

BOXLIGHT **FP-95t** PROJECTOR

the new standard in LCD projectors

Playing in the presentation big leagues? Then play with the best tool you'll find anywhere—**BOXLIGHT's FP-95t** projector. It's a super bright, 2300 ANSI lumens, SXGA projector that can belt high quality video and digital images across the stadium. And unlike 3-gun and light valve projectors it requires no convergence or maintenance. In fact, the lifetime cost of servicing 3-gun machines alone would pay for a new **FP-95t**. Hit your messages home on the big screen. Call today for details on this all-star projector.

With 2300 ANSI lumens, ambient light and large images are no challenge to this super bright projector.

The FP-95t offers true 1280 x 1024 SXGA and compression for 1600 x 1200 UXGA.

At only 39.2lb/178 kg it's about half the size and weight of a 3-gun or light valve projector.

Multiple connectivity for integration with a wide range of peripherals.

Digital Realized Interpolation Technology (DRIT) creates a resolution free environment—digitally reconstructing images by expansion or compression.

Built-in laser pointer remote draws audience to presentation details.

Digital zoom imaging via remote enlarges portion of the presentation for closer detail.

Easy integration into conference rooms and auditoriums using existing electronics such as AMX and Crestron.

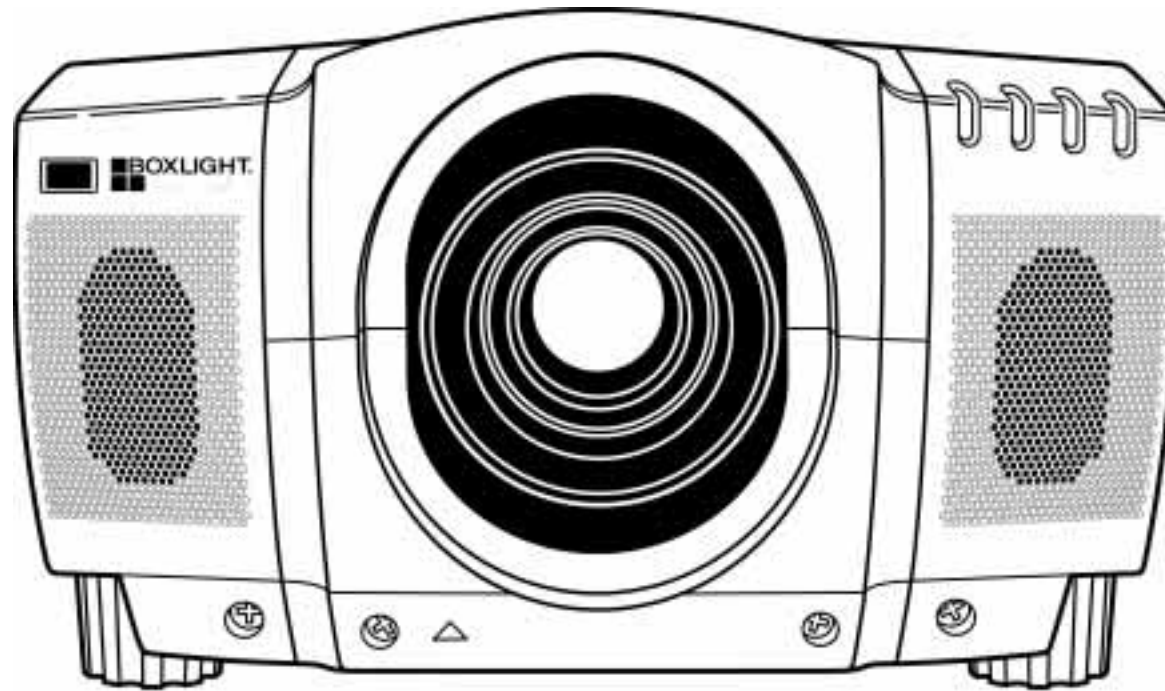

Twin-stackable feature for an even brighter show—nearly 4600 ANSI lumens.

Compatible with most leading high resolution workstation units.
