TWO VERY SPECIAL JOKERS!

TOP FIT IN EVERY PRESENTATION

XGA-RESOLUTION AND 1300 ANSI LUMENS!

Toshiba has dealt fresh cards for exciting presentations. With the MEDIASStars TLP-670 and TLP-671 you will have an ace up your sleeve in every presentation. Make a convincing impression with even more luminous power. With 1300 ANSI lumens in full XGA-resolution for high brilliance and fantastic picture depth you will impress in every round.

Whether top view or 3-D object... The integrated swivelling, folding camera with full XGA-resolution (810,000 pixels) will open up whole new perspectives to your public. Inspire your audience with technical model demonstrations or documents in true-to-life colours.

The weight of the TLP-671 is also worth noting. At only 4.5 kg you can easily win every game. What if you pay even more attention to every gram? No problem! The TLP-670 is at just 3.7 kg one of the smallest projectors in its class. Stuff that ace up your sleeve... The new MEDIASStars from Toshiba.

Project your data directly from your PC, Mac or notebook, or use the projectors's ability to support your presentation with its integrated DVD, video and TV inputs. With our multitalented equipment you can place all your best cards on the table. In this way you can show texts, graphics or even web sites live from the internet in multidimensional form on every wall. Place everything on one card. With the TLP-671 you will have another triumph in your hand.
