

BrightLink® Pro 1410Wi

The world's most innovative meeting room productivity tool.

EPSON®
EXCEED YOUR VISION

Easy to Use

No Computer Required

Collaboration Tools

You Don't Know What You Are Missing

Looking for ways to increase productivity in your organization?

Tired of holding multiple meetings every week and feeling like you are not making any progress?

Do you have handwritten notes on post-its or flip charts — or even pictures of whiteboard notes taken via your cell phone, and no one is following up on the action items?

Epson has the solution.

The All-in-one Meeting Room Productivity Tool

The BrightLink Pro 1410Wi, our new meeting room productivity tool, will help you increase productivity throughout your organization.

It's simple to use because it works like an appliance, and does not require a computer.

- Just walk in, turn it on and start writing — that's it!
- Use it like a whiteboard, add pages, insert images
- If you have your own device, like an iPad® or laptop, project your content, annotate on it and capture all your notes
- When you are done, you can save your work, print it or email it

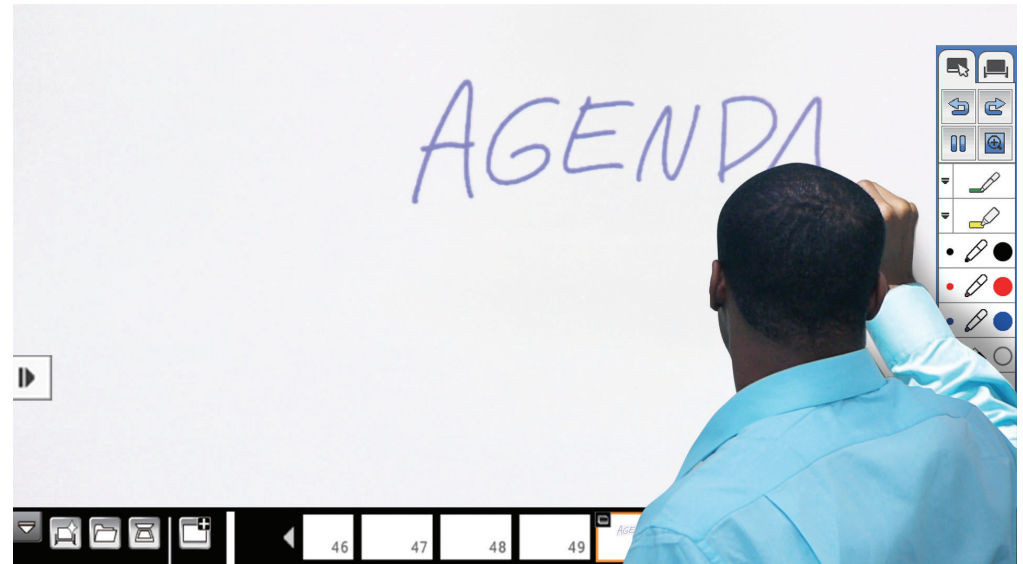

Maximize your productivity in the workplace with the BrightLink Pro 1410Wi. Your meetings will be more efficient and fun, and sharing notes and action items will be a piece of cake.

Whiteboard 2.0

Turn your traditional whiteboard into a new digital whiteboard

- Turn it on and start writing using the interactive pen
- Add pages when you need more space
- Insert images from your USB drive or network drive
- Print, save, or email when you are done

Use the control panel for easy access

- Use the control pad as a USB hub, an extension to your USB ports, or as a remote control unit with easy access to certain functions
- Use the USB ports to connect to your computer, printer or thumb drive
- Use the intuitive buttons to power the projector on/off, or select functions including Whiteboard mode, Source Search, Capture, Print or Save

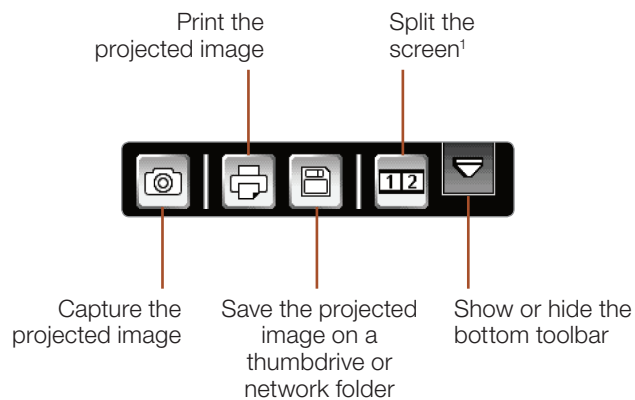

Present, Annotate and Capture

Use it with your own device

Bring your own content, project it on the screen, annotate and capture your notes. When you're done, share content via the Email, Print or Save functions.

