somehow made it into our hands, where innovation, performance, and affordability skillfully coexist. With 25 years of engineering prowess in specialty display markets, from medical to commercial to industrial, Planar is pouring years of proficiency into distinctive home theater projectors. The result is an experience far beyond mere satisfaction. Rather, Planar provides the very means by which all your senses will revel in wonder. Available exclusively through specialty home theater partners worldwide, Planar’s projectors were designed with your exact needs in mind.

The revolutionary Planar Viper, PD8150 and PD8130 1080p projectors all offer revolutionary Picture-in-picture (PIP) and Picture-by-picture (PBP) features. PIP reduces the designated image area of the active source and places it on the screen next to the PIP source. In addition to PIP, these Planar projectors also feature Split Screen features, where two active sources are displayed in equal sizes next to each other. This special mode allows two giant images on the same screen at the same time.
With an amazing 2,000 lumens light output and a spectacular 10,000:1 contrast ratio, every performance becomes a command performance. Featuring 5 lens options with horizontal and vertical lens shift and an elegant piano black design, this projector will surely transform your theater into a glorious experience. Prepare to be mesmerized, this VIPER will charm you.

- HD 3-chip DLP™ with DynamicBlack™
- Benchmark performance for projector technology
- 2,000 lumens, 10,000:1 contrast
- 5 lens options with horizontal & vertical lens shift
- Integration features
- Elegant custom design and piano black finish

1080p DLP® with DynamicBlack™
- Horizontal & Vertical lens shift
- 1,000 lumens; 15,000:1 contrast
