Acer ColorBoost II+ Technology

ColorBoost II+ is an advancement that refines the form of light waves to improve color performance based on lamp spectrum and color-wheel properties. Acer ColorBoost II+ enriches natural color temperature to achieve optical color balance, and enhances content-based color brightness.

Acer ColorSafe II

Acer projectors featuring ColorSafe are virtually immune to color decay, such as the yellow or green tint on images displayed by some projectors that have been used for extended periods of time. Acer projectors take advantage of DLP® technology to guarantee picture integrity despite prolonged use. Extended lifespan and consistent image quality lower total cost of ownership.

DLP 3D Ready

This projector supports DLP 3D glasses for viewing in 3D any 120 Hz frame-sequential 3D content from a PC with a 120 Hz graphics card and 3D stereoscopic player.

Acer EcoProjection

Acer EcoProjection is a complete environment-friendly power management solution that reduces standby power consumption by up to 80%, from 5W to 1W. Also featured in the Acer EcoProjection suite is Acer ePower Management for customized power-saving configurations.