Connect your iPad, iPhone®, iPod®, Android™ devices or computer wirelessly, or via HDMI, DisplayPort and other inputs.

PC Interactivity

If you prefer to interact with your PC or Mac,[®] you have the option to use the interactive pens as wireless mice. This will give you the flexibility to run any application on your computer, surf the web, and edit your documents on the go.

You can enable interactivity in three different ways:

- 1 Transfer the video via HDMI, DisplayPort or a VGA cable and use the interactivity via a USB cable
- 2 Transfer video, audio and interactivity via a USB cable
- 3 Transfer video, audio and interactivity wirelessly using free EasyMP[®] Network Projection v2.81 (or higher version) software

You can also use Epson[®] Interactive Tools (EIT) for basic annotation functions including being able to save directly into Microsoft[®] PowerPoint.[®]

Bring Premium Design to Your Room

The BrightLink Pro 1410Wi offers an optional all-in-one mount, available in three different finishes. Choose from a beautiful Teak, deep Cherry, or sleek Aluminum finish to seamlessly fit in with the existing décor at any corporate setting.

TEAK FINISH

CHERRY FINISH

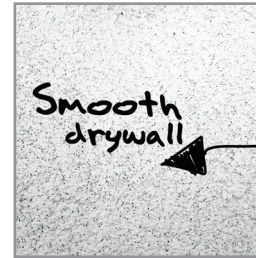

ALUMINUM FINISH

Epson projector sold separately. All-in-one mount option sold separately from Chief Mounts.
Visit www.chiefmfg.com for more information.

Any Surface Becomes a Collaborative Surface

Ultra versatile

BrightLink Pro 1410Wi works on almost any surface — an existing dry-erase board, a whiteboard, a flat wall, or a table.² Interactive capabilities are built into the projector, so it's perfect in virtually any setting. Simply project and annotate with the BrightLink Pro 1410Wi.

Ultra-short-throw Design for Large Images up to 100"

Go bigger than flat panels — 100" diagonal widescreen image

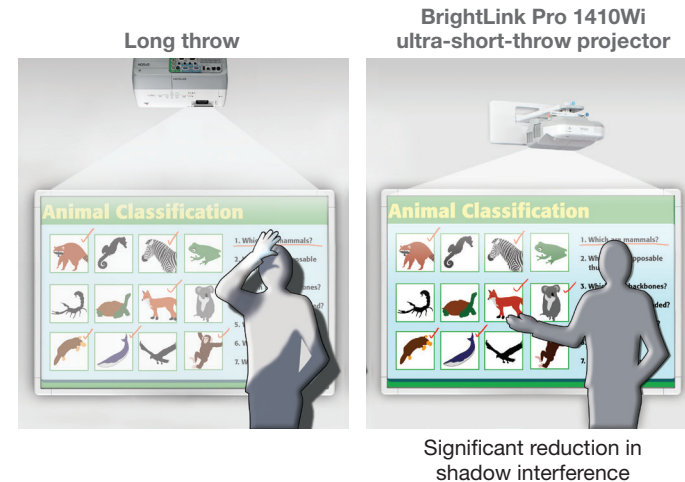

Take advantage of one of the largest interactive areas available without paying a premium for size. The BrightLink Pro 1410Wi can project images up to 100" in native WXGA, 1280 x 800 resolution.

- 69% larger than a 77" flat panel display or board
- 27% larger than a 87" flat panel display
- Bright, vivid images in well-lit rooms
Color Brightness: 3100 lumens³
White Brightness: 3100 lumens³

Virtually eliminates shadows and eye glare

BrightLink Pro 1410Wi's ultra-short-throw design eliminates many of the common problems of interactive systems, such as shadowing and eye glare. With an incredibly efficient 0.27 throw ratio, BrightLink Pro 1410Wi allows you to project extra-large interactive images up to 100" with the projector less than 12.5" away from the image surface.

Full-size Videoconferencing

You no longer need a flat panel display for your videoconferencing needs, with the BrightLink Pro 1410Wi. Connect your videoconferencing system to BrightLink Pro 1410Wi and display an image as large as 100" (diagonal). Simultaneously display your videoconference on one side of the screen and additional content, such as a web page or presentation, on the other side.

Split Screen¹

Project two images (video or still) side-by-side from two different sources. Choose from three layout options. You can swap the images, choose the source for the audio and even display closed captioning, if the source signal includes it.

