

HDR-PJ10

High Definition Projector Handycam® Camcorder

Share your memories virtually anywhere using the HDR-PJ10 Handycam camcorder's built-in, high-contrast projector. This mobile theater can project up to a 60" (diag.) image on almost any surface, and with powerful stereo speakers, you'll hear all the action. Record 1920x1080/60i/60p Full HD videos onto 16 GB of internal flash memory.

Projector HD

1920x1080 Full HD 60i/60p Recording w/3MP still image

The Sony® HDR-PJ10 offers 1920x1080 resolution letting you record your memories in exceptional Full High Definition quality. Capable of 60p recording with playback via HDMI™ (cable sold separately) to an HDTV providing stunning clarity and incredibly detailed and smoother playback of your memories.

16 GB¹ embedded Flash Memory for up to 6 hours of recording

The embedded 16 GB¹ flash memory can record and store up to 6 hours of high definition video footage (HD LP mode).*

Project your videos on the go anywhere, anytime

The high-contrast projector built-in to the LCD panel gives you the freedom to share your favorite memories virtually anywhere. Powerful enough to project a 60" diagonal screen, this small projector packs a powerful punch. Combined with advanced stereo speakers with Clear Phase technology, your memories will come alive for you and those you're sharing with.

Wide Angle G lens to capture everything you want

Experience the pinnacle of Sony® lens technology with the professional-quality G Lens. Engineered for superior optical performance, Sony G lenses deliver brilliant, accurate color reproduction and sharp, amazingly detailed images. In addition, the 29.8mm focal length offers a broader perspective for enhanced wide angle shooting.

Back-illuminated "Exmor R" CMOS sensor for superb low-light video

Experience stunning low-light sensitivity with improved image clarity and drastically reduced grain with Sony's back-illuminated "Exmor R" CMOS sensor. Designed for compact cameras and camcorders, the "Exmor R" sensor relocates the photo diodes above the support circuitry, maximizing the light gathering area per pixel so you can shoot with better results in lower lighting conditions

Optical SteadyShot™ image stabilization w/Active Mode

Optical SteadyShot image stabilization with Active Mode compensates for greater degrees of camera shake to deliver stunningly smooth video from wide angle to full telephoto shooting. In addition, innovative 3-Way Shake-Canceling adds electronic roll stability for even smoother video capture.

42x Extended Zoom to get even closer to the action

Extended Zoom works in conjunction with 30x optical zoom to get even closer to the action while maintaining HD image quality.
