VPL-SW600 Series
VPL-SX 600 Series
Ultra Short Throw Projectors

VPL-SW636C  VPL-SW631
VPL-SW631C  VPL-SX631
VPL-SW600/SX600 Series Ultra Short Throw Projectors are ideal for classroom or corporate use, with simple, flexible installation and plenty of interfaces for connection with other devices. Advanced 3LCD BrightEra™ panel technology by Sony and powerful 3,300 lumen brightness improve the visual impact; colors are richer and images are much clearer and show high contrast. With models offering Dual Pen Interactivity, up to two people can write on-screen at the same time. In addition, the VPL-SW636C can be used PC-free, enabling spontaneous interactivity between the presenter and participants. When required, any dual-pen input can be saved to a PC as a readable file. These capabilities ensure presenter satisfaction and boost participant performance. In addition, the extended lamp replacement time of up to 10,000 hours allows for synchronized filter and lamp maintenance, minimizing costs and reducing downtime.
FEATURES

Installation Advantages

Ultra Short Throw Projection

Each projector is equipped with an ultra-short focal length lens, which makes it possible to project images from a very short distance*. The presenter is not distracted by the projected image, and the audience can see the projected image more easily as this feature minimizes the chance of the presenter casting a shadow on the screen.

The VPL-SW600/SX600 Series offers installation flexibility so these projectors are ideal for many different applications.

Fine Lens Shift/Lens Zoom

VPL-SW600/SX600 Series projectors are equipped with an optical zoom and lens shift capability. Using this function, the position of the projected image can be easily adjusted to the desired settings during installation. Very little effort is required to make adjustments after set-up. This greatly reduces the time and hassle of fine-tuning the image position without having to physically move the projector or sacrifice image quality. In addition, these projectors ship with an original wall mounting from Sony which allows adjustment of projector pitch, roll, and yaw.

* Minimum distance of 44 cm with the VPL-SX631
High Image Quality

3LCD BrightEra™ Natural and Vivid Color Images
Thanks to the optical system constantly projecting three basic colors, the projector offers excellent light efficiency and this, ensures colorful and bright images. Sony’s BrightEra panels deliver improved panel light resistance, higher resolution, high brightness, and increased panel reliability. High color reproducibility is important especially when using colorful content, such as materials typically used in classrooms.

![3LCD Projection System Diagram]

Various Picture Modes for Optimal Picture Quality
The projector has six available picture modes for correct picture quality: Dynamic, Standard, Presentation, Blackboard, etc. With six picture modes and three brightness modes, you can select the most suitable picture / brightness combinations (according to your picture source and environment) to, create an optimal image every time.

Dynamic
Emphasizes contrast to produce a dynamic and vivid picture.

Standard
Delivers an image that is natural and well balanced.

Presentation
Provides a bright image, suitable for presentations.

Blackboard
Produces an image suitable for displaying on a blackboard.
Good TCO, Energy-efficient Design

Long-lasting Lamp
By incorporating a high-performance lamp and advanced lamp-control technology, these projectors deliver an extremely long lamp replacement time of 10,000 hours*1.

New Gamma Mode for Rich Colors (Picture Mode: Dynamic)
To realize rich color and clear images in a variety of content, these projectors include a new and improved gamma curve for pictures. There is very obvious improvement in picture color (which is much richer) and in text and images (with high contrast and greater clarity).

• Blank
The VPL-SW600/SX600 Series projectors can temporarily disable video signal output. This function can be easily operated with just the touch of a button on the supplied Remote Commander™ unit. In addition, this function allows blank image projection with low power consumption using lamp control technology.

• Lamp Dimming Function
After 10 seconds of a static signal feed, the lamp dims by approximately 15%. After a configurable set period of time, this function dims the lamp to as low as approximately 30% of original brightness.

Auto Power Saving Function
• Auto Mode (Auto Brightness Adjustment Function)
The brightness of the lamp’s output is automatically adjusted depending on the brightness of the projected image, to avoid unnecessary power consumption. When showing darker images that don’t require high brightness, lamp output decreases.

Lamp and Filter Synchronized Maintenance
The expected lamp maintenance time for each model can reach up to 10,000 hours depending on the selected lamp mode, and dust filters require the same maintenance interval. Synchronizing the timing of lamp and filter maintenance enables users to reduce the numbers of “ladder climbs” for maintenance.

ECO MODE Key
With a single push of the ECO MODE key on either the projector or the supplied Remote Commander unit, users can select an energy-saving setting from the ECO Mode menu.

*1 Approximate recommended period, in low mode.
Ease of Use

Network Presentation (LAN)
When the projector is installed in a LAN, presentations can be projected from any PC and Mac on the network. A tablet or smart phone can be connected at the same time. You can project jpg, pdf, and other supported formats. Up to four users can project PC / Mac images simultaneously, while up to eight*1 users can connect to one projector.

Compatible operating systems: MS Windows, Mac, Android, iOS

Wireless Presentation Software
For Windows® / Mac OS: Projector Station for Network Presentation
For iOS / Android™: VueMagic™*2

Compatible operating systems: MS Windows, Mac, Android, iOS

Remote Control for iPhone/iPad/Android
Projector Remote is a simple remote control application for Sony’s projectors. Networked projectors can be controlled by this remote application, and remote control allows you to operate the projector using simple and easy-to-read buttons.

*1 Up to seven users for wireless.
*2 The application for tablets and smartphones is provided by Pixelworks. For details, please visit the following website: http://PWPresenter.pixelworks.com

USB Display
The projector allows you to display pictures and audio* with one USB cable. You do not need to install any driver for this function. This is a convenient and very easy way to connect to the projector.

* There is a time lag in video and audio. Beyond basic usage, Line-in or HDMI-in is recommended.

Input Label
Input label which appear in the input menu on screen can be customized. This gives users a clear understanding of which equipment is connected.

USB Media Viewer
By attaching a USB memory device to the VPL-SW600/SX600 Series USB connector, users can directly project data files stored on this memory device, without requiring a PC. Supported file formats are JPG, BMP, PNG, TIF, and GIF.
Interactive Function (VPL-SW636C, VPL-SW631C)
The interactive function of the VPL-SW636C and VPL-SW631C allows presentation files to be controlled using an interactive pen. By combining one or two pens and the included IPU2 software, you can write and draw on the presentation screen. Moreover, in the VPL-SW636C’s PC-free interactive mode, you don’t even need a connected PC to control the on-screen presentation, and you can save the data drawn using the projector’s white board function. In addition, you can read data from a PC via USB connection; this means that, class and meeting attendees can spontaneously share their latest information with each other during a presentation. Clearly, this level of instant interactivity can improve class’ performance and ensure high levels of user satisfaction.

Other Features
Closed Captioning
Official teletext broadcasting, developed by the NCI, USA

Network and Control
Controls and monitors projector status
Compatible with various control systems

OPTIONAL ACCESSORIES