Layout Option 1:
50-50% Split Screen

Layout Option 2:
Main image on the left

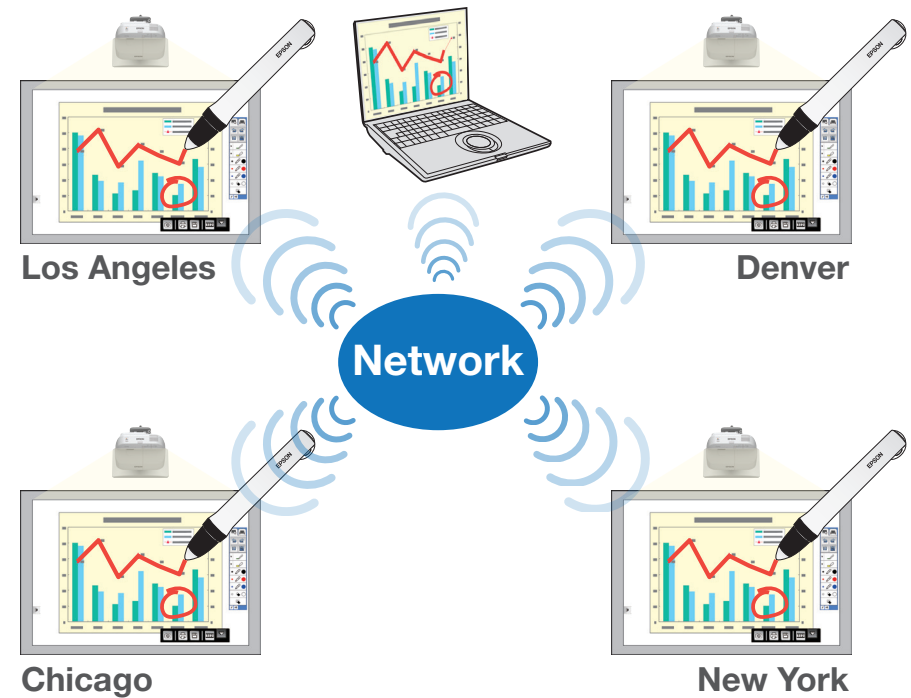

Layout Option 3:
Main image on the right

Remote Collaboration

The BrightLink Pro 1410Wi enables you to share your content across the network, by projecting that content at other locations using up to three more BrightLink Pro 1410Wi projectors. All four projectors enable users to annotate on the projected image and their annotations are visible at all four locations, resulting in more productive and collaborative meetings.

Epson iProjection™ App

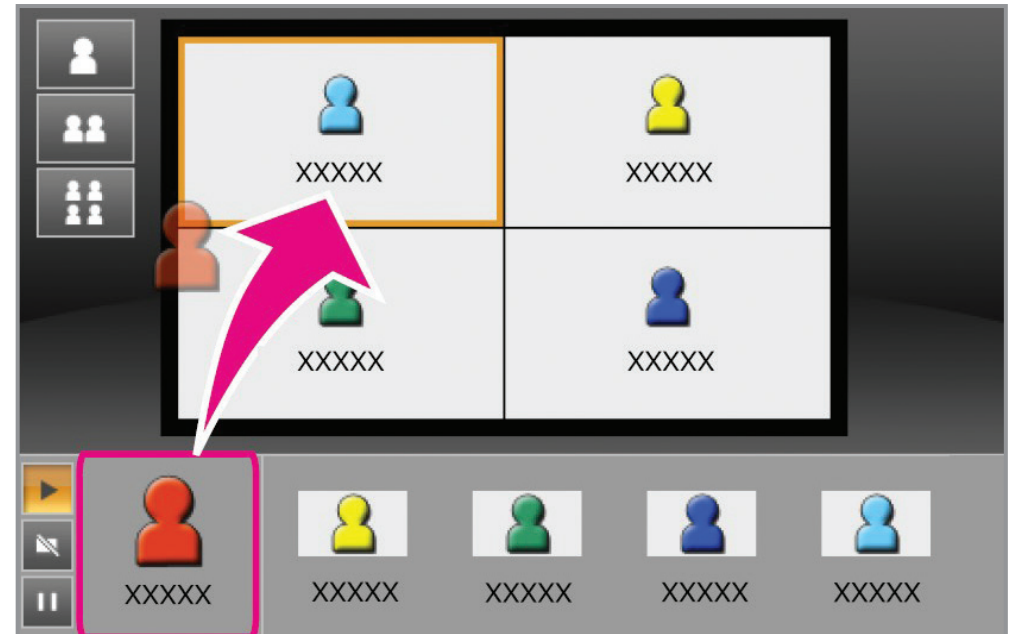

Display and control content from your iPhone, iPad, iPod touch,[®] or Android devices with the Epson iProjection App and any nearby wireless or networked Epson projector. This free application allows road warriors to travel light and present from their mobile devices.

