

[TLP 650]

THE NEW EASE!

IN BEST FORM
EVERY TIME

The TLP 650 by Toshiba is a true champion in the lower weight categories. It copes easily with various different technical disciplines. Whether data projection from the computer or optionally presentations via DVD, video and TV, this all-round athlete is tailor-made to your wishes. You can show texts, diagrams, pre-produced presentations and Web pages live from the Internet on any wall in overdimensional quality. And its S-video, DVD and audio inputs let you show moving pictures in cinema format. Is your projector up to all this?

The new TLP 650 puts you in best form for every presentation. Our compact multi-talent has been slimmed down even further for the tough presentation contest. It only weights 3.7 kg so you don't have to lug unnecessary weights around, because presentations are hard enough as it is. Our featherweight has enormous power, a first-class outfit and fantastic inner values: 1100 ANSI lumen in full XGA-resolution will inspire your audience with brilliant luminosity and fantastic depth to your pictures. Technical details such as automatic adjusting functions, digital zoom and stills function make your task so much easier. The new TLP 650 keeps you on the move. Before and during the presentation. And saves your strengths for a convincing performance.

XGA-RESOLUTION
1100 ANSI-LUMEN

[VIDEO + DVD + TV]

[PC, MAC + NOTEBOOK]

TLP 450 AND 650

DATA AND FACTS