The app is easy to navigate and use with intuitive menu options that make it simple to bring your mobile content to the big screen. Find out how to set up your Epson iProjection App and learn more about your projector and device compatibility. To get started, visit epson.com/projectorapp

Multi-PC Projection

Epson Multi-PC Collaboration utility allows you to display four individual PC screens simultaneously over the network with up to 32 queued to be connected to the same projector. This feature is a great tool for meetings or projects where multiple users will present and share ideas and graphics.

Management and Control Functions

Attach the projector to your LAN via a wired or wireless⁴ connection for remote management and control functions using EasyMP® Monitor software. IT administrators can configure and monitor the status of their Epson networked projectors, including the remote viewing of power status, lamp hours and temperature/filter conditions.

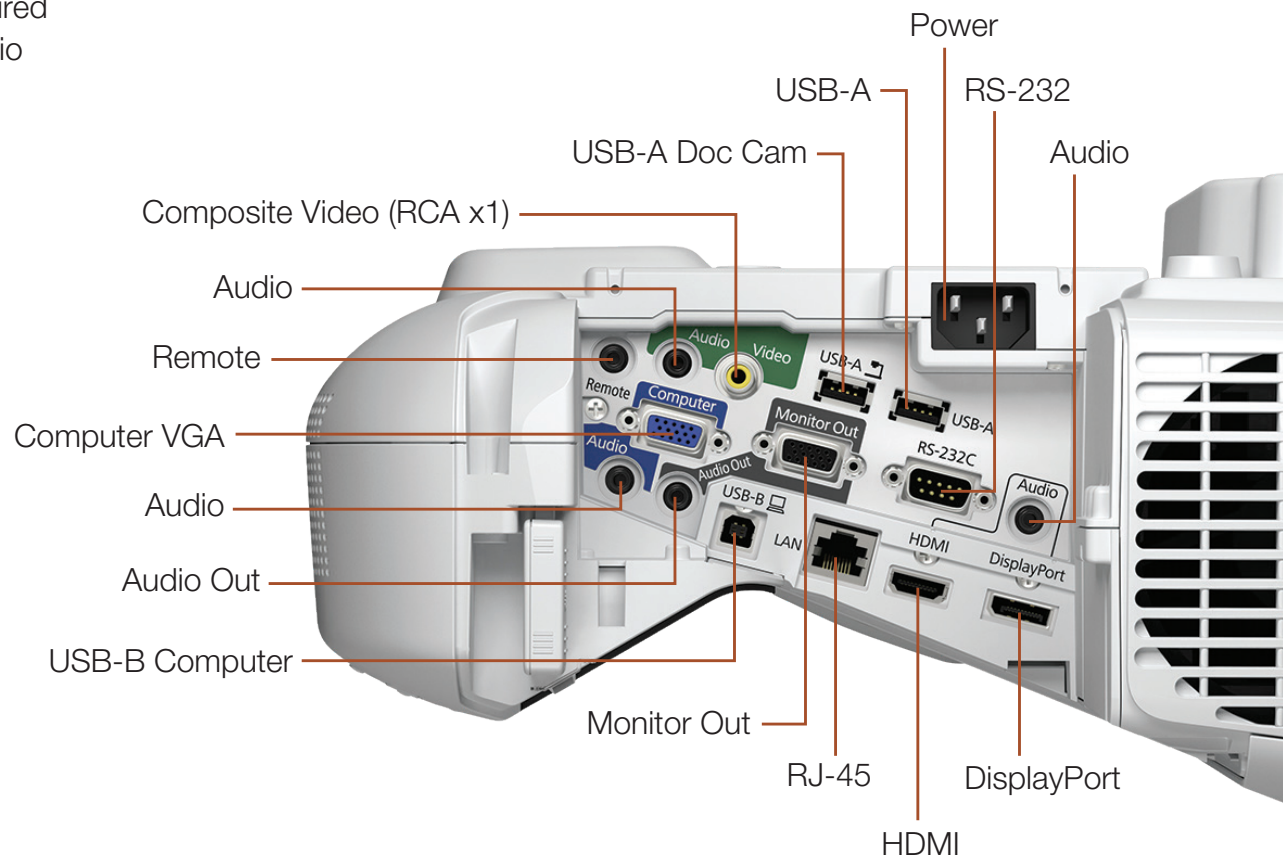

The Schedule function is a convenient way for you to easily control the projector at non-networked venues.

The embedded “clock” inside the projector enables it to do scheduled tasks without having the “network stand-by mode” on. This saves energy, as the projector can be turned off when not in use.

Advanced Connectivity

- Digital connectivity: HDMI and DisplayPort for high-definition digital video and audio
- VGA, Video and USB inputs
- Network connectivity: Attach it to your LAN via a wired or wireless⁴ connection and present visual and audio content over the network, where multiple users can present and share ideas and graphics

Epson Support

The Epson Road Service Program

When you buy an Epson projector, it's backed by one of the most unprecedented product protection plans in the industry. It's called the Epson Road Service Program, and if anything goes wrong with your projector while it's under warranty, we'll send another one via overnight shipping,⁵ absolutely free of charge. Epson projectors are known for reliably delivering impressive image quality, presentation after presentation. We make the best-selling projectors in the world. And with the Epson Road Service Program, they're protected by one of the most impressive programs in the world.

- Replacement product sent via overnight shipping⁵ — shipped Next Business Day to the United States or Canada, free of charge
- We pay the postage both ways — your replacement projector will come with a return shipping label, postage paid
- An extreme level of support — they're the world's best-selling projectors, and they're backed by one of the world's finest customer care programs

3LCD Technology

3x Brighter Colors with Epson⁶

Brilliant image quality requires high color brightness (color light output), and Epson 3LCD projectors have 3x Brighter Colors than leading competitive projectors.⁶

One brightness measurement (lumens) is not enough. A projector's specification needs to show both high color brightness and high white brightness. If color brightness is lower than white brightness, images may be dark, dull and lose detail. If not provided, be sure to ask for a projector's color brightness specification.

EPSON

High color brightness and high white brightness

COMPETITOR

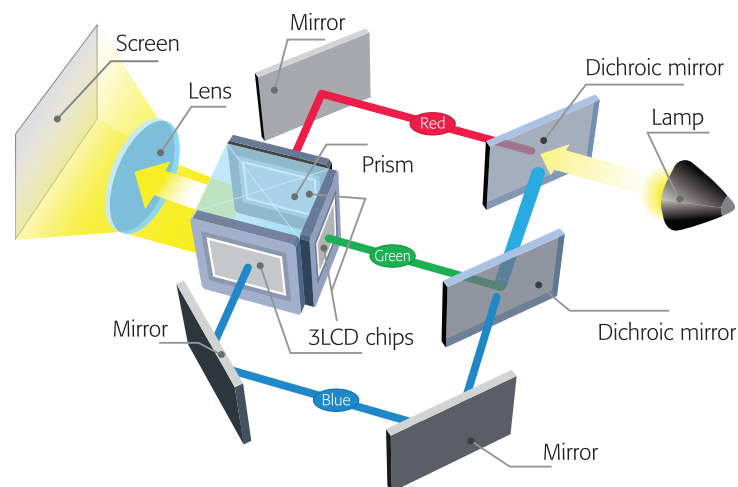

Color brightness significantly lower than white brightness

Actual photographs of projected images from an identical signal source. Price, resolution and white brightness are similar for both projectors (Epson 3LCD and 1-chip DLP competitor). Both projectors are set to their brightest mode.

3LCD — The #1 projection technology in the world

- All 3LCD projectors have both high color brightness and high white brightness
- All 3LCD projectors have 3 chips
- 25% lower power consumption for lower energy costs⁷
- 20 years of road-tested reliability

Long-life lamp that's easy to replace

The BrightLink Pro 1410Wi's high-efficiency lamp lasts up to 3500 hours in Normal Mode and up to 5000 hours in ECO Mode.⁸ It can be replaced quickly and easily, without having to uninstall the projector.

- 1 Consult your user manual for input combinations.
- 2 Interactive Table Mode cannot operate without a table mount specifically designed for this purpose.
- 3 Color brightness (color light output) and white brightness (white light output) will vary depending on usage conditions. Color light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.
- 4 Requires 802.11 network adapter (included).
- 5 Overnight shipping not available in all areas. Road Service orders must be in by 3 p.m. Eastern Time for Next Business Day delivery.
- 6 Compared to leading 1-chip DLP business and education projectors based on NPD data, July 2011 through June 2012. Color brightness (color light output) measured in accordance with IDMS 15.4. Color brightness will vary depending on usage conditions.
- 7 Data source: ProjectorCentral.com, Jan. 2013 Average of 1,128 shipping models for which the manufacturers provided lumens and total power data, all resolutions and brightness levels. Energy efficiency was measured as wattage per lumen. It was measured for both 3LCD and 1-chip projectors in each of five brightness segments. 3LCD projectors averaged less required electricity per lumen in each of the five segments.
- 8 Lamp life will vary depending upon mode selected, environmental conditions and usage. Lamp brightness decreases over time.
